About the Contributors

Mandeep Mittal is an Assistant Professor in the Department of Computer Science and Dean (Student’s Activities) at Amity School of Engineering and Technology, New Delhi, India. He has completed his Ph.D. (Inventory Control and Management) from University of Delhi and M.Sc. (Applied Mathematics) from IIT Roorkee, India. He has published a number of research papers in International Journals including Applied Mathematics and Computation, Int. Journal of Systems and Science, Int. Journal of Inventory Control and Management, Int. Journal of Applied Industrial Engineering, Int. Journal of Industrial Engineering Computations, Int. Journal of Strategic Decision Sciences, Int. Journal of Services Operations and Informatics and Int. Journal Revista Invetigacion Operacional. He is a member of editorial board, Int. Journals Revista Invetigacion Operacional and Int. Journal of Control and Systems Engineering.

Nita H. Shah is a professor in the Department of Mathematics, Gujarat University, Ahmedabad, India. She received her Ph.D. in inventory control management, operations research. Currently, she is engaged in research in inventory control and management, supply chain management, forecasting and information technology and information systems, neural networks, sensors and image processing. She has more than 275 papers published in international and national journals. She is author of four books. She is serving as a member of the editorial board of Investigation Operational, Journal of Social Science and Management, International Journal of Industrial Engineering and Computations and Mathematics Today.

* * *

Reshu Agarwal is currently pursuing Ph.D. in Computer Science from Apaji Institute of Mathematics and Applied Computer Technology, Banasthali University, Rajasthan. He has done M.C.A and has 4 years of teaching experience. His research interest lies in the field of Data Mining.
About the Contributors

Snigdha Banerjee is a Professor at the School of Statistics, Devi Ahilya University, Indore, India. She has published papers in the fields of operations research, bioinformatics, design of experiments and management in journals like Journal of the Operational Research Society, International Transactions in Operational Research, International journal of Production Economics(IJPE), Mathematical and Computer Modeling, Applied Mathematical Modeling, Proteomics, Annals of the Institute of Mathematical Statistics, Sankhya etc. She is reviewer in many international and national journals like EJOR, IJPE, Rairo operations research, Defense Science Journal etc. She has worked on various projects of applications of statistics and operations research methods in the fields of economics, management, computers, engineering, biological models etc.

Vinti Dhaka is a Research Scholar in the Department of Mathematics and Statistics, Banasthali Vidyapith, India. She completed her M.Phil in Mathematical Sciences in 2012 from Banasthali Vidyapith. At present, she is pursuing her PhD in Operational Research. Her area of interest is inventory management.

Niharika Garg has about eight years of extensive teaching experience. She is currently working as Assistant Professor in department of CSE & IT in ITM University, Gurgaon. She specializes in Analysis and Design of Algorithms, Compiler Design, Intelligent Systems and Wireless Scanning, and RFID. She is working on a project sanctioned by DST, Government of India. She has published two papers in international journals, and presented one at an international conference. She is working as an active member of the Institute–Industry Interaction Cell.

Chandra K. Jaggi is Professor and Head in the Department of Operational Research, University of Delhi, India. His research interest lies in the field of supply chain and inventory management. He has published more than 78 papers in various international/national journals including IJPE, EJOR, JORS, IJSS, IJOR, etc. He has guided Ten PhDs and 20 MPhil in Operations Research. He is Editor-in-Chief of International Journal of Inventory Control and Management and Associate Editor of IJSAEM, Springer, Co-Editor/Reviewer-In-Charge of The GSTF, JMSOR and on the editorial board of the IJSOI, AJOR, IJECBS, JASR, and AJBAS. He was awarded Shiksha Rattan Puraskar in 2007.

Hemant Jalota is currently a PhD Scholar in School of Basic Sciences at IIT Mandi, Mandi, Himachal Pradesh, India. He completed his MSc in 2010 and has 3 years of teaching experience. His area of research are Operation Research, Fuzzy set theory, Portfolio optimization, Soft computing, Modelling and simulation (Engineering application).
**Mrudul Y. Jani** is an assistant professor in the Department of Applied Sciences, Faculty of Engineering and Technology at Parul University, Vadodara, Gujarat, India. He has 7 years of teaching experience. His research interests are in the field of Inventory management under deterioration and different demand structures. His articles have been published in Revista Investigacion Operacional, JOBARI, IJIEC and IJACM.

**Jitendra Kumar** works as Assistant Professor in Department of Applied Mathematics, Madhav Institute of Technology & Science, Gwalior. She has done M.Sc. from Bundelkhand University, Jhansi in 1998 and M. Phil (Special Function) from Jiwaji University, Gwalior in 2003. She has published 6 research papers in National and International repute Journals. Her area of interest is Application of Queueing Models.

**Kaushik Kumar** received his B. Tech in Mechanical Engineering from REC (Now NIT), Warrangal, India, MBA from IGNOU and Ph. D from Jadavpur University, Kolkata. He has over 25 years of teaching, research and industrial experience. Presently, he is an Associate Professor at Department of Mechanical Engineering, Birla Institute of Technology- Mesra, Ranchi, India. His areas of teaching and research interest are Optimization, Non-conventional machining, CAD / CAM, Rapid prototyping and composites. He has 7 Patents, 7 Book Chapters, 90 international Journal, 18 International and 8 National Conference publications to his credit. He is on the editorial board and review panel of 7 International and 1 National Journals of repute. He has been felicitated with many awards and honours.

**Pravin Kumar** is an Assistant Professor in Mechanical Engineering Department, Delhi Technological University, Delhi, India. He is Ph.D. in supply chain Management from IIT Delhi and M.Tech in Industrial Management from I.T., BHU, Varanasi (Now IIT BHU Varanasi). He has published many research papers in international and national journals of repute. His area of specialisation is supply chain and logistics management. He has authored few books on Engineering Economics from Pearson Education and Wiley India.

**Vijay Kumar** is an Associate Professor in Mathematics Department, Faculty of Engineering & Technology, Manav Rachna International University, Faridabad, India. He has published many research papers in international and national journals of repute. His area of specialisation is Generalized Fuzzy Sets and Decision Making. He has authored two books.
About the Contributors

Ningombam Sanjib Meitei holds a Ph.D. in Statistics from Devi Ahilya University, Indore, India. He has worked on various projects inventory management, data analysis, algorithm development and bioinformatics. He was awarded the prestigious Young Scientist Award 2010 in the field of Mathematics, Statistics and Computer Science by Madhya Pradesh Council of Science and Technology, India. His works have been published in journals and books such as Journal of the Operational Research Society, Rairo operations research, Proteomics, Journal of Proteomics, Humana Press, etc.

Vinod Kumar Mishra is an Assistant Professor in the Department of Computer Science and Engineering at B.T. Kumaon Institute of Technology, Dwarahat, Almora, India. He received his PhD in Mathematics in 2011 from Dr. Ram Manohar Lohia Avadh University, Faizabad, India. He completed his Master’s degree in Mathematical Science in 2001 and another Master's degree in Computer Application in 2007. His research interests are in inventory system, queuing theory, Network Optimization, wireless network and mathematical modelling.

Shyamal Kumar Mondal is an Associate Professor in the department of Applied Mathematics with Oceanology and Computer Programming, Vidyasagar University, West Bengal, India. He is presently working on Inventory Control System, Fuzzy Risk Analysis, Soft Set Theory, Bio-mathematics, and Soft Computing etc. He has published about fifty research papers in different reputed international and national Journals.

Sarla Pareek is Professor and Head, in Department of Mathematics & Statistics, at Banasthali Vidyapith. She is life member of various academic bodies, has published 35 research articles in various reputed journals, guided 8 M.Phil & 8 Ph.D. students. To her credit she was invited to deliver lectures at many places on various research topics. Her areas of research interest include Inventory models, Demography and Applied Statistics.

About the Contributors

Piyush Kant Rai is an Associate Professor in the Department of Mathematics & Statistics, Banasthali University, India. His research interest lies in the field of Demography and Small Area estimations. He has published more than 17 papers in various international/national journals. He has guided Eight PhDs out of which One Awarded and Seven Pursuing and Seven Mphil out of which six Awarded and one Pursuing in the field of Demography and Small Area Estimations.

Supriyo Roy has been working as Associate Professor, Birla Institute of Technology-Mesra, Ranchi. A Post Doctoral Fellow from Airbus Group Endowed (formerly EADS-SMI Center for Supply Chain) IIM-Bangalore, Dr. Roy has an experience of more than five years in Manufacturing industry and 15 years of experience in Post Graduate teaching. His teaching and research interest comprises interdisciplinary areas of Management Science, Production and Operations management, Decision Science, Soft Computing for Manufacturing, etc. He has to his credit published 10 International book chapters, 22 Conference papers and more than 45 papers in leading International and National journals in the area of management science. His research output is coming in reputed International as well as National journals. He is acting as editorial review board of many International and National Journals of repute.

Isha Sangal is an Assistant Professor in the Department of Mathematics and Statistics, Banasthali Vidyapith, India. She has published 5 research articles in various reputed journals. Her area of research includes inventory management.

Meghna Sharma is currently working as Assistant Professor, in the department of CSE & IT in ITM University, Gurgaon, Haryana India. Before she came on board at ITMU, she worked as a scientist/Engineer ‘SC’ in ISRO Satellite Centre, Bangalore and prior to that, as Lecturer in Amity School Of Engineering and Technology, New Delhi, Haryana. Her areas of interest are Data Mining, Big Data Analytics and DBMS.
About the Contributors

Juhi Singh is an Assistant Professor in the Department of Computer Science, Amity School of Engineering and Technology, New Delhi. She has done B.Tech and M.Tech in Information Technology. Currently she is pursuing Phd (Computer Science) from Banasthali Vidyapeeth. She has more than 9 years of teaching experience. Her research interest lies in the field of Data Mining and Inventory Management. She has published a number of papers in International/National journals.

Jyoti Singh is presently working as Research Analyst, International Engineering Services, H.No.- 87A, RZI – Block, West Sagarpur, New Delhi – 110046, India. She has authored or coauthored over 5 research papers in Journals and Conferences. Her research work appeared in Advances in Industrial Engineering, IUP Journal of Mechanical Engineering, etc.

Priya Singh is presently working as Research Analyst, Nalanda International Engineering Services, H.No.- 87A, RZI – Block, West Sagarpur, New Delhi – 110046, India. She has authored or coauthored over 5 research papers in Journals and Conferences. His research work appeared in Advances in Industrial Engineering, IUP Journal of Mechanical Engineering, etc.

Hardik N. Soni is a Professor at Chimanbhai Patel Post Graduate Institute of Computer Applications, Ahmedabad, India. He received his BSc and MSc in Mathematics from Gujarat University, Ahmadabad, Gujarat, India. He received his PhD from Gujarat University in Inventory Control Management, Operations Research. His major research interests are in inventory control/optimisation and cooperation and coordination within supply chains. He has published his research works in refereed journals.

Shivangi Suthar is working as a Surveyor at Survey of India, Gandhinagar, India. She has received her BSc and MSc in Mathematics from Gujarat University, Ahmadabad, Gujarat, India. She is pursuing her PhD from Kadi Sarva Vishwavidyalaya, Gandhinagar. Her research interest concentrate on inventory control and management under imprecise framework.

Manoj Thakur is a faculty at Indian Institute of Technology Mandi. Before joining IIT Mandi he was in Industry for more than three years and worked there as Research Analyst in Financial domain. He did M.Sc. from University of Roorkee and M.Phil. and then Ph.D. from IIT Roorkee. He has published several research papers in refereed journals and conferences. His areas of research are Numerical Optimization, Machine Learning and its application to Finance.
