About the Authors

EDITOR

Lisa A. Petrides
Lisa A. Petrides is an assistant professor of education in the Department of Organization and Leadership at Teachers College, Columbia University. She is the coordinator of the Education Leadership and Management EdD-MBA program, a joint degree program offered by the Educational Administration Program and the Columbia Business School. Dr. Petrides is also a senior research associate at the Community College Research Center at Teachers College. Her teaching and research interests are in the areas of management systems and information technology, information and decision-making, higher education and workforce preparation, and issues of access and equity in education. She has worked as an information management consultant, developing management information systems for government contracts and business management. She currently works with a wide array of Internet-based technologies for classroom teaching. She received a PhD in education from Stanford University and an MBA in information systems and policy from Sonoma State University, and worked as a postdoctoral fellow at Educational Testing Service in the Educational Policy Research Division.

CONTRIBUTING AUTHORS

Zane L. Berge
Zane Berge is currently director of training systems, Instructional Systems Development Graduate Program at the University of Maryland System, UMBC Campus. His scholarship is in the field of computer-mediated communication and distance education and includes numerous articles, chapters, workshops, and presentations. Most notable are Berge and Collins’ recently published books. First, in 1995, was a three-volume set, *Computer-Mediated Communication and the Online Classroom*, that encompasses higher and distance education. Following that was a four-volume set of books, *Wired Together: Computer-Mediated Communication in the K-12 Classroom*, and most recently, he and Schreiber edited *Distance Training* (Jossey-Bass, 1998).

Christopher Blandy
Chris Blandy provides expertise in digital video production for CD-ROM, Web and videotape; HTML; and multimedia software. He serves as a WebCT trainer and consultant.
Blandy has been employed at the University of Texas in various technical support roles since 1995. He is a recent graduate of the University of Texas and holds a BA in Economics.

**Sheryl Burgstahler**

Sheryl Burgstahler is an affiliate associate professor at the University of Washington where she is also assistant director of Information Systems, Computing & Communications. Burgstahler directs project DO-IT (Disabilities, Opportunities, Internetworking, and Technology), funded primarily by the National Science Foundation, U.S. Department of Education, and the State of Washington. DO-IT employs adaptive technology, computers, and the Internet to help people with disabilities succeed in academics and careers. She has written numerous articles that spread the word about making computers and Web resources accessible to people with disabilities. She is the primary author of the *New Kids on the Net* Internet training series for students and teachers.

**Andy Busuttil**

Andy Busuttil works as the senior staff development officer in the Centre for Higher Education and Development at the University of Western Sydney. His passion is ethnomusicology and he has a consuming interest in organizational development, social systems and the impact of global contexts on subsystems and vice versa. He is interested in the impact of technology on the educator-student relationship and the development of educator skills. In his staff development work his focal interests are the development of leadership skills among managers and the development of team and organizational planning processes. He has a master’s of higher education.

**Dubravka Cecez-Kecmanovic**

Dubravka Cecez-Kecmanovic is professor and founding chair in information systems at the Faculty of Management, University of Western Sydney Hawkesbury. She has been teaching graduate and undergraduate courses in information systems since 1970. She is also a founder of the Research Group Information Systems—Knowledge Management in Organisations. Her research interests are in computer-mediated communications and Web-based learning and teaching, knowledge management, information systems development methodologies, and groupware technologies. She holds an MS in system sciences and information systems from the University of Belgrade and a PhD in computer science and information systems from the University of Ljubljana.

**Mark Lowry Decker**

Mark Lowry Decker is the lead instructor and advocate for WebCT. He is also the quality assurance manager for UTCD 2000, a role he filled in 1998 and 1999. He came to ACITS from the Center for Social Work Research. At UT, he has provided research and administrative support to the Faculty Computer Committee, the Multimedia Instruction Committee, the Telecommunications and Networking Committee, and the Long-Range Planning for Information Technology Steering Committee. He received his BA from Texas Tech while majoring in English and psychology and has a master’s degree in social work from UT with an emphasis in administration and planning.
Gunapala Edirisooriya
Gunapala Edirisooriya is associate dean at the College of Education, East Tennessee State University. He has been associated with the higher education sector his entire adult life, as a student, instructor, or administrator, except for a stint of four years during which he worked as a research and evaluation specialist in a large urban school system. Altogether he has attended or worked for nine universities in Sri Lanka, Great Britain, Nigeria, and the U.S. In addition, he has served the World Bank and the Government of Sri Lanka as a consultant on educational planning. His current research focuses on educational data management. He received his PhD from the University of Delaware.

Dorothy E. Finnegan
Dorothy E. Finnegan is an associate professor of education in the area of educational policy, planning and leadership in the School of Education at the College of William and Mary. She is an anthropologist and has taught undergraduate anthropology in the past and now teaches in the graduate higher education program. Her research interests include American and Belgian faculty careers, legal issues in higher education, and the history of higher education.

Ann F. Harbor
Ann F. Harbor is IT strategic planning and administration director for information systems at University of Memphis. She leads the campus-wide technology planning process which mandates daily involvement at various levels across the campus and within the Information Systems division to help gauge trends, progress, issues, or assess other institutional and divisional needs. She holds a master’s in educational leadership and a bachelor’s in psychology and has extensive background in human resource management. She is a member of SCUP and EDUCAUSE.

Jan K. Hart
Jan K. Hart has been chair of the Library Learning Resource Center at University of Arkansas for Medical Sciences since 1988. She is currently nearing completion of an EdD in Higher Education at the University of Arkansas at Little Rock. Her interests are medical informatics, student/faculty computer literacy, faculty development, and implementation of information and educational technology. She holds a Masters in Library Science from the University of Denver, and an MEd in instructional resources from the University of Arkansas at Little Rock.

Robert Heckman
Robert Heckman is an associate professor at the School of Information Studies, Syracuse University. He teaches courses in strategic management of information resources, management principles, and professional issues in information management. He developed one of the first university courses on information technology acquisition, and he has directed three studies for the Society of Information Management (SIM) on current practices in software contracting and the management of information technology procurement. He previously worked for over 20 years in the information industry. He served as vice president and division head for the Mellon Bank Datacenter Group, one of the largest providers of information services to the financial industry.
Ali Jafari
Ali Jafari is director of CyberLab and associate professor of Computer Technology at Indiana University Purdue University Indianapolis (IUPUI). Professor Jafari has worked in the field of Information Technology and distance learning since 1985 as a software designer, system architect, and researcher. He has designed and directed several major research and development projects including the Interactive Multimedia Distribution System (http://www.imds.iupui.edu/, 1996), the Oncourse Environment (http://oncourse.iu.edu, 1999) and the Angel Enterprise System (http://angel.iupui.edu/, 2000).

Joyce P. Kaufman
Joyce Kaufman is professor of political science at Whittier College and director of the Whittier Scholars Program. Kaufman worked with the ICONS project since its inception and initiated bringing the ICONS project to California high schools, as well as the INMP project to Community Colleges throughout the country. Her publications include being the Guest Editor, *International Negotiation: A Journal of Theory and Practice*, special issue on “The Teaching of International Negotiation,” Vol. 3, No. 1, 1998, and “The International Negotiation Modules Project: Integrating International Simulation into the Geography Classroom in the Community College,” in the *California Geographer*, Vol. XXXVII, 1997.

Sharon Khanuja-Dhall
Sharon Khanuja-Dhall is a global information technology quality leader at GE Capital. Her work involves project planning, team facilitation, functional and technical requirement analysis, and process mapping to the application of quality models and frameworks. She has worked for Arthur Andersen in the Operational Consulting Group where she managed and participated in reengineering engagements. She is currently completing her MA in organization psychology at Teachers College, Columbia University. She holds a BS from Syracuse University’s Information Studies and Technology School.

Siva Kumari
Siva Kumari is a research assistant professor at the University of Houston where she is developing courses for an online certification program in information processing technologies. Kumari currently teaches a course entitled “Integrating Technology into the Curriculum.” She has been working with educators to integrate information technologies into education since 1994. Her doctoral research involved the study of higher education faculty using Web-based teaching.

Brian Lewis
Brian Lewis is professor and director of the School of Communication at Simon Fraser University. He teaches courses in information technology, media industry structures, technology and policy, as well as digital video production courses. His early research work applied a cultural perspective to how various countries are policing and implementing their new information infrastructures. Recent work, with Richard Smith and Christine Massey, has analyzed the micro and macro policy environments surrounding the development and implementation of telelearning technology at post-secondary sites throughout Canada.
Dan Lim
Dan Lim earned a PhD degree in educational administration from Andrews University, Michigan, in 1998. He had received training in software engineering and instructional design. He specializes in interactive authoring tools, graphics and interface design, JavaScript/DHTML Web development, and interactive courseware development. His special research areas are interactive paperless learning, interactive online testing, learning games, and interactive courseware models. Besides assisting and training faculty in instructional technologies and courseware development, Dr. Lim teaches computer and instructional design courses to traditional and online students.

Gregory A. Malone
Gregory A. Malone is the technology computer systems coordinator at Cabrillo College in Aptos, California. His previous positions included teaching, research and evaluation, and management at schools and colleges in northern California and the Caribbean. His teaching and research interests are in educational psychology, instructional technology, program evaluation and measurement, and psychological statistics. Malone is conversant in grant writing, educational program evaluation, higher education and K-12 staff development and teaching, research methodology, statistics, and a broad range of applications of instructional technologies.

Christine Massey
Christine Massey is a PhD candidate in the School of Communication at Simon Fraser University in Burnaby, British Columbia. Her research interests are in the study of organizational and technological change in the university, and the evolving role of universities in a knowledge-based society.

Dave Maswick
Dave Maswick is a graduate of the School of Information Science and Technology at Syracuse University where he received an MS in information management. He currently serves as associate dean of information services and director of information technology at Bard College in Annandale-On-Hudson, New York. Maswick has participated in numerous technologically based educational initiatives as a consultant, designer, instructor and student.

Gary E. Miller
Gary E. Miller is associate vice president for distance education and executive director of the World Campus at Pennsylvania State University. He also serves as affiliate associate professor of adult education. He currently serves on the Executive Committee of the International Council for Distance Education and the Board of Directors of the Midwest Universities Consortium for International Activities, Inc. Dr. Miller holds a doctor of education degree in higher education from Penn State. He is the author of The Meaning of General Education: The Emergence of a Curriculum Paradigm (Teachers College Press, 1988). He has also chaired the Commission on Principles of Good Practice in Continuing Education for the National University Continuing Education Association.
Bizhan Nasseh
Bizhan Nasseh is a special assistant for educational technology and adjunct faculty of computer science. He has bachelor’s degrees in criminology and in economics, a master’s degree in computer science, and a doctoral degree in education from Ball State University. He has research interests in computer-based distance education. He has extensive experience in faculty development, academic application development, distance education, training programs, and computer and communication technologies. For the past 20 years, he has worked in information technology in different capacities at Ball State University.

James I. Penrod
James I. Penrod is the first vice president for information systems and CIO at University of Memphis. He was one of the first dozen chief information officers to be appointed in an institution of higher education and has served in that capacity at three other institutions. He holds a PhD in institutional management, a master’s in biostatistics and a bachelor’s in mathematics. He has been active in professional organizations for many years, serving on a variety of boards and committees such as CAUSE, EDUCOM, (now EDUCAUSE) and SIM.

Rosalind Latiner Raby
Rosalind Latiner Raby is the director of the consortium, California Colleges for International Education, and has worked in the field of internationalizing community college curriculum for over the past decade. She has been the community college coordinator of the INMP project since its inception. Her most recent publications include: “Community College Models: Ideals for Educational Reform” in Introducing Community Colleges to South Africa, Ed. A.H. Strydom & L.O.K. Lategan, University of the Free State: Bloemfontein South Africa (1998), and Looking to the Future: A Report on International and Global Education Activities in California Community Colleges, Chancellor’s Office of the California Community Colleges (1998).

Pablo Reguerin
Pablo Reguerin is the coordinator for information management and finance at the National Center for the Accelerated Schools Project. He has worked as a senior admissions counselor for the University of California, Santa Cruz on projects dealing with access to higher education, and worked with the University of California’s PUENTE Transfer Program on student advising, counselor training, and strategy development that aimed to increase transfer success at several community colleges throughout California. He has also worked as an information management consultant in higher education settings and taught various workshops on database design and information management. He received a master’s in education from the Department of Organization and Leadership at Columbia University, Teachers College.

Jamie Rodgers
Jamie Rodgers is a principal consultant with PricewaterhouseCoopers (PwC) in Toronto. His specialties are project management, business process improvement, and information systems design and implementation within the financial services industry and government. Prior to PwC, he was with Andersen Consulting. Jamie pursued his MS in information resources management at Syracuse University in parallel with his management consulting duties.
Kevin Ruthen
Kevin Ruthen is a consultant at IBM Global Services Banking Finance and Securities Division. He recently obtained his master’s of information resource management from the School of Information Studies at Syracuse University, where he also received his bachelor’s of science in information management. Ruthen is president and co-founder of Sportcon Consulting. Prior to IBM, he was a project manager for Prudential Securities in the New Technology Equity Trading Systems area.

James H. Ryan
James H. Ryan serves as Penn State’s vice president for outreach and cooperative extension. He oversees the coordination of the University’s external outreach initiatives and has responsibility for Continuing Education, Distance Education, Public Broadcasting, and Cooperative Extension. He has served as a faculty member in public administration and held various administrative positions in academic affairs, institutional advancement, and student personnel with Indiana University and at the State University of New York at Buffalo. He received his baccalaureate, masters, and doctoral degrees from SUNY, Buffalo. His doctorate is in the sociology of education and higher education administration, with an emphasis on organizational development.

Morrie Schulman
Morrie Schulman is a systems analyst for the CIT. He was the principal investigator for the Web Tool Selection Committee, participated in the licensing of WebCT and is its systems administrator. He has been with the CIT since 1997, when he returned to the University after running a small business for 20 years. He holds a master’s degree in educational psychology with emphasis on program evaluation and is near completion on a second master’s degree in library and information science. He has worked as an educational program evaluator and has taught at Austin Community Schools and Austin Community College.

Scott R. Sechrist
Scott Sechrist is an associate professor and program director of the Nuclear Medicine Technology Program at Old Dominion University in Norfolk, Virginia. He has taught several courses in radiation physics and medical terminology via the TELETECHNET program at Old Dominion University. This program is an integrated television, computer, and audio system providing undergraduate and graduate instruction throughout Virginia and to additional sites throughout the United States. He received a grant from the American Cancer Society to create computer-based smoking prevention programs for preschool-aged children. He is a doctoral candidate in the higher education program at the College of William and Mary in Williamsburg, Virginia.

Andreea M. Serban
Andreea M. Serban is the director of institutional assessment, research and planning at Santa Barbara City College. Prior to joining Santa Barbara City College, Dr. Serban had research and faculty positions at University of Redlands, Rockefeller Institute of Government, State University of New York System Administration, Institute for Educational Sciences and University of Bucharest. Her research interests are in the areas of performance funding, reporting and measurement, and state budgeting for higher education. Her experience
includes policy analysis, higher education planning and finance, qualitative and quantitative research, mathematics and statistics, data analysis and management, and applications of computer technologies.

Kandis M. Smith
Kandis M. Smith is the special assistant to the vice president for academic affairs at the University of Missouri System. She received a PhD in higher education from the University of Missouri-Columbia. Her current research interests are in the areas of teaching and information technology, issues of equity and diversity, and development of collaborative programming. She is currently working with a number of diverse groups to develop innovative uses of technology to enhance teaching and learning.

Richard Smith
Richard Smith is assistant professor of communication in the Faculty of Applied Science in Simon Fraser University, Burnaby, British Columbia. He is also director of the Centre for Policy Research on Science and Technology (CPROST) at Simon Fraser University at Harbour Centre, in Vancouver, British Columbia. His research looks at the innovation process for new products and services in telecommunications and financial services industries, policy studies of new applications for information technology for universities as well as the primary and secondary school environment, and the role of social capital in the management of innovation and collaborative research and development. He holds MA and PhD degrees from Simon Fraser University in Burnaby, Canada.

Robert S. Stephenson
Robert S. Stephenson, an expert on the biophysics of insect photoreceptors, is associate professor in the Department of Biological Sciences at Wayne State University in Detroit, Michigan. For the last three years he has taught a successful online physiology course at Wayne State. The course has both lecture and Internet-only sections, and is based on 550 Web pages, as well as RealVideo asynchronous broadcast of the videotaped lectures and an electronic discussion board. Dr. Stephenson is the founder and chief architect of the Harvey Project, an open course project to develop free, online rich content for teaching physiology. He holds a PhD from MIT and is a Sun Microsystems certified Java programmer.

Gary Wee
Gary Wee is vice president and director for a leading European bank in derivatives and global relative value. His background includes 12 years of trading various fixed-income and equity portfolios, and he has several years of experience with financial system design and architecture. He co-founded Tux Communications Inc., a company which develops and markets products focused on real-time data publishing and Internet-based collaborative technology. He completed an MS in information management at Syracuse in 1999.
