About the Contributors

**Juan Miguel Aguado** teaches Communication Theory at the School of Communication and Information Studies, University of Murcia (Spain). His publications include ‘Mobile Society: Culture, Identity and Technology’ (Edited with Inmaculada J. Martínez, 2008), Movilizad@s: Women and mobile Communication in the Information Society’ (with Inmaculada J. Martínez and Iolanda Tortajada, Spanish Women Studies Institute, 2009), ‘Technology and Social Complexity (Edited with Eva Buchinger and Bernard Scott, Editum, 2010) and ‘Mobile Communication: Towards a New Media Ecosystem’ (Gedisa, 2013). Juan Miguel’s research includes mobile communication’s ecosystem and its social and cultural implications. Together with Inmaculada J. Martínez he is currently coordinating an international four year research project on the impact of personal information management as an economic asset revolutionizing both the digital media and advertising systems.

**Claudio Feijóo** holds an MSc and PhD in Telecommunication Engineering and an MSc in Quantitative Economics. He is professor at the Technical University of Madrid (UPM) where he researches on the future socio-economic impact of emerging information society technologies, in particular, from an ultra-broadband, mobile and content perspective. Currently he serves as Co-Director of the Sino-Spanish Campus at Tongji University in Shanghai. He is also the co-founder and coordinator of the ICT area in the international master programme on city sciences and main responsible of the organizing committee of the International Conference in City Sciences. He spent two years at the Institute for Prospective Technological Studies of the European Commission researching on the future prospects of mobile content and applications. He also directed the Chair in Telecommunications Regulation and Information Society Public Policies at UPM. He participated in the information society development plans and broadband deployment strategies while being adviser for the Spanish State Secretary on Telecommunications and Information Society. On the entrepreneurial side, for three years he was dedicated to launch a university spin-off devoted to the transfer of know-how in technology, media and telecommunications. Since then he has participated in numerous start-up companies. He has also been involved in numerous research, development and consulting projects, both public and private, in Europe, Latin America, North of Africa and Asia. He lectures regularly in international seminars and postgraduate courses and has authored more than 200 publications in books, journals and conferences. He is guest lecturer at IE Business School on digital business and disruptive ICT, and member of the board of the International Telecommunications Society.
**About the Contributors**

**Inmaculada J. Martinez** is an Assistant Professor at the School of Communication and Information Studies, University of Murcia (Spain) where she teaches Advertising Ecosystem. Her publications include ‘Mobile Society: Culture, Identity & Technology ’ (2008), ‘Mobilized: Women & Mobile in the Information Society ’ (2010) and ‘Mobile Communications: Towards a New Digital Ecosystem’ (2013). Her research interests include mobile advertising and marketing, mobile merchandising, the new media impact on consumer behaviour and mobile communications from a gender perspective. Together with Juan Miguel Aguado, she is currently coordinating an international four year research project on the impact of personal information management as an economic asset revolutionizing both the digital media and advertising systems.

* * *

**Frederic Adam** is a freelance Art director and an expert in Mobile Learning and spatial narratives. He’s currently working with scientists in Australia and the United States. Between 2011 and 2013 he was as Associate Teacher at the Fine Arts School, at the University of Murcia and an artist member of the Art Collective Transnational Temps and Founder of the GPS Museum web portal (gpsmuseum.eu) about Locative Media and creativity.

**Shivom Aggarwal** is a Research Associate in CeDInt (Centro domótica Integral), Universidad Politécnica de Madrid, Spain and doctoral candidate in Operations and Technology department at IE Business School, Madrid, Spain. His main research areas include Big Data, Smart Cities, Cloud Computing, Knowledge Management and Future Technologies. He also works with the European Union under FP7 framework and other governmental organizations on policy making for future technologies such as Big Data and Artificial Intelligence. Prior to joining academia, he worked in mergers and acquisitions of high-tech companies including Big Data Analytics, Information Security and Mobile Computing with an investment bank based in Munich, Germany. He is a Computer Engineer (with a specialization in Information Security) by training with a Masters in international management. He also possesses international certifications such as a CEH (Certified Ethical Hacker), an RHCE (Red Hat Certified Engineer) and Network Management. He has been an entrepreneur and management consultant with technology start-ups based in Europe and Asia.

**Alberto Arenal** has a MSc in Telecommunications Engineering and a MSc in City Sciences from the Technical University of Madrid and a Business Administrations degree from the National Distance Learning University (UNED). He is currently a doctoral candidate at the Technical University of Madrid in the Entrepreneurship field and his main research include the qualitative and quantitative analysis of the entrepreneurial ecosystems, with focus on cities. Since 2009, he has been working in several positions in REDTEL, the Spanish Association of Telecommunications Operators, and in AMETIC, the Association of Electronics, Information and Communications Technologies, Telecommunications and Digital Content Companies in Spain, focusing on the study of the regulatory framework of the Digital Economy and the relationship between the different stakeholders.
Cristina Armuña has both a MSc in Telecommunications Engineering and MSc in City Sciences by the Technical University of Madrid. Currently, she is a PhD candidate at the Technical University of Madrid with focus on entrepreneurial ecosystems and obtaining a Law degree from the National Distance Learning University (UNED). She has two years of experience as financial consulting at Management Solutions and after this she has been acting for five years as Manager of the Telecommunications Infrastructures Department at the Spanish Association of Telecommunications Operators REDTEL, focused on the mobile regulatory framework. She currently combines the research field with strategic consulting at Noon Venture (a consultancy firm specialized in strategic advice in the domain of Technology, Media and Telecommunications), and startup creation and mentoring at Inténtalo Startups (educational platform for accelerating potential entrepreneurs).

Victoria Bleda holds a degree in Law and a master’s in Public Administration. She has been working in and around the music industry for the last 20 years. She has been part of record labels, both traditional and online, led a music editorial initiative, and worked for intellectual property rights collecting societies.

João Canavilhas is an associate professor and has done his PhD at the Universidad de Salamanca (Spain) with a thesis entitled Webnoticia: propuesta de modelo periodístico para la WWW. He teaches at the Universidade da Beira Interior (Covilhã PORTUGAL), where he is Vice-Rector and researcher at Labcom Laboratory of Online Communication He is the author or co-author of 4 books, 20 chapter books and 30 papers in national and international scientific journals. His most important contribution to online journalism is the “Tumbled Pyramid theory”. His research work focuses on various aspects of “Communication and New Technologies”, particularly in the fields of online journalism, e-politics, social media and journalism for portable devices.

Andreu Castellet has a PhD Degree in Social and Law Sciences from the University of Murcia (Spain), where he teaches in the Department of Information and Documentation. He has also been in the Media Management and Transformation Centre (MMTC) of Jönköping International Business School (Sweden) as a Visiting Researcher. He holds a Bachelor in Journalism from the Autonomous University of Barcelona (Spain). Also, he has a worked as a journalist in a number of media groups in Spain and in the UK. His research interests include digital media management, innovation, structure and regulation; and mobile ecosystem strategies.

Enrique Castelló-Mayo holds a PhD from the Complutense University of Madrid, and he was Assistant Professor in this University and University of Valladolid. Actually he is Associated Professor and Researcher at University of Santiago de Compostela, member of the Audiovisual Studies Group and Audiovisual Coordinator of CIDUS (Platform for Innovation and Experimentation and Innovation in Digital Contents). His research lines include: audiovisual formats and applied production technologies, transmedia narratives. His background includes working in Antena 3 TV, Agencia EFE, Information and Communication New Technologies Program and as external collaborator of Televisión Española and ATEI.
About the Contributors

Rodrigo da Cunha holds a Doctorate in Communication and Contemporary Culture from the Federal University of Bahia (UFBA). Adjunct Professor of News Design, at Department of Communication, Federal University of Pernambuco (UFPE), Brazil. Research member in Online Journalism Research Group (GJOL) and in the Convergent Journalism Laboratory Project. Your research is about news apps interfaces for mobile devices, news design, infographics, history of design, digital journalism, and cyberculture.

Fernando Firmino da Silva holds a Doctorate in Communication and Contemporary Culture from the Federal University of Bahia (UFBA). Professor in the Department of Communication at the State University of Paraíba (UEPB) and professor of the PosGraduate Program in Journalism at the Federal University of Paraíba.

Manuel José Damásio holds a PhD in communications/Multimedia Systems from the Universidade Nova de Lisboa and an MSc in digital media by Napier University (UK). He is an Associate Professor and the Head of the Film and Media Arts department at Universidade Lusófona in Lisob, Portugal. He holds vast experience in consulting and production concerns of audiovisual and multimedia production. He is a member of the R&D research unit CICANT - Centre for Research in Applied Communication, Culture and New Technologies and a Member of the board of GEECT the European Association of Film and Media schools.

Giuditta De Prato joined the Institute for Prospective Technologies as a post-doctoral researcher in January 2009 to contribute to projects on the economic aspects of the Information Society and on the impacts of Information Society Technologies, mainly focusing on ICT R&D, the software sector, patents and innovation. She has a PhD in Economics and Institutions from the University of Bologna (Italy). Before joining IPTS, she was a software developer and IT consultant from 1992 to 2005. From 2005 to 2009, she was a contract research assistant, focussing on research activities on local development, evaluation, ICT and open source at the University of Bologna, where she also lectured on macroeconomics and environmental economics. She co-edited together with E. Sanz and J.P Simon, Digital Media Worlds; The new media economy, Oxford, Palgrave, 2014.

Patrícia Dias is the author of “The Mobile Phone and Daily Life”, a book about the social impact of the mobile phone. She is a lecturer and a researcher at the Catholic University of Lisbon (UCP) and at Lusófona University (ULHT), specializing in social media and digital marketing. She coordinates the Advanced Training in Social Media at UCP. She holds a PhD in Communication Studies from the Catholic University of Portugal with Summa Cum Laude distinction.

Jesús Ferrandis has a MSc in Telecommunications Engineering from the Technical University of Madrid and a MSc in Economics from National University of Distance Education in Spain. His career has been linked to Telefonica along different positions in the field of Technology, R+D and Corporate Strategy. He is an expert on ICT based entrepreneurship and advisor to different educational programs in this field.
Julian Flores González is an associate professor at the University of Santiago de Compostela (Spain) in the Department of Electronics and Computer Science. Julian got his degree in Physical Sciences, specializing in electronics in 1991, a PhD in 1996 and afterwards a post-doc in the Graphics Visualization and Usability Center of the Georgia Institute of Technology (USA). His main research activity has focused on the development of interactive graphical applications in real time. These applications have covered a range of areas from applications, to the revaluation of assets, to the rehabilitation of people with different types of diseases.

José Luis Gómez-Barroso is an Associate Professor in the Department of Applied Economics and Economic History at Universidad Nacional de Educación a Distancia (UNED). He holds a PhD and a degree in Economics from the Universidad Nacional de Educación a Distancia (UNED). He also holds a degree in Telecommunication Engineering from the Universidad Politécnica de Madrid as well as a degree in Law from the Universidad Complutense. His research interests lie on the economics and regulation of ICT markets, and on the factors hindering the development of an information society. Gómez-Barroso has participated in different research projects, some of them for the European Commission. He has published more than sixty academic papers and chapters in books.

Sara Henriques is a PhD student in Communication Sciences at the Universidade Lusófona de Humanidades e Tecnologias, she has a master’s degree in Educational Psychology from the Instituto Superior de Psicología Aplicada – Instituto Universitário (ISPA). She also started a PhD in Developmental Psychology which she opted to reassign to Communication Sciences due to the work she is currently performing at the Centre for Research in Applied Communications, Culture and New Technologies at ULHT. She has developed academic research in the developmental and cognitive psychology field and more recently in the communication sciences field. Her academic interests and recent academic activity is based on the influence of online social media in social relationships and patterns of individual and collective behavior and on the transformations of social practices and social relationships via the dissemination and use of new social technologies.

Antía López-Gómez is a Professor in the Department of Communication Sciences and a Researcher in the Audiovisual Studies Group of the University of Santiago de Compostela (Spain). Since 1997, she holds a Ph.D. from the Universidad Complutense in Madrid (Spain) in Information Sciences. Her research lines include: textual, content and format analysis.

Roi Méndez Fernández is a Computer Systems engineer from the University of Santiago de Compostela (Spain) since 2007 and got the title of Master in Computing, specializing in Computer Graphics, within the Universitat Politecnica de Catalunya (Spain). In 2009, developing his master’s thesis at the University of Manchester (UK). His fields of interest focus on virtual and augmented reality, immersive environments and human-computer interaction. Currently, he is a pre-doctoral student at CITIUS, focusing his research on the use of virtual sets in live television program broadcasting.
About the Contributors

Abhishek Nayak is currently a Doctoral Candidate and a research scholar in the Marketing department at the IE Business School, Madrid. His key research areas include consumer analytic (understanding and predicting consumer purchase intentions) and advertising effectiveness during recessions (optimizing resources through effective media allocation). Before pursuing his PhD, he completed his MBA in International Business and Bachelors in Electronics Engineering from India. He has industry experience in the Sales and Business Analytic domain in the logistics and the IT industry.

Suzana Oliveira Barbosa holds a Doctorate in Communication and Contemporary Culture from the Federal University of Bahia (UFBA). Professor in the Department of Communication and Communication and Contemporary Culture Program, Faculty of Communication, at the Federal University of Bahia (UFBA). Investigator-coordinator of the Research Group on Online Journalism (GJOL). Coordinator of the Convergent Journalism Laboratory Project. Her research is about journalism, digital journalism, database journalism, convergence journalism and mobile journalism.

Brett Oppegaard was the individual recipient of the regional and national 2012 George and Helen Hartzog Award for his research into mobile app development and media delivery systems within the National Park Service, as well as the national 2013 John Wesley Powell Prize winner for outstanding achievement in the field of historical displays.

Marcos Palacios has a B.A First Class Honours (Sociology) University of Liverpool (1975); Ph.D. (Sociology) Center for Latin American Studies, University of Liverpool (1979). Full professor in the Department of Communication and Communication and Contemporary Culture Program, Faculty of Communication, at the Federal University of Bahia (UFBA). Visiting Professor at University of Beira Interior (Portugal). Investigator-coordinator of the Research Group on Online Journalism (GJOL). Research member in the Convergent Journalism Laboratory Project. Research experience in Communication Studies, with special reference to Cyberculture, New Media and Journalism and sociological aspects of Communication.

Ignacio Peinado holds an MsC in Telecommunication Engineering by the Technical University of Madrid. Currently, he is working as an Innovation Manager in the University Hospital of Getafe, Spain. He has been working more than 10 years in the design, development of validation of ICT solutions for healthcare and inclusion in the context of different international research projects. In total, he has collaborated on more than 10 projects funded by the European Commission, in both technical and management aspects. Moreover, he has worked as a user experience and accessibility consultant for different start-ups and SMEs.

Verónica Perales (European PhD) is a Professor of Multimedia and Transmedia Narratives at the Fine Arts School and also at the School of Communication, University of Murcia (Spain). Co-founder of international art collective Transnational Temps (2001), questioning different aspects of the underlying ideology of technological progress. The mass media’s trivialisation of certain environmental problems, perception, dialogue, citizen action and the strategies of superfluous green cleaning are some of the issues addressed by the group, whose ultimate aim is to reinforce encourage genuine respect for the biosphere. Her artistic practice is also related to environmental activism and ecofeminism.
**Sergio Ramos** gained his PhD and Master in Telecommunications Engineering from the Technical University of Madrid - UPM. He holds an MBA from the Stockholm School of Economics and a Degree in Advanced Management from the IE Business School. His career has been linked to two main areas of activity: ICT and Information Society Sector, and Innovation Management and Entrepreneurship. His starting research interest was related to the study of the mobile Internet phenomenon in Europe from the regulatory, market and business perspectives, being his Ph.D. Thesis (2005) one of the first studies in Europe in the field. Currently he is focused on practical research and experimentation on entrepreneurial ecosystems, particularly in the characterization of the trigger factors that stimulate entrepreneurship and innovation. Among his most relevant positions, he worked for the European Commission as Resident Twinning Adviser of an EC Twinning Project for the Public Utilities Commission of Latvia, to design and monitor the transposition process of EU electronic communications regulatory framework into Latvian legislation. In addition, he worked for the Spanish Association of Telecom Network Operators (REDTEL) as a Director of Network Infrastructure Deployment, and served as Innovation and Entrepreneurship Manager at CeDInt-UPM (Research Centre for Smart Buildings and Energy Efficiency at UPM). Currently based in Madrid, he combines lecturing, research and managerial activities at UNED, UPM and IE Business School, with strategic consulting for the last eight years at Noon Venture (a consultancy firm specialized in strategic advice in the domain of Technology, Media and Telecommunications), and startup creation and mentoring at Inténtalo Startups (educational platform for accelerating potential entrepreneurs).

**Leocadio Rodríguez Mañas** holds a PhD in Medicine. He is the Head of the Geriatric Department at the University Hospital of Getafe and Director of the Spanish Network on Aging and Frailty (RETI-CEF) of the Ministry of Economy and Competitiveness, Co-Director of the Toledo Study on Healthy Aging-TSHA. He has been the Principal Investigator in 36 research projects, 4 of them funded by the European Commission focused on the field of frailty in elderly people. He has authored more than 130 papers in reputed journals.

**Juan Angel Ruiz** is a manager in a European leading IT company. At the same time, he is a Ph.D. student at the Applied Economy Department, in the UNED (Spain). He is currently researching on the economic value of personal information for companies in the digital economy. His interests also include global public goods, global public private partnerships, public policy evaluation, privacy policies, and the role of IT technologies in the production functions. Mr. Ruiz holds an MSc in Forest Engineering-manufacturing, from the Universidad Politécnica de Madrid (Spain); a BS in Economics-quantitative modelling, and a MS on economic growth and sustainable development by the UNED; a MS in Financial Management by the ESIC Business & Marketing School (Spain), and an Executive degree in Business Management by HEC-School of Management (Paris-Mumbai). His career has been developed in the ICT sector—in both, big and niche companies—where he has carried out consulting and program management primarily those related with business processes and supply chain management, and large contract sales in Banking, Manufacturing and the public sector (national and European Institutions). He has also assumed strategic and business development responsibilities in the public sector market, portfolio management roles, and strategic transformation program leadership within his own company for different geographies. He currently lives in Paris.
Eduardo M. Sánchez Vila was born in Barcelona, Spain in 1970. He received a B.S. degree in physics from the University of Santiago de Compostela in 1993, a Ms. degree in Neuroscience at the International University of Andalucía in 1996, and a Ms. degree in Computer Science at the University of Southern California in 2001. He also received a PhD in Physics in 2000 from the University of Santiago de Compostela. Nowadays, he is working as an Associate Professor in the Department of Electronics and Computer Science at the University and as researcher at the Research Center for Information Technologies (CITIUS) of Santiago de Compostela. His research interests are in recommender systems, satisfaction models, and computational models of somatosensory and visual systems.

Ivan Satuf is a PhD student in Communication Sciences at University of Beira Interior (Portugal), a researcher trainee at the Laboratory of Online Communication (LabCom) and a CAPES/Brazil doctoral fellow. His research interests are the fields of journalism and new media.

Jean Paul Simon is the founder of JPS Public Policy Consulting, a consulting firm specialised in media/telecom law regulation and strategy. He has held various positions in the telecom industry, worked as a senior scientist at the Institute for Prospective Technological Studies (IPTS), European Commission, Directorate-General JRC. He holds a PhD in Philosophy (1975) and is a graduate (MBA) from the Ecole des Hautes Etudes Commerciales (HEC) (MBA, econometrics, 1971). He has written several books and articles on communications and public policy. He is a frequent speaker on telecommunications and media in Asia, Europe and the USA. He co-edited with G. De Prato and E. Sanz, the book “Digital Media Worlds; The new media economy,” Oxford, Palgrave, 2014.

Christian Sonnenberg is an Assistant Professor of Information Systems and the Academic Chair of Management Information Systems and Information Technology at Florida Institute of Technology. His research focuses on mobile and handheld usability, modeling and simulation techniques, online learning formats, data visualization, and web accessibility.

Inês Teixeira-Botelho is the author of “Extreme Generation,” a Vodafone sponsored book about the impact of new technologies both in digital natives and emigrants. She has worked as an author for several publications, books and screenplays, as a speaker, consultant and advisor on communication, media, technology and entrepreneurship, as a researcher and project manager at Lusófona University (ULHT) and also is an invited specialist in the Advanced Training in Social Media at the Catholic University of Lisbon (UCP). She holds an Msc from Catholic University of Portugal with a Summa Cum Laude distinction.

Elena Villalba Mora holds a PhD in Biomedical Engineering from the Technical University of Madrid, where she is an Assistant Professor. She is also senior researcher at the University Hospital of Getafe, Spain. With 10 years’ experience, she has participated in 11 international research projects focused on the modeling, design and validation of Health Information Technologies for long-term care. She also investigates the technological and socio-economic value of eHealth products and services across Europe. She has published 9 papers in reputed journals, and more than 25 conference papers and book chapters.

Oscar Westlund, PhD, is Associate Professor at the University of Gothenburg, currently working as Research Leader for “Medieutredningen” at the Government Offices of Sweden, Ministry of Culture. Westlund has researched the production, distribution and consumption of news through various methods for a decade, focusing especially on the shift towards mobile media. He has also conducted research into mobile search, including taking part in a project for the EU-commission based at the Institute for Prospective Technology Studies in Seville. Westlund has published more than 60 book chapters and reports, and articles in approximately 20 different international journals. He serves on the editorial boards of Digital Journalism, Journal of Media Business Studies, Journal of Media Innovations, and Mobile Media & Communication.
