About the Contributors

Hajime Eto, Ph.D., is a professor emeritus, the University of Tsukuba, Tsukuba Science City, Japan, where he taught policy science. Since the student days with the University of Tokyo, he has been interested in the methodology of sciences such as logic and the philosophy of science, particularly in the methodologies of new interdisciplinary sciences such as computer language, operational research, policy science, innovation analysis, and now e-tourism. He has served international scientific circles by publishing over 70 papers in various scientific journals as well as several books. He is serving several international journals as the editorial board member such as International Journal of Services Technology and Management (Inderscience), International Journal of Foresight and Innovation Policy (Inderscience), Scientometrics (Kluwer-Springer), and Information and Management (Elsevier). His current interest is in the methodological transfer between natural and social sciences, humanities, and technology.

Suvojit Acharjee is currently working as an Asst. Professor in Dept. of ECE, National Institute of Technology, India. He completed his M. Tech from Department of Electronics of Tele-Communication, Jadavpur University, West Bengal, India and B. Tech from Future Institute of Engineering and Management, Sonarpur, West Bengal, India. He has around 25 research papers published in various International Journal and conferences. His research domain is Motion vector and video compression.

Geoffrey Adjaison has finished his taught courses in MBA Human Resource from the IGNOU University, New Delhi under the Pan- African Education programme initiated jointly by the Government of India and the African Union. He has worked at the University Relations Office at the Kwame Nkrumah University of Science & Technology in Ghana. He is currently a lecturer (Adjunct Faculty) at the Business Development Centre, Central University College, Accra Ghana as well as the Lead Consultant of Bureau for Research and Development, Ghana. He is a leading experts in the Management of Development Programmes and Projects and has worked on a number of projects in Ghana. He writes, presents and consults on issues of human resource policies and practices, education, Community Development/project management and CSR.

Elisa Alén-González is an Associate Professor of Marketing in the Faculty of Business Sciences and Tourism at University of Vigo (Spain). She holds PhD and BSc degree in Business Administration from University of Vigo and UNED. Her teaching and research interests focus on the areas of tourism marketing, tourist behavior, e-tourism, motivation, behavioral intentions, including different types of tourism,
mainly thermal, accessible and senior tourism. She has published in internationally recognized journals such as Current Issues in Tourism, Journal of Hospitality, Leisure, Sport & Tourism Education or Journal of Business Research. She has also presented papers at key national and international conferences.

**George Amoako** is a Senior Lecturer and Head of department at the Marketing Department of Central Business School, Central University College in Accra Ghana, an academic and a practising Chartered Marketer (CIM-UK) with specialisation in Branding, CSR and Strategic Marketing. He was educated in Kwame Nkrumah University of Science and Technology in Kumasi Ghana and at the University of Ghana and the London School of Marketing (UK). He is currently reading his PhD at London Metropolitan University UK. He has considerable research, publication, teaching, consulting and practice experience in the application of marketing theory and principles to everyday marketing challenges and management and organisational issues.

**Fredrick Asamoah** is head of department at Management Department of Central Business School at Central University College in Accra Ghana. He is a qualified and practicing lawyer and an academic. Frederick is passionate about students welfare and progress.

**Sukanya Banarjee** is an M. Tech Scholar in Department of CSE, JIS College of Engineering and Technology, Kalyani, Nadia. She completed her B. Tech from M.C.E.T, Murshidabad, West Bengal. She has two research papers in international journals and conference. She is currently working on medical image processing and watermarking.

**Tomas Cahlik** received his degree in Economics from the University of Economics in Prague in 1979, where he completed his CSc. (equivalent of PhD.) in 1984. From 1979 to 1984 he worked as Assistant Professor at the Department of Econometrics of this University. From 1985 to 1992 he worked at the Institute of Computer and Information Science, Czechoslovak Academy of Sciences (CAS), where he headed the Department of Information Systems. In 1993, he became the Director of the Institute of Information Systems of the CAS. In 1994, he joined the Institute of Economic Studies at Charles University- Faculty of Social Sciences where he nowadays teaches “Ethics and Economics” and “Comparative Economics”. Since 2011, he teaches part-time “Econometrics” at the University of Economics in Prague. The main area of his expertise is comparative economics, economic development and growth and analysis of research and development activities. He has had lectures about different economic topics at Cornell University, University of Arizona, Schevtschenko University in Kyiv, University of Cairo, University of Pretoria and University of Cape Town, Waseda University, Doshisha University and Chuo University (Japan), East China Normal University and Fudan University in Shanghai (among others).

**Sayan Chakraborty** is currently working as an Asst. Professor in Dept. of CSE, Bengal College of Engg. & Tech, Durgapur, India. He completed his M. Tech and B. Tech from Dept. of CSE, JIS College of Engineering, Kalyani, West Bengal, India. He has around 28 research papers in various international journals and conferences. Biomedical image processing, watermarking and meta-heuristics are the key-areas which he is currently working on.

**Chii-Ching Chen** graduated from National Chengchi University, Taipei, and received his Ph.D. degree in National Development in June 1998. He is now an associate professor at the Department of
About the Contributors

Public Affairs and Management of Kainan University, Taiwan. His fields of specialization include public policy research, public service management, and issues relevant to globalization research. His numerous publications have focused on the analysis of globalization and localization development, performance management of public services, and cultural issues in medical tourism research.

**Bikash Ranjan Debata** is a Post-Doctoral Fellow at the Faculty of Business Administration, University of Macao, Macao SAR, China. He has four years of rich corporate experience and eight years of experience in teaching. He has completed his Ph.D. from National Institute of Technology, Rourkela, India. His area of interest includes service quality management, medical tourism, cross culture marketing communication, and tourism impact. He has published more than twenty research papers in various international and national conferences and journals.

**Pablo de Carlos** is an Assistant Professor in the Department of Business Management and Marketing at the University of Vigo (Spain), where he graduated and received his Ph.D. degree in Economics. He is involved in teaching at degree and master level at the Faculty of Business Sciences and Tourism of Ourense. His research interests include several topics related to sports and tourism economics, with particular focus on efficiency analysis, and E-tourism. He has published his work in high-impact journals like Current Issues in Tourism or Journal of Hospitality, Leisure, Sport & Tourism Education and has presented papers in national and international conferences. He has also reviewed several journal articles relating to tourism economics.

**Nilanjan Dey** is an Asst. Professor in the Department of Computer Science in Bengal College of Engineering and Technology, Durgapur, West Bengal, India. He is a PhD scholar of Jadavpur University, Electronics & Telecommunication Engineering Department, Kolkata, India and also holds an honorary position of Visiting Scientist at Global Biomedical Technologies Inc., CA, USA. He is a Research Scientist at Laboratory of Applied Mathematical Modeling in Human Physiology (LAMMHP), Territorial Organization Of- Scientific And Engineering Unions, Bulgaria. He is the Managing Editor of International Journal of Image Mining (IJIM), Inderscience (ISSN 2055-6039) and is the Regional Editor Asia of International Journal of Intelligent Engineering Informatics (IJIEI), Inderscience (ISSN 1758-8723). He is in the field of education since 2005 which includes 1.5 years of industrial experience. His research interests include: Medical Imaging, Soft computing, Data mining, Machine learning, Rough set, Mathematical Modeling and Computer Simulation, Modeling of Biomedical Systems, Robotics and Systems, Information Hiding, Security, Computer Aided Diagnosis, Atherosclerosis. He has applied for a patent, has 4 books (including 3 edited books), 12 book chapters and more than 100 international conferences and journal papers. He has also served as a guest editor of various journals and as a Program Committee member, Session Chair of several international conferences, editorial board member of various IGI global journals and also regular reviewer of SPIE, Springer and Elsevier journals. He is a member of SAI, IE, FOSET, UACEE, ISOC etc.

**Trinidad Domínguez** is an Associate Professor in the Department of Business Management and Marketing at the Faculty of Business Sciences and Tourism, University of Vigo (Spain). She is graduated in Business Administration and Management with a Master in Tourism and PhD in Business Management. Dr. Domínguez is specialized in tourism marketing and her research interests are focused on tourist behaviour and motivation. Mainly, she has authored papers, book chapters and conferences exploring
problems at the intersection of tourism and differential collectives such as seniors or people with disability. Nowadays, her research works are focused on smart tourism, thermal tourism and tourism sites too.

**Sonia Ferrari** is a professor of Place Marketing and Tourism Marketing at the Department of Scienze Aziendali e Giuridiche (University of Calabria, Italy), where she has been associate professor of Tourism since 2005. She has been a researcher in the same University since 1993 and has also taught Management, Service Management, Event Marketing, Marketing of Museums and Tourism Management. At the same university she is President of the Tourism Science Degree Course and President of Valorizzazione dei Sistemi Turistico-Culturali Degree Course since 2007. Her main fields of study and research are services management, tourism marketing, place marketing, event marketing, wellness tourism, parks and natural areas marketing.

**Monica Gilli** is Assistant Professor at the University of Milano-Bicocca, where she teaches Sociology of Territory, and Tourism. Her research interests are: tourism as a factor in urban regeneration and local development, cultural and heritage tourism, museums, the relationship between tourism and identity construction, rural tourism, landscape, food and sustainability. Among her publications there are “Authenticity and Interpretation in Tourist Experience” (2009; “Autenticità e interpretazione nell’esperienza turistica”, FrancoAngeli, Milano), “The Voyage Out. Sociological Studies” (2012; The Voyage Out. Studi sociologici”, ScriptaWeb, Napoli) and with E. Ruspini, M. Decataldo and M. del Greco “Tourism, Genres, Generations” (2013; “Turismo, generi, generazioni”, Zanichelli, Bologna).

**Takashi Hasuike** is an Assistant Professor in Graduate School of Information Science and Technology, Osaka University. He received his B.S. in Engineering from Osaka University, M.S. and Dr. in Information Science from Osaka University. He is a member for Japan Industrial Management Association (JIMA), Operations Research Society of Japan (ORSJ), Japan Society for Fuzzy Theory and Intelligent Informatics (SOFT), The Institute of Systems, Control and Information Engineers (ISCIIE), Japan Association for Management Science (JAMS), and The Institute of Electrical and Electronics Engineers (IEEE). His research interests are Mathematical Programming, Stochastic and Fuzzy Optimization, Network Optimization, Tourism, Supply Chain Management. His papers have appeared in Omega (The International Journal of Management Science), Computers and Industrial Engineering, Journal of Global Optimization, Fuzzy Sets and Systems, Information Sciences, Applied Mathematical Modelling, Journal of Japan Industrial Management Association (JIMA), etc.

**Aleksandar Ivanović** is the Founder, Head, and Professor at Alexander College of Arts, Business, Finance, Tourism, and Management as well as of the Institute of Ecotourism, Organic Agriculture, and Alternative Medicine in Belgrade, Serbia. Having graduated Economics at Belgrade University as the best student of the generation in 1987, he obtained M.S. in Economics and MBA degree, and conducted PhD research both in business planning and in finance and accounting. Besides even wider education and theoretical knowledge and speaking seven languages, he has enormous practical experience as CEO in several firms within different branches for two decades and a half, having been especially successful in revitalizing ruined companies. He has been teaching, researching, and published a great number of scientific papers, manuals, and monographs in the areas of: Business, International, and Monetary Economics; General, Services, and Operations Management; Banking, Finance, and Accounting; Agriculture, Marketing, and Design; Tourism, Travel, and Transportation.
**About the Contributors**

**Hideki Katagiri** is an Associate Professor in Graduate School of Engineering, Osaka University. He received his M.S. and Dr. in Engineering from Osaka University. He was a Research Associate in Graduate School of Engineering, Hiroshima University from 2000 to 2005. He is a member for Operations Research Society of Japan (ORSJ), Japan Society for Fuzzy Theory and Intelligent Informatics (SOFT), and The Institute of Electrical and Electronics Engineers (IEEE). His research interests are Mathematical Programming, Stochastic and Fuzzy Optimization. He has published many interesting papers in some major journals such as European Journal of Operational Researches, Expert Systems with Applications, Fuzzy Sets and Systems, Information Sciences, Applied Mathematical Modelling, etc.

**Elena Kuchina** received the Master degree in Quantitative Methods in Economics from University of Economics, Prague in 2013. The field of study was Econometrics and Operation Research. The final thesis of the Master degree was “‘Models of Analysis and Forecasting of the insolvency of Czech companies’”. Since 2013 she has been doing PhD program in Econometrics and Operation Research. In the frame of the PhD studies the teaching courses are Basic Econometrics and Introductory Econometrics. The main area of her PhD research is Applied Econometrics, Quantitative Modeling with particular interest in predictive models, analysis of the short and long-term relationships in economy.

**Desmond Kumi** is the CEO and lead consultant of DAL Consultancy Company limited Ghana. He holds an undergraduate degree in Computer Science and Mathematics with First Class Honours from the University of Ghana, Legon and a master’s degree in Management and Information Systems from Cranfield University, United Kingdom. He has extensive experience in process modelling and analysis of data using SPSS, STATA, EVIEWS, EPI-INFO, AMOS and LISREL. He has worked as MIS and process modelling consultant for Geoban Santander Bank, United Kingdom (2012) and CDH Financial Holdings Ltd, Ghana (2014). He has also worked as a freelance research and statistics consultant for German International Cooperation, Regional Coordination for HIV and TB (2008-2014). Desmond K. Kumi lives in Accra, Ghana.

**Bruce Henry Lambert** is a frequent guest speaker & lecturer on place marketing & branding. He’s traveled to some 75 countries and has university degrees from four nations; his doctorate is in Management Strategy from the University of Oxford. Lambert is Professor & Development Director of Localversity, a recently founded community-centered education network headquartered in Stockholm, Sweden, and Visiting Professor, Meiji University, Tokyo, Japan. His recent research work focuses on local development strategies, new technological tools, and the economics of leisure.

**Tzung-De Lin** received his PhD in STS (science, technology, and society) and sociology from the University of Edinburgh. He is an assistant professor of general education with a joint appointment in sociology at National Tsing Hua University, Taiwan. Most of the courses he teaches deal with the relationship between science/technology and society, such as Science, Technology, and Society (both undergraduate and graduate level), and Robots: Social Imagination and Technological Horizon. His current research interests include sociological inquiry on robotics, and on large technological systems. His article titled Theater as a Site for Technology Demonstration and Knowledge Production: Theatrical Robots in Japan and Taiwan will appear in the June issue of East Asian Science, Technology, and Society: An International Journal.

**I-Chun Liu** has been a public servant at the Department of Health of Taiwan for seven years. She is now a professor and director of the Department of Social and Policy Science at Yuan Ze University, Taiwan. Her major interests are primarily related to the development of health insurance policies, study of the medical tourism service, and research on medical spa management issues. She is the author of many publications, including those on an analysis of health care reform and structural interests, analysis of medical tourism policy from a policy network approach, and evaluation research of Taiwan’s National Health Insurance Policy.

**Siba Sankar Mahapatra** is a Professor at the Department of Mechanical Engineering, National Institute of Technology, Rourkela, India. He has more than 20 years of experience in teaching and research. His current area of research includes multi-criteria decision-making, quality engineering, assembly line balancing, group technology, neural networks, and non-traditional optimisation and simulation. He has published more than 100 journal papers. He has written few books related to his research work. He is currently dealing with few sponsored projects.

**Siddartha Nath** is an M. Tech Scholar in Department of CSE, JIS College of Engineering and Technology, Kalyani, Nadia. He completed his B. Tech from the same institution. He has 8 research papers published in various International Journal and conferences. He is currently working on medical pattern recognition and medical image processing.

**Bhaswati Patnaik** is an Assistant Professor and Head of the Department of Humanities and Social Sciences at National Institute of Technology, Rourkela, India. She has more than 10 years of experience in teaching and research. Her current area of research includes organisational culture and dynamics, emotional intelligence and quality of work life. She has published more than 20 research articles in referred journals. Currently, she is dealing with few industrial consultancy projects.

**Thomas Saaty**, Chair of Distinguished University Professor, University of Pittsburgh; member National Academy of Engineering; 2012, Fellow of the American Association for the Advancement of Science; winner of the Herbert Simon Award for best paper in 10 years; 2011 received the distinguished award Doctoris Honoris Causa in a ceremony at Poland’s oldest and most prestigious Jagiellonian University, Krakow, Poland; 2008 awarded the Impact Prize by INFORMS for his work on the Analytic Hierarchy Process; 2000; awarded the gold medal from the International Society for Multicriteria Decision Making; 1977 award from the Institute of Management Sciences for one of the best applied studies of that year; The Sudan Transport Plan; 1972 the L.R. Ford prize in mathematics for a comprehensive paper “Thirteen Colorful Variations on Guthrie’s Four Color Conjecture”. Previously, professor, the Wharton School, University of Pennsylvania; Scientific Analyst at the Arms Control and Disarmament Agency in the Department of State, Washington: nuclear arms reduction negotiations with the Soviets in Geneva. He developed the Analytic Hierarchy Process (AHP) for decision-making and its generalization to feedback, the Analytic Network Process (ANP). Published 43 books and more than 300 papers; latest books Group Decision Making: Drawing out and Reconciling Differences: Problem Solving & Decision Making; The Brain: Unraveling the Mystery of How It Works; Creative Thinking and Problem Solving; The Neural Network Process (NNP).
About the Contributors

**Jie Sun** received the Ph.D. degree in Computer Science from Zhejiang University in 2014. She is a lecturer in School of Information Science and Engineering, Ningbo Institute of Technology, Zhejiang University. Her research interests include software engineering, requirements engineering, service requirements and service computing. She has published papers on Expert Systems: the Journal of Knowledge Engineering (ES), Software: Practice and Experience (SPE), 32nd International Conference on Conceptual Modeling (ER’13), and 10th International Conference on Services Computing (SCC’13) and so on. She is a PC member for the fourth International Workshop on Requirements Patterns (RePa’14) and European Workshop on Service Systems (EWISS’09).

**Hiroe Tsubaki** is a Professor in Department of Data Science, The Institute of Statistical Mathematics. He is also a vice-president in The Institute of Statistical Mathematics. He received his Ph.D. degree in Engineering from The University of Tokyo in 1988. He was a Professor at Tsukuba University from 2000 to 2007. He is a member for Japanese Society of Applied Statistics, and Japan Statistical Society. He received some Awards from The Japanese Society for Quality Control (JSQC), The Society of Instrument and Control Engineering (SICE), Japan Statistical Society, etc. He also published many interesting papers in some major journals in Applied Statistics.

**Hiroshi Tsuda** is a Professor in Department of Mathematical Sciences, Doshisha University. He was the Vice President of The Japanese Association of Financail Econometrics and Engineering from 2007 to 2012 and the President of Society of Applied Economic Time Series Analysis from 2009 to 2012. He is a member for Japan Statistical Society, Society of Applied Economic Time Series Analysis, The Japanese Association of Financail Econometrics and Engineering, The Japanese Association of Value-Creating ERM, etc. His research interests are Statistics Statistical Finance, Mathematical Finance, Risk Management, and Economical Statistics Econometrics. He has also published many interesting papers in some major journals and international conferences of these research fields.

**Ye Wang** received the Ph.D. degree in Computer Science from Zhejiang University in 2013. She is a lecturer in School of Computer and Information Engineering, Zhejiang Gongshang University. Her research interests include software engineering, requirements engineering, service computing and e-tourism services. She has published her work in international journals and conferences such as IJHCS, SPE, IJSEKE, JITSM, ICWS, APRES and so on. She is a PC member for conferences in the fields of software engineering such as the 26th and 27th International conference on Software Engineering and Knowledge Engineering (SEKE’14 and SEKE’15) and European Workshop on Service Systems (EWISS’09). She has been a reviewer for International Journal of Software Engineering and Knowledge Engineering. She has also been an associate chair for the fourth International Workshop on Requirements Patterns (RePa’14).
