About the Contributors

**Eva Volna** is an associate professor at the Department of Computer Science at University of Ostrava, Czech Republic. Her interests include artificial intelligence, artificial neural networks, evolutionary algorithms, and cognitive science. She is an author of more than 50 papers in technical journals and proceedings of conferences.

**Martin Kotyrba** is an assistant professor at the Department of Computer Science at the University of Ostrava, Czech Republic. His interests include artificial intelligence, formal logic, soft computing methods and fractals. He is an author of more than 30 papers in conference proceedings.

**Michal Janosek** is an assistant professor at the Department of Informatics and Computers at the University of Ostrava, Czech Republic. His interests include artificial intelligence, multi-agent systems, modeling and simulations. He is an author of more than 20 papers in proceedings of conferences.

* * *

**Milan Adamek** is an associate professor at Tomas Bata University in Zlín. His research interests include sensors, measurement and camera systems. He is an author of around 120 papers in journals, book chapters and conference proceedings.

**Denisa Hrušecká** is working as a senior lecturer at Tomas Bata University in Zlín, Faculty of Management and Economics, Department of Industrial Engineering and Information Systems. Her specialisation is industrial engineering, production planning and scheduling and business information systems supporting production processes. She has studied the relationship between advanced software tools for production planning and scheduling and the aspects of process management in her dissertation. Her current research activities are focused on topics of lean management, production planning and possibilities of expert systems in production management area.
**About the Contributors**

**Robert Jarušek** is a Ph.D. student at the Department of Computer Science at University of Ostrava, Czech Republic. His interests include artificial intelligence, neural networks, and soft computing. He is an author of more than 15 papers in proceedings of conferences.

**Roman Jasek** is working as an Associate Professor, head of Department of Informatics and Artificial Intelligence in Faculty Applied Informatics in Tomas Bata University in Zlin. He graduated from computer science in Palacky University in Olomouc, his Ph.D. received in Charles University in Prague. His research interests are: Artificial Intelligence, Computer Science and Data Security.

**Bronislav Klapuch** is a Ph.D. student the Department of Computer Science at University of Ostrava, Czech Republic. He is long life working in the IT business as a Developer, Tester, Business Analyst and Project Manager mostly on the banking information systems.

**Vaclav Kocian** was a Ph.D. student at the Department of Computer Science at University of Ostrava, Czech Republic. His interests include artificial intelligence, neural networks, and soft computing. He is an author of more than 20 papers in journals and proceedings of conferences.

**Said Krayem** lectures at UTB artificial intelligence, several PhD’s doctor and students and cooperates with the Academy of Sciences in Prague. He wrote more than 20 books on computer science and more than 10 articles.

**Dora Lapkova** is an asistent at Tomas Bata University in Zlin. Her research interests include professional defence, self defence, physical protection, security management. She is an author of around 20 papers in journals, book chapters and conference proceedings.

**Ivo Lazar** was born in the Czech Republic, and went to the Tomas Bata University in Zlin, where he at present studying in the faculty Application Informatic to obtain his Ph.D degree in 2018. He is the author of several articles about artificial intelligence and is a lecturer Cisco academy.

**Zuzana Kominkova Oplatkova** is an associate professor at Tomas Bata University in Zlin. Her research interests include artificial intelligence, soft computing, evolutionary techniques, symbolic regression, neural networks. She is an author of around 100 papers in journals, book chapters and conference proceedings.
About the Contributors

Michal Pluháček was born in the Czech Republic, and went to the Tomas Bata University in Zlin, where he studied Information Technologies and obtained his MSc. degree in 2011 and Ph.D. degree in 2016. He now works as a researcher at the same university. His professional interests are various topics in artificial intelligence with focus on evolutionary algorithms.

Roman Senkerík was born in the Czech Republic, and went to the Tomas Bata University in Zlin, Faculty of applied informatics, where he studied Technical Cybernetics and obtained his MSc degree in 2004, Ph.D. degree in 2008 (Technical Cybernetics) and Assoc. prof. degree in 2013 (VSB – Technical University of Ostrava – degree in Informatics). He is now a researcher and lecturer at the same university (lectures from Applied Informatics, Cryptology, Artificial Intelligence, Mathematical Informatics). His research interests are: Theory of chaos, Optimal control of chaos, Softcomputing methods and their interdisciplinary applications, Optimization, Neural Networks and Evolutionary Computation. He was IPC member or session chair of many important international conferences and symposiums. He is Recognized Reviewer for many Elsevier journals as well as many other leading journals in computer science/computational intelligence.

Jaromír Svejda was born in the Czech Republic, and went to the Tomas Bata University in Zlin, where he studied Information Technologies and obtained his MSc degree in 2011. He is now a Ph.D. student at the same university.

Zdenka Telnarová is an assistant professor at the Department of Computer Science at the University of Ostrava, Czech Republic. Her interests include data modelling and ontological semantics, modelling of natural deduction and RDF data models in Oracle. She is an author of more than 20 papers in conference proceedings.

Martin Žáček is an assistant professor at the Department of Computer Science at University of Ostrava, Czech Republic. His interests include formal logic, knowledge representation and artificial intelligence. He is an author of more than 30 papers in proceedings of conferences.

Roman Zak was born in the Czech Republic, and went to the Tomas Bata University in Zlin, where he studied Information Technologies and obtained his MSc degree in 2011. He is now a Ph.D. student at the same university.
