Ahmad Alaiad is an assistant professor in computer information systems department at the Jordan University of Science and Technology, Jordan. His research focuses on information systems health informatics. He has various publications in reputed journals and conferences.

Khalid Alkhatib is an assistant professor in accounting and finance in the department of Computer Information Systems, Jordan University of Science and Technology. He obtained his PhD degree in accounting and finance and postgraduate diploma in social science research methods from Cardiff University in the United Kingdom. His master and bachelor degrees in management are also from the United Kingdom. He gained his financial experience from the banking industry in the UK where he worked. His teaching commitments are accounting, business planning and control, and accounting information systems. His research interests are financial reporting, information disclosure, and international accounting.
About the Contributors

Akashdeep Bhardwaj, PhD research scholar from UPES, PGDM, B.E (Computer Science), is an Enterprise Risk and Resilience Technology professional working on Information Security and Infrastructure Operations domain having worked for various US based MNCs and trained and certified in Internal Information Security, Ethical Hacking, Microsoft, Cisco and VMware technologies.

Balamurugan Balusamy had completed his B.E. (computer science) from Bharathidasan University and M.E. (computer Science) from Anna University. He completed his Ph.D. in cloud security domain specifically on access control techniques. He has published papers and chapters in several renowned journals and conferences.

Ranjit Biswas has guided thirteen Ph.D.’s (degrees conferred) and published more than 120 research papers all being in foreign journals of international repute of USA, German, France, UK, Bulgaria, Italy in the field of Computer Science. He is having about 34 years of teaching experience in India and abroad at renowned universities viz. Calcutta University, IIT Kharagpur, Philadelphia University, IGNOU, NIT, etc. He is a Member in Editorial Board of 14 journals of high esteem international repute published from USA, German, France, UK, Bulgaria, Italy and Asian countries. Presently, he is Professor & Head of the Department of Computer Science & Engineering in Jamia Hamdard University, New Delhi, India.

Ernesto Damiani is a full professor at the Università degli Studi di Milano and Director of the Khalifa University Information Security Centre in Abu Dhabi, UAE. He has held visiting positions at a number of international institutions, including George Mason University in Virginia, LaTrobe University in Melbourne, Australia, and the University of Technology in Sydney, Australia. He has also done extensive research on advanced network infrastructure and protocols, taking part in the design and deployment of secure high performance networking environments, both as chief scientist and in management positions. His areas of interest include Web services security, processing of semi and unstructured information (e.g., XML), and semantics aware content engineering for multimedia. Also, he is interested in models and platforms supporting open source development. He has served and is serving in all capacities on many congress, conference, and workshop committees. He is a senior member of the IEEE and ACM distinguished scientist.
About the Contributors

Dan DeFilippi was a black hat hacker in his teens and early twenties. In college he sold fake IDs, and later committed various scams, including phishing, credit card fraud, and identity theft. He was caught in December 2004. In order to avoid a significant jail sentence, DeFilippi decided to become an informant and work for the secret service for two years, providing training and consulting and helping them understand how hackers and fraudsters think. Today, DeFilippi is a successful director of engineering at a private organization. He continues to give his time toward raising awareness of cybercrime, particularly credit card fraud, presenting talks at international symposia, global media interviews, and guest lecturers at universities.

Fulvio Frati holds an administrative position at the Dipartimento di Informatica, Università degli Studi di Milano. He is the author of many international scientific publications in the field of Open Source, Service Oriented Architecture, Collaboration Environment, and Software Development Process Monitoring and Modeling. He has served as a PC member and publication chair of many International conferences and workshops.

Hayrünisa Gürel works in Marmara University Vocational School of Social Sciences, in Department of Foreign Trade in Istanbul, Turkey. She teaches courses on economics, insurance in foreign trade, banking law, communication. Her academic studies are on insurance and banking. She has been working as a lecturer in Marmara University, the Vocational School of Social Sciences since 2010.

Shirley Jothi Mano majored in Computer Science and currently pursuing masters in Information Technology at VIT university Vellore. Her areas of interest are in networks and image processing.

Katina Michael is a professor in the School of Computing and Information Technology at the University of Wollongong. She is the IEEE Technology and Society Magazine editor-in-chief and also the senior editor of IEEE Consumer Electronics Magazine. Since 2008, Michael has been a board member of the Australian Privacy Foundation. Michael researches on the socio-ethical implications of emerging technologies and has cross-disciplinary qualifications in IT and Law. Michael is responsible for the creation of the human factors series of workshops hosted annually since 2006 on the “Social Implications of National Security”. The workshops and proceedings were funded by the ARC’s Research Network for a Secure Australia (RNSA) which embraced multidisciplinary collaboration.
Nitin Nagar has received a Master Degree in Computer Applications from Devi Ahilya University, Indore and perusing PhD Degree from Devi Ahilya University Indore, India. Presently he is the Assistant Professor at International Institute of Professional Studies, Devi Ahilya University Indore, India. He is having more than 7 years of teaching and 6 years of research experience. His areas of research are Cloud Computing, Advanced Database Management System, and Distributed Computing.

Saranya Nandagopal is currently pursuing her M.Tech at Vellore Institute of Technology, India.

Ahu Coşkun Özer has received her PhD degree from Istanbul University in Turkey. She has master degree on Theory of Economics. She has bachelor’s degree from Marmara University. She is now Assistant Professor in Marmara University, Vocational School of Social Sciences. Economic policy, international economics, entrepreneurship are special interests of her.

Nilanjan Ray is from Kolkata, India. He has obtained his M.Com (Mktg), MBA (Mktg), STC FMRM (IIT-Kgp), PhD (Management) from The University of Burdwan Department of Business Administration). He has 8 years teaching experience in BBA, MBA, BCom and 6 years Research experience and guided around 56 Post Graduate students’ project. Dr. Ray has contributed over 30 research papers in reputed National and International Referred, Peer Reviewed Journals and Proceedings. He has contributed 10 book Chapters and also Chief Editor of 4 Edited Book Volumes of IGI Global USA. He has also associated himself as a reviewer of Journal of Business and Economics, Research Journal of Business and Management Accounting and Journal of Service Marketing Emerald Group Publishing Limited, Research Journal of Business and Management Accounting, and as an Editorial Board Member of several referred Journals. He has also chaired in a technical session at IJAS Conference 2012, at Harvard University, Boston, USA. Dr. Ray is a life-member of the International Business Studies Academia.

Claudio Santacesaria is an experienced R&D manager with a focus on innovation. He has managed the R&D of big and small companies in various fields from Telecommunications to Banking applications.
About the Contributors

Ugrasen Suman has received a Master Degree in Computer Applications from Rani Durgawati University Jabalpur and PhD Degree in Computer Science from Devi Ahilya University Indore, India. Presently, he is a Professor at School of Computer Science & Information Technology, Devi Ahilya University, Indore, India. He has more than 14 years of teaching and research experience. His areas of research are Software Engineering, Knowledge Management & Mining, Software Reuse, Software maintenance & reengineering and Service Oriented Computing. He has guided four PhD Scholars, four PG research scholars and 37 M.Tech thesis. Currently, he is guiding eight PhD Scholars. He has published more than 70 research papers in national & international journals/conferences. He is also working as Dy. Coordinator on a UGC-SAP research project on Distributed systems. He is a member of IEEE, IEEE-CS, Senior Member of IACSIT, Life Member of CSI and IAENG.

Malathi Velu completed her B.E. (Computer Science) from Panimalar Institute of Technology and is pursuing her M.Tech (IT-Networking) at Vellore Institute of Technology. She has published a conference paper in ACM Publication and a book in Lambert Publication.

Marta Vidal, BSc and MBA from ESADE Business School, PhD student in Management at Complutense University, Assistant Professor of Management at European University of Madrid.

Javier Vidal-García, Assistant Professor of Finance, University of Valladolid, has a BSc in Management from Queen’s University Belfast, MSc in Finance from Aston Business School, MA in Economics from Autonomous University of Madrid, Ph.D. in Financial Economics from Complutense University of Madrid and has been a postdoctoral fellow at the Harvard Business School.
Qussai Yaseen received his PhD in Computer Science from the University of Arkansas at Fayetteville, AR, USA in 2012, where he developed new approaches for mitigating insider threat in relational databases. At the U of A, he worked as a research assistant for Professor Brajendra Panda on a project funded by US AFOSR to tackle insider threat in relational database systems. Dr. Yaseen has published several papers in refereed journals and conferences. Prior to receiving his Ph.D., Dr. Yaseen worked at Al-Balqaa University, Jordan as an instructor, and at Irbid Private University as a lab administrator. Dr. Yaseen recieved his Bsc. and Msc. in Computer Science from Yarmouk Univeristy and Jordan University of Science and Technology in 2002 and 2006 respectively. After getting his Ph.D degree in 2012, Dr. Yaseen worked at Yarmouk University for two years. In 2014, Dr. Yaseen joined Jordan University of Science and Technology. Currently, he is working on Cloud Security and trying to develop new approaches that protect information stored in the Cloud, especially in Cloud Relational Databases.

İsmail Yıldırım is an assistant professor of finance at Hitit University, Department of Finance, Banking and Insurance, Corum, Turkey. He received PhD in Finance with his thesis entitled as Stress Testing in the Risk Measurement of Insurance Companies: An Implementation in Turkish Insurance Sector.
