About the Authors

Eli B. Cohen serves as Professor of Computerized Management Information Systems at the Leon Kozminski Academy of Entrepreneurship and Management (Poland) and Director of the Informing Science Institute (U.S.). He is Co-Founder of the Informing Science Journal (http://inform.nu), a refereed academic journal read throughout the world and the Journal of IT Education (http://jite.org). He has taught in Australia, Poland, Slovenia, and the U.S. He has formal training and certification in IS, psychology, and education.

Camille Auspitz is Project Manager at Day & Zimmermann, Inc.

Clare Atkins is Academic Leader in the School of Computer and Office Technology at the Nelson Marlborough Institute of Technology and an Honorary Associate of Massey University in Aotearoa/New Zealand. Her research and teaching interests are mainly in the area of relational database design, particularly in requirements acquisition and conceptual modeling and evidence-based information systems. In 1999, Dr. Atkins was recognized by the College of Business at Massey University with two Excellence in Teaching awards, Best Undergraduate Teaching and Overall Distinguished Teacher in the College. The design and delivery of the module described in this chapter was largely responsible for these awards.

Raquel Benbunan-Fich’s research interests include educational applications of computer-mediated communication systems, asynchronous learning networks, and evaluation of commercial Web-based systems. She has published articles on related topics in Group Decision and Negotiation, Journal of Computer Information Systems, and Journal of Computer-Mediated Communication, among others, and has forthcoming articles in Communications of the ACM and Information & Management. Dr. Benbunan-Fich is an Assistant Professor of Information Systems at the W. Paul Stillman School of Business, Seton

Hall University. She received her PhD in Management Information Systems from Rutgers University in 1997.

**John Bentley** is a Senior Lecturer in Information Systems at Victoria University of Technology in Melbourne. He is the Course Director of the Bachelor of Business in Computer Systems Support conducted in Melbourne and Hong Kong. He has coordinated the activities of the Faculty of Business on the Melton Campus in the outer western suburbs of Melbourne. Professor Bentley has been a member of the Faculty Board of Studies and a foundation member of the Academic Board of the university. He is currently undertaking a PhD concerning the curriculum of information systems undergraduate courses and graduate attributes. He has a strong teaching background combined with relevant industry experience and consultancy work. His research interests include small business and electronic commerce, Web usability, user issues in systems development, work-integrated learning, and problem-based learning.

**Susy S. Chan** is an Associate Professor and the Director of the Center for E-Commerce Research in the School of Computer Science, Telecommunications, and Information Systems, at DePaul University. She was the Co-Creator of DePaul University’s pioneering master’s and baccalaureate programs in e-commerce technology. As a former CIO and Vice President for Planning at DePaul, she developed its six-campus IT infrastructure. Her research is focused on e-commerce development and strategies, mobile commerce, enterprise transformation, and ERP procurement. She received a PhD in Instructional Technology from Syracuse University.

**Chris Cope** has been teaching about information systems and researching into IS teaching and learning for 13 years. He is currently an academic in the Division of IT at La Trobe University, Bendigo, Australia.

**Bill Davey** is a Senior Lecturer in the School of Business Information Technology at RMIT University, Melbourne, Australia. He holds bachelor’s degrees in Science and Education and a master’s of business degree. His research interests include methodologies for systems analysis and systems development, Visual Basic programming, information systems curriculum, and information technology in educational management. He & Arthur Tatnall have worked together and cooperated on many occasions. They have worked on joint research projects and co-authored a large number of papers, book chapters, and textbooks relating to management information systems, programming, and IS curriculum.
Mariam Fergusson works at PricewaterhouseCoopers in Global Risk Management Solutions focusing on e-business and information technology security in the public sector. She was a Senior Lecturer in the School of Computer Science, UNSW, at the Australian Defence Force Academy in Canberra from 1995-2000. The focus of her teaching was to postgraduate students in information systems research methods and telecommunications. During this time, she undertook significant research into the teaching of postgraduate research students. Prior to that, she was the coordinator of an MBA program in the United Arab Emirates. Ms. Ferguson’s research interests are in electronic commerce, particularly in public sector service delivery. Over the last three years, she has worked with Australian federal and state government agencies on a range of electronic business projects including Internet payment systems, and has published a book chapter and several articles on this topic. She has worked in the information technology industry for the last 20 years, dividing her time between consultancy work, and an educator and researcher at universities.

Beverley G. Hope is employed as Teacher and Researcher in the School of Information Management at Victoria University of Wellington, New Zealand, where she became involved in the planning for a new Honours and Research Master’s program in 1997. The programme was offered for the first time in 1998. During the completion of this chapter, Dr. Hope was supported by a Visiting Fellowship at the City University of Hong Kong. She completed a Bachelor’s of Science and MBA at the University of Kansas and a PhD at the University of Hawaii at Manoa. Her PhD studies were supported by a scholarship from the East-West Center. Her research and teaching focus on quality, information management, current IS issues, and IS research. In her work she takes a holistic or system view of organisations and the issues that face them. She has presented and published at many regional and international conferences, and acts as referee for several international conferences and journals.

Pat Horan is a Senior Lecturer in the Department of Information Technology at La Trobe University, Bendigo. After programming in the days when mainframe Cobol was king, she moved into tertiary IT teaching, evolving through technical and advanced education colleges to university. Her current research interest is how students learn about IS and her ongoing PhD study is in this field. In addition to students her interests include animals (especially dogs, cats, goats, and horses), opera, cryptic crosswords, films, red wine, and bemused observation of the antics of politicians and university management.
Brad King is Chief Information Officer at Day & Zimmermann, Inc.

Linda V. Knight is Associate Dean of DePaul University’s School of Computer Science, Telecommunications, and Information Systems. She is also Director of CTI’s Center for the Strategic Use of Emerging Technologies. Co-developer of one of the world’s largest e-commerce degree programs, she lectures on the topic of e-commerce curricula and teaches and conducts research in the area of e-commerce business strategy, development, and implementation. She is Associate Editor of the Journal of IT Education, and services on the Editorial Review Board of the Information Resources Management Journal. An entrepreneur and IT consultant, she has held industry positions in IT management and quality assurance management. She holds a PhD in Computer Science from DePaul University.

Ned Kock is the Director of the E-Collaboration Research Center, Fox School of Business Management, Temple University, Philadelphia, USA. He is also a CIGNA Corporation Research Fellow and an Irwin L. Gross E-Business Institute Research Fellow.

Glenn Lowry is Professor and foundation Executive Director of MBA Programs at United Arab Emirates in Abu Dhabi. He earned the PhD in Information Systems from Rutgers University, USA. He served in senior academic and administrative posts at Virginia Tech, the University of Iowa, University of Technology, Sydney, the University of Tasmania, and as Visiting Research Fellow at Victoria University. He has also worked in industry as an account manager at Technical Aid Corporation in Washington, DC, and has consulted to NCR, Fujitsu, and Sumbershire Management (Singapore). He has lectured throughout the U.S., Australasia, Europe and the UK, Africa, and the Middle East. With research interests in technology-led innovation and change management, cross-cultural technology acceptance, software engineering, e-business, research methods, and information systems education, Dr. Lowry has authored 60+ papers and six books.

Terry D. Lundgren is a Professor of Information Systems at Eastern Illinois University where he has been on the faculty since 1989. His research and writing have resulted in more than 100 publications, including co-authoring Records Management and Advanced Microcomputer Applications textbooks. His current research interests include enhancing microcomputer and programming courses by Web technology. He has been an advocate of computer use since the early 1970s and is on technology’s leading edge in course development and delivery.
Geoffrey C. Mitchell is employed as a Senior Lecturer in the University Teaching Development Centre at Victoria University of Wellington, New Zealand. After six years teaching in the information systems area, Dr. Mitchell moved to the UTDC to support the introduction of new courseware systems across the university. He has been the recipient of innovation in teaching awards and research grants for his work in the development of online teaching systems. His PhD research in Australia and New Zealand has focused on the politics of new systems introduction in public sector organisations.

Karen S. Nantz is a Professor of Information Systems at Eastern Illinois University where she has been on the faculty since 1990. Dr. Nantz is the co-author of *The 3 R’s of Email: Risks, Rights, and Responsibilities*, along with numerous articles in academic journals. She currently serves as an Associate Editor of the *Journal of Information Technology Education* and is on the editorial boards of the *Annals of Cases on Information Technology Applications* and *The Journal of End User Computing*. Her teaching interests include systems analysis, database, and management of information systems.

Geoff Sandy has worked in tertiary education for 25 years and the private sector for five years, first at BHP Petroleum and then the ANZ Banking Group. His main research interests are learning strategies, censorship of the Internet, and network usage policy. He has published widely in these areas, teaches at the undergraduate and postgraduate levels, and supervises research degree students. He is a member of the Academic Board of Victoria University, Australia, and the Committee for Postgraduate Studies and the Resources Planning and Advisory Committee. Dr. Sandy has provided consultancy services over many years to a diverse group of organizations from the private and public sectors.

Anthony Scime is currently an Assistant Professor of computer science at the State University of New York College at Brockport. His interests include information technology education and the World Wide Web as an information system for creation, discovery, storage and dissemination of knowledge. He has over twenty years of academic, industry, and government experience in applying information systems to solve large-scale problems. He has supervised multiple large and small software development projects as well as complex hardware/telecommunications designs and installations.

Lorraine Staehr is a Lecturer in the Department of Information Technology at La Trobe University. Her research interests are in mathematical modeling of adsorption processes, women in computing, the business benefits of ERP systems,
and information systems education. She has published research papers in a number of international conferences and journals.

**Leigh Stelzer**’s current research focus is Web-enhanced instruction and its relationship to student individual differences, learning styles, and teaching strategies. He has published professional articles on trade negotiations, joint ventures, and cross-cultural problems doing business in China. Additional research publications examine the strategies for effective business education and the interface of business and politics. Dr. Stelzer is a Board Member and Past President of Beta Gamma Sigma Alumni of Greater New York and Past Chair of the Department of Management, W. Paul Stillman School of Business, Seton Hall University. Dr. Stelzer serves as Chair, Intranet-Based Management Education of the Management Education Division (MED), Academy of Management (AOM). He received his BA from New York University and his PhD from the University of Michigan.

**Arthur Tatnall** is a Senior Lecturer, and Director of the Electronic Commerce Research Unit in the School of Information Systems at Victoria University in Melbourne, Australia. He holds bachelor’s degrees in Science and Education and a research master’s of arts in which he explored the origins of business computing education in Australian universities. His PhD involved a study in curriculum innovation in which he investigated the manner in which Visual Basic entered the curriculum of an Australian university. His research interests include technological innovation, information systems curriculum, Visual Basic programming, project management, electronic commerce, and information technology in educational management.

**Connie E. Wells** is Chair of the Master of Science in Information Systems program at the Walter E. Heller College of Business Administration at Roosevelt University, Chicago, IL. Dr. Wells earned her BSE degree in Math Education at Northern Illinois University. She received her MBA and PhD degrees from the University of Minnesota, majoring in Management Information Systems. In addition to teaching at Roosevelt University, she taught at Georgia State University, Reinhardt College, and Nicholls State University. Her major areas of interest in teaching and research are teamwork in systems analysis and design, and in assessment/evaluation of software and information systems.
