About the Contributors

Latif Al-Hakim lectures in management in the Faculty of Business at the University of Southern Queensland, Australia. His experience spans industry, research and development, and academic institutions. Latif was awarded his undergraduate degree in 1968. His master’s (1978) and PhD (1983) were awarded by the University of Wales (UK). Dr. Hakim has published extensively in industrial engineering, information management, and systems modelling. He is the author and editor of seven books, more than 10 chapters in books, and more than 75 papers in various journals and conference proceedings. He is the editor-in-chief of International Journal of Information Quality and Associate Editor International Journal of Networking and Virtual Organisations. Latif has also conducted international technology transfer seminars and consulted to a number of major industrial organisations in Australia.

Massimo Memmola is a researcher in the Department of Business Administration, Faculty of Economy, Catholic University of Milan, and a researcher of the Centre for Research and Studies in Healthcare Management (Ce.Ri.S.Ma.S.) and holds the same role at the Association for Managerial and Business Studies (ASAM) in the same University. He teaches courses in planning and control, management accounting, financial analysis, performance measurement, and Internet strategy. He is involved in several research projects in the area of the development of managerial practices in large and small companies and healthcare organizations. He is member of the editorial board of the International Journal of Healthcare Delivery Reform Initiatives (JHDRI). He graduated from Catholic University in 1999, and received a PhD in business administration from Catholic University in 2003.

Abdu Ali Albur graduated from King Fahad University of Petroleum and Minerals, in Dahran Saudi Arabia with a bachelor’s of science degree in physics and from the University of Maryland University College with a master’s degree in e-commerce. He has worked as an educational supervisor for 5 years in Saudi Arabia and for 4 years in Bahrain building his expertise in e-trading and computer programming. He is currently the IT manager at the Ministry of Education in the Kingdom of Saudi Arabia, Dhahran, Eastern Province.

Fernando Alonso received a BEng in industrial engineering in 1970 and a BSc in computing in 1972, both from Universidad Politécnica de Madrid (UPM), Spain. Alonso earned his PhD in computing from the UPM in 1985, and his PhD dissertation merited the distinction of a university prize. Alonso’s major field of study is software development in the fields of software engineering and knowledge engineering.
and e-learning. He is a full professor of computing at the UPM’s School of Computer Science, where he has worked as a full-time professor and researcher since 1989. He is also the R&D Director of the Centre of Computing and Communications Technology Transfer (CETTICO), and leads the Information and Communications Technology Research Group at the UPM. He has authored or co-authored 15 books on programming and software engineering and over 60 papers published in journals and international conferences.

**Giovanna Castellano** is an assistant professor at the Computer Science Department, University of Bari, Italy. She received a PhD from the Computer Science Department at the same University in 2001. Her teaching experience includes computer architectures and multimedia publishing. Her research interests embrace artificial neural networks, fuzzy systems, knowledge-based neurocomputing, granular computing systems, metalearning systems, computational intelligence for Web personalization, with special emphasis on neuro-fuzzy modeling. Within these research areas, she is author of more than 100 papers published in scientific journals and international conference proceedings. Her e-mail address is <castellano@di.uniba.it>

**Lei Chen** received his PhD in computer science and software engineering from the Auburn University in 2007. He is currently an assistant professor in the Department of Computer Science at the Sam Houston State University. His research interests include wireless routing, wireless communications, QoS, and Multimedia.

**Kieran Conboy** is a lecturer in information systems at NUI Galway, Ireland. His doctoral research focused on agile methods for systems development as well as agility across other disciplines. Kieran’s other research interests include systems analysis and management accounting in systems development projects and he is currently leading a €600,000 project in the area. Some of his research has been published in various journals and conferences such as the European Journal of Information Systems, the International Conference in Information Systems (ICIS), the European Conference in Information Systems (ECIS), IFIP 8.6, and the XP200n conference series. Kieran is also the program chair for the European Conference in Information Systems to be held in Galway from June 9-11, 2008, and the program chair for the XP and Agile Development Conference to be held in Limerick from June 10-14, 2008.

**Anna Maria Fanelli** is a full professor at the Computer Science Department, University of Bari, Italy. Currently, she is involved in teaching computer architecture and computational intelligence methodologies courses for the Computer Science Curriculum. Her scientific activity concerns knowledge-based neurocomputing paradigm, neuro-fuzzy systems, granular computing, and computational Web intelligence. She has published more than 150 papers on the previous topics. She is the director of the PhD School in Informatics. She is Senior Member of the IEEE Computational Intelligence Society and the IEEE System, Man, and Cybernetics Society. She is also member of the INNS (International Neural Network Society), the EUSFLAT (European Society for Fuzzy Logic and Technologies), and the AI*IA (Italian Association for Artificial Intelligence). Her e-mail address is <fanelli@di.uniba.it>

**George Feuerlicht** is the director of MSc programs at the Faculty of Information Technology, University of Technology, Sydney, Australia. George has published over 60 conference and journal papers on a range of topics in information technology and computer science. George focuses on industry-rele-
About the Contributors

relevant research problems and is the author of a number of recent publications on the topic of design of service-oriented applications. George has achieved international recognition in the area of design of service-oriented applications through his contributions to leading international conferences and chairing workshops. George holds a PhD from the Imperial College, London University, UK.

**Maria Alice Frontini** holds a MSc degree in management of technology from Massachusetts Institute of Technology, Boston. She has a graduation degree in production engineering from Polytechnic School of University of São Paulo, Brazil, of which she is a PhD candidate. Her research interests are in business strategy, technology innovation, and information technology. In the past 12 years she has working in strategic consulting in telecommunications, financial services, and retail with a focus on management of technology.

**Chiara Frigerio** is researcher of organization science and information systems management at Università Cattolica in Milan, where she is responsible of some of research activities of CeTIF (research centre on innovation and management for financial institutions). She got a PhD in information systems at LUISS University in Rome. She wrote some articles on the role of information and communication technology on the organisational mechanisms, in particular on work process and structures. At the moment she is involved also in some European project on the role of collaboration in change management practices. She teaches organization design and information systems at the same university.

**Luigi Geppert** spent 3 years at the Mathematics Department of Milan Polytechnic, involved in applied research activities, after earning the university degree on Theoretical Physics (1982) at University of Milan. In 1985 he founded an information technology (IT) consulting company realizing software platforms for manufacturing applications. At the end of 80s he joined as a senior partner at Efeso Srl, a management consulting company focused on vertical applications for internal and external logistics. He became CEO of the IT business unit deploying reengineering (BPR) and business process improvement (BPI) projects for ERP and logistics applications. In 1995, he founded his own management consulting company, Minerva Consulting, focused on IT system for BPR and BPI. Since the early 90s he has been using systems thinking and system dynamics approach and tools to accomplish his modeling activities. By using these competencies, he has worked as an acting senior consultant, especially for important enterprises in manufacturing and banking, national wide and international wide. He is also professor of system dynamics for strategy at the Catholic University of Milano at the department of Enterprise Management.

**Svenja Hagenhoff** has been an assistant professor at the Institute of Information Systems, University of Goettingen since 2002. She finished her doctoral thesis in information systems in 2001. In 2008, she finished her state doctorate (habilitation) and passed the postdoctoral lecture qualification in management and information systems. She was visiting researcher at the University of California Los Angeles, and interim professor at the University of Hildesheim, Germany. At the University of Luebeck, Germany, she was guest lecturer. She holds a master in management from the University of Goettingen, Germany. Svenja Hagenhoff has research experience in the field of Internet economics and information markets, e-learning, knowledge management and innovation management, and service-oriented architectures.
Kevin K.W. Ho is working on his doctorate in information systems at the School of Business and Management of the Hong Kong University of Science and Technology (HKUST). He obtained his BSc (Hons.) and MPhil in chemistry and MSc in information systems management from local universities and an MA in managerial economics from the University of Oklahoma. Kevin is now working in the Hong Kong Police Force as an executive officer. His research interests include electronic auction, information systems strategy, and electronic government. He has published in the Journal of E-Government, Journal of Global Information Management, and the International Journal of Cases on Electronic Commerce.

Wen-Chen Hu received a BE, an ME, an MS, and a PhD all in computer science from the Tamkang University, Taiwan, National Central University, Taiwan, University of Iowa, Iowa City, and University of Florida, Gainesville in 1984, 1986, 1993, and 1998, respectively. He is currently an assistant professor in the Department of Computer Science at the University of North Dakota. Dr. Hu has published over 60 articles on refereed journals, conferences, and books. His current research interests are in handheld computing, electronic and mobile commerce systems, Web technologies, and databases.

Pankaj Kamthan has been teaching in academia and industry for several years. He has also been a technical editor for books, a member of the editorial board of journals, a member of the program committee of conferences, and participated in standards development. His research interests include software quality, markup languages, and knowledge representation.

Christian Kaspar is a consultant at Cap Gemini Consulting since 2007. He worked at his doctoral thesis at the University of Goettingen at the Institute of Information Systems between 2003 and 2006. After finishing his thesis, he was a visiting scholar at the Centre of Digital Enterprise at the University of Auckland, New Zealand. He holds a master in management from University of Munich, Germany. Christian Kaspar has experience in the fields of publishing industry, information markets, and telecommunication industry.

Orla Kirwan is currently completing her PhD at NUI Galway, Ireland. Her research is in the area of the implementation of energy management information systems. She is funded by the Irish Research Council for Science, Engineering and Technology (IRCSET) through the Embark Initiative. She has also completed a B. Comm degree, a higher diploma in research methods and a master’s in e-commerce at NUI Galway. She has presented her research at several international conferences and the research presented here is from her master’s degree.

Fernando José Barbin Laurindo holds graduation, MSc and PhD degrees in production engineering from Polytechnic School of University of São Paulo, Brazil. He has a graduation degree in law from the University of São Paulo and graduated in an extension course in business administration from Fundação Getúlio Vargas. His research interests are information technology and business strategies, information technology planning, and project management. For 15 years, he had worked in companies of the manufacturing, financial, and service sectors. He is an associate professor of the Production Engineering Department at Polytechnic School - University of São Paulo - EPUSP, where he has worked since 1997.
**About the Contributors**

**Susan Leferink** is a resident of Montana. She graduated from Montana State University in business management/marketing and has established a broad based career through both private and public sector customer service-oriented work environments. She currently works as a computer support specialist for Montana’s Department of Commerce (networking, database administration, web development, and computer training). She is scheduled to graduate with a master’s degree in e-commerce from the University of Maryland University College in Spring 2008.

**David Lizcano** holds a MSc degree with honors in computer science (2006) from the Universidad Politécnica de Madrid. He is a PhD student at the Universidad Politécnica de Madrid's Department of Computer Science, and holds a research grant from the UPM and the European Social Fund under their Research Personnel Training program. He is working as a research associate and PhD candidate at the Computer Networks and Web Technologies Lab (CoNWeT Lab, Universidad Politécnica de Madrid), where he is currently involved in several national and European funded projects relating to Web 2.0 and Enterprise 2.0 technologies and service-oriented architectures (SOA).

**Genoveva López** holds a MSc and PhD in computer science from the Universidad Politécnica de Madrid. She is now an associate professor of the UPM working with the Department of Computer Languages and Systems and Software Engineering at the UPM’s School of Computing. She is a researcher of the Information and Communication Technologies Research Group, focusing on distributed systems development, and Web services and technologies. As a member of this research group, she has participated in 22 publicly funded R&D projects, and has coauthored over 25 publications or scientific documents, 16 papers at congresses, and 10 books on these areas.

**Thomas Lyle** was born and raised in Philadelphia, Pennsylvania and currently resides in its western suburbs. He received his BS in computer science from The Pennsylvania State University in 1973 and has spent the last 30 plus years working in the private sector. He began working for his current employer, PNC, in the mutual fund services division, as a Systems Architect and Product Development Manager primarily focused on migrating mainframe legacy software packages to client server personal computer software packages initially and then eventually to Internet and e-commerce software packages. Since earning his BS, he has been continually learning new technologies from training provided both internally and externally outside of the university system as university curriculums were playing catch-up with industry. He enrolled in the ECOM/MBA dual degree program mainly because of its online capabilities and because it allows him to spend equal amounts of time on business management tasks as well as technical development tasks.

**B. Dawn Medlin** is currently serving as an interim chair and associate professor in the Department of Computer Information Systems in the John A. Walker College of Business at Appalachian State University in Boone, North Carolina. She earned her doctorate at Virginia Polytechnic Institute and State University. Her teaching and research activities have been in the area of information technology, specifically in security and privacy issues related to healthcare institutions and retailing organizations. Dr. Medlin’s research articles have appeared in journals such as the Information Systems Security: The (ISC)2 Journal and the Journal of Information Privacy and Security, Int. J. Information Technology Management, Journal of Computer Information Systems, Int. Journal of Management, among other refereed journals.
Sílvia Novaes Zilber is a PhD in business administration. She is an electronic engineer with a degree from “Escola Politécnica da USP” (POLI/ USP), with masters and doctors degrees in business administration from FEA/ USP, São Paulo, Brazil. She has published many papers in journals, such as Journal of Technology Management & Innovation and International Journal of Automotive Technology and Management (IJATM). She participated of many international conferences as author, including EUROMA, Academy of Management, IAMOT, ALTEC, and BALAS. She is a researcher and advisor in the areas of e-business, the automotive industry, and strategies for innovation.

Björn Ortelbach works at Henkel as an IT controller. He finished his doctoral thesis in 2007 at the Institute of Information Systems, University of Goettingen. He holds a master in business information systems from the University of Goettingen. Björn Ortelbach has experience in the fields of information markets, publishing industry, and controlling.

Bernhard Ostheimer is postdoctoral research fellow at the University of Giessen, Germany. His current research interests include distributing e-business systems, e-university and e-campus systems, e-learning, and Web content management.

Hsueh-Ieng Pai is a research assistant and a doctoral candidate at Concordia University, Canada. Her research interests include knowledge representation and management, uncertainty reasoning on the Semantic Web, and query optimization.

Giovanna Palumbo received the Sociologist Degree at Universidad Católica Andrés Bello, Caracas in 1974, the MBA Degree at Instituto de Estudios Superiores de Administración (IESA), Caracas in 1989, and the master degree on international health care management, economics, and policy at Università Luigi Bocconi, Milano, 2001. Since 2005 she has been project leader of the “Digital Hospital Project” which is being developed at Ospedale Valduce, Centro Riabilitazione Villa Beretta, Lecco. Before arriving to Italy in 2001, she had been general manager of the Center for Managerial Development at IESA, Caracas, and researcher/faculty/consultant at the same institute. From 1989 to 1992 she had been consultant/faculty of the training program on Health Service Management for the Regional Program on Mother-Child Health, at Pan American Health Organization/World Health Organization (PAHO/WHO), Washington/Sao Paulo.

Krassie Petrova is currently a senior research lecturer at the School of Computing and Mathematical Sciences in the faculty of Design and Creative Technologies, Auckland University of Technology (New Zealand). Krassie is serving (since 2004) as Postgraduate Programme Leader at the School, and (since 2003) as editor of the New Zealand-based open access journal Bulletin of Applied Computing and Information Technology. She earned her MSc and postgraduate diplomas at the University of Sofia (MSc) and the University of Auckland. Her teaching, postgraduate supervision, and research activities have been in the discipline areas of information systems and technology, and in curriculum development (e-business, net-centric computing and information security). In the last 10 years, Krassie has published a number of works in research journals, edited books, and refereed conference proceedings (e- and m-Learning, skill and a capability development, mobile business applications).
Stephen Proctor is a director for Computer Sciences Corporation (CSC) located in suburban Washington, DC. He has been in the IT field for many years supporting infrastructure initiatives in commercial and government markets. He currently leads an incredible team providing infrastructure engineering and operations to the US government. He is scheduled to graduate with a master’s degree in e-commerce from the University of Maryland University College in summer 2008.

Mahesh S. Raisinghani is an associate professor in the Executive MBA program at the TWU School of Management. He is a certified e-commerce consultant (CEC) and a project management professional (PMP). Dr. Raisinghani was the 2007 G. Ann Uhlir Fellow in Higher Education Administration. He also received: the TWU School of Management’s 2005 Best Professor Award for the Most Innovative Teaching Methods; 2002 research award; 2001 King/Haggar Award for excellence in teaching, research and service; and a 1999 UD-GSM Presidential Award. His research has been published in several academic journals such as IEEE Transactions on Engineering Management, Information & Management, Journal of IT Review, Journal of Global IT Management among others, and international/national conferences. Dr. Raisinghani is included in the millennium edition of Who’s Who in the World, Who’s Who among Professionals, Who’s Who among America’s Teachers, and Who’s Who in Information Technology.

Marcos Reyes holds a MSc degree in computer science from the Universidad Politécnica de Madrid (UPM). Marcos has been with Telefónica I + D since 2000, where he has been involved in several R&D projects related to identity management and business process management systems applied to workforce management and trouble-ticketing systems. In 2005, Marcos was promoted to chief architect and designer of Telefónica I + D’s SmartFlow Platform and Enterprise 2.0 projects, applying Web 2.0 concepts to enterprise systems within the Morfeo Open Source (www.morfeo-project.com) community set up by Telefónica I + D. Also, Marcos coordinates several community organizational matters.

Mauro Rossini received the degree in electronics engineering with a specialization in bioengineering from Politecnico di Milano in 1998. He is researcher and consultant for Gait & Movement Analysis Laboratory at Valduce Hospital - Villa Beretta Rehabilitation Center since 1995. Since 2004 he has been responsible for several projects developed inside the HINT@Lecco (Health Innovation Network Technology at Lecco) research network. His main research areas concern gait and movement analysis, robotic rehabilitation, telemedicine, medical informatics in particular for electronic medical record, and introduction of high level technologies in rehabilitation field. The main current projects where he is technical project leader are “Introduction of Electronic Medical Record in a Rehabilitation Hospital” and “Telemedicine to follow up patient at home.”

Lutz Seidenfaden is an assistant to a member of the Board of Festo Corporation. He finished his doctoral thesis in 2007 at the Institute of Information Systems, University of Goettingen. He holds a master’s in business information systems from the University of Goettingen. Lutz Seidenfaden has experience in the fields of P2P services and architectures, information markets, and publishing industry.

Javier Soriano holds a MSc in computing (1998) and a PhD in computer science (2003) from Universidad Politécnica de Madrid (UPM). He is an associate professor at the UPM’s School of Computer Science, Spain, where he teaches both undergraduate and postgraduate courses on computer networks, distributed systems, and emergent Web technologies. He leads the Computer Networks and Web Tech-
Axel C. Schwickert is full professor of business administration and information management at the University of Giessen, Germany. His current research interests include engineering, management and operation of Web portals, Web applications and Web site farms, electronic university and e-learning, IT management, as well as IT compliance.

Maria Alessandra Torsello is a PhD student at the Computer Science Department, University of Bari, Italy. She got the degree at the University of Bari in 2004. She presented the degree thesis concerning the recognition of static postures for the human motion analysis. She was interested in the investigation of computational intelligence techniques for the development of self-adaptive learning systems. Her current research activity concerns the design of Web personalization systems by the application of soft computing methodologies, with particular reference to the neuro-fuzzy strategy. Her e-mail address is <torsello@di.uniba.it>

Alessandra Tzannis has a PhD in “marketing strategies for enterprise,” XX cycle at the University of Bergamo, with a thesis entitled “SMEs’ Internationalization Processes and Cultural Dynamics.”

She graduated from the Catholic University of Milan in foreign languages and literature (French-English), addressed “tourism management,” and she attended the advanced course “marketing management online” as well. She teaches in modules, tutorials, and masters degree in marketing organized by the same University (locations: Brescia and Milan). She is focused on topics related to the internationalization of small and medium enterprises and the impact of cultural dynamics on the development processes across borders, working on research projects among different universities. Her research areas include international marketing, intercultural marketing, internet marketing, Web strategy, and business-to-business. She has collaborated with Centrimark since 2003. She worked for contributions translations from English into Italian and drafting the index of the Manuale di Management nell’economia digitale by W.G. Scott, M. Stecco, and M. Murtula published by Il Sole 24 Ore, in October 2003.

Jiri Vorisek is a professor and head of the Department of Information Technologies at the University of Economics, Prague and adjunct professor at the Pfeiffer University, Charlotte, North Carolina. He is founder and the president of the Czech Association for Systems Integration, and CEO of consulting company ITG Ltd. He received his PhD in management information systems from the University of Economics, Prague. He specializes in strategic management of information systems, systems integration, outsourcing, and methodologies of IS design and implementation. He is author or coauthor of seven books and dozens of textbooks, articles, and conference papers. He is founder of the systems integration international conferences.
Chyuan-Huei Thomas Yang received an MS in computer science from the New Jersey Institute of Technology in 1991 and a PhD in computer science from the National Tsing Hua University, Taiwan in 2005. He is currently an assistant professor in the Department of Computer Science at the Hsuan Chuang University, Taiwan. His research interests include computer vision, information security, and databases.

Vincent Yen is a professor of management information systems in the Department of Information Systems and Operations Management, Raj Soin College of Business, Wright State University, Dayton, Ohio. He has been teaching a variety of information systems courses since 1988. His research interest in recent years is in methodologies for analysis and design of business processes while keeping abreast with professional and software industry developments. Some of his recent articles reflecting this interest and have appeared in refereed journals and proceedings are titled: “A Node-Centric Analysis of Metagraphs and Its Applications to Workflow Models”; “Web Services and Workflow Modeling”; and “An Integrated Model for Business Process Measurement”. He is on the editorial review board of Journal of Organization and End User Computing and Annals of Cases on Information Technology.

Yanjun Zuo received an MS and a PhD in computer science from the University of Arkansas in 2003 and 2005, respectively. He is currently an assistant professor in the Department of Information Systems and Business Education at the University of North Dakota. His research interests include information and computer security, trustworthy computing, and database security.
