**Hafid Agourram** is a doctoral candidate in the department of Business Administration at the University of Sherbrooke, Quebec, Canada. He is also an assistant professor at Bishop’s University, Quebec, Canada. His research interests focus on national culture and IS implementation and success in multinational organization.

**Alan T. Burns** is an assistant professor at the DePaul University’s School (USA) of Computer Science, Telecommunications and Information Systems, where he teaches information systems and electronic commerce courses. His research interests include knowledge management within the realm of product development and technological solutions that can assist organizational knowledge transfer. He is completing his Ph.D. in MIS from Kent State University. Prior to his Ph.D. work, he worked in an engineering and management capacity in several functional areas of two organizations. He holds an M.B.A. from Kent State University and a B.S. in Mechanical Engineering from General Motors Institute.
Marly Monteiro de Carvalho holds a Production Engineering degree from the Engineering School of São Carlos-University of São Paulo, Brazil. She has an M.Sc. and Ph.D. in Production Engineering from the Federal University of Santa Catarina. Her research interests are project and technology management, quality and business strategies. For several years (1992-2000), she was a researcher for the Technological Research Institute of São Paulo State. Since 1992, she has been an assistant professor of the Department of Production Engineering at the Polytechnic School-University of São Paulo-EPUSP.

Jason F. Cohen is a lecturer in the School of Economic and Business Sciences at the University of the Witwatersrand, Johannesburg, South Africa, where he specializes in teaching strategic information systems management, and e-commerce to both undergraduate and postgraduate students. His research interests include strategic business and strategic IS management with a focus on strategy formulation, strategic planning and business performance. He is currently completing his Ph.D. in the area of information systems strategic planning.

Jakov (Yasha) Crnkovic is an associate professor of Management Science and Information Systems at the School of Business, University at Albany, New York, USA. After receiving his B.S. in Mathematics and Computer Science, he combined it with economics (M.S.) and computer information systems in business (Ph.D.) at the University at Belgrade, Yugoslavia. Before joining the University at Albany, he taught graduate and undergraduate courses at the University at Binghamton, College of Saint Rose, University at Belgrade, Yugoslavia, and University of Miami, Florida. His research is in the areas of decision support systems, management of information technology, system simulation, e-business and networking. He is the author or co-author for more than 10 textbooks and over 60 publications (in Serbian and English).

R. Brent Gallupe is a professor of Information Systems and director of the Centre for Knowledge Enterprises at Queen’s Business School, Queen’s University at Kingston, Canada. His current research interests are in computer support for groups and teams, global information systems, and knowledge management systems. His work has been published in such journals as Management Science, MIS Quarterly, Academy of Management Journal, Sloan Management Review, and the Journal of Applied Psychology. Dr. Gallupe advises both private- and public-sector organizations on the development and use of group support technologies for management teams. His clients include Canada Post, Health Insurance Division, Ontario Provincial Government, and the Canadian Urban Transit Association.

Babita Gupta is an associate professor of Management Information Systems in the School of Business at California State University Monterey Bay, USA. She
obtained her Ph.D. in Business Administration from the University of Georgia. Her research interests are in the areas of electronic commerce, security and privacy, Web-design issues, customer relationship management, consumer behavior and global issues, intelligent agents, and knowledge management and parallel network optimization. Her research work has been published in the *Journal of Industrial Management and Data Systems*, the *Journal of Information Technology Cases and Applications*, the *Journal of Computing and Information Technology* and the *Journal of Scientific and Industrial Research*.

**William K. Holstein** (B.E., RPI, Troy, NY; M.S. and Ph.D., Purdue University, West Lafayette, IN) is currently a D. Hollins Ryan distinguished professor of Business Administration at The College of William and Mary, School of Business Administration, Williamsburg, VA, USA. Prior to that, he was an assistant and then an associate professor at Harvard University, Graduate School of Business, Boston, MA; professor, distinguished service professor and dean at the School of Business, University at Albany-SUNY, Albany, NY; visiting professor at IMEDE, Lausanne, Switzerland; and founding executive director at The Center for Private Enterprise Development in Hungary. Dr. Holstein has extensive consulting and project experience in the U.S., Europe, Southeast Asia, Central and South America and the Caribbean region. He is the author of three books and numerous articles on production planning and control, computer programming, management information systems and decision support systems.

**John Ingham** is a professor in the Faculty of Business Administration at the University of Sherbrooke, Quebec, Canada. He is also the head of the D.B.A. program at the same university. He holds a doctorate in applied economics from Université Catholique de Louvain, Belgium. His current research interests include virtual teams, electronic commerce management, information systems strategic planning and enterprise systems in a global context.

**Lakshmi S. Iyer** is an assistant professor in the Information Systems and Operations Management Department at the University of North Carolina at Greensboro, USA. She obtained her Ph.D. in Business Administration from the University of Georgia. Her research interests are in the areas of electronic commerce, intelligent agents, decision support systems, knowledge management, data mining, and cluster analysis. Her research work has been published in the *Annals of OR, Encyclopedia of ORMS, Decision Support Systems, the Journal of Information Technology and Management*, the *Journal of Scientific & Industrial Research*, the *Journal of Data Warehousing*, and *Industrial Management and Data Systems*.

Kevin Johnston was born in Umtata, Transkei, South Africa in 1953. He obtained a B.Sc. from Rhodes University, a B.Sc. (Hons) from the University of South Africa (UNISA), and an M.Com. from the University of Cape Town (UCT). He is married with two daughters. He also has over 20 years of experience in the IT industry in Southern Africa, working for companies such as De Beers, Liberty Life and BoE. He has spoken at IT conferences in Africa, Europe and the USA. He is currently a senior lecturer in Information Systems at UCT, South Africa.

Rajiv Kishore is an assistant professor of the School of Management at The State University of New York at Buffalo, USA. He received his Ph.D. in Computer Information Systems from Georgia State University. His current research interests include IT outsourcing, adoption of software process and emerging IT innovations, and software process improvement. His papers have appeared or will be appearing in *Information Systems Frontiers* and *Communications of the ACM*. He has consulted in these and related areas with a number of large companies, some of which include BellSouth, Blue Cross Blue Shield of Minnesota, Clearnet Communications (Canada), Dun and Bradstreet Software, IBM, and Pioneer Standard Electronics. He is also the recipient of a multi-year NSF research grant as a co-principal investigator for conducting research in the area of IS outsourcing.

Linda V. Knight is an associate dean of DePaul University’s (USA) School of Computer Science, Telecommunications, and Information Systems. She is also the director of CTI’s Center for the Strategic Application of Emerging Technologies. As co-developer of one of the largest e-commerce degree programs, she teaches and conducts research in the area of e-commerce business strategy, development, and implementation. She is an associate editor of the *Journal of IT Education*, and serves on the editorial review board of the *Information Resources Management Journal*. An entrepreneur and IT consultant, she has held industry positions in IT management and quality assurance management. She holds a Ph.D. in Computer Science from DePaul University.

Fernando José Barbin Laurindo holds a graduate, M.Sc. and Ph.D. degrees in Production Engineering from the Polytechnic School of University of São Paulo, Brazil. He is also a graduate of Law from the University of São Paulo, and created an extension course in Business Administration from the Fundação Getúlio Vargas. His research interests are information technology and business strategies, information technology planning and project management. During the past 15 years, he has worked for companies in the manufacturing, financial and service sectors. Since 1997, he has been an assistant professor of the Department of Production Engineering at the Polytechnic School - University of São Paulo-EPUSP.
Purnendu Mandal is an associate professor of MIS in the Department of Management and Marketing, Lewis College of Business, Marshall University, West Virginia, USA. His current teaching courses include principles of MIS, database management, electronic commerce and strategic MIS. He taught in England, India, Singapore, Australia and the U.S. He published over 100 refereed journal and conference papers. His works appeared in *EJOR, IJPOM, IJQRM, Industrial Management and Data Systems, Intelligent Automation and Soft Computing: An International Journal, Logistics Information Management*, etc. Dr. Mandal serves in a number of professional bodies and currently is on the editorial board of three international journals.

D. C. McDermid has over 10 years practical experience in the IT industry as well as many more years as an academic. His main research interests are in the area of systems modelling and systems thinking, particularly in how they can be applied to capturing information systems specifications. He is also interested in how consultants and other senior IT professionals can assist the discipline in terms of adding value to IT business processes. He holds a bachelor's degree with honours in Computing Science, an M.B.A. from the University of Glasgow, and a Ph.D. in Information Systems from Curtin University of Technology in Australia. He also has links and memberships with several professional bodies.

Andreas L. Opdahl is a professor of Information Systems Development at the Department of Information Science at the University of Bergen in Norway. His research interests include multi-perspective enterprise and IS modelling, IS-architecture management and requirements determination for IS. He is the author, co-author and co-editor of more than 40 journal articles, book chapters, refereed archival conference papers and books. Dr. Opdahl reviews papers for premier journals and serves regularly on the program and organization committees of renowned international conferences and workshops. He is a member of IFIP WG8.1 on Design and Evaluation of Information Systems.

Pauline Ratnasingam is an assistant professor of MIS at the University of Vermont (USA), School of Business Administration. She has lectured on the topics of project management, management of information systems and electronic commerce in Australia, New Zealand, Europe and America. She is an associate member of the Association of Information Systems, and is a member of the Information Resources Management Association and Academy of Management. Her research interests include business risk management, Internet-based business-to-business e-commerce, organizational behaviour, inter-organizational-relationships and trust. She has published several articles related to this area in national and international conferences and refereed journals. She has received a grant from the National Science Foundation to pursue her work on inter-organizational trust in business-to-business e-commerce.

Philip Seltsikas is a lecturer in Business Information Technology at the School of Management, University of Surrey, UK. He manages several research projects in Information Systems including a large European project on ASP. Before joining the University of Surrey, he held posts at Brunel University and at the Aston Business School where he lectured in business policy and strategic management. He holds a B.Sc. (Hons.) in Managerial and Administrative Studies from Aston University, an M.Sc. by research in Business Management from the Aston Business School and a Ph.D. in Management and Information Systems from the same institution. He has worked with senior management at Xerox Ltd. on business process and information management strategy for the Europe, Middle East and Africa region. He has also worked in the City of London on company take-overs and privatisations and as a systems analyst/programmer.

Tamio Shimizu earned his B.S. degree in Mathematics from the University of São Paulo, Brazil. He holds an M.Sc. from the Aeronautical Institute of Technology, São José dos Campos, and a Ph.D. in Production Engineering from the Polytechnic School of the University of São Paulo. His research interests are information technology, intelligent manufacturing systems and decision support systems. During the past several years, he was a professor of the Aeronautical Institute of Technology, São José dos Campos. Currently, he is a full professor and the current head of the Department of Production Engineering at the Polytechnic School-University of São Paulo-EPUSP.

Bongsik Shin is an associate professor at the Department of Information and Decision Systems at San Diego State University, USA. He earned a Ph.D. from the University of Arizona. His work has been published or accepted in Communications of the ACM, IEEE Transactions on Systems, Man, and Cybernetics, IEEE Transaction on Engineering Management, the Journal of Data Warehousing, the Journal of Organizational Computing and Electronic
Theresa A. Steinbach is an instructor at the DePaul University’s School of Computer Science (USA), Telecommunications and Information Systems, and associate director of the CTI’s Center for the Strategic Application of Emerging Technologies. She teaches Web-based scripting as well as teaching and conducting research in traditional and e-commerce systems analysis and design. Ms. Steinbach is the founder of the student-led DePaul Chapter of the Association for Computing Machinery-Women as well as its faculty sponsor. As owner of an IT consulting firm, she provided turnkey solutions for small- and medium-size enterprises. Ms. Steinbach is completing her Ph.D. in Computer Science from DePaul University. She holds a B.A. in Mathematics, an M.B.A in Quantitative Economics, and an M.S. in Information Systems from DePaul University.

Felix B. Tan serves as the editor-in-chief of the *Journal of Global Information Management*. He is also the vice president of Research for the Information Resources Management Association and the editor of the ISWorld Net’s EndNote Resources page. Dr. Tan’s current research interests are in electronic commerce, business-IT alignment, global IT, management of IT, cognitive mapping and narrative methodologies. His research has been published in *MIS Quarterly, Journal of Global Information Management, Journal of Information Technology* as well as other journals and refereed conference proceedings. Dr. Tan has over 20 years experience in IT management and consulting with large multinationals, as well as university teaching and research in Singapore, Canada and New Zealand. Dr. Tan is from The University of Auckland, New Zealand.

D. E. Sofiane Tebboune is a doctoral student at the Department of Information Systems and Computing, Brunel University, UK. He is also a member of the Centre for Strategic Information Systems (CSIS) at Brunel University. Mr. Tebboune holds an M.A. in Information Systems Management, and researches the area of IS Outsourcing, and collaborative strategies in the context of Application Service Provision. He has previously been involved in research on e-procurement and supply chain management.

Qiang Tu is an assistant professor of Management Information Systems at the College of Business of Rochester Institute of Technology, USA. He received his bachelor’s degree in Management Engineering and a master’s degree in Systems Engineering from Jiaotong University, China. He holds a Ph.D. from the College of Business Administration of University of Toledo. He has published in

**Wei Wang** is a senior systems analyst and a data warehouse specialist at the Information Technology Services Department of Rochester Institute of Technology, USA. She holds a master’s degree in Systems Engineering from Nanjing University of Science and Technology, China and an M.Sc. in Information Systems and Manufacturing Management from the University of Toledo. She has many years of IT consulting and training experience. She was a senior consultant with Keane Inc., one of the nation’s top IT consulting firms. She has worked with a number of large manufacturing companies on their IT implementation projects, such as Champion International Paper and Maidenform Inc. Her current research interests include ERP implementation, data warehousing and business decision support systems.

**James D. White** is an instructor at the DePaul University’s School of Computer Science (USA), Telecommunications and Information Systems. He teaches undergraduate and graduate Information Systems courses as well as conducts research in the strategic use of applications, and systems analysis and design. Prior to joining DePaul, Mr. White held the position of Vice President – Information Systems for the Chicago Board of Trade. He received a B.A. in Psychology from Northwestern University, an M.B.A. from the Dominican University and is completing his Ph.D. in Computer Science at DePaul University.
