About the Contributors

**Neeraj Anand** is working as a Professor and HOD – QT/RM/Operations since July, 2012 with UPES, Dehradun. His area of specialization is Quantitative Techniques, Research Methodology and Operations. Other areas of interest are Supply chain management and Project Management. He has 20 years experience in academics and 3 years in industry. He is a certified Internal Auditor from DNV and has performed the role of Management Representative for ISO 9000 certification for UPES from its inception in 2006 to 2010 and again took over the charge in June 2013. He has successfully faced surveillance audits by DNV. He has been actively involved in Extension/Training and Coordinated an Executive Program for Centre for Aviation Studies for executives of University of Applied Science, Frankfurt a Resource person for “Supply Chain Management” for ISPe and delivered sessions on “Project Management” for engineering graduates of THDC, Tehri (U.K.) in 2011. He has conducted 4 MDPs on and Project Management and SCM. He carried out a research project with UHHDC (Uttarakhand Handloom & Handicraft Development Corporation) and another with a UREDA (Uttaranchal Renewable Energy Development Agency). Conducted ESDP (Entrepreneurship and Skill Development Program) sponsored by Ministry of MSME in partnership with Indian Institute of Entrepreneurship, Guwahati in 2010. Organized ICMI 2013 (International Conference on Management of Infrastructure) in Feb 2013. Convener of the national conference on “Innovation and Entrepreneurship” in 2010. He is a life member of Society of Operations Management and an affiliate Member- Energy Institute, London (U.K). Member – BOS (Board of Studies) and Core Member – FRC (Faculty Research Committee) at UPES.

**Surajit Bag** has completed his PhD in 2014 from College of Management and Economic Studies, University of Petroleum & Energy Studies, U.K. He has trained in Case Study Teaching from Indian Institute of Management Calcutta. He has trained in Total Quality Management from Indian Institute of Technology Kanpur. He has also mastered Multivariate data analysis under Indian Institute of Technology, Kharagpur. Presently he is working in the position of Procurement Head with
Tega Industries South Africa Pty Ltd, South Africa. He is having more than seven years of industry and research experience. His areas of research interest are Sustainable Supply Chain Management, Supply Chain Risk Management, Humanitarian logistics strategy and Business excellence. He has attended several National and International conferences and has published 40 papers in reputed journals. He is a member of professional bodies such as Indian Rubber Institute (IRI), Operational Research Society of India (ORSI), Society of Operations Management (SOM), AIMS International and Asian Council of Logistics Management (ACLM).

Sreejith Balasubramanian is the Institutional Research Officer at UOWD. He has more than 10 years of experience that includes teaching, research, consultancy and project management. Sreejith received his Bachelor’s degree in Electronics and Communication Engineering from University of Calicut. He went on to obtain a Master’s degree in International Business from UOW. He is also pursuing a Doctor of Philosophy (PhD) in business from Middlesex University, UK. His research interest is in the area of sustainability and carbon footprint modelling. His work has been published in leading international journals and conferences.

Ehab Bazan holds a Doctor of Philosophy (Ph.D.) degree from Ryerson University in Toronto, Canada, in Mechanical and Industrial Engineering. He has completed his Masters of Applied Science at Ryerson University in Mechanical and Industrial Engineering and his Bachelors of Science in Mechanical Engineering (Design and Production) from Ain Shams University in Cairo, Egypt. He is currently the Operations Manager at a large manufacturing and remanufacturing firm in the automotive industry located in the Greater Toronto Area in Ontario, Canada managing over 150 employees. His previous industrial experience stems from a wide variety of consulting projects both in Egypt and Canada. Teaching experience includes both student academic coaching and teaching at the high school and university levels as well specialized trainings for engineering and management professionals. His current research interests include: production economics, supply chain management, inventory systems, green supply chain management, and environmentally responsible supply chains. His work has been published in internationally renowned journals such as the International Journal of Production Economics, Computers and Industrial Engineering and Applied Mathematical Modelling. He is a member of the Ontario Society of Professional Engineers.

Jay Brown is an Assistant Professor of Operations Management in the Information Systems and Operations Management department at Loyola University Maryland and teaches in the area of Operations Management at the undergraduate and graduate level. He holds a Ph.D. in Operations Management from Kent State University. His
research interests include stochastic modeling, the last mile problem, supply chain management, and mathematical programming with publications in such journals as the International Journal of Logistics Research and Applications and the Journal of Manufacturing Systems. His prior work experience includes production control, supply chain management, and managing an operations department. He is a member of DSI, INFORMS, ISM, and POMS.

Maxim A. Bushuev is currently an assistant professor of Management at Kent State University – Geauga. Dr. Bushuev received a B.S. degree in Automation Engineering from Voronezh State Technological Academy in 2001, and a PhD degree in Technical Sciences from the same university in 2006. He received MBA degree from Chadron State College in 2009 and a Ph.D. degree in Operations Management from Kent State University in 2013.

Jantanee Dumrak is a lecturer for Global Management Program at Torrens University Australia. She has Doctorate in Project Management from University of South Australia. She has worked as a thesis supervisor and examiner for Master of Project Management Program at the School of Natural and Built Environments, University of South Australia. Before joining academia, Jantanee worked as a project coordinator for collaborative reproductive health projects funded by the United Nations and the Government of Thailand. She is interested in project and program management of development projects.

Yudi Fernando is a Senior Lecturer in Operations Management at the Graduate School of Business, Universiti Sains Malaysia (USM). He received his PhD from the School of Management at USM. Dr. Yudi also worked for several years in the electronics industry. His research focus is in the area of sustainability supply chain, green logistics, green production and service management. Dr. Yudi currently teaches operations strategy: sustainability and supply chain management, business research methodology, advance business statistics subjects at MBA/DBA levels. He has also been supervising several PhD/DBA students with research topics on operations and supply chain management. He has been a member of editorial boards for International Journal of Operations Research and Information Systems (IJORIS). Dr. Yudi has actively participated as an expert reviewer for international conferences. Thus far, he has published in several journals such International Journal of Services and Operations Management, International Journal of Applied Logistics, Food Control, International Journal of Information Management, International Journal Logistics Systems and Management, International Journal of Operations and Supply Chain Management, International Journal of Productivity and Quality Management, International Journal of Value Chain Management, and so on.

Amulya Gurtu is an Assistant Professor of Supply Chain Management in the Austin E. Cofrin School of Business at the University of Wisconsin, Green Bay, where he started the supply chain management program. He obtained his PhD from Ryerson University, Canada, MBA from Western University, Canada and MS (Engineering) from Bhopal University, India. His current research is on supply chains, global manufacturing, and on environmental and social sustainability. His research has been published in the Journal of Environment & Development, Management Research Review, Applied Mathematical Modelling, and Sustainable Production and Consumption. He is a manuscript reviewer for many leading journals including the International Journal of Production Economics, the Journal of Cleaner Production, and the Journal of Business Ethics.

Mohamad Y. Jaber is a Full Professor of Industrial Engineering at Ryerson University. He obtained his PhD in Manufacturing and Operations Management from The University of Nottingham, UK. His research interests are: modelling learning and forgetting curves and their applications and logistics and inventory systems. He has published many papers in internationally renowned journals. He is an Editor for Applied Mathematical Modelling, Computers and Industrial Engineering, and Ain Shams Engineering Journal, and also the editor of the books Inventory Management: Non-Classical Views and Learning Curves: Theory, Models, and Applications. He is a member of several professional societies.

Nitty Hirawaty Kamarulzaman is an Associate Professor in the Department of Agribusiness and Bioresource Economics, Faculty of Agriculture, Universiti Putra Malaysia. Her research interests include supply chain management, sustainable logistics, reverse logistics, agribusiness marketing, and consumer purchasing behavior.
About the Contributors

Kijpokin Kasemsap received his BEng degree in Mechanical Engineering from King Mongkut’s University of Technology Thonburi, his MBA degree from Ramkhamhaeng University, and his DBA degree in Human Resource Management from Suan Sunandha Rajabhat University. He is a Special Lecturer at Faculty of Management Sciences, Suan Sunandha Rajabhat University based in Bangkok, Thailand. He is a Member of International Association of Engineers (IAENG), International Association of Engineers and Scientists (IAEST), International Economics Development and Research Center (IEDRC), International Association of Computer Science and Information Technology (IACSIT), International Foundation for Research and Development (IFRD), and International Innovative Scientific and Research Organization (IISRO). He also serves on the International Advisory Committee (IAC) for International Association of Academicians and Researchers (INAAR). He has numerous original research articles in top international journals, conference proceedings, and book chapters on business management, human resource management, and knowledge management published internationally.

Andrey Kretinin is a Ph.D. candidate in the Department of Marketing and Entrepreneurship at Kent State University. His primary research envelops the domains of strategic management, entrepreneurship, family business, and international business, with focus on franchising, its structure, governance, and internationalization.

Sherif Mostafa is a lecturer and a PhD candidate in construction and project management at School of Natural and Built Environments, University of South Australia. He obtained MSc in Industrial Engineering and B.Sc. in Production Engineering and Mechanical Design from Mansoura University in 2010 and 2003. Sherif is a member of Barbra Hardy Institute, Project Management Institute (South Australia Chapter), Institute of Industrial Engineers, the Institution of Engineers Australia, and Lean Construction Institute Australia. Sherif is interested in lean and agile manufacturing/construction, offsite manufacturing, modelling and simulation of agile supply chain, lean six sigma, sustainability and green manufacturing, Multi Criteria Decision Making (MCDM), and Ant Colony Optimisation (ACO). For further details, refer to his staff homepage at http://people.unisa.edu.au/Sherif.Mostafa.

Krishan Kumar Pandey is Professor & Vice Dean of Jindal Global Business School. He did his post-graduation and Doctorate in Statistics and a second post-graduation in Management. 14 years ago, he started his career as a teacher & consultant and worked for reputed firms and prestigious universities in India. Prior to Joining JGBS, Dr. Pandey was Sr. Associate Professor & Head of Decision Sciences at University of Petroleum and Energy Studies, Dehradun. Dr. Pandey has also worked as Assistant Dean (Research) at COMES at UPES. His research interest areas
are Energy & Environment, Renewable Energy, Data Mining, Business Analytics, Small Area Estimation, Sampling etc. Dr. Pandey has published 30 research papers in international and national journals of repute. As per Elsevier research dashboard portal till June 2016, eight of his top research papers are downloaded/viewed around 19,275 times with 240 citations and his h-index is 6. His work has been published in top reputed journals in the area of Renewable Energy & Energy Policy like “Applied Energy”, “Energy Policy”, “Renewable and Sustainable Energy Reviews”, “Renewable Energy”, “Energy Systems” etc., and has participated in several international & national conferences. He has authored two books published by VDM Verlag, Germany. Dr. Pandey has guided fourteen Ph.D. Scholars from across the industry and academia in different areas of his specialization. Dr. Pandey was the founding Editor in Chief, for UPES Management Review- A biannual International Journal of Core Sector (ISSN 2250 – 0723). He is also acting as an editorial board member & reviewer for various reputed journals published by Elsevier, Emerald, T&F etc. Dr. Pandey has held sessions at the European Union’s project for capability building of the Indian aviation sector, jointly executed by UPES and Fachhochschule Frankfurt am Main University of Applied Sciences, Frankfurt, Germany. He has conducted training sessions for executives from aviation and energy sectors- Oil India, IOCL, HPCL, BPCL, ONGC, GAIL, IBM etc. He has organized many national and international conferences as a convener and Co convener. Dr. Pandey has received many awards and cash prizes.

Cory Searcy is an Associate Professor and Director of the Environmental Applied Science and Management Program at Ryerson University. He is also an Associate at the International Institute for Sustainable Development. His current research focuses on sustainability indicators, supply chain management, and integrated management systems. His research has been published in several leading academic journals, including the Journal of Cleaner Production, the Journal of Business Ethics, and the International Journal of Production Economics.

Balan Sundarakani is an Associate Professor and Program Director for Master of Science in Logistics in the Faculty of Business and Management at the University of Wollongong (Australia) in Dubai. Previously he was working as an Assistant Professor with UOWD from May 2009 till Aug 2011. He has 12 years of teaching and research experience in the area of Supply Chain Management across the various universities including the National Institute of Technology, Tiruchirappalli, IIT, Roorkee, Hindustan University, Chennai and the National University of Singapore, Singapore. He also served as an Adjunct Research Fellow with the Chair of Logistics Management with Swiss Federal Institute of Technology (ETH), Zurich, Switzerland.
About the Contributors

Gowri Vijayan holds a PhD degree in Agribusiness from the Department of Agribusiness and Bioresource Economics, Faculty of Agriculture, Universiti Putra Malaysia. Her research interests include agribusiness, sustainable supply chain management, green logistics, reverse logistics, strategic management, marketing, agricultural marketing, and Netchain management.
