About the Contributors

**Nilmini Wickramasinghe** (PhD, MBA, Grad DipMgtSt, BSc) is the inaugural Professor – Director Health Informatics Management at Epworth HealthCare and the Professor of Health Informatics Management at Deakin University, Australia. For over 20 years, she has been actively researching and teaching within the health informatics domain with a particular focus on developing suitable models, strategies and techniques grounded in various management disciplines to facilitate more effective designs, development and implementation of technological solutions to effect a superior, value-based patient-centric delivery of care. Professor Wickramasinghe has collaborated with leading scholars at various premier healthcare organizations throughout Australasia, the US, and Europe and is well-published with more than 300 referred scholarly articles, more than 10 books, numerous book chapters, an encyclopaedia and a well-established funded research track record. Professor Wickramasinghe is the editor-in-chief of two scholarly journals published by InderScience, the Intl. J. Biomedical engineering and Technology (www.inderscience.com/ijbet) and the Intl. J Networking and virtual Organisations (www.inderscience.com/ijnvo).

***

**Mohammad Abdolshah** received his B.Sc. and M.Sc. in Industrial Engineering from Amirkabir University of Technology, Tehran, Iran. Later, he obtained his Ph.D. from University of Putra Malaysia, Malaysia in Industrial Engineering. Dr. Mohammad Abdolshah’s current research interests are Industrial Engineering, Quality Engineering, Control Project, and Project Management.

Eltayeb Salih Abuelyaman received a Ph.D. in Electrical and Computer Engineering from the University of Arizona, USA, in 1988, an M.Sc. in Electrical and Computer Engineering from Oregon State, USA, in 1984, and a B.Sc. in Applied Mathematics from the University of Khartoum, Sudan, in 1978. Research interests are in Computer Networks Security and Data Mining.

Yamam Abuzinadah is a Doctoral researcher and mental health accredited educator. She is conducting her PhD in mental health literacy among people from Arabic background. She acts on the research and innovation committee in school of Global, urban and social studies in RMIT University, as the higher degree by research representative. She is a certified hypnotherapists and trained counsellor. She holds a Master’s degree in Social Health and Counselling in the Children and Family strand from Macquarie university in Sydney, Australia and a bachelor degree in sociology from KingAbdulaziz university in Jeddah, Saudi Arabia. Yamam is a member of the Victorian transcultural reference group, St Vincent hospital, and the advisory committee for the Ethnic council of Victoria. She has run training programs and workshops in Sydney, Brisbane and Melbourne Australia around social and cultural issues, such as: stress management, parenting, refugees health and wellbeing, and domestic violence. Yamam is interested in mental health awareness and education, migrants’ and refugees’ health, cultural sensitivity and e-mental health.

Sasan Adibi (BS’95, MS’99, MS’05, PhD’10, SMIEEE’11) has a PhD degree in Communication and Information Systems from University of Waterloo, Canada and the recipient of the best PhD thesis award from the IEEE Society. He is currently involved in the research, design, implementation, and application Electronic Health (eHealth) and Mobile Health (mHealth). Sasan’s research publication background is mostly in the areas of Quality of Service (QoS), Security, and eHealth/mHealth. He is the first author of 50+ journal/conference/book chapter/white paper publications and is a co-editor of four books, two of which are in the areas of mHealth and the other two books are in the areas of 4th Generation Mobile Networks and QoS. He is an inventor/co-inventor of 4 patents in the areas of Health Informatics. He has 9+ years of strong industry experiences, having worked in a number of high-tech companies, including: Nortel Networks, Siemens Canada, BlackBerry Corp., WiMAX Forum, and Huawei Technologies. He is the founder and managing director of Cyber Journals and serving as Cyber Journals Health Informatics Associate Editor. He served as a Vice Chancellor Research Fellow at Royal Melbourne Institute of Technology (RMIT) at the Department of Business IT and Logistics for two years. He is currently a lecturer in the School of Information Technology at Deakin University.

Olumuyiwa Bamidele Alaba is a Lecturer at the Department of Computer and Information Sciences, Tai Solartin University of Education, Ijagun, Ijebu-Ode, Ogun State. He has published in journals and present papers in conferences both within and outside Nigeria.

Jeremiah Ademola Balogun is a Graduate Research Assistant in the Department of Computer Science and Engineering, Obafemi Awolowo University, Nigeria. His focus is in the area of applied computing that is application of computing theories to address and solve health related problems in Sub Saharan Africa. He has published in journals and presented papers in conferences within Nigeria. He is currently researching into Cancer and environmental-related diseases in Nigeria. His research interest includes Health Informatics, Data Mining, Machine Learning, Software Engineering and Geographical Information System. He enjoys reading and brainstorming sessions.
About the Contributors

Dipali Bansal is presently a Professor and Head of Electronics & Communication Engineering Department with a NAAC A Grade Manav Rachna International University, Faridabad, India. Dr Bansal is a doctorate in Biomedical Instrumentation and Bio signal processing from Jamia Milia University, New Delhi and an upcoming and young scientist. She has got a distinguished career in teaching and industry spanning 19.5 years and her research work has found prominent recognition and has been published in many national and international journals and conferences. She is a Reviewer of many journals including the journal of Medical & Biological Engineering & Computing (Springer).

Bader Binhadyan is a PhD candidate at RMIT University, Australia. He holds a master degree in Business Information Systems from Monash University, majoring in Enterprise Resource Planning (ERP), and a bachelor degree in Information Technology from La Trobe, Australia as well as two diplomas in IT, University of California, San Diego and Imam Saud University in Riyadh. He Worked at Saudi Arabian Monetary Agency (SAMA) for just over 8 years as asst. computer programmer. Because Bader has worked and studied in Australia, the Middle East and North America, it helps him to get insight into different cultures and crafted my ability to adapt new environments and introduce new ideas. He has interests in psychology, human behaviour, technology which has the most influence his research of interests.

Mari Botti has held the Epworth/Deakin Chair in Nursing position since 2004 and is an Alfred Deakin Professor at Deakin University. Her research focus is located within clinical and health services evaluation with a particular interest in postoperative pain management and the investigation of models of care that encourage patient engagement in their care, safety, health and wellbeing. Mari is a founding member of the Deakin University research priority centre in Quality and Patient Safety. In addition, she chairs the Deakin University Human Research and Ethics Committee and the Epworth HealthCare Human Research Ethics Low Risk Committee.

Karoly Bozan is an associate professor of informatics and computer science at Idaho State University. Dr. Bozan’s research interest encompasses system design in the health domain in the multi-stakeholder context. Prior to joining academia, Dr. Bozan held numerous technical and management consulting positions in a variety of industries.

Peter Brooks is currently a Professorial Fellow at the Centre for Health Policy- School of Population and Global Health University of Melbourne. Peter Brooks has held previous posts as Executive Dean of Health Sciences at the University of Queensland, as Professor of Medicine at St. Vincent’s Hospital, Sydney (University of New South Wales) and was the Foundation Professor of Rheumatology at the Royal North Shore Hospital and the University of Sydney. He completed his medical training at Monash University in Melbourne and then studied rheumatology under Professor Watson Buchanan in Glasgow. His first academic post in Australia was at the University of Tasmania in 1976. Professor Brooks is a rheumatologist/public health/health policy practitioner with a major research interest in the treatment and epidemiology of rheumatic diseases and health workforce/ health policy/ patient engagement. Over the past decade he has developed a major interest in health workforce reform in particular new models of care and established the Australian Health Workforce Institute at University of Melbourne to assist developing an evidence base for Health Workforce policy and innovation. He also has a major interest in Telehealth and M Health technologies and how they might transform the health system and empower patients in making health care decisions.
Bill Davey is a Senior Lecturer in the School of Business Information Technology at RMIT University, Melbourne, Australia. His research interests include methodologies for systems analysis and systems development, information systems curriculum, eGovernment and the elderly, and information technology in educational management. Bill and Kevin have worked together co-operatively on many occasions. They have co-operated on several joint research projects and coauthored several papers relating to management information systems, programming, computers in management, eGovernment and the elderly, and IS curriculum.

Carolin Durst holds the Chair of Information Systems at the University of Bremen. Her research focuses on the development of new methods for the exploration and the design for computer-supported cooperative work (CSCW) systems. The fields of applications comprise of use cases in healthcare, crowdsourcing and innovation management. Her research has been published in Communications of the AIS (CAIS), the International Journal Technological Forecasting and Social Change (TFSC) and elsewhere, including books and conference proceedings.

Ruwini Edirisinghe is a Vice-Chancellor’s research fellow at RMIT University. She has been working at RMIT since 2009 as a research fellow in a number of Australian Research Council (ARC) funded projects. Ruwini received her PhD in Information Technology from Monash University, Australia in 2009. Ruwini was awarded Endeavour post-doctoral research fellowship in 2010. She was graduated with First Class Honors from Bachelor of Engineering specialized in Computer Science & Engineering from University of Moratuwa, Sri Lanka in 2003. She has industry experience working in multi-national IT companies providing software and hardware solutions. Her research interest includes, mobile computing, sensor networking applications and construction & infrastructure management. Ruwini is a member of Institute of Electrical and Electronics Engineers (IEEE) and a committee member of IEEE Victorian Women in Engineering group.

C.K. Foo is a retired medical practitioner who has treated patients for over 40 years.

Daniel Gartner earned his doctoral degree in Operations Management at the TUM School of Management, Technische Universität München (TUM), Germany and works as a Lecturer in Operational Research at Cardiff University, UK. He worked as a Postdoc at the H. John Heinz III College, Carnegie Mellon University, Pittsburgh, USA. His research examines optimization problems in health care and machine learning techniques to improve hospital-wide scheduling decisions. Prior to joining TUM, he received his university diploma (Master’s equivalent) in medical informatics from the University of Heidelberg, Germany and a M.Sc. in Networks and Information Systems from the Université Claude Bernard Lyon, France.

Hassan Ghasemzadeh is an Assistant Professor of Computer Science in the School of Electrical Engineering and Computer Science at Washington State University (WSU). His research interests lie in different aspects of Embedded and Pervasive System Design including sustainable and green computing, low-power architectures, reconfigurable computing, and system-level optimization. The focus of his current work is on collaborative signal and information processing, power optimization, data analytics, and algorithm design for Internet-of-Things (IoT) systems with a primary emphasis on applications in
healthcare and wellness. His research spans the areas of embedded systems, mobile computing, and machine learning. Prior to joining WSU in 2014, he was a Research Manager at the UCLA Wireless Health Institute and an Adjunct Professor of Biomedical Informatics at San Diego State University. He was on the faculty of Azad University from 2003-2006 where he served as Founding Chair of Computer Science and Engineering at Damavand branch, Tehran, Iran. Dr. Ghasemzadeh received his Ph.D. degree in Computer Engineering from the University of Texas at Dallas in 2010, and spent the academic year 2010-2011 as a Postdoctoral Fellow at the West Health Institute. He received his M.S. degree in Computer Engineering from University of Tehran, Tehran, Iran, in 2001 and his B.S. degree in Computer Engineering from Sharif University of Technology, Tehran, Iran in 1998.

**Kaushik Ghosh** is an Assistant Professor of Management Information Systems (MIS) at Lamar University. He received his Ph.D. in MIS from the University of Mississippi. His research has appeared in academic journals, namely, Journal of Computer Information Systems, Communications of the AIS, among others, as well and conference proceedings such as ICIS, HICSS, and AMCIS. His current research interests include IT-enabled healthcare.

**Steve L Goldberg** is the founder and president of Inet International Inc., a Canadian technology management consulting firm. Inet International has been an incubator for the development of Glycemicare which is now available for commercialization. Mr. Goldberg has a BA in Economics and Computer Science from the University of Western Ontario. He sits on the Editorial Board of the *International Journal of Networking and Virtual Organizations* as well as he gives talks on online market research and wireless technology in healthcare. In healthcare delivery, Mr. Goldberg and his team used the first standardized wireless technology infrastructure to deliver innovative chronic disease management solutions. His technical expertise and international reputation have resulted in the program being recognized and utilized internationally.

**Güney Gürsel** is born in 1972 in İzmir / Turkey. He graduated from Military Academy In 1994 as a systems engineer. He had his MSc. degree in information systems field in 2003 in Middle East Technical University (METU), and PhD in Medical Informatics field in 2012 again in METU. He is working in the Department of Medical Informatics, Gülhane Military Medical Academy, as medical informatics specialist. He speaks advanced English. He is working in the fields of Healthcare Information Systems (HIS), Evaluation of HIS, End user expectations from HIS, Fuzzy logic application in HIS, Interoperability in HIS. He is married and has two kids.

**Raj Gururajan** is actively involved in Health Informatics Research since 2000, with over 300 publications to date. He has also received 4 ARC Linkage Projects awarded, an Indo-Queensland Research Grant, 3 best paper awards for his publications, University Research Excellence Award, Queensland Premier’s Research Excellence Award in Health Research, Malaysia-Australia Institute Grant, AusAid Leadership Award for Health Leadership Training and an Endeavour Executive Award for Health Informatics Research. He has supervised over 30 students to Higher Degree Research Completion. He has been invited to deliver keynote address in key events in Australia, India, China, Malaysia and Singapore. He is a PhD Examination Board Member of many Indian universities. He is currently the Information Systems Discipline Leader at University of Southern Queensland, Australia.
**Peter Haddad** is working towards his PhD from Deakin University, Australia. He is involved in different research projects that concentrate on IS/IT in healthcare. Mr Haddad is coming from engineering management background, and has over 12 years’ experience in this area, both in academic and professional contexts.

**Abdul Hafeez-Baig** is a Senior Lecturer in the School of Information Systems at the USQ, and obtained his Ph.D. in 2010. He has published over two dozen refereed publications in the domains of health and education with technology as the main area of research. His research interests are wireless technologies in healthcare, knowledge management, adoption, diffusion, and infusion of information technology.

**Mohamad Rahim Hatami** M.D., M.B.A. Managing Director of a pharmaceutical company for more than 12 years.

**Margaret E. Heffernan**, O.A.M., PhD, is an academic in the School of Management, RMIT University. Margaret’s research focuses on the health sector: the interrelationships of systems and cross-cultural communications within a socio-ecological framework, and particularly the phenomenon of transsubstantive error within public health promotion. Her work has resulted in several awards for cross-cultural collaborations and resource developments across Australia and internationally.

**Peter Adebayo Idowu** is a Senior Lecturer and researcher in the Department of Computer Science and Engineering, Obafemi Awolowo University, Nigeria. His focus is in the area of applied computing that is application of computing theories to address and solve health related problems in Sub Saharan Africa. He has published in journals and present papers in conferences both within sub Saharan Africa and internationally. He is currently researching into HIV/AIDS, Cancer and environmental health related diseases in sub Saharan Africa. He is also a Member of British Computer Society, Nigerian Computer Society, International Geospatial Society and, International Federation of Information Processing WG 9.4. His research interest includes Health Informatics, Data Modelling, Software Engineering, Geographical Information System, and Informatics. He is blessed with two Research Associates; Praise and Vicky. He enjoys reading and driving.

**R Jegan** obtained B.Tech, Electronics and Communication Engineering from Sun College of Engineering in the year 2008 and obtained M.Tech Embedded System from Karunya University in the year 2010. He has number of published journals in the field of biomedical applications.

**Meha Joshi** is an Assistant Professor in Delhi School of Management, Delhi Technological University. She is a keen researcher in the area of safety and health of employees. She has to her credit research publications in national and international repute. She has contributed her research paper for the capacity building of employees at Regional Labor Institute, Ministry of Labor and Employment, Government of India.

**Abdorreza Karimi** is an Industrial Engineering student at the master’s level at the Islamic Azad University in Iran.
**About the Contributors**

**Vass Karpathiou** has inter-disciplinary experience spanning over 30 years in Business, Technology and Academia. His current research interests are ICT Healthcare, IT Strategy, Digital Disruption and IT Value creation.

**Kijpokin Kasemsap** received his BEng degree in Mechanical Engineering from King Mongkut’s University of Technology, Thonburi, his MBA degree from Ramkhamhaeng University, and his DBA degree in Human Resource Management from Suan Sunandha Rajabhat University. He is a Special Lecturer in the Faculty of Management Sciences, Suan Sunandha Rajabhat University, based in Bangkok, Thailand. He is a Member of the International Association of Engineers (IAENG), the International Association of Engineers and Scientists (IAEST), the International Economics Development and Research Center (IEDRC), the International Association of Computer Science and Information Technology (IACSIT), the International Foundation for Research and Development (IFRD), and the International Innovative Scientific and Research Organization (IISRO). He also serves on the International Advisory Committee (IAC) for International Association of Academicians and Researchers (INAAR). He has had numerous original research articles in top international journals, conference proceedings, and books on the topics of business management, human resource management, and knowledge management, published internationally.

**Poonam Singh Kharwar** obtained an M.Ed., M.A. Degree and M. Phil. and Ph.D. in Education from DDU Gorakhpur University, Gorakhpur, and Joined Higher Education Teaching Service! in U.P. State Govt in 2006. Served various places (Ambedkarnagar, Kannauj) and recently (AUG, 2012) in Ne-tajee Subhash Chandra Bose Govt. Girls Post Graduate College, Lucknow. Working in Banaras Hindu University at present. Conducted researches during M. Phil. and Ph.D., and several research works. Findings presented and shared at national and International forum both in India and abroad, got papers published in reputed journals.

**Devesh Kumar** qualified for a M.B. B.S. and M.D. (Community Medicine) from King George Medical College, Lucknow, India, joined Indian Railways in 1991. Served Indian Railways hospitals in varying capacities of medical officer in the field of public health, occupational health and general medicine at various levels, carried several field and operational research; presented and shared in various National and International forums both within India and abroad including World Public Health Congress held in Kolkata and Congress of International Commission of Occupational Health in Seoul; got published many research papers in reputed journals including pub-med indexed journals and advocated organisation for implementation of findings for welfare of railway employees and their family members.

**Hoda Moghimi** has over 10 years’ experience in lecturing, research, consulting, solution transformation and project management including the delivery of large business analytics, Big Data and information management projects. Dr. Moghimi also has over 30 peer-reviewed scholarly publications and she is the author of several book chapters in Health Informatics contexts.
Imran Muhammad (PhD Business Information Systems, Masters in Business (ERP Systems), Masters in Business Information Systems) is a postdoctoral fellow at Deakin University, Melbourne, Australia. His primary research interests are in the area of business information systems especially in the field of healthcare information systems management and electronic health records (EHR). He has more than 10 years of teaching and research experience in different areas of business information systems Health informatics and management.

Wafaa Faisal Mukhtar received a BSc. and MSc. in Computer Science from the Faculty of Mathematical Sciences, University of Khartoum. Currently is a PhD candidate at Sudan University of Science and Technology. Research interest is in Data Mining.

Lemai Nguyen (PhD) is a Senior Lecturer at Department of Information Systems and Business Analytics, Deakin Business School, Deakin University. Lemai is also Honorary Research Affiliate at Epworth Healthcare. In health informatics, Lemai conducts research in implementing and evaluating nursing information systems and their impacts on various aspects of care delivery. She also conducts research in electronic health records implementation evaluation, healthcare analytics, and information needs and information behaviours of clinicians, patients and their carers. Lemai publishes widely in many high quality international scholarly journals, conferences, and books. She is Section Editor of Australasian Journal of Information Systems (AJIS).

Emine Özmete is professor at Ankara University, at the Department of Social Work. She is the head of the Center on Aging Studies Implementation and Research at Ankara University. She is conducting her studies about quality of life, well-being, social capital, life skill education, financial behavior- financial planning and resource management in the family and aging studies. Prof. Dr. Emine Ozmete received her MS in Family and Consumer Sciences from the University of Ankara in 1997 about quality of life and values. In 2002 she received her doctorate degree from the University of Ankara. She visited to USA Iowa State University, Department of Family Studies and Human Development as scholar. When European Union announced 2012 as the year of active aging and international solidarity and on March there was the week of respect for elderly people at Turkey, Prof. Özmete has leaded the International Solidarity and Active Aging Symposium which organized by Family and Social Policies Ministry and Center on Aging Studies of Ankara University. Also she organized the Aging and Health: Good Health Adds Life to Years Symposium with World Health Organization Turkey Office and Center on Aging Studies of Ankara University when the World Health Organization designated the aging and health as the subject of the agenda for World Health Day at April 7, 2012, and she organized Global Elderly Care and Elderly Tourism-2013-, Alzheimer Awareness Conference and Age Friendly Technologies and Designs in 2014. Prof. Özmete is a respective member of International Federation on Aging and International Federation on Social Work. She has carried out several project such as “Development of Life Skills Education Programme to Young People- 2005-2009”, “Elderly Poverty Project: Analysis of Economic, Social and Cultural Needs-2012”, “Assessment of Intergenerational Solidarity in Turkey-2015-2016”, “Healthy Aging and Encountered Problems Project-2015”, “Elder Abuse Research-2015” supported by National Scientific Council, Development Agency or Ministry of Health. She is advisory member of Family and Social Politics Ministry.
About the Contributors

Rema Padman is a Professor of Management Science and Healthcare Informatics, Thrust Leader of Healthcare Informatics research at iLab, and Research Area Director for Operations and Informatics at the Center for Health Analytics in the H. John Heinz III College at Carnegie Mellon University, and Adjunct Professor in the Department of Biomedical Informatics at the University of Pittsburgh School of Medicine. Her research examines healthcare operations, data-driven decision support, and process modeling and risk analysis in the context of information technology interventions, such as ehealth and mhealth for chronic disease care.

Kevin R. Parker is Chair and Professor of the Department of Informatics and Computer Science at Idaho State University. Parker’s research interests include eGovernment and the elderly, health IT and the elderly, business intelligence, and the impact of developments in informatics on curriculum. He has been published in such journals as Education and Information Technologies, Informing Science, Journal of Information Systems Education, and Communications of the AIS. Dr. Parker’s teaching interests include web development technologies, programming languages, data structures, and database management systems. Dr. Parker holds a B.A. in Computer Science from the University of Texas at Austin (1982), an M.S. in Computer Science from Texas Tech University (1991), and a Ph.D. in Management Information Systems from Texas Tech University (1995). He chairs an interdisciplinary academic department that spans the College of Business and the College of Science and Engineering, and offers degrees in business informatics, health informatics, and computer science.

Fay Cobb Payton is a Professor of Information Systems/Technology at North Carolina State University. Her research examines information technologies impact in health care settings, data analytics, health disparities, user experiences, social influences and new media. She is an Editor for Health Systems, Associate Editor for Decision Sciences and Associate Editor of Information Technology & People. She worked in industry at several technology and healthcare organizations.

Natasha Pinto is a Medical Doctor and a recent graduate of the NC State University MAB Program. She has worked in several hospitals and clinical environments. She will start a career in healthcare marketing and innovation.

K. Rajasekaran is a dynamic and innovative professional having both industrial and Academic experience. Been an R&D engineer in Bharat Electronics Ltd., Bangalore. (BEL), Public Sector Undertaking. Successful in spearheading Space Electronics Division in BEL. Instrumental in guiding many student's projects here in Karunuya University. Developed and guiding various product research activity like Bioimpedanc e measurement, Breathing rate Detector, and non-invasive measurement of Hemoglobin, Glucose level, etc. Currently, in the process of thesis submission for a Ph.D. at Anna University, Chennai.

Arkalgud Ramaprasa is a Professor Emeritus of Information and Decision Sciences.

Bernice Redley is Associate Professor in the School of Nursing and Midwifery at Deakin University research partnership with Monash Health. Her research interests include healthcare quality and patient safety in complex health care settings, inter-professional teamwork and communication, using health informatics to support nursing practice and health service evaluation.
Jana Riechert is a master’s student in the Chair of Information System II at the University of Erlangen-Nuremberg. Her research interests lie in the field of healthcare information systems.

Seyed Ali Rokni is a PhD student of Computer Science at WSU.

Khadijeh Rouzbehani is a distinguished researcher in university of Tehran who has been running her consulting firm for roughly a decade. She has been consulting and running workshops in Iran. Her expertise is Policy analysis, policy evaluation, Health policy, organizational behavior and leadership, ethics and KM.

Ghazaleh Sajjadi is a financial Manager in Behestan Behdasht (Pharmaceutical Company) from 2006 Deputy of Export manager from 1998.

Zaid Zekiria Sako graduated from RMIT University in Melbourne, Australia with a Bachelor in Business (Business Information Systems). His enthusiasm and curiosity in how technology works and his ambition in infusing health related problems with digital solutions pushed him to pursue a Masters in Research. He is currently undertaking a Masters in Research at Deakin University, Melbourne, Australia.

Jonathan L. Schaffer is managing director in the Information Technology Division at Cleveland Clinic where he leads the eClevelandClinic effort to connect the participants in the care process. Cleveland Clinic’s MyConsult program, an online second medical opinion program, is used by consumers and corporations worldwide to pro-vide access while removing the geographic barriers to care. The Dr Connect program securely connects referring physicians to their patients care at Cleveland Clinic. An active board certified joint replacement surgeon, he is also the Program Director for the Advanced Operative Technology Group in the Orthopaedic and Rheumatologic Research Center. Prior to the Cleveland Clinic, Dr. Schaffer was CEO of Harmonie Group, Inc., a corporate spin off from the informatics lab at Brigham and Women’s Hospital and Harvard Medical School. He has participated in many healthcare software development projects from clinical applications to supply chain management systems and has been a founder of or consultant to four healthcare technology companies. He is also active with the medical industry and venture community having participated in a number of medically related start-ups. Jonathan is a graduate of Haverford College, Case Western Reserve University’s School of Medicine, University of Pennsylvania’s Orthopaedic Surgery Residency program, the Adult Reconstructive Orthopaedic Surgery Fellowship program at Brigham and Women’s Hospital and holds an MBA from the Kellogg School of Management at Northwestern University in Evanston, Illinois.

Kabir C. Sen is a professor of marketing at Lamar University, Beaumont, USA. He has a Ph.D. in marketing from Washington University in St. Louis, USA. He has published papers on franchising, sports economics, service quality and health care marketing. He has a co-authored book dealing with quality in the service and manufacturing sectors.

Dixit Sharma is a final year Btech (ECE) student from Guru Nanak Dev University RC Jalandhar. Currently, he is a visiting student at IIT Delhi in the Centre for Biomedical Engineering (CBME) under Prof. Sneh Anand for 5 months.
**About the Contributors**

**Butta Singh** received his Bachelor’s degree in Electronics and Communication Engineering from Guru Nanak Dev Engineering College, Ludhiana, Punjab, India in 2002, Master’s degree in Instrumentation and Control Engineering from Sant Longowal Institute of Engineering and Technology, Longowal, Sangrur, Punjab, India in 2005 and Ph.D. in Engineering from National Institute of Technology, Jalandhar, Punjab, India. He is serving as Assistant Professor in the Department of Electronics and Communication Engineering, Guru Nanak Dev University, Regional Campus, Jalandhar, Punjab, India. His professional research interests are in signal processing, in particular, applied to biomedical applications. He has published over 50 research articles in internationally reputed journals and conference proceedings.

**Preetvanti Singh** is an Associate Professor in the Department of Physics and Computer Science, Dayalbagh Educational Institute, Agra, India. She received her PhD in Operation Research from Dayalbagh Educational Institute, Agra, India. Her current research interests include decision support system (DSS), geographical information system (GIS) and optimisation techniques. She has published several papers in various reputed journals and co-authored computer science textbooks.

**Thais Spiegel** is an Associate Professor in the Industrial Engineering Department of Rio de Janeiro State University. Her research interests include healthcare operations management and design, process modeling, decision making, logistic and supply chain management in health care settings.

**Vasundhara Rani Sood** is currently pursuing a PhD from the University of southern Queensland, Australia. Previously, she has successfully completed a Masters of Computer Applications from Punjab Technical University Jalandhar, India and a Masters of Technology from Himachal Pradesh University of Shimla, India. She also has three years’ teaching experience.

**Suja Sarah Thomas** completed her PhD in Accounting & Financial Management from Annamalai University, India. She also has an Education degree from the same University. Currently, she serves as an Assistant Professor in the College of Business Studies at Al Ghurair University, Dubai, UAE. Her research interests include Accounting Information Systems, IFRS, Narrative reporting, Risk Reporting, Managerial & Cost Accounting. Her work has been published in international journals and conference proceedings such as The Asian Academy of Management Journal, ERP Journal of Economic and Business Review, and Proceedings of the International Business Conference on Diversity and Sustainability.

**Keith K.T. Toh** is a lecturer in the School of Management, RMIT University. His interests are in the intersections between communities of practice, strategy as practice, organisational learning and knowledge management. Keith’s background is in information systems and he still retains a keen interest in systems modelling architectures and methodologies such as UML, Zachman Framework, TOGAF, SSADM, Rational Unified Process. He also works with Protege as ontology.

**Aman Tyagi** completed his BTech in Electrical Engineering from Gurukula Kangri Vishwavidyalaya, Haridwar, post graduate diploma in Microelectronic System and Embedded Technology from Jaypee Institute of Information Technology, Noida and MTech in Computer Science from Dayalbagh Educational Institute Agra (India). Currently, he is working for his PhD degree in the Department of Physics and Computer Science, D.E.I., Agra. His areas of interest include biomedical engineering, decision support systems, fuzzy rule base systems, and intelligent systems.
Anitha Mary Xavier obtained a Doctor of Philosophy from Department of Electronics and Instrumentation, Karunya University, Coimbatore in the year 2015. She obtained a Master of Engineering Degree (VLSI) from Anna University, Coimbatore, in the year 2009, and Bachelor of Engineering Degree (B.E Electronics and Instrumentation) from Karunya Institute of Technology, in the year 2001. She has published several international journals.

Yiye Zhang is an Assistant Professor of Health Informatics at the Department of Health Policy and Research, Weill Cornell Medicine, Cornell University.
