About the Contributors

**Dimitrios I. Fotiadis** received the Diploma degree in chemical engineering from the National Technical University of Athens, Athens, Greece, in 1985, and the Ph.D. degree in chemical engineering and materials Science from the University of Minnesota, Minneapolis, MN, in 1990. He is currently a Professor of biomedical engineering in the Department of Materials Science and Engineering, the Director of the Unit of Medical Technology and Intelligent Information Systems, Department of Materials Science and Engineering, University of Ioannina, Ioannina, Greece, and an Affiliated Member of FORTH, Biomedical Research Institute. He was a Visiting Researcher at the RWTH, Aachen, Germany and the Massachusetts Institute of Technology, Boston, MA. He has published more than 150 papers in scientific journals, 280 papers in peer-reviewed conference proceedings, and more than 30 chapters in books. He is the editor of 16 books. His research interests include modeling of human tissues and organs, intelligent wearable devices for automated diagnosis and bioinformatics. His work has received more than 1,700 citations (Scopus).

***

**Isabel Machado Alexandre** is an Assistant Professor in the International School of Technology and Architecture of ISCTE – Instituto Universitário de Lisboa. She is also the group leader of Information Technology Group, a research group on mainly on artificial intelligence at IT-IUL (delegation of IT – Instituto de Telecomunicações at ISCTE-IUL). Her main scientific interests lay in the area of Artificial Intelligence applied to Education, Autonomous Agents and Interactive Applications. She has published more than 35 papers in proceedings of international conferences, 3 journal papers, 6 book chapters and edited 2 books.

**Álvaro Alvares de Carvalho César Sobrinho** has a B.Sc. degree in Systems Analysis from the CESMAC University Center (2010), a M.Sc. degree in Computational Modeling of Knowledge from the Federal University of Alagoas (2013), and is a Ph.D. degree candidate in Computer Science from the Federal University of Campina Grande. His research interests are formal methods, pervasive computing, and embedded systems.

**Athanasios Anastasiou** received his Bachelor degree in Electrical & Electronic Engineering from the University of Newcastle Upon Tyne, in 2005. In 2006, he received his M.Sc. degree in Digital Signal & Image Processing from the University of Central Lancashire. Likewise, in 2009 he obtained his second M.Sc. degree in Biomedical Engineering held by the University of Patras and the National Technical
University of Athens (N.T.U.A.). Since 2011, he is a member of the Biomedical Engineering Laboratory of N.T.U.A., and a Ph.D. candidate in Biomedical Engineering (University of Patras and N.T.U.A.). His current research interests comprise Bioinformatics, Biosignal Processing, Digital Image Processing and technologies for assisted living. He is a Member of the Institute of Electrical and Electronics Engineers (IEEE) - EMBS Society and Computer Society, Member of the Institution of Engineering and Technology (IET) and a member of the Technical Chamber of Greece (TEE).

**Stavros Archondakis** is a Cytopathologist MD. He serves as director of Cytopathology Department of 401 Athens μΙΑΤΑΠΥ Hospital. He has graduated from Thessaloniki Medical School and National Military Medical School in 1996. Since 2007, he is appointed assessor of the Hellenic Accreditation System (ESYD) for the accreditation of medical laboratories according to ISO 15189:2012. He speaks English and French. He is member of Hellenic Society of Clinical Cytopathology, Society of Medical Studies and Society for Quality Management in the Health Sector. He is the author of 29 medical books, some of them awarded by the Greek Anticancer Society. He has participated with posters and oral presentations in more than 200 congresses and seminars, he has authored more than 25 articles in greek and foreign medical journals. He possesses more than 800 hours of teaching experience in medical and paramedical schools.

**Maria Teresa Arredondo Waldmeyer** is full Professor of Bioengineering at the Telecommunication Engineering Faculty - Technical University of Madrid (UPM). Presently, she is Director of LifeSTech, Director of the Vodafone Chair and Director of International Latin-America Affairs of UPM. Prof. Arredondo has been Principal Researcher of more than 50 Granted Scientific & Technical Projects and EU-funded Projects dealing with Ambient Intelligence applied to the social and healthcare sector environments. Especially, in the areas of: advanced and smart graphical user interfaces and human factors evaluation; systems and services for people with special needs; mobile access to information services; tele-psychiatry, homecare; and intelligent biomedical clothes. She has been leading the UPM participation in some of the most challenging projects funded by the EU in the seventh framework program in the area of e-Health (HeartCycle, METABO, CogWatch and PERFORM) during the last years and currently she is involved in different ongoing projects (MOSAIC and PD_manager). She is the author of 10 books and more than 300 scientific papers.

**Pantelis A. Asvestas** received his Diploma in Engineering from the Department of Electrical and Computer Engineering of the National Technical University of Athens, Greece in 1996 and the title of Doctor in Engineering from the same Department in 2001, on medical image processing. From 2003 till today he has been working as an electrical engineer, participating in R&D projects. On May 2008, he has been appointed in the Department of Biomedical Engineering. His research interests cover the following fields: classification of biosignals and medical images using artificial intelligence, Image processing, Registration and fusion of medical data, 3D visualization of medical data, Biometrics, Real time video processing, Fractal analysis of images. Dr. Asvestas has co-authored 35 papers in international scientific journals and 62 scientific publications in book chapters, proceedings of international or national congresses and national scientific magazines.

**Ederson Bastiani** is a professor at Federal Institute Farroupilha (Brazil). He is graduated in Systems Information by Centro Universitário Franciscano (Brazil) and holds master degree in Computer Scien-
ence at Federal University of Santa Maria (Brazil). His interests include pervasive computing applied to healthcare, distributed systems and web development.

**Aníbal Caixinha** has a Master in Computer Science Engineering from the International School of Technology and Architecture of ISCTE – Instituto Universitário de Lisboa. He is also researcher of IT-IUL (delegation of IT – Instituto de Telecomunicações at ISCTE-IUL) and works as Software Development Engineer at ActOne. His professional work experience has been around managing, designing and developing intranet web applications, mostly, in a corporate environment.

**Jorge Cancela** received the B.S. in Telecommunications Engineering and the M.Sc. degree in Telemedicine and Biomedical engineering from Universidad Politecnica de Madrid, Spain, in 2009. Currently he is PhD candidate in Biomedical Engineering at the Universidad Politecnica de Madrid (UPM). He works as research engineer at Life Supporting Technologies (LifeSTech) group at UPM. He has been involved in several R&D projects dealing with the use of Information and Communication Technologies (ICT) in the areas of eHealth, mHealth and wearable technologies for health. His main research interests are: algorithms, signal processing and modelling; Human-Computer Interaction (User Experience, Usability, Wearability, Gamification) and Health Technology Assessment in the context of eHealth, mHealth, telehealth and wearable systems for health.

**Manuel Casanova** made his residency training in neurology and then spent 3 years doing a fellowship in neuropathology at The Johns Hopkins Hospital. During his stay at the Johns Hopkins Hospital, Dr. Casanova was in-charge of Pediatric Neuropathology, a fact which kindled his interest in developmental disorders of the brain. His clinical experience was enhanced by appointments as either a consultant or staff neuropathologist at Sinai Hospital (Maryland), the North Charles Hospital and the D.C. General Hospital. He spent several years as Deputy Medical Examiner for Washington, D.C., where he gained valuable experience in the post-mortem examination of Sudden Infant Death Syndrome and child abuse. His expertise in the field was recognized by honorary appointments as a Scientific Expert for the Armed Forces Institute of Pathology (AFIP) and as a Professorial Lecturer for the Department of Forensic Science at George Washington University. Dr. Casanova spent 8 years helping to establish 2 of the most successful brain banks in this country: The Johns Hopkins Brain Resource Center (3 years) and the Brain Bank Unit of the Clinical Brains Disorders Branch at the National Institutes of Mental Health (5 years). Dr. Casanova did training in psychiatry at the National Institutes of Mental Health under the tutelage of Drs. Richard Wyatt, Danny Weinberger, and Joel Kleinman. He retired as a Major in the US Army Reserves and later on as a Lt. Commander in the Public Health Service. He joined the Medical College of Georgia as a full Professor in 1991 and came to the University of Louisville in 2003 as the Gottfried and Gisela Kolb Endowed Chair in Psychiatry.

**Vassilia Costarides** has graduated from National Technical University of Athens, from the school of Mining and Metallurgical Engineering with a specialization in Materials Engineering. She proceeded her studies in Biomedical Engineering and has worked in the medical device industry for 6 years as a technical specialist. Since 2013 she has been participating in projects regarding public health, medical device nomenclature, health technology assessment and medical device technical specifications. Among her interests is also quality in health care and she is an ISO9001:2008 and ISO13485:2003 auditor. She is currently a PhD candidate in Biomedical Engineering in the National Technical University of Athens.
and a member of the Biomedical Engineering Lab and Applied Informatics in m-Health research team. She is also a member of the Technical Chamber of Greece.

**Paulo César do Nascimento Cunha** is graduated in Biomedical Systems from the State University of Health Sciences of Alagoas (2009), and has a M.Sc. degree in Computational Modelling of Knowledge from the Federal University of Alagoas (2012). He is a professor at the State University of Health Sciences of Alagoas with experience in electronics, with emphasis on R&D Systems, acting on the following topics: Microcontroller, Operational Amplifier, and Biomedical Instrumentation.

**Leandro Dias da Silva** has a B.Sc. degree in Computer Science from the Federal University of Alagoas (1999), Masters in Electrical Engineering from the Federal University of Paraíba (2002) and Ph.D. in Electrical Engineering from the Federal University of Campina Grande (2006). He is currently a Professor at the Computing Institute, Federal University of Alagoas and Coordinator of the Posgraduate Program in Computer Science at IC / UFAL. He has experience in the area of Computer Science, with emphasis in Software Engineering, mainly in the following topics: petri nets, model checking, flexible manufacturing systems, colored petri nets, timed automata, ubiquitous and pervasive computing, medical informatics and component-based development.

**Niraj Doshi** has recently defended his PhD in Computer Vision from Loughborough University, U.K. Before starting his PhD, he gained his Masters in Digital Imaging, Computer Graphics and Vision from the same university. He has Bachelor’s degree in Biomedical Engineering, Mumbai University, India. His research interest is medical image analysis, computer vision, pattern recognition and texture analysis.

**Ayman El-Baz, Ph.D.,** Associate Professor and University Scholar in the Department of Bioengineering at the University of Louisville, KY. Dr. El-Baz earned his bachelor’s and master degrees in Electrical Engineering in 1997 and 2001. He earned his doctoral degrees in electrical engineering from the University of Louisville in 2006. In 2009, Dr. El-Baz was named a Coulter Fellow for his contribution in the biomedical translational research. Dr. El-Baz has 13 years of hands-on experience in the fields of bio-imaging modeling and non-invasive computer-assisted diagnosis systems. He has developed new techniques for the accurate identification of probability mixtures for segmenting multi-modal images, new probability models, and model-based algorithms for recognizing lung nodules and blood vessels in magnetic resonance and computer tomography imaging systems, as well as new registration techniques based on multiple second-order signal statistics, all of which have been reported at multiple international conferences and journal articles. His work related to novel image analysis techniques for autism, dyslexia, and lung cancer has earned multiple awards, including the Wallace H. Coulter Foundation Early Career Translational Research Award in Biomedical Engineering Phase I & Phase II, a Research Scholar Grant from the American Cancer Society (ACS), first place at the annual Research Louisville 2002, 2005, 2006, 2008, 2009, 2010, 2011 and 2012 meetings, and the “Best Paper Award in Medical Image Processing” from the prestigious ICGST International Conference on Graphics, Vision and Image Processing (GVIP-2005). He has been the PI of five research projects that are funded by the Coulter Foundation, PI of a research project funded by the American Cancer Society, and co-PI on two R01 projects awarded by the NIH. Based on these awards, he developed a new CAD system for early diagnosis of lung cancer. PulmoCADx, Inc. (St. Louis, MO 63108, USA) has licensed this lung CAD system. He has authored or coauthored more than 300 technical articles (72 journals, 8 books, 30 book
chapters, 135 refereed-conference papers, 58 abstracts published in proceedings, and 12 US patents). The primary focal point of his research is to develop and implement innovative and ground-breaking techniques for use in image-guided surgeries and the creation of non-invasive image-based diagnostic systems, which can help to revolutionize the early diagnosis of numerous diseases and brain disorders. The work of his lab has achieved worldwide recognition and is helping to pave the way for upcoming cutting-edge medical systems. The current research projects in his lab include: 1) Development of techniques for the early diagnosis of lung cancer, based on analyzing the growth rate of detected lung nodules found in CT images, 2) Development of techniques for the early diagnosis of Autism, based on using magnetic resonance images to analysis various brain structures (e.g., brain cortex, corpus callosum,...), 3) Development of techniques for the early detection of Acute renal rejection, based on using dynamic magnetic resonance images, 4) Development of techniques for the early diagnosis of prostate cancer using non-invasive diffusion magnetic resonance images, and 5) Development of image based systems for the early detection of heart failure using tagged, cine, and late contrast magnetic resonance images.

Maria Eliete Pinheiro is a Medical Doctor, Professor of Medicine, PhD in Nephrology, and Coordinator of the Integrated Center of Nephrology, Federal University of Alagoas, HUPAA/UFAL.

Ahmed Elnakib, Assistant Professor, Electronics and Communications Engineering Department, Mansoura University. Dr. Elnakib received his B.Sc. and M.S. degrees from Mansoura University, Egypt, in 2003 and 2007, respectively. He received his PhD degree from university of Louisville, USA, in 2013. His current research includes developing new computer aided diagnostic systems, image modeling, image segmentation and registration, and shape analysis of medical structures. He has authored or coauthored more than 50 technical articles, appeared in world-renown journals including Medical Physics and IEEE TITB. Mr. Elnakib is a regular reviewer for a number of technical journals including Medical Image Analysis, IEEE TMI and IEEE TIP. He was the recipient of the John Houchens Prize for the Outstanding Dissertation, 2013.

Joan Escarrabill, MD PhD, is a respiratory physician and currently the Director of the Chronic Care Program at Hospital Clinic (Barcelona) and the Director of the Master Plan for Respiratory Diseases (PDMAR) at the Ministry of Health since 2009. Since 2012 he is the scientific director of Home Respiratory Therapies Observatory. At the Hospital Clinic, through chronic care program, he promotes transversal policies regarding information and therapeutic education, transitional care, geriatric care and adherence programs and management of polypharmacy. A main driving force of the program is to promote the role of the patient, both in the design of materials and in the evaluation. Regarding the Master Plan he works in the management of COPD exacerbations, with a special interest in readmissions. And at the Observatory, he promotes research related to the variability of clinical practice in long-term oxygen therapy and home mechanical ventilation.

Mireia Espallargues. Medical Doctor, Ph.D. in Medicine and Surgery, Postgraduate Diploma in Design and Statistics for Research in Health Sciences, Master in Public Health and Biomedical Research Methodology, Master in Health Care Services Management and Assessment, Degree of Specialist in Preventive Medicine and Public Health and Master in Leadership and Management of Science and Innovation. Currently acting Assistant Director of the Assessment Area of the Agency for Quality and Assessment of Catalonia (AQuAS). During 2003-04 she was on post-doctoral research stage with the
Health Economy Group of the School of Health and Related Research (ScHARR) of the University of Sheffield, UK. She has been the main researcher of different competitive projects in Spain and WP leader or collaborator researcher in European projects, as well as member of different health services research collaborative networks (IRYSS, CIBERESP, REDISSEC) and currently Chief Operating Officer of the Barcelona WHO-FIC Network at AQuAS. Her areas of interest are related to effectiveness measurement and clinical practice variations, assessment of health technologies, clinical effectiveness, prioritisation of interventions and patient’s reported outcomes. He has advised, reviewed and participated in several evidence-based clinical practice guidelines (CPG). And she is the author or co-author of several technical reports as well as scientific publications. Currently, one of its main areas of work revolves around the assessment of chronic care.

**Themis P. Exarchos**, male, was born in Ioannina, Greece, in 1980. He received the Diploma degree in computer engineering and informatics from the University of Patras, Patras, Greece, in 2003 and the PhD degree from the Dept. of Medical Physics of the University of Ioannina. His PhD thesis is entitled Data Mining and Healthcare decision support systems. His research interests include modelling of biological procedures, medical data mining, decision support systems in healthcare, and biomedical applications. Dr. Exarchos has worked in several R&D projects and has published more than 120 papers in scientific journals, conferences and books.

**Carlos Fernandes Baeta** is Physician, Specialist and Head of Department of Internal Medicine; - He was a member of the Executive Board of the FCM-UNL and President of the Student Association of the FCM-UNL; - He was Director of Service and of the Department of Internal Medicine, Chairman of the Pharmacy and Therapeutics Commission and Accessor of the Clinical Director of ULSNA, epe, - Graduate in Mediterranean Diet at the University of Barcelona and in Clinical Nutrition at the University of Navarra; - He has delivered more than 300 communications, coordinator of several scientific studies, National Coordinator of two multicenter international clinical studies and Principal Investigator of over 12 multicenter national and international scientific studies; - Moderator of lecture roundtables and guest in various national and international congresses and scientific meetings; - Organized more than 100 scientific meetings and was the Chairman of the 19th National Congress of Atherosclerosis; - He was a member of the Working Group of Echocardiography, of the Intra-Vascular UltraSound Study Group and of the Sub-group Stress Echo, in the European Society of Cardiology; - Participated in the European Stroke Initiative; - Was the responsible Physician of the ICU of the Hospital de Portalegre, between 1991-1995; - President of the Jury of various graduations and providing Physicians competitions and for the acquisition of clinical material; - Advisor of resident Physicians; - Founding member of various civil and scientific institutions and various working groups; - He was the scientific director of the “INFORME” project, funded by the Telematics Programme of the European Union; - He was member: of the Editorial Board of the Bulletin of the Portuguese Society of Intensive Care; of the Board of drafting the proposed subspecialty of Critical Care Medicine; of the workgroups for quality certification by the Kings Fund and the Manchester Triage system in the Hospital de Portalegre.

**Nenad Filipovic** is Professor of Biomechanics and Informatics at the Mechanical Engineering Faculty of the University of Kragujevac (Serbia). His research interests are in the area of fluid mechanics, coupled problems; fluid-structure interaction, heat transfer; biofluid mechanics; biomechanics, multi-scale modeling, discrete modeling, molecular dynamics, computational chemistry and bioprocess modeling. He
is author and co-author 6 textbooks and 3 monographs on English language, over 120 publications in peer review journals and over 5 software for modeling with finite element method and discrete methods from fluid mechanics and multiphysics. He is Director of Center for Bioengineering at University of Kragujevac and leads joint research projects with Harvard University and University of Texas in area of bio-nano-medicine computer simulation. He also leads a number of national and international projects in area of bioengineering. He was awarded with Young Scientist Award on the Second MIT Conference on Computational Fluid & Solid Mechanics, (Ed. K.J. Bathe), Boston, USA. He is a Managing Editor for Journal of Serbian Society for Computational Mechanics and member of European Society of Biomechanics (ESB) and European Society for Artificial Organs (ESAO).

**Diamantino Freitas**, graduated in Electrotechnical Engineering and PhD in Electrotechnical and Computer Engineering by the Faculty of Engineering of the University of Porto, in 1976 and 1991, respectively, has teaching functions at the Electrotechnical and Computer Engineering Department of that Faculty since 1974, presently with a position of Associate Professor. Has been member of several national and international projects and national delegate to R&D actions with functions of collaboration and/or coordination, namely COST Action 219 - “Future telecommunications and tele-informatics facilities for disabled persons” and its successors. The main areas of interest both for teaching and R&D have been Telecommunications and Accessibility for Persons with Special Needs, Automatic Speech Processing, Acoustics and Electroacoustics, Bioengineering and Rehabilitation Engineering. From 2009 to March 2015, was author or co-author of 16 papers in international conferences with proceedings, 3 international book chapters, 13 international journal papers and 2 patents (please check most of this information at https://sigarra.up.pt/feup/en/FUNC_GERAL.FORMVIEW?p_codigo=208644).

**Leandro O. Freitas** is professor at Polytechnic School of the Federal University of Santa Maria - RS, in Brazil, where teaches classes in the courses of Technical Informatics and Technology in Internet Systems. He has Master degree in Computer Science at Federal University of Santa Maria and bachelor’s degree in Information Systems at University Center Franciscano. Currently, he develops researches in the areas of pervasive and ubiquitous computing, and ontologies applied to health spaces, like hospitals and homecare environments, using workflow models to describe the development of applications for this kind of domains. His work also approaches real-time decision support systems applied to Ambient Assisted Living and Ambient Intelligence.

**Eleni I. Georga** received the bachelor degree in Computer Science from the Department of Computer Science, University of Ioannina, Greece in 2005 and the M.Sc. degree in the area of technology and applications from the Department of Computer Science, University of Ioannina, Greece in 2008. Today she is PhD candidate in University of Ioannina, and her PhD thesis concerns the predictive modeling of glucose metabolism of diabetic patients using physiological compartmental models, machine learning techniques and time series analysis. Mrs. Georga has been involved in research projects where she has performed research in data mining, clinical decision support, mobile computing, context-aware applications and patient monitoring systems. She has published 1 book chapter, 3 journal articles and 11 papers in international conferences.

**Georgy Gimel’farb** received an equivalent to the Ph.D. degree of Candidate of Engineering Sciences in Engineering Cybernetics from the Academy of Sciences of the Ukrainian SSR, Kiev, Ukraine, in 1969.
and the advanced Doctor of Engineering Sciences degree in Control in Engineering Systems from the Higher Certifying Commission of the USSR, Moscow, USSR, in 1991. His research interests include probabilistic image modeling, statistical pattern recognition, texture analysis in medical and remotely sensed images, and computational stereo vision. After working for a long time at the V. M. Glushkov’s Institute of Cybernetics of the Ukrainian Academy of Sciences, he joined in 1997 The University of Auckland (Auckland, New Zealand), where he is currently a Professor in Computer Science and a co-Director of the Intelligent Vision System Laboratory. He authored or co-authored more than 60 journal articles, 255 papers in peer-reviewed conference proceedings, 65 book chapters, 4 patents, and 6 books, including the monograph “Image Textures and Gibbs Random Fields” (Kluwer Academic, 1999). He is a recipient of the prestigious State Premium of Ukraine in Science and Technology for 1997 for fundamental and applied research results in image and signal recognition and development on their basis of intelligent information technologies and systems.

**Kostas Giokas** has since 1994, had a long career in consulting in several companies in the UK and Greece. He graduated in 2000 from the University of Westminster in London, UK obtaining a BSc in Business Information Technology. He received his MBA from the UK Open University in 2002. He then joined the Biomedical Engineering Laboratory of the National Technical University of Athens where he worked as a Researcher in Biomedical Engineering focusing on large network analysis, design and deployment while consulting on National and European deployment projects. At the same time he is part of the R&D team that undertakes EU research projects in BEL. He has been involved in research proposals leading more than 35 of them. He has been team member/leader in more than 20 European and National research projects in the field of health informatics and has published 50 scientific papers. He is currently the leader of the Applied Informatics in mHealth (AiM) Research Team.

**Betania Groba** is Occupational Therapist Researcher at RNASA IMEDIR group research and associated teacher at Faculty of Health Science (A Coruña, Spain). Currently, student of Health Science doctorate with studies in autism spectrum disorders and Information and Communication Technologies.

**Maria Haritou**, MSc, PhD, received a degree in Physics from the University of Patras in 1990, a M.Sc. in Medical Physics and Ph.D. in Biophysics & Biomedical Eng. from the European Post Graduate Programme in Medical Physics and Biomedical Eng. (UoPatras and NTUA) in 1992 and 1999 respectively. She has worked as Associated Scientist at the Institute of Communication and Computer Systems (ICCS) from 1992 to 2002. Since April 2002 she is working as permanent research staff at ICCS where currently she holds the position of a Research Director. Her main areas of expertise in basic and applied research are in cell membrane electroporation and electrofusion, clinical hemorheology and biorheology, cell membrane biochemistry, modelling of biological systems, artificial intelligence and clinical decision support systems, design of telemedicine and home care applications, e-Health systems and services. She has published 60 papers in international journals and conference proceedings in her areas of expertise. She has been the principal investigator of 22 R&D projects from 1998 to now, and participated in more than 15 others. She was the Project Manager of the AAL-2008-1 project “ALADDIN”.

**Dimitra Iliopoulou** has received her Degree in Electrical & Computer Engineering from the National Technical University of Athens in 2001. She received her PhD in 2009 (A smart integrated system for the consultation and management of Diabetes Melitus) in NTUA’s Biomedical Engineering Laboratory
in which she has studied and applied informatics and telematic methods in several areas in the field of health services and in particular related to diabetes. She has worked in IT and Telecoms in several companies (Multimedia A.E. – DOL, Bull ATS, Datamed SA, Omnis M.). She also has great experience in the field of health telecommunications and informatics as she has been active in several European and National Research projects in regards to the application of IT in health.

**Petros Karakitsos** is a Cytopathologist MD and has been the Director of the Department of Cytopathology of the University General Hospital “ATTIKON” in Athens from 2004. His main research interests include: a) Human papillomavirus epidemiology, pathology of infection and mechanisms that lead to cervical carcinogenesis, b) current DNA and or RNA methods for viral and microbial detection and typing, including respiratory, genital and gastrointestinal viruses, c) study of molecular mechanisms for cancer development in lung, cervical, endometrial and colon cancer and d) neural networks and advanced bioinformatic methods for maximization of diagnostic accuracy and optimal triaging of patients. He has over 140 peer reviewed publications and over 200 presentations in international and Hellenic congresses.

**Spyridon Konitsiotis** was born in Corfu, Greece, in 1963. He received the M.D. degree from the University of Ioannina Medical School, Ioannina, Greece, in 1987, and the Ph.D. degree from the National Institutes of Health, Bethesda, MD, in 1990. His Ph.D. thesis focused on the neuropharmacology of basal ganglia. Since 2000, he has been with the University of Ioannina Medical School, where he is currently an Assistant Professor of Neurology. His research interests include movement disorders, Parkinson’s disease, neuropharmacology, and drug-induced movement disorders.

**Christine Kottaridi**, Biologist, has a PhD in Applied Microbiology-Virology and a MSc in “Biology Applications to Medicine”. She has been a research associate of the Department of Cytopathology, Athens University General Hospital “ATTIKON” from 2008. She has 30 published papers in peer-reviewed journals and several announcements in International and Hellenic congresses. Her research interests are focused on evaluation of experimental protocols concerning molecular and cellular mechanisms of pathogen emergence, public health, virus evolution, epidemiology and surveillance.

**Vasilios Kouloulas** earned a degree in Physics at University of Athens (1987). Phd in Biomedical Engineering at National Technical University of Athens - NTUA (1994). Degree in Medicine at University of Athens (1996). Specialization in Radiation Oncology at Aretaieion university Hospital (2000). Post-Doc in quality assurance in radiotherapy at EORTC, Brussels (2002). PhD in Clinical Oncology at University of Athens (2004). Elected Assistant Professor Radiation oncology in Medical School of Athens (2004). Dr. Kouloulas has authored and co-authored up to now more than 160 manuscripts in peer reviewed journals with more than 1300 citations and H-factor of 20. He is the director of radiotherapy unit of 2nd Department of Radiology in ATTIKON University Hospital, while he is also collaborating with the Electrical and Computer Engineering of the NTUA.

**Georgia Koutsouri** obtained her Engineering Diploma from Electrical and Computer Engineering (ECE) department of University of Patras, Greece, in 2010. She then obtained her PhD diploma from the Biomedical Engineering Laboratory at the National Technical University of Athens, Greece, in 2014. She is currently a researcher at Institute of Communication and Computer Systems (ICCS), working on several projects. Her research interests include the areas of machine learning, data mining and image
Dimitris Koutsouris was born in Serres, Greece in 1955. He received his Diploma in Electrical Engineering in 1978 (Greece), DEA in Biomechanics in 1979 (France), Doctorat in Genie Biologie Medicale (France), Doctorat d’ Etat in Biomedical Engineering 1984 (France). Since 1986 he was research associate on the USC (Los Angeles), René Descartes (Paris) and Assoc. Professor at the Dept. of Electrical & Computers Engineering of National Technical University of Athens. He is currently Professor and Head of the Biomedical Engineering Laboratory. He has published over 150 research articles and book chapters and more than 350 peer reviewed conference communications. He has been the former elected president of the Hellenic Society of Biomedical Technology, HL7 Hellas and Chairman at the School of Electrical and Computer Engineering. Prof. D. Koutsouris has been principal investigator in more than 100 European and National Research programs, especially in the field of Telematics and Informatics in Healthcare. His work has received more than 1800 citations.

George I. Lambrou is a biologist who received his training at the Philipps-Universität, Marburg Germany (Diplom) and his PhD from the Medical School of the University of Athens. He has specialized in developmental biology, neurochemistry and molecular oncology. His main research interests include tumor cell proliferation dynamics, in particular nonlinear and chaotic models, as well as pharmacogenomics with emphasis on the glucocorticoid receptor NFκB signal transduction pathway and resistance to glucocorticoid-induced apoptosis. He is also occupied with modeling methodologies and computational biology approaches, along with high-throughput methodologies, such as microarrays.

Giovani R. Librelotto is a Professor at Universidade Federal de Santa Maria (UFSM). He teaches in computer science and information system courses. He received his PhD in Computer Science from the University of Minho, Portugal in 2005. He is a frequent author and speaker on ontologies specification, pervasive computing, web semantic, and programming language design. At this moment, he is applying ontologies into bioinformatics problems related to cancer.

Javier Pereira Loureiro, associate professor at the Faculty of Health Science from the Universidade da Coruña (UDC), Spain. He received his Msc in Computer Science from the UDC in 1995 and in 1997 he received his Master degree in Computer Science. He also received his Ph.D. in Computer Science from the UDC in 2004. His research interests include telemedicine and tele-diagnostic, medical informatics, accessibility and assistive technologies for people with disabilities.

Swanirbhar Majumder is writer of book “Time Plane, Feature Extraction of ECG wave and Abnormality Detection”, and book Chapters in IGI Global and Springer with around 50 papers in International Journals & Conferences. He did his B.tech in Electronics and Comm Engg from North Eastern Hill University, Meghalaya, india and M.tech from Dept of Applied Physics of the prestigious University of Calcutta, West Bengal india. Since 2006 he has been working as an Asst Professor in the Dept of Electronics & Comm Engg in NERIST, a Deemed University in Arunachal Pradesh, India. His research interests are, signal and image processing, biomedical signal processing, biometrics, ANN and embedded systems.
About the Contributors

Yiannis Makris has a Ph.D. in Medical and Molecular Genetics from Kings College London in cooperation with Medical School of University of Athens. He also holds a BSE in Nursing (University of Athens), M.Sc. in Molecular Biology (UCL, London) and a diploma in Bioinformatics (MIT, Boston). His Ph.D. thesis included the identification and characterization of the gene responsible for the genetic disease orofacial clefting. He is a scientific collaborator in the Electrical Engineering Department of National Technical University of Athens since 2007 and in the Chemical Engineering Department since 2013 and has active participation in various European Union programs. He prepares and teaches the postgraduate course ‘Introduction to Bioinformatics’. He is also the owner of CELLETHA company which deals with novel biofuel processes and an internet entrepreneur dealing with affiliate marketing. His scientific specialization and interests include Bioinformatics, Data Mining, Biomedical Technology, Microarrays, Gene Therapy and Medical Information Technology.

Vasiliki Markaki obtained the Diploma of Electrical and Computer Engineering from National Technical University of Athens, Greece, in 2003 and the PhD degree from the same school in 2012. Her research interests include medical image analysis, processing and registration.

Tino Martí is International Area manager at TicSalut responsible of coordinating of EU ehealth projects in integrated care, mobile health and personal health records. He is also finance manager at CASAP, a primary care consortium in Castelldefels. His 15 years experience in the health sector encompasses different positions in the area of healthcare management and health policy in the Catalan Department of Health and ICS as well as international healthcare consulting for WHO Europe and IASIST. Tino is economist and holds a Master degree in Health Economics and Healthcare Management by University Pompeu Fabra. Founding member of Bsailut and editor of RISAI, Journal of Healthcare Innovation and Integrated Care.

George K. Matsopoulos is an Associate Professor at the School of Electrical and Computer Engineering of the National Technical University of Athens. He received the diploma in Electrical Engineering in 1988 from the National Technical University of Athens (NTUA), Athens, Greece. He received the M.Sc. degree in 1989 and the Ph.D. degree in 1993 from Bioengineering Unit at the University of Strathclyde, U.K. His interests are nonlinear image processing applied to medical applications, 2-D and 3-D registration of medical images, computer vision applications and Web-based medical systems for telemedicine application and remote image processing. He published more than 200 papers in international journals, conferences, and scientific books.

Leonardo Melo de Medeiros received the M.Sc. degree in Computer Science from Universidade Federal de Pernambuco, Recife, Brazil he researched with requirements engineering for distributed software teams. Currently, he is working toward the Ph. D. degree in Computer Science at Universidade Federal de Campina Grande, PB - Brazil. His current research is monitoring patients with Parkinson’s disease using Health Games in the Embedded Lab - UFCG. In the past he worked with distributed global software teams developing embedded software for cell phones with different companies. He is currently Assistant Professor in Information System bachelor’s degree at Federal Institute of Alagoas, Maceió - Brazil.

David José Murteira Mendes, born in Évora (Portugal) in the 4th of July of 1966 delivered his thesis to achieve a PhD degree in Computer Science in Universidade de Évora (Portugal). Previously he owns
a MSc in Applied Artificial Intelligence also from the same University, a MBA from Universidad de Extremadura (Badajoz, Spain) a BSc in Computer Science from Universidade Nova de Lisboa (Portugal). He has developed a Software Engineer career from 1989 and developed mainly software for government organizations in particular for Hospitals intended both for management and clinical support. He acted as IT coordinator near the Mozambican Health Ministry after having designed the national Health Information System according to the governments memorandum “Health Strategic Program 2009/14”. He has special interest in scuba diving being an active PADI instructor and underwater photographer.

Zarko Milosevic has an MSc in Mechanical Engineering and works as research engineer in Bio-engineering R&D in Kragujevac.

Josep Maria Monguet has a PhD in Industrial Engineering from the Higher School of Engineering of Barcelona. Professor at the Universitat Politècnica de Catalunya and Commissioner Design – UPC Vilanova. Academic director of the “Business, Design and Technology” master Telefonica - UPC Professional and research activity focused on innovation in the application of ICT and design in the Healthcare field. He has worked in innovation and research projects with industry and public organizations in areas of health processes simulation, telemedicine, eLearning and multimedia applications during the last 30 years. He has developed leading positions at UPC as Vice Rector, and as the Multimedia School founder and director. He has directed diverse postgraduate training initiatives in collaboration with industry and has participated in the creation of university’s spinoff.

Laura Nieto is Occupational Therapist Researcher at the RNASA-IMEDIR Group and associate professor at the Faculty of Health Sciences of the University of A Coruña (UDC). Currently, she is working on her doctoral thesis in the PhD Program in Health Sciences. Her research focuses on implementing and evaluating occupational therapy interventions with older people through technological tools.

Konstantina S. Nikita received the Diploma in electrical engineering (1986) and the Ph.D. degree (1990) from the National Technical University of Athens (NTUA), Greece. She then received the M.D. degree (1993) from the Medical School, University of Athens, Greece. From 1990 to 1996, she worked as a Researcher at the Institute of Communication and Computer Systems, NTUA. In 1996, she joined the School of Electrical and Computer Engineering, NTUA, as an Assistant Professor, and since 2005 she serves as a Professor, at the same School. Her current research interests include biomedical signal and image processing and analysis, biomedical informatics, simulation of physiological systems, medical imaging, biological effects and medical applications of radiofrequency electromagnetic fields. Dr. Nikita has authored or co-authored 154 papers in refereed international journals, 38 chapters in books, and over 300 papers in international conference proceedings. She is author or co-author of two books (Simulation of Physiological Systems, Medical Imaging Systems) in Greek and co-editor of one book (Computational Electromagnetics: State of the Art and Future Trends) in English published by Springer. She holds two patents. She has been the technical manager of several European and National Research and Development projects in the field of biomedical engineering. She has been honorary chair/chair/member of the program/organizing committee of more than 70 international conferences on the same fields (IEEE-IST, IEEE-BIBE, IEEE-ITAB, ICST-Mobihealth etc). She has served as keynote/invited speaker at several international conferences, symposia and workshops organized by NATO, WHO, ICNIRP, IEEE, URSI, COMCON, PIERS etc. She is member of the Editorial Board of the IEEE Trans-
actions on Biomedical Engineering and guest editor of several international journals on biomedical engineering subjects (IEEE Transactions on Information Technology in Biomedicine, Computerized Medical Imaging and Graphics, IOP Measurement Science and Technology, etc). She has been the advisor of twenty completed Ph.D. theses, several of which have received various awards. She has served as external evaluator in numerous University promotion committees and in international and national committees for grant proposal applications. Dr. Nikita has received various honors/awards, among which, the prestigious Bodossakis Foundation Academic Prize for exceptional achievements in “Theory and Applications of Information Technology in Medicine” (2003). She has been a member of the Board of Directors of the Hellenic National Academic Recognition and Information Center, a member of the Board of Directors of the Greek Atomic Energy Commission and a member of the National Council of Research and Technology. Dr. Nikita is a Senior member of the Institute of Electrical and Electronics Engineers (IEEE), a member of the Technical Chamber of Greece and a member of the Athens Medical Association. She is also the founding chair and ambassador of the IEEE-Engineering in Medicine and Biology Society, Greece chapter, vice chair of the IEEE Greece Section and deputy head of the School of Electrical and Computer Engineering of the NTUA.

**Dalibor Nikolic** was born on April 24th 1985 in Smed. Palanka, Serbia. He received master degree from the University of Kragujevac, Serbia in 2010 and currently is a PhD student on the same University. He is Research Associate at Research and Development Center for Bioengineering. His research interests focus on bioengineering and software engineering.

**Saurabh Pal** is currently serving as Assistant Professor in the Department of Applied Physics, University of Calcutta. Earlier he was with other degree engineering colleges and has more than 12 years experience in academics. He had done his B.Sc. with Physics (Hons.), B.Tech., M.Tech and PhD from University of Calcutta, India. Prior to join in academics, he was with Emerson Process Management as Junior Engineer. His major research area includes signal and image processing, biosignal acquisition and processing, medical image analysis and pattern recognition. He has published over 20 research papers in various national and international journals and conferences.

**Sofia Panteliou** received her 5 year BSc and PhD in Mechanical Engineering from the University of Patras, Greece in 1997 and 1984 respectively. She was hired as a Lecturer by the Mechanical Engineering Dept., University of Patras, where she was promoted to the Assistant and Associate Professor of Mechanical Design by the same Department in 1997 and 2003 respectively. The years 1994-1996 she performed Post doc studies at the Mechanical Engineering Dept., Washington University in St. Louis, U.S.A. Her specialty is “Dynamic behavior of thermomechanical continua. Design of mechanical and biomedical systems”. Currently she is retired and her interest is on the design and development of medical devices.

**Athanassios Papadopoulos** received his degree in Physics from the Department of Physics of the University of Patras, Greece in 1994. He completed his MS.c in Medical Physics at University of Surrey, U.K. He received his Ph.D from the Department of Medical Physics from University of Ioannina, Greece in 2006. He is a member of the research group of the Unit of Medical Technology and Intelligent Information Systems in University of Ioannina and his major research interests include medical image processing, medical decision support, computer-aided detection and diagnosis, machine learning and data mining. He is also serving as a Radiation Physicist in the Department of Nuclear medicine of
University Hospital of Ioannina, Greece. Dr. Papadopoulos is the co-editor and the author of a book and four book chapters, respectively, and is the author of more than twenty papers in scientific journals and several papers in international conference proceedings. He has participated in many European and National projects as a Technical manager, scientific and technical partner such as: CHRONIOUS (FP7), eHIF, INTERREG, TEMeTeN and CHILDCARE.

**Matteo Pastorino** has a B.Sc. in Telecommunication Engineering and M.Sc. in Information and Communication Technology by the Politécnico of Torino. He has collaborated in several R&D projects dealing with information and communication technologies (ICT) in the areas of e-Inclusion and e-Health. He has participated as an expert in developing algorithms of patterns recognition to detect motor disorders and design of models in patients with Parkinson Disease in PERFORM (FP7) project. Actually he is involved in the development of personalized home rehabilitation system (CogWatch – FP7) that aims to enhance the rehabilitation of stroke patients with physiological and cognitive impairments.

**Alejandro Pazos** has a PhD. in engineering informatics.

**Angelo Perkusich** is a professor at the Electrical Engineering Department (DEE), Federal University of Campina Grande (UFCG) since 2002. Dr. Perkusich has got his Ph.D and Master degrees in Electrical Engineering both from Federal University of Paráiba in 1988 and 1994, respectively. He was a visiting researcher at the Department of Computer Science, University of Pittsburgh, PA, USA, from 1992 to 1993, and developed research activities on software engineering and formal methods. He is currently the principal investigator of research projects financed by public institutions such as FINEP (Brazilian Agency for Research and Studies) and CNPq (Brazilian National Research Council), as well private companies such as Nokia Brasil, Petrobras, Envision, Compal, Samsung, Foxconn, and Positivo Informática. The main focus on such research projects are on embedded systems, mobile pervasive and ubiquitous computing, industrial automation, and open source software development. He has over 25
years of teaching experience in the university as well as training courses for industry in the context of software for real-time systems, software engineering, embedded systems, computer networks, formal methods, and Symbian and Mobile Linux operating system. His main research areas are: Embedded Systems, Software Engineering, Mobile Pervasive Computing and Formal Methods, with more than 250 papers published, and 60 master thesis and 10 doctoral dissertations advised.

**Irene Pimenta Rodrigues** is an associate professor at departamento de informática, Universidade de Évora. She works on Natural Language Processing, Artificial Intelligence and knowledge representation and reasoning.

**Kalliopi Platoni** received her MS and PhD in Medical Physics from the University of Paul Sabatier of Toulouse in France in 1995 and 1998 respectively. She has started working as medical physicist since 1999. Nowadays she is medical physicist at Radiation Oncology Unit of 2nd Department of Radiology, University Hospital ATTIKON, Greece. Author or co-author in 30 scientific papers published in peer-review journals having more than 200 scientific citations (h-index:6). Participation in many national and international congresses/seminars. More than five years educational experience in scientific lectures.

**Abraham Pouliakis** is physicist, holds an M.Sc. in electronics and radio-communications, and a Ph.D. degree from the Medical School (University of Athens) related to the application of neural networks in cytopathology diagnosis. Since 1993 he has participated in numerous National, European and European Space Agency Research projects related to information and communication technology, artificial intelligence applied in medicine, collaborative systems, e-learning and e-health. Currently he is senior researcher and responsible for quality control and assurance in the Department of Cytopathology, University of Athens, School of Medicine. He has 34 publications in international peer reviewed scientific magazines, more than 90 presentations in international and Greek conferences and is co-author of five books chapters. His research interests are related to information and communication technology, image/signal processing and artificial intelligence including their applications in the fields of industry and health.

**Thais Pousada** is PhD in Health Science by University of a Coruña. She is teaching at the degree of Occupational Therapy in Faculty of Health Science, and at Master of research and health assistance. She has done her research in the field of assistive technology to promote personal autonomy in person with disabilities. She is member of expert committee of Spanish Rare Diseases Federation.

**Milos Radovic** received his M.Sc. degree from Faculty of Mechanical Engineering, University of Kragujevac in 2009. He is PHD student and teaching assistant at Faculty of Engineering, University of Kragujevac. He participated in several national projects funded by Serbian ministry of education, science and technological development, and international projects funded by European commission. His research is focused on data mining and optimization. Radovic is author and co-author of 12 publications in international and national journals and 15 international conference publications.

**Cicero Volnei Jesus Ribeiro**, Bachelor of Science in Information Systems at Centro Universitário Luterano, ULBRA (2005). Specialist in Cryptography and Network Security at Universidade Federal Fluminense, UFF (2010). Master of Science in Computer Programming Language and Database at Universidade Federal de Santa Maria, UFSM (2014). Experience in Computer Science, with emphasis
on software development, database administration, network management and servers administration on Linux platform. Works with systems development since December 2000.

**Pedro Miguel Rodrigues** was born in Coimbra, Portugal, in 1988. He received his graduation and Master graduation in biomedical engineering, in 2009 and 2011, respectively, both from the Polytechnic Institute of Bragança, Portugal. Currently, he is currently working toward the Ph.D. degree with the Faculty of Engineering of the University of Porto (FEUP) at the Department of Electrical and Computer Engineering - FEUP. He is author of a several research articles and his research interest areas are related with signal processing and pattern recognition. Recently his research has been mainly focused in processing and discrimination of biomedical signals, especially electroencephalogram signals obtained from patients with neurological diseases.

**Igor Saveljic** was born on April 28th 1983 in Kragujevac and he received master degree from the University of Kragujevac, Serbia in 2009. Igor is working as Research Associate at Research and Development Center for Bioengineering and Faculty of Engineering at University of Kragujevac. His research interests are focused on bioengineering and software engineering.

**Gerald Schaefer** gained his PhD in Computer Vision from the University of East Anglia. He worked at the Colour & Imaging Institute, University of Derby (1997-1999), in the School of Information Systems, University of East Anglia (2000-2001), in the School of Computing and Informatics at Nottingham Trent University (2001-2006), and in the School of Engineering and Applied Science at Aston University (2006-2009) before joining the Department of Computer Science at Loughborough University. His research interests are mainly in the areas of colour image analysis, image retrieval, physics-based vision, medical imaging, and computational intelligence. He has published extensively in these areas with a total publication count exceeding 350. He is/was a member of the editorial board of more than 20 international journals, reviews for over 100 journals and served on the programme committee of more than 300 conferences. He has been invited as keynote or tutorial speaker to numerous conferences, is the organiser of various international workshops and special sessions at conferences, and the editor of several books, conference proceedings and special journal issues.

**Vicky Serra Sutton.** Sociologist (University of Barcelona, UB), diploma in Health Studies (UB) and PhD (Public Health and Biomedical Research Methods, Autonomous University of Barcelona). Researcher at the Agency of Health Quality and Assessment of Catalonia (AQuAS). Among her expertise areas are qualitative and quantitative methodologies in health service research. She is a consulting professor of the Universitat Oberta de Catalunya. In the context of public governmental organizations, she has worked in commissioned projects for the Catalan and Spanish Health Ministries and international research projects. She has published more than 25 technical reports, articles and book chapters. Peer-reviewer of public health journals and member of the CIBERESP and the Spanish Society of Epidemiology.

**Ahmed Soliman** has received his B.Sc. and M.S. degrees in Computer Engineering from Mansoura University, Mansoura, Egypt. He is currently a Doctoral Candidate in the Electrical and Computer Engineering department at the University of Louisville, Louisville, KY, USA. In December 2011 he joined the BioImaging Laboratory at University of Louisville as a research assistant. He has actively
been working on design of computer aided-diagnostic systems and parallel algorithms development for the processing of N-dimensional images in the field of medical image analysis.

**Tomasz Soltysiński**, PhD, Eng. gathered his experience as an interdisciplinary scientist, researcher and developer, with primary background in informatics and computer sciences (receiving his MSc in these domains) subsequently developed into biophysical and biomedical expertise (through obtaining PhD in medical bioengineering and biocybernetics). His professional research experience covers mostly advanced and challenging topics on interface between medical physics, neurosciences/neuroinformatics, bioinformatics, immunoinformatics, multimodal biomedical imaging, computational biology and experimental techniques, including time-resolved spectroscopy. Author’s particular research interests deal with the methods and techniques devoted to personalized medicine along with the early diagnostics and treatment of the chronic disorders of cancerous and autoimmune origin. In 2014 he founded International Institute of Advanced Multidisciplinary Studies in Biomedical Research, Informatics, Nanotechnology and Biophotonics.

**Aris Spathis** received his BSc in Biology in 2005 from the School of Science of the National and Kapodistrian University of Athens and his PhD in 2009 from the School of Medicine of the National and Kapodistrian University of Athens. He has been a research associate of the Department of Cytopathology of the University General Hospital “ATTIKON” in Athens from 2005. His main focus is molecular analysis of liquid based cytology preserved clinical samples with regard to cancer development and progression. He has more than 20 peer reviewed publications and several announcements in International and Hellenic congresses, focused on HPV, colorectal cancer and lymphomas.

**João Paulo Teixeira** obtained his PhD in Electrical and Computers Engineering at Faculty of Engineering of University of Porto (Portugal) in 2004 and worked in several projects related with TTS, Prosody modeling, ANN, and EEG, ECG and Speech signals. He teaches at the Polytechnic Institute of Bragança (Portugal) since 1995 mainly in the area of Signal Processing and is author of two books, several chapter books, and numerous scientific publications in journals and conference proceedings.

**Alex Trejo** earned a Master of Science in Engineering (UPC-BarcelonaTech, Polytechnic University of Catalonia, 2003), Master of Science in Business, Design & Technology (UPC-BarcelonaTech, - Polytechnic University of Catalonia, 2011) and Onsanity Solutions Ltd. Cofounder. Since 2000, he has focused most of his working experience in project management and currently his business revolves around innovative solutions and knowledge management applied to the health sector and life sciences, from research projects in the field of technology agreement, the social and collective intelligence. Experience in design management, technical development and management of multimedia content and web 2.0, innovation, integration, solutions and services associated with ICT in Health environments.

**Kostas Tsiouris** received his diploma in Electrical & Computer Engineering from the Democritus University of Thrace (DUTH), Greece, in 2013. Since 2014 he is with the Biomedical Engineering Laboratory, School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA) as a PhD candidate. His research interests include biomedical engineering, digital signal processing, computational intelligence and pattern recognition techniques in neuroscience. His main area of research covers the analysis of the Electroencephalogram (EEG) for the detection and prediction of
epileptic seizure events. Since 2013 he is also a member of the Unit of Medical Technology & Intelligent Information Systems, Department of Materials Science and Engineering of the University of Ioannina.

Charalambos Tsirmpas was born in Athens in 1984. In 2009 he graduated from the School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA), specializing in telecommunications. Since 2009 he is a PhD candidate at the Biomedical Engineering Laboratory of NTUA. His research interests include areas such as Probabilistic Graphical models, Data and Text Mining, as well as Clinical Decision Support Systems. Also, his PhD research focuses on the “Internet of Things” in healthcare applications. He is a member of the Institute of Electrical and Electronics Engineers (IEEE) and the Technical Chamber of Greece (TEE).

Alexandros Tzallas holds the position of Lecturer of Computer Programming at the Department of Computer Engineering of the Technological Educational Institute of Epirus, Arta, Greece. He holds a BSc degree in Physics from the University of Ioannina, Ioannina, Greece (in 2001) and a PhD degree in Medical Physics from the University of Ioannina, Ioannina, Greece (in 2009). He has worked on several research and development European and national programs as a software engineer, researcher, technical manager, seminar instructor and post-doc researcher. He has published more than 60 peer-reviewed manuscripts, 4 book chapters and he is the editor of 1 book. He has received more than 300 citations. He serves as reviewer for several scientific journals and conferences and he also serves as an Editorial Board member of Journal of Healthcare Informatics. His research interests include EEG, wearable devices, biomedical signal and image processing, biomedical engineering, decision support and medical expert systems and biomedical applications.

Samuel Vizzotto is currently professor of Information Systems at the Antonio Meneghetti Faculty (AMF). He has a degree in Computer Science from Franciscan University Center (UNIFRA) in 2009. He is a Master student in Computer Science at Universidade Federal de Santa Maria (UFSM), in Programming Languages and Database field. He is also a software developer focused on logistics, management and security.

Konstantia Zarkogianni has received the Diploma in Electrical and Computer Engineering (2003) from the Aristotle University of Thessaloniki, Greece, the MSc Degree in Electronic and Computer Engineering (2005) from the Technical University of Crete (TUC), Greece, and the Ph.D. degree (2011) from the National Technical University of Athens (NTUA), Greece. Since 2005, she is a member of the BIomedical Simulations and IMaging Laboratory (BIOSIM) of NTUA. Her current research interests include medical decision support systems, control systems, physiological systems modeling, diabetes management. She is the author or the co-author of 23 papers published in refereed international journals and conference proceedings. She has participated as a research associate in national and EU funded projects. She is a reviewer for several international journals. She is a member of the Institute of Electrical and Electronics Engineers, and the Technical Chamber of Greece.
