About the Contributors

**Ebru V. Ocalir-Akunal** is associate professor at the City and Regional Planning Department of the Gazi University, Ankara, Turkey. She graduated from the City and Regional Planning Department of Gazi University in 1993. She completed her master’s studies in the Regional Planning Department of the METU in 1996. She got her Ph. D. degree from the Institute for Transport Planning and Traffic Engineering of Vienna University of Technology in 2003. She carried out post-doctoral studies in the Research Centre of Transport Planning and Traffic Engineering of Vienna University of Technology in 2010. Her main topics of research are the development of spatial structures and mobility and decision support systems.

***

**Cengiz Akcam** is working as Civil Engineer at General Highway Directorate of Denizli Brach, Turkey.

**Darcin Akin** has undergraduate (graduated as valedictorian) and master’s degrees in Civil Engineering from Dokuz Eylul University in 1987 and 1992, respectively. He received his doctoral degree from Michigan State University (MSU), USA in 2000 in Civil Engineering. After graduation from MSU, he joined the Department of City and Regional Planning at Gebze Institute of Technology (GIT), Kocaeli. He taught graduate courses at GIT in transportation engineering and planning and supervised graduate thesis in several aspect of urban planning. In 2012, He joined the Department of Urban and Regional Planning at Yildiz Technical University, Istanbul. He also served as a technical advisor during the preparation of Istanbul Master Transport Plan from 2005 to 2010. He also led the project of Trip Generation Handbook for the city of Istanbul. His research interests include transportation engineering and planning. He has published and presented papers at national and international journals and conferences, including ASCE journals, TRB Meetings and the TRB Journal. He also talked several conferences organized by the Ministry of Transportation, Maritime Affairs and Communications, and the Metropolitan Municipalities of Istanbul and Kocaeli. Dr. Akin is currently a full-professor and the chairman of the Department of Civil Engineering at Gediz University in Izmir, Turkey.

**Serdar Alasalvar** graduated from Department of Civil Engineering in Pamukkale University, Denizli, Turkey in 2000. Upon his graduation he worked at several consulting firms and developed several civil engineering projects. He served at Air Force Logistics Command as a Third Lieutenant. He has been
working as a civil engineer at Istanbul Metropolitan Municipality since 2008. He received his master’s degree from Bahcesehir University, Istanbul, Turkey with a thesis titled Modelling Urban Growth and Expansion Using Interdistrict Travel Data: Case Study of Sakarya Province, Turkey, under the supervision of Dr. Darcin Akin.

**Turan Arslan** received his BS degree in Civil Engineering from the Yildiz Technical University, Istanbul, Turkey, in 1993 and the MSc and PhD degrees in the Civil Engineering from Illinois Institute of Technology, Chicago, USA, in 1997 and 2003, respectively. He joined the staff of Mustafa Kemal University, Hatay, Turkey in 2004 as an Assistant Professor. He became an Associate Professor in 2011. Since June 2012, he has joined Uludag University and been with the Department of Civil Engineering and Head of Transportation Division in the Uludag University. His research interests focus on transportation modeling, travel behavior, and decision support systems.

**Marco Bortolini** is a Post-Doctoral fellow at the Department of Industrial Engineering of the University of Bologna, Italy. In 2013, he received his PhD degree from the University of Padova, Italy, Industrial Engineering doctoral school. His main research activities include the study of effective strategies and tools to design industrial plants and logistic systems, the study of optimization and heuristic models applied to integrated supply chain management, the feasibility analysis of production plants and renewable energy systems. In these fields, he takes part in several research projects in partnership with other universities, scientific centers and private companies. He is author of 60 scientific contributions for international journals, book chapters and conference sessions.

**Ziya Cakici** is working at Pamukkale University as a Research Assistant since 2012.

**Fatih Çiğil** obtained his Ph.D. in Department of Environmental and Technical Research on Accidents from the Gazi University. His research field lies in the area of environmental and safety traffic. He is working on applications of efficiency analysis, renewable energy technologies, data envelopment analysis and artificial intelligence applications.

**Aykut Süreyya Duyguvar** is Industrial Engineer graduated from Istanbul Technical University in 2004. He is productivity analysis officer in military and serving with the rank of captain. He is now Ph.D. Candidate in Supply Chain Department in Turkish Military Academy Defence Science Institute.

**Sehnem Duzgun** has been performing research on spatial information technologies, spatial, spatio-temporal data analyses and mining in Earth science and engineering as well as interdisciplinary studies. She is the author of two books, five book chapters and more than 200 scientific papers.
Ozge Yalciner Ercoskun is an associate professor in the City and Regional Planning Department of the Gazi University, Ankara, Turkey. She graduated from the City and Regional Planning Department of the Istanbul Technical University in 1998. She completed her master’s studies in the Geodetic and Geographic Information Technologies Department of the METU in 2002. She got her Ph.D. degree from the City and Regional Planning Department of the Gazi University in 2007. She has attended several national and international congresses; summer schools and workshops related to ecological urban planning and geographic information systems. She has written 3 books and more than 50 papers on sustainable urban design and ecological and smart urban planning, geographic information systems and information technologies. She has worked as a researcher in many national and institutional projects. She has awards about sustainability and urban growth, sustainable tourism.

Serpil Erol is a professor in the Department of Industrial Engineering at Gazi University. She received her Ph.D. from the Ankara University in 1987. Her current research interests are in systems analysis and design, production planning, inventory theory, supply chain management, logistics management, flexible manufacturing systems, distribution and transportation. Professor Erol has over 90 publications of several journals. She attended and presented papers at the national and international conferences.

Kivanc Ertugay is a GIS specialist urban planner. His research interests are: Accessibility measures, accessibility modeling, Geographical Information Systems (GIS), Transportation Planning, Service/Catchment Area, Location/Allocation, Supply/Demand related analysis, and Spatial Data Analysis.

Mauro Gamberi is an Associate Professor of industrial plants and logistics at the Department of Management and Engineering, University of Padova, Italy. His key research topics deal with the design and optimization of complex production systems, manufacturing processes and assembly lines, inbound and outbound networks and warehousing systems. He, further, focuses on the mechanical plant design, validation and field-test developing collaborations with private companies and public research centers.

Margaret Hamilton, BSc (Hons), PhD, University of Wollongong, Australia, is an Associate Professor in the School of Computer Science and Information Technology at RMIT University in Melbourne Australia. Her current research centres on Mobility, Human Computer Interaction and Computer Science Education. Smart transportation has been her passion, and her recent research directions have involved smart bus applications as well as integration of real-time, multimodal public transport systems to provide passengers with up to the minute accurate optimised travel options. She currently supervises 5 PhD students and researches into the smart sensing and cloud services research area. Her teaching currently involves Introduction to Information Technology, Professional Computing Practice (involving ethics, employability skills, legal obligations), Advanced Professional Development, and has included Web Programming, Programming in C++ , Computing Theory. She is currently holds two A* research grants from the Australian Government, and is working on developing sustainability resources throughout RMIT University.

Jagan J., is currently working as the Junior Research Fellow (JRF) for the Sponsored Research project by BRNS in the Centre for Disaster Mitigation and Management (CDMM), VIT University, Vellore. His project area covers the Cone penetration tests and liquefaction susceptibility of soils. He is also pursuing the M.S. (By Research) in Geotechnical Engineering in the same department. His current research
is in unsaturated soil by using the data mining techniques. He also touches the area like slope stability, site characterization, pile foundation, etc. He had completed his Bachelor of Engineering (B.E.) in Civil Engineering in Adhiyamaan College of Engineering, Hosur.

**Serhan Karabulut** graduated from the Land Forces Academy, Department of Mechanical Engineering in 2003. He completed his master’s studies in Gazi University, Traffic Planning and Implementation in 2007. He got his Ph. D. degree from Gazi University, Department of Environmental and Technical Research of Accidents in 2014. His research area is the dangerous goods transportation. Karabulut is currently serving as an officer in the Turkish Land Forces, Transport Command.

**Yetis Sazi Murat** is a full time Professor at Department of Civil Engineering, Pamukkale University, Denizli, Turkey. He has been working on various topics of transportation science (traffic engineering, transportation planning, public transportation etc.) since 1994. Use of Artificial Intelligence Methods in Transportation Science is one of the main research interests of him. He has many research papers on these subjects.

** Mihaia Iulian Niculai** is a research assistant at the Centre for Environmental Research and Impact Studies at the University of Bucharest. He studies landscape ecology, the dynamics of the countryside and conservation planning. Niculai has attended courses in environmental economics and management at the Luigi Bocconi Comercial University, Milan. His work has been presented in national and international scientific conferences and been published in several number of articles in international databases indexed journals. Since 2006, he has been an active participant in research projects related to biodiversity conservation and integrated waste management.

**Mihai Razvan Nita** Researcher at the Centre for Environmental Research and Impact Studies and Lecturer at the Faculty of Geography, University of Bucharest. Phd in Geography since 2011, main research topics include green infrastructures, environmental conflicts and environmental impact assessments.

**Francesco Pilati** is a Ph.D. student in Mechatronics and Product Innovation Engineering at the Department of Management and Engineering, University of Padova, Italy. His key research topics include innovative approaches for production system design. He implements these approaches in several fields, such as warehousing, assembly lines and plant facility design. His research, moreover, focuses on the development of methods and techniques to consider, simultaneously, different industrial plant aspects as economic profitability, environmental sustainability and technical performance.

**Alberto Regattieri** is a Full Professor at the Department of Industrial Engineering of the University of Bologna, Italy. He teaches undergraduate and graduate courses in logistics, operations and industrial plant design. His current research interests include logistics, the optimal design of manufacturing and service systems, the production planning and control and the development of effective maintenance strategies for industrial plants. He manages several research projects on these fields granted by public institutions and private companies.
Sangeeta Roy is an Undergraduate in Civil Engineering. She completed her B.Tech (Civil) in School of Mechanical and Building Science, VIT University, Vellore. She has vast knowledge in the field of geotechnical engineering and also in soft computing. She also has good exposure on pile foundation, soil slope stability, etc. She also developed her knowledge on the integration of soft computing and transportation engineering. Her area of interest covers the soil engineering with the combination of data mining techniques.

Pijush Samui is a professor at Centre for Disaster Mitigation and Management in VIT University, Vellore, India. He obtained his B.E. at Bengal Engineering and Science University; M.Sc. at Indian Institute of Science; Ph.D. at Indian Institute of Science. He worked as a postdoctoral fellow at University of Pittsburgh (USA) and Tampere University of Technology (Finland). He is the recipient of CIMO fellowship from Finland. Dr. Samui worked as a guest editor in Disaster Advances journal. He also serves as an editorial board member in several international journals. Dr. Samui is editor of International Journal of Geomatics and Geosciences. He is the reviewer of several journal papers. Dr. Samui is a Fellow of the International Congress of Disaster Management and Earth Science India. He was the recipient of Shamsher Prakash Research Award for the year of 2011.

Bülent Soykan is a Ph.D. candidate at Old Dominion University, having received his M.S. in Technology Management from Defense Sciences Institute, Turkish Military Academy. His research interests include combinatorial optimization, airline crew scheduling, and simulation. He has published research in The Journal of Defense Sciences.

Adnan Sozen is Professor in the Department of Energy Systems Engineering at the Faculty of Technology of Gazi University. He obtained his M.Sc. and Ph.D. in Mechanical engineering from the Gazi University. His research field lies in the area of environmental and energy. He is working on applications of efficiency analysis, renewable energy technologies, solar heating/cooling systems, energy systems, environmental efficiency, data envelopment analysis and artificial intelligence applications. Professor SÖZEN has published more than 120 papers in reputable academic journals (75 of them are covered by SCI articles) and conferences.

Maria Spichkova received her Bachelor Degree in Computer Science at Moscow Power Engineering Institute (Technical University, Russia) in 2000 and a Master’s Degree in Computer Science at Dresden University of Technology (Germany) in 2003, respectively. She received a PhD in Computer Science in 2007 at Technical University Munich (Germany), where she worked in a researcher and lecturer role between 2003 and 2013. At the Technical University Munich, Maria Spichkova was involved both as a participant and as project leader in a large number of researched industrial projects in collaboration with AVL, Microsoft, DENSO Automotive, Robert Bosch GmbH, BMW Car IT, etc. She also supervised Bachelor and Master’s theses, taught a number of lecture courses (e.g., Applied Logic in Engineering, Modelling of distributed systems, Fundamentals of system and program development) as well as seminar courses. Currently, she is a Lecturer at the School of Computer Science and IT, RMIT University, Australia. She conducts research related to specification, modelling, testing, and verification of safety-critical and distributed systems, as well as to human factor related areas.
Gabriel Ovidiu Vanau is a geographer whose research interests focus on land use and environmental planning, urban-rural interaction and linkages, protected areas governance in relation to economic development. Gabriel Ovidiu Vanau holds a doctorate in geography from the University of Bucharest. His doctoral thesis examined the fringe of Bucharest as an urban-rural interface. He works as a research assistant at the Centre for Environmental Research and Impact Studies and as a teaching assistant at the Faculty of Geography, both within the University of Bucharest. He is strongly committed to integrating education and outreach into research projects, particularly by exposing his students to the excitement of scientific research.

Zafer Yılmaz 1996- Bachelor degree from Turkish Military Academy (Systems Engineering) 2003-MS degree from Middle East Technical University (Informatics Institute Modelling and Simulation Department) 2015- PhD. degree in Supply and Logistic Management Department of Turkish Military Academy Defense Sciences Institute.
