About the Contributors

George Leal Jamil has a Post-doctoral degree by Faculdade de Letras of Universidade do Porto, PhD in Information Science from the Federal University of Minas Gerais (UFMG), Master degree in Computer Science (UFMG) and B. Sc. in Electrical Engineering (UFMG). He wrote books, chapters and papers about topics regarding information technology and strategic management. Council member of journals and Congresses, with main research interests in information systems management, strategy, knowledge management, and software engineering, marketing and information technology adoption in business contexts. Also works as a consultant in these areas.

José Poças Rascão (PhD, ISCTE/ULI) is a Professor of Management Information Systems at the Polytechnic Institute of Setubal, Portugal. Is Director of course management of distribution and logistics. Is a research in the Research Unit in the development of enterprise (UNIDE) at the University Lisbon Institute (ISCTE/ULI). Since 2000 has published 7 books on strategy management and management of information and more than 23 publications on strategy and information management. Under his supervision, 6 Masters Theses have been successfully from 2007 to 2014, with 3 more coming up for defense in next 2 years. He also works as private management consultant for large and medium-sized enterprises. He worked as management consult at Price Waterhouse and Coopers & Lybrand between 1989 and 1995.

Fernanda Ribeiro (born 1958) is an associate Professor at the Faculty of Arts and Humanities of University of Porto (Portugal) and is member of the research centre CETAC.MEDIA (Centre of Studies in Technologies and Communication Sciences). Previously she worked as an archivist at the Municipal Archives of Porto. She got a degree in History and obtained the diploma of the Librarian-Archivist Course from the University of Coimbra. Her PhD in Information Science is from University of Porto with a dissertation entitled The Access to Information in Archives. During the last 25 years she devoted her academic research to access and retrieval of information in archives, subject indexing, classification, information evaluation, theory and methodology of Information Science as well as LIS professional training. She is co-author of a Portuguese manual of Archival Science under the title Arquivística: teoria e prática de uma Ciência da Informação (1999), which got a prize from the Portuguese Association of Librarians, Archivists and Documentalists (BAD) and of another book entitled Das “Ciências” Documentais à Ciência da Informação: ensaio epistemológico para um novo modelo curricular (2002).

Pedro Fernandes da Anunciação has a PhD in Management at Évora University. Coordinator Professor at Information Systems Department of Business School (Escola Superior de Ciências Empresariais) of Polytechnic Institute of Setúbal (Instituto Politécnico de Setúbal), Portugal. President of Scientific and Technical Council of Business School (Escola Superior de Ciências Empresariais) of Polytechnic Institute of Setúbal (Instituto Politécnico de Setúbal), Portugal. Member of Coordination Council of Business School (Escola Superior de Ciências Empresariais) of Polytechnic Institute of Setúbal (Instituto Politécnico de Setúbal), Portugal. Member of Information Systems Governance European Club – Portugal.

Adelaide Maria de Souza Antunes is a Chemical Engineer. Master’s and Doctor in Chemical Engineer by Federal University of Rio de Janeiro (UFRJ)/Brazil. She works at National Institute Industrial Property (INPI) and Permanent Professor of Post-graduate program of the School of Chemistry by Federal University of Rio de Janeiro. She has held numerous positions in these organizations in the Innovation and Technological Management area. She is Professor Emeritus of the UFRJ and counselor of several Associations in the chemical-pharmaceutical industry in Brazil. She is currently a member of the following committees: Intellectual Property at ANPEI; Executive Committee of Chemical Industry at “Plano Brasil Maior”; Counselor of the Regional Council of Chemistry in third region; Commissioner of the Brazilian Association of Chemical Technology at ABIQUIM. Also acting like Councilor at laboratories: LABCOM - Fuel and Oil Products laboratory; SIQUIM - Information System about Chemical Industry by University of Rio de Janeiro and participant of the National Institute of Science and Technology Drugs and Medicines - INCT/INOFAR. Acting on the following topics: industry, fine chemical, petrochemical, alternative energy sources, patents, technological forecasting and future study.

Renata Maria Abrantes Baracho, Ph.D. in Information Sciences at UFMG with PDEE at The Penn State University, Master Degree in Computer Science (UFMG), B. Sc. in Computer Science and Architecture (UFMG), President of the Brazilian Association for Research in Information Science (ANCIB). Coordinator of Program in Information Science from the Federal University of Minas Gerais PPGCI/UFMG (2012-2014). Professor in the Department of Information Theory and Management at the Federal University of Minas Gerais (UFMG). Research interests in information architecture, information and knowledge management, information retrieval and building information.
Fernando Paulo Belfo is professor at the Higher Institute of Accounting and Administration of Coimbra, Politecnical Institute of Coimbra, Portugal for approximately 20 years, where he has lecture and been responsible for several disciplines, especially in the area of Information Systems. He is also professionally experienced in the areas of information & technology and management, with participation in projects at several firms of different sizes, from which underlines his participation in the specification, planning, analysis, design, implementation and maintenance of management information systems of the paper mill of Soporcel (Portucel), headquartered at Figueira da Foz, Portugal. He received the Bachelor degree in electrotechnical engineering, as informatics specialist, from the Technology and Science Faculty, Coimbra University, Portugal. He received a Master degree in economics from the Economy Faculty, Coimbra University, Portugal. He is also an associate researcher at Algoritmi Centre in Guimarães, the research unit of the School of Engineering of the University of Minho, under the Technology Information, Communications and Electronics (TICE) area. His main research interests are the alignment between business and information technology, knowledge management, business process management, project management, people & human factors in IT and technology innovation. On these research themes, he has made approximately three dozen publications, including book chapters, journal articles and papers presented at national and international conferences.

Paulo Henrique de Souza Bermejo is PhD in Knowledge Engineering and Management by the Universidade Federal de Santa Catarina (Brazil), and performed a post-doctoral stage in Innovation at Bentley University (U.S.A.). Currently, he is Assistant Professor in the Department of Computer Science at Universidade Federal de Lavras (Brazil), and researches about innovation, business management, strategy, governance, entrepreneurship and information systems management. Over his 15-years career, Bermejo has published 1 book, 4 book chapters, more than 50 refereed papers on his research interested topics, and has developed over 25 software products in partnership with public and private institutions. In the period of 2009 to 2011, he worked as Associate Dean for Graduate Studies at Universidade Federal de Lavras. In 2013, Dr. Bermejo started to conduct ‘productivity scholarship in research’ supported by Foundation for Supporting Research in the states of Minas Gerais (Fapemig).

Jonathan Bishop is an information technology executive, researcher and writer. He founded the Centre for Research into Online Communities and E-Learning Systems in 2005, now part of the Crocels Community Media Group. Jonathan’s research and development work generally falls within human-computer interaction. He has over 70 publications in this area, including on Internet trolling, cyber-stalking, gamification, cyberlaw, multimedia forensics, Classroom 2.0 and Digital Teens. In addition to his BSc(Hons) in Multimedia Studies and various postgraduate degrees, including in law, economics and computing, Jonathan has served in local government as a councillor and school governor, and has contested numerous elections. He is also a fellow of numerous learned bodies, including BCS - The Chartered Institute for IT, the Royal Anthropological Institute, the Royal Society of Arts, and the Royal Statistical Society. Jonathan has won prizes for his literary skills and been a finalist in national and local competitions for his environmental, community and equality work, which often form part of action research studies.
About the Contributors

**Antonio-Juan Briones-Peñaiver** is an Assistant Professor of Management at Technical University of Cartagena (Spain) and researcher for the Portugal International Centre (CIEO), mention of European Doctorate (Doctorate with European accreditation). His research interest is focused on the study of entrepreneurs, start-up business projects, firms’ cooperation & strategic alliances, and, in general, business collaboration relationships along the European Union. In the last years he has been leading several Projects of International Cooperation for Development issues between the European Union and Central America, sponsored by the Spanish Ministry of Foreign Affairs. He is currently the Director of the Master in Business Administration (MBA) at Technical University of Cartagena. As well as Deputy Director at the “Young Entrepreneurs Chair”. Before joining the University, he occupied positions as Economist and Executive Director in several Agribusiness companies.

**Cleber Carvalho de Castro** has a PhD degree in Agribusiness by Federal University of Rio Grande do Sul (UFRGS), MSc in Administration (UFRGS) and BSc in Administration from the Federal University of Lavras (UFLA). Currently is an Associate Professor at Federal University of Lavras (UFLA) and council member of journals and congresses. His research area is management of technological innovation, organizational networks, and industrial clusters.

**Benjamin Fernandes** joined the Air Force Academy in September 2006 for the Master’s Degree in Military Aviation, specializing in Pilot-Aviator. He completed the theoretical part of his education in 2011, with a master degree dissertation in the area of Organizational Engineering. In 2012 he completed the flight training and now is a C-130H transport aircraft pilot.

**Paula Figueiredo** is PhD student in Management in Laureate International Universities – Universidade Europeia. Since 2008, she has collaborated with several managers to develop their leadership skills. She has participated in projects of Management, Human Resource Management, Creativity and Innovation, Social Responsibility and Sustainability.

**André Pimenta Freire** is an Assistant Professor at the Department of Computer Science of the Federal University of Lavras, Brazil. He holds a PhD in Computer Science from the University of York, UK. His research is focused on the use of user-centred design approaches into diverse fields, such as electronic government and distance learning.

**André Grützmann** is Assistant Professor in the Department of Computer Science at Universidade Federal de Lavras (Brazil), teaching Software Engineering, Information Systems, and Business Intelligence subjects. His research areas range from web-based innovation to information technology. Prof. Grützmann holds Ph.D. in Business Administration from Universidade Federal de Lavras (Brazil), Master degree in Business Administration from Universidade Federal de Santa Catarina (Brazil), and B.Sc. in Computer Science from Universidade Federal de Santa Catarina (Brazil). He has taught in undergraduate courses in Information Systems, Computer Science, and Business Administration for 15 years. In the past, he also worked in small projects in web development. He has written papers about topics regarding internet technologies, innovation, social media and information technology and attended at conferences in these areas. He also works as a consultant in these areas.
Zulmira Hartz is a physician by Federal University of Rio Grande do Nort. Master’s and doctorate in Health Collective by University of Montreal and Post doctorate from the École Nationale de Santé Post-France. She was Researcher in Epidemiology holder at ENSP/Fiocruz (retired) and coordinated the Master and Doctorate in Public Health assuming subsequently the overall coordination of graduate of the Oswaldo Cruz Foundation. She was also teacher at Department of Social Medicine, University of Montréal that remains as a Research Associate at the Groupe de Recherche en Santé interdisciplinaire (GRIS). Among the positions held, include the direction of the Department of Communicable Diseases and Epidemiology of the State Health Secretariat of Rio de Janeiro, and the deputy director of the National School of Public Health (Fiocruz). Independent consultant in program evaluation, policy and health systems also integrating CNPq- research group’s evaluation of the situation of endemic processes and control programs (ENSP-Fiocruz) and Management Studies and Evaluation in Health (GEAS/IMIP). She is currently deputy director of the Institute of Hygiene and Tropical Medicine (IHMT) at University NOVA of Lisbon (IHMT/UNL) which is associate professor and coordinator of the course Assessment in Health in the Doctoral Program in International Health.

Liliane Carvalho Jamil is in her second year of the General Surgery Residency Programme at Santa Casa de Belo Horizonte. She studied medicine at Universidade Federal de Minas Gerais and graduated in 2012. She has worked in primary care and minor emergencies in the city of Sabara. Her interests are healthcare improvement, clinical medicine, general Surgery and plastic surgery.

Pankaj Kamthan has degrees in mathematics, mathematics education, and computer science. His teaching and research interests include agile methodologies, conceptual modeling, requirements engineering, software engineering education, and software quality. He has been teaching in academia and industry for the past two decades. He has taught over 20 courses in undergraduate and graduate programs, and is an avid user of information technology in his courses. He has been a technical editor, participated in standards development, and served on program committees of conferences and editorial boards of journals related to e-learning, information technology, and resource management. He has authored over 80 scholarly publications.

Kijpokin Kasemsa received his BEng degree in Mechanical Engineering from King Mongkut’s University of Technology Thonburi, his MBA degree from Ramkhamhaeng University, and his DBA degree in Human Resource Management from Suan Sunandha Rajabhat University. He is a Special Lecturer at Faculty of Management Sciences, Suan Sunandha Rajabhat University based in Bangkok, Thailand. He is a Member of International Association of Engineers (IAENG), International Association of Engineers and Scientists (IAEST), International Economics Development and Research Center (IEDRC), International Association of Computer Science and Information Technology (IACSIT), International Foundation for Research and Development (IFRD), and International Innovative Scientific and Research Organization (IISRO). He also serves on the International Advisory Committee (IAC) for International Association of Academicians and Researchers (INAAR). He has numerous original research articles in top international journals, conference proceedings, and book chapters on business management, human resource management, and knowledge management published internationally.
**About the Contributors**

**Tibor Koltay** is Professor, Head of Department and Course Director for the LIS curriculum at the Department of Information and Library Studies, of Szent István University, Faculty of Applied Arts and Pedagogy in Jászberény, Hungary. One of his main professional interests, where he also published papers extensively includes information literacy and related fields, including information overload and – more recently – data literacy.

**Jorge Lima de Magalhães** is a Chemist. Master’s and Doctor of Science by Federal University of Rio de Janeiro/Brazil. Post-doctorate by Université de Provence Aix Marseille, France (Laboratoire IRSIC EA4262 - Institut de Recherche en Sciences de l’Information et de la Communication) Competitive Intelligence for Public Health. He works at the Oswaldo Cruz Foundation (Fiocruz) in Centre for Technological Innovation – Farmanguinhos (NIT-Far). He is professor of the Master Program in Management, Research and Development in the Pharmaceutical Industry. He has several scientific articles and books. The emphasis of their research permeate the identification, analysis and treatment of Big data in Health in the context of Management and Innovation Technological covering issues related to the pharmaceutical industry and public health. In this sense, use of information science tools such as Competitive Intelligence and Knowledge Management applicable to the study of scenarios like BIG DATA analysis, Web 2.0, Health 2.0, Technological Trends, marketing, Patents and Knowledge Translation.

**Henrique Mamede** has a PhD in Information Systems and Technologies by Universidade do Minho, Master in Informatics by Faculdade de Ciências da Universidade de Lisboa, Engenharia Informática pela COCITE, CRL. Professor at Departamento de Ciências e Tecnologia da Universidade Aberta, a portuguese distance learning university, and contributor to INESC-TEC. Oporto, Portugal. Mainly teaches in the field of Information Systems, with a special interest in digital business and security, as well as in networking and distributed systems.

**João P. C. Marques** obtained his Ph.D. in Industrial Management from the University of Aveiro – Portugal (2005). His master’s degree is in Management, from the Lisbon School of Economics and Management – Technical University (ISEG) (1997). He has been a Professor at the Polytechnic Institute of Coimbra - Portugal, since 1990, where he coordinates the M.Sc. course in Business Management. He has been a researcher with the Research Unit on Governance, Competitiveness, and Public Policies – University of Aveiro since 2007. He has published more than 20 scientific papers and 2 books. His main interests are in innovation management, strategy management, entrepreneurship and business incubators.

**Anderson Antonio Freire de Moraes Meireles** has B.Sc. in Information Systems from the Universidade Federal de Lavras (Brazil). He received a Fellowship in Scientific Initiation programs at Universidade Federal de Lavras (Brazil). He has worked in projects regarding the use of online social networks, trend identification, and open innovation. It has articles published in national and international conferences. His main areas of research interest are social media, innovation, and the use of information technology applied to business.

**Isabel Moço** is a PhD Student in Social Sciences and Organizational Behaviour, Lisbon University. She has two Post-Graduation in Human Resources Management, one from Católica University and other from ISLA Lisboa, and a Post-Graduation in Communication from ISCTE/IUL. She is a bachelor in Sociology from ISCTE/IUL and a Teaching Assistant in Human Resources Management and coordinator of several Post-Graduations in Human Resources Management.
Mónica Erichsen Nassif. PhD and MS in Information Science. Researcher and lecturer at the School of Information Science of the Federal University of Minas Gerais (UFMG), in information and knowledge management and competitive intelligence.

Sónia Valéria Fonseca Nunes has a degree in Information Systems Management – Business School (Escola Superior de Ciências Empresariais) of Polytechnic Institute of Setúbal (Instituto Politécnico de Setúbal), Portugal. Work experience: Implementation of HP HCIS (HealthCare Information System) from Hewlett-Packard, in the Emergency Department - Pediatric, Gynecologic and Geral Project Lifecycle experience, including requirements gathering, configuring, tests, training and Go Live. Now works as a Systems Analyst in a Hospital Center in Lisbon (Centro Hospitalar Lisboa Ocidental) with the responsibility of project manager in several projects such as Business Intelligence, implementing new features in several applications used in the hospital.

Carlos Páscoa (PhD, UL/IST) works for the Portuguese Air Force, at the Headquarters in the Operations Division and teaches Organizational and Design Engineering at the Air Force Academy. He is also a researcher at the Air Force Academy. He has taught Operational Force Employment and Staff Studies at the Air Force Staff College and he is a frequent speaker at the Joint Staff College. He has, since 2009, more than 50 publications on Enterprise Architecture, Enterprise Engineering, Enterprise Governance, Organizational Change and Organizational Competencies. He has, since 2010, supervised 33 master thesis in the area of Organizational and Design Engineering at the Air Force Academy and at Instituto Superior Técnico (University of Lisbon).

Fabrício Horácio Sales Pereira holds a BSc in Information Systems from the Federal University of Lavras. He is currently an MSc student at the Department of Computer Science of the Federal University of Minas Gerais. He has experience with research on Human Computer Interaction with a focus on accessibility, usability and assistive technology.

Claudio Roberto Magalhães Pessoa is civil engineer, specializing in business management and IT, telecommunication systems and computer networks engineering and telecommunication systems and computer networks management. Holds a Master degree in Business Administration. Currently he’s doing PhD in Information Science on Federal University of Minas Gerais. He is Lecturer and researcher at the Fumec University, developing research in the following areas: telecommunications, security information, knowledge management, strategic alignment between technical areas (Telecom, IT) and management of organizations and production engineering. He has been working in the telecommunications market, as a consultant, for 20 years, developing projects in computer networks and information management.

Olívia Pestana was born in 1969 and is Assistant Professor at the Faculty of Arts of the University of Porto (Portugal) and member of the research centre CETAC.MEDIA. Previously worked in the health sector as Chief Librarian and Research Information Manager in a hospital of the Portuguese National Health Service. Her PhD is in Information and Communication in Digital Platforms from University of Porto (joint course with University of Aveiro) with a thesis entitled Information services in the hospital context: Services network and Network of services. Her academic research is devoted mainly to information management, information services, health context information, subject indexing and classification.
About the Contributors

Renan Carlos Rodrigues is an Information Systems undergraduate student at Universidade Federal de Lavras (UFLA). He studied at University of Oregon (UO) as an exchange student with a fully funded scholarship by Coordenadoria de Aperfeiçoamento de Pessoal de Nível Superior (CAPES). He has worked as a research assistant at UFLA, where he developed studies about Open Innovation via Online Social Networks. He is also a member of the WebDev study group at UO, where he could improve his studies about web development and social network’s APIs.

André de Lima Salgado holds a BSc in Information Systems from the Federal University of Lavras. He is currently an MSc student at ICMC - University of São Paulo. He has been working on research on Human-Computer Interaction. He is a member of ALCANCE Research Group and was a Visiting Researcher at University of Ontario Institute of Technology.

Edilaine Rodrigues Soares is a Master’s student in Business Administration - University FUMEC (2015); Specialist Software Engineering at Technological Education Institute - IETEC (2013); Bachelor in Information Systems from COTEMIG School (2007); Lecturer on Software Engineering Workshop at Technological Education Institute – IETEC. Presented and published several articles in International Management Congress of Technology and Information Systems – CONTECSI of University of São Paulo – USP. Participation in the writing of book chapters.

Filipe Castro Soeiro is a senior international professor of Entrepreneurship, Innovation Management, Design, Marketing, International Business and Global Strategy at Universidade Europeia–Laureate International Universities. Professor Castro Soeiro is the Coordinator of the Executive Master in Entrepreneurship and Innovation programme at Universidade Europeia (Lisbon, Portugal), Visiting Professor and Coordinator of the Field Lab Programme in Entrepreneurial Innovative Ventures at Nova School of Business and Economics (Lisbon, Portugal) and Lecturer at Faculty of Creative Industries of University of Saint Joseph (Macao, China), bridging international research and teaching in Europe and Asia. He is an expert in business/academic administration recognized for innovations in interdisciplinary and international academic programming, by using e.g., Artificial Neural Network systems, has been publishing on worldwide recognized and leading scientific journals as the Research Policy Journal (Elsevier), as well as contributed as scientific reviewer for the editorial board of leading academic journals as the Cross Cultural Management: an International Journal (Emerald). He holds Ph.D. in Economics from University of Beira Interior (programme in consortium with University of Evora), titled Essays in Regional Innovation Systems, Knowledge Economy and Policy-Making: An applied perspective to European context, M.Sc.
About the Contributors

Maria José Sousa is a researcher from Business Research Unit, Instituto Universitário de Lisboa, Portugal and a Professor at Universidade Europeia – Laureate International Universities, she received her Ph.D. degree in Management from the Aveiro University and her research is in the fields of management and innovation. She has published several research papers and in addition to her research expertise, she has extensive practical experience in public and private organizations. Dr. Maria José Sousa has received a number of prestigious awards including two research grants for her Ph.D. studies.

José Manuel Tribolet (PhD, M.I.T.) is Full Professor of Information Systems at IST/UTL - Instituto Superior Técnico, University of Lisbon, responsible for courses in Enterprise Information Systems and Organizational Engineering, and President of INESC, the largest Portuguese private research institute. He is a senior researcher at the Center for Organizational Design and Engineering (CODE) of INOV - INESC INOVAÇÃO, where he has, since 2000, more than 100 publications on Enterprise Architecture, Engineering, Governance and Transformation. Under his supervision, 8 Ph.D. theses have been successfully defended from 2007 to 2012, with 3 more coming up for defence in the next 4 years. He also works as private executive counsellor for top executives in business and public administration. He plays a leading government advisory role in GPERRTIC, a national strategic program to rationalize and improve the Information Systems and ITC infrastructures of the Portuguese public administration.

Augusto Vieira is on his third year of the Ophthalmology Residence Program of the Hilton Rocha Foundation in Belo Horizonte, Minas Gerais, Brazil. He has studied Medicine in the Federal university of Juiz de Fora, Minas Gerais, Brazil. He has worked with Emergency Medicine and Primary Care Medicine. His main interests are Ophthalmology and Medical Innovation.

Antonio José Daniel Xavier, M.D. PhD., Physician (UFMG). Master degree in Medicine (University of Cambrigde). Medicine PhD (UFMG/Faculdade de Ciências Médicas de Minas Gerais). MBA in Business (Fundação Dom Cabral) and MBA in Finance (Instituto Brasileiro de Mercado de Capitais/ IBMEC). Health Care Management Specialization by INSEAD (France) and Imperial College of London Economics. Senior Professor - UFMG and Faculdade de Ciências Médicas de Minas Gerais.

Fernando Hadad Zaidan is a doctorate student in Science Information at Federal University of Minas Gerais (www.ufmg.br), Brazil. MSc in Administration (2008), Degree in Computer Science (2006) and Web Development XML (2004), System Analyst (1986). Coordinator and Professor of specialized courses in several institutions. Has constructed an important IT career, working nowadays as an Enterprise Architecture and Business Intelligence consultant. Author of some technical and scientific papers, published at important web sites, journals and international conferences.
About the Contributors

André Luiz Zambalde is Full Professor at Federal University of Lavras (UFLA-BR). He served as Pos-doctoral researcher at NOVA Information Management School at Nova de Lisboa University (ISEGI-NOVA - PT). Professor Andre holds Ph.D. in Computer Systems Engineering from Federal University of Rio de Janeiro (COPPE-UFRJ-BR), Master degree in Industrial Electronic (UNIFEI-BR), and Undergraduate in Telecomunications Engineering (INATEL-BR). He has written papers about knowledge management and innovation, information technology and strategic management. Council member of journals and congresses, with main research interests in knowledge management and innovation, human computer interfaces, hypermedia systems, strategy and marketing of new technologies. He also works as consultant in knowledge management and innovation.
