About the Contributors

Constantinos Mourlas is Assistant Professor in the National and Kapodistrian University of Athens (Greece), Department of Communication and Media Studies since 2002. He obtained his PhD from the Department of Informatics, University of Athens in 1995 and graduated from the University of Crete in 1988 with a Diploma in Computer Science. In 1998 was an ERCIM fellow for post-doctoral studies through research in STFC, UK. He was employed as Lecturer at the University of Cyprus, Department of Computer Science from 1999 till 2002. His previous research work focused on distributed multimedia systems with adaptive behaviour, Quality of Service issues, streaming media and the Internet. His current main research interest is in the design and the development of intelligent environments that provide adaptive and personalized context to the users according to their preferences, cognitive characteristics and emotional state. He has several publications including edited books, chapters, articles in journals and conference contributions. Dr. C. Mourlas has taught various undergraduate as well as postgraduate courses in the Dept. of Computer Science of the University of Cyprus and the Dept. of Communication and Media Studies of the University of Athens. Furthermore, he has coordinated and actively participated in numerous national and EU funded projects.

Nikos Tsianos is a research assistant and doctoral candidate at the New Technologies Laboratory of the Faculty of Communication and Media Studies of the University of Athens. He holds an Msc in Political Communication from the University of Athens. His main research area is the incorporation of theories from the Psychology of Individual Differences into Adaptive Educational Hypermedia, the development of corresponding systems and the empirical evaluation of such systems in the context of an experimental psychology methodology. He has published numerous articles in conferences and journals regarding this field of research, while he also participates in a number of national and EU funded projects, including research on locative media and mobile applications.

Panagiotis Germanakos, PhD, is a Research Scientist, in the Laboratory of New Technologies, Faculty of Communication & Media Studies, National & Kapodistrian University of Athens and of the Department of Computer Science, University of Cyprus. He obtained his PhD from the University of Athens in 2008 and his MSc in International Marketing Management from the Leeds University Business School in 1999. His BSc was in Computer Science and also holds a HND Diploma of Technician Engineer in the field of Computer Studies. His research interest is in Web Adaptation and Personalization Environments and Systems based on user profiling/filters encompassing amongst others visual, mental and affective processes, implemented on desktop and mobile / wireless platforms. He has several publications, including co-edited books, chapters, articles in journals, and conference contributions.
Furthermore, he actively participates in numerous national and EU funded projects that mainly focus on the analysis, design and development of open interoperable integrated wireless/mobile and personalized technological infrastructures and systems in the ICT research areas of e-Government, e-Health and e-Learning and has an extensive experience in the provision of consultancy of large-scaled IT solutions and implementations in the business sector.

* * *

**Ray Adams** is the Founder and Centre Head for CIRCUA (Collaborative International Research Centre for Universal Access) that is based in the School of engineering and Information Sciences at Middlesex University. He is also a member of Churchill College, Cambridge. He is on the conference boards for a number of international conferences. He is also on the editorial board of two journals; Universal Access in the Information Society and Advances in HCI. He has published three books and a significant number of papers. His research interests include: human cognition, user modeling, universal access and research methods.

**Gláucia Almeida** is an Arts Educator that works for São Paulo Municipal Schools Network. She is graduated in Arts with focus on music at the Mozarteum Faculty of São Paulo.

**Zoe Bablekou** acquired her first degree in the University of Ioannina, Greece and her P-G Diploma in the Institute of Education of the University of London. She was awarded a PhD on memory processes from the Department of Psychology of the University of Leeds. She currently is an Associate Professor in Developmental and in Cognitive Psychology with the Aristotle University of Thessaloniki, Department of Early Childhood Education. Her research interests focus on memory and language in children, with particular reference on WM structure and operations.

**Ana Luiza Bertelli Furtado Leite** is a Math Educator that works for the São Paulo Municipal Schools. She is graduated in science with focus on Math, Physics and Chemistry at Faculdade Tereza Martin and Universidade de Arara Professor Edmuldo Ulson - UNAR. She also did two years of Architecture at Faculdade de Belas Artes de São Paulo.

**William Billingsley**. After four years working in the telecommunications industry, William Billingsley undertook his PhD in the University of Cambridge’s Computer Laboratory, where he worked on Intelligent Books. He received his PhD in 2007, and became a research associate with the university’s Centre for Applied Research in Educational Technology (CARET). In 2009, he became a senior research engineer with National ICT Australia, a computer science research centre established by the Australian Government. His latest research is part of a project working with Queensland Health to develop a system using video and transcript analysis to improve the communication skills training of clinicians and medical students.

**Hichang Cho** is an assistant professor of the Communications and New Media Programme, National University of Singapore. His current research focuses on computer-mediated communication (CMC), computer-supported collaborative learning (CSCL), and online privacy.
Maja Ćukušić is a teaching assistant at the Faculty of Economics, University of Split, Croatia. She holds BSc degree in Computer Science from the Faculty of Organization and Informatics, University of Zagreb and has just submitted her master thesis. She had worked as an IT consultant in an international holding company for over 3 years prior to her university employment. She teaches Information Technologies, Electronic Business, ERP Systems and Business Intelligence. Her research interests range from IT management and organization to implementation of complex ICTs, Internet technologies, social software and eLearning systems.

Laura B. Dahl is a faculty member in the College of Continuing Education at the University of Utah. Her research interests are multimedia and cognition, human-computer interaction, and educational technology. Laura worked as a software and web developer, and has spent years designing and teaching technology courses. She frequently conducts workshops on technology integration to faculty at higher education institute.

Marlene Gonçalves da Silva Freitas is a math educator that works for both municipal and state schools in the city of São Paulo. She is also a Pedagogue with focus in management.

Roseli de Deus Lopes is a Professor and researcher of the Department of Engineering of Electronic Systems at the Polytechnic School of the University of São Paulo – USP and director of the Estação Ciência of USP. She is graduated, master and doctor in Electrical Engineering at the Polytechnic School of USP. Her research interests are related to interactive electronic media, including computer graphics, image processing, interaction devices, visualization techniques and virtual reality. She has links with national and international technical organizations such as (Sociedade Brasileira de Computação - SBC), (The Institute of Electrical and Electronics Engineering - IEEE) and (Association for Computing Machinery - ACM). She coordinates researches in the field of collaborative learning supported by interactive electronic media and game development. She also coordinates the (Feira Brasileira de Ciências e Engenharia – FEBRACE ‘Brazilian Fair of Sciences and Engineering’). And she contributes with the group of pedagogic consultancy referent to the implementation of the project Um Computador por Aluno – UCA, which is run by Secretaria de Educação à Distância SEED/MEC.

Jorge Ferreira Franco is graduated in Portuguese and English, and is postgraduated in Pedagogy in Brazil. He concluded his master degree in Virtual Environments at the University of Salford, England. He is doing his PhD research in Electrical Engineering at (the Escola Politécnica da USP ‘Polytechnic School of the University of São Paulo’) with research focus on Interactive Technologies for supporting Education. Currently, he works for the São Paulo Municipal School Network as an Information and Communication Technology Facilitator at the Laboratory of a Primary Municipal School in the city of São Paulo. He is also a researcher at the Laboratório de Sistemas Integráveis da POLI-USP and the NATE (Núcleo de Aprendizagem, Trabalho e Entretenimento), in which he collaborates with the implementation of the project Um Computador por Aluno - UCA.

Nilton Ferreira Franco is graduated in History and Geography. Currently, he is a History educator that works for the São Paulo State Schools. He is post graduated in Psychopedagogy. His Master course was in History of Art and Culture at Universidade Presbiteriana Mackenzie. During his Master course he investigated about the Sarau as a popular movement in the periphery of the city of São Paulo.
About the Contributors

**Jill A. Flygare** is currently a faculty member in the Department of Teaching & Learning. She holds a BA in Secondary Social Sciences and a M. Ed in Instructional Design and Educational Technology. Her research interests are in the area of effective online design and online social communication.

**Victor Manuel García-Barrios** is key researcher and project manager at the Institute for Information Systems and Computer Media (IICM) at Graz University of Technology as well as lecturer at Graz University of Applied Sciences (Campus02). Since 1999 he has been involved in many IICM projects, such as the research projects AdeLE (adaptive e-learning with eye-tracking), MISTRAL (semantic multimodal information management), and APOSDLE (process-oriented, self-directed, work-integrated learning). In the last years he has published numerous papers in renowned international conferences and journals. At present, his research areas include e-learning, adaptive systems, privacy enhancement technologies.

**Geri Gay** is the Kenneth J. Bissett Professor and Chair of Communication at Cornell University and a Stephen H. Weiss Presidential Fellow. She is also a member of the Faculty of Computer and Information Science and the director of the Human Computer Interaction Lab at Cornell University. Her research focuses on social and technical issues in the design of interactive communication technologies. Specifically, she is interested in social navigation, affective computing, social networking, mobile computing, and design theory.

**Martin Graff** is a Reader in Psychology at the University of Glamorgan. He is an Associate Fellow of the British Psychological Society and a Chartered Psychologist. He is also an executive member of ELSIN a European wide research group dedicated to furthering research in the area of cognitive style. His research interests include cognitive style, the psychology of individual differences, learning from hypertext and e-learning, and he has published widely in these areas. He has also carried out several major consultancy projects evaluating the success of e-learning provision in the UK. His latest book entitled ‘Cyber behaviour: Psychological Interaction with Online Environments’ is due out next year.

**Andrina Granić** is an Associate Professor at the Department of Computer Science, University of Split, Croatia. She holds the Doctorate and MSc degrees in Computer Science and the Dipl.-Ing. degree in Electrical Engineering, all from the Faculty of Electrical Engineering and Computing, University of Zagreb. Her research interests are currently focused on both theoretical and application-oriented aspects of universal access, inclusive design, usability, accessibility and smartness, intelligent user interfaces and user models, concerning interactive systems in general and eLearning systems in particular. Dr. Granić was and still is active in a number of national and international R&D projects and has authored or co-authored over fifty papers as book chapters or in international journals and conferences in her area of interest.

**Michael Grimley** is interested in the enhancement of learning, and in particular as it relates to cognition, motivation, interest, interactivity, new technologies and e-learning. These interests have led him into the study of how technology can be leveraged to improve learning. He currently specializes in the utility of new technologies for education and has a keen interest in learning and individual differences.
Christian Guetl is Assistant Professor and Key Researcher at the MediaLab at Graz University of Technology, Austria, and Adjunct Research Professor at the School of Information Systems, Curtin University of Technology, Perth, WA. He holds a doctoral degree in computer science. His active research is in Information Retrieval and Visualization, Cross-media Information Retrieval, Adaptive E-learning and Personalization, Virtual Worlds for Learning and Knowledge Transfer, and Knowledge & Skill Assessment and Feedback and he is involved in national and international research projects on these topics. He is also involved in the organization of conferences and workshops, such as the IEEE EDUCON, IEEE DEST, ViWo and CAF.

Constantin Halatsis was born in Athens, Greece, in 1941. He received his BSc degree in Physics in 1964 and his MSc degree in Electronics in 1966, both from the University of Athens. In 1971 he received his PhD degree in Computer Science from the University of Manchester, UK. From 1971 to 1981 he was a researcher with the Computer Centre of NRC Demokritos in Athens. In 1981 he became Full Professor of Computer Science at the University of Thessaloniki, Greece, and in 1988 he was invited as Full Professor of CS at the Department of Informatics and Telecommunications of the University of Athens, where he is today since then. He has been visiting at CERN and the University of Cyprus. His teaching, research and development interests cover a wide area, including computer architecture, high performance computing and networking, artificial intelligence, e-government, cryptography, and theory of computation. He has supervised many PhD students, some of whom are now university professor in Greek Universities. He has been project leader or manager of many national and EU funded projects, and has served as consultant in several public and private organizations. He is author/co-author of more than 120 technical papers published in refereed international scientific journals and conference proceedings.

Richard R. Hoffman is a graduate student in the Department of Educational Psychology, University of Utah. His research interests are in instructional design, educational technology, and cognitive processes web-based learning.

Eleni A. Kyza is a Learning Scientist interested in the design and research of innovative, computer-based learning environments. She received her BSc (summa cum laude), with specialization in educational technology from Boston University, an Ed.M. degree in Technology in Education from Harvard University and a PhD degree in the Learning Sciences, with a minor in cognitive science, from Northwestern University. Her studies were funded by Fulbright while her post-doctoral study at the University of Cyprus was supported by a fellowship from the Cyprus Research Promotion Foundation and a Marie Curie Grant. She is a Lecturer in Information Society at the Department of Communication and Internet Studies at the Cyprus University of Technology. For the last four years she has been working on the development and empirical investigation of the web-based learning and teaching platform STOCHASMOS, examining the role of different technological features in supporting reflective inquiry in science education.

Zacharias Lekkas is a research assistant and doctoral candidate at the New Technologies Laboratory of the Faculty of Communication and Media Studies of the University of Athens. He holds an Msc in Occupational Psychology from the University of Nottingham. He is interested in the role of emotions in web-based educational systems, and has conducted empirical research on the effect of human factors
such as anxiety, emotional moderation, emotional intelligence, self efficacy etc. Additionally, his research interests include the field of decision making support in Adaptive Hypermedia and the design of personalized training systems. His work has been published in conferences, journals and edited books.

**Makis Leontidis** is currently a Research Scientist, in the Laboratory of Educational and Language Technology in the Department of Informatics and Telecommunications, National & Kapodistrian University of Athens. He earned a MSc degree in Studies in Education from H.O.U. and a BSc degree in Computer Science from the Department of Informatics and Telecommunications, National & Kapodistrian University of Athens. His research interests are in the area of Affective Computing, Artificial Intelligence, Web Adaptation and Personalization Environments and Emotional Processes, implemented on Web Educational Systems. He has published articles in Journals as well as in numerous refereed Conference Proceedings.

**Patricia A. Lowe, PhD**, is an Associate Professor and Director of Training of the School Psychology Program in the Department of Psychology and Research in Education at the University of Kansas-Lawrence. She is a 2000 graduate of the School Psychology Program at Texas A&M University in College Station, Texas. Dr. Lowe completed an APPIC postdoctoral internship at the Warm Springs Counseling Center and Training Institute in Boise, Idaho before beginning her academic career at the University of Kansas. Dr. Lowe is a licensed psychologist and licensed school psychologist. Her research interests include the examination of anxiety from a developmental perspective, behavioral and personality assessment, measurement, neuropsychology, and prevention.

**Marcos Antonio Matias** is a graduate student in Math at Bandeirantes University. He did a technical course in Electric. He has worked as electrical designer and has used to support that the software AutoCAD™.

**Theresa Ochoa** is an Associate Professor of special education at Indiana University. She develops problem-based learning computer-supported modules for teacher preparation and conducts research on collaborative decision-making among undergraduate students. She earned her PhD from the University of California Santa Barbara in 1999.

**Marlene de Oliveira Moreno** is a Science Educator that works for both municipal and state schools in the city of São Paulo. She is also a Pedagogue with focus in management.

**George A. Papadopoulos** (PhD) holds the (tenured) rank of Professor in the Department of Computer Science, University of Cyprus. His research interests include component-based systems, mobile computing, e-health, e-learning, open and distance learning, distributed systems, service oriented computing and cooperative systems. He has published over 100 papers as book chapters or in internationally refereed journals and conferences and he serves in the Editorial Board of 5 international journals. Professor Papadopoulos is a recipient of an 1995 ERCIM-HCM scholarship award. He has been involved or is currently participating, as coordinator or partner, in over 40 internationally and nationally funded projects (total budget for his participation more than 5 MEURO). He is the Director of the Software Engineering and Internet Technologies Laboratory (http://www.cs.ucy.ac.cy/seit). More information can be found at his personal web site at: http://www.cs.ucy.ac.cy/~george
About the Contributors

Elena C. Papanastasiou, has received her Honors BSc in Elementary Education from The Pennsylvania State University, and her PhD in Measurement and Quantitative Methods from Michigan State University. Since 2001, Dr. Papanastasiou has worked at the University of Kansas the University of Cyprus and the University of Nicosia. Dr. Papanastasiou is mostly interested in quantitative research in the areas of assessment, test development and psychometrics, and computer adaptive testing. So far, she has published one book and more than 30 peer reviewed articles. She has also presented and co-presented more than 70 papers at conference. Dr. Papanastasiou is also the Director and co-founder of E.P.S. European Psychometric Services, a Cyprus based company that specializes in providing innovative and state-of-the-art assessment solutions and services for governmental agencies, organizations, companies, and education worldwide.

Paula Peres has recently concluded her doctoral at University of Minho. Master in computer science and graduate in Math Computer. She is currently teaching on the computer scientific science area in the Higher Institute of Accounting and Administration of Porto, ISCAP. She is developing many research activities concerning the Integration of the Information Technologies and Communication in higher education context. She has already participated in some initiatives and courses in blended learning mode and she uses these technologies as a support and to complement her learning practices. She has some books published in the information system area and she has also cooperated in e-learning editions.

Pedro C. C. Pimenta (Moçambique, 1964) ended his Chemical Engineering ‘Licenciatura’ degree in 1988, and finished his ‘Doutoramento’ on industrial control in 1997, both by Faculdade de Engenharia da Universidade do Porto. Currently, he is an invited teacher at the Departamento de Sistemas de Informação da Escola de Engenharia da Universidade do Minho, lecturing courses on introductory algorithmics and programming, both at the 1st and 2nd study Bologna cycles. His research interests on adoption of TIC in teaching and learning in Higher Education (e-learning) started in 1997, when he joined Universidade do Minho, and spawned recently to the broader theme of social computing. He has participated / contributed to several european projects like Galecia/Socrates, WebEdu/LdV, Omnipaper/IST, Hybrid Moulds/Leonardo, WeKnow/Minerva, and has an active collaboration with several Higher Education Institutions (U. Portucalense, U. Católica, U. Coimbra, ISEP) on the orientation of post-graduation students. He is also member of IEEE and secretary of the Editorial Committee of IEEE-RITA since 2006.

Elvira Popescu received the PhD degree in Information Systems from the University of Craiova, Romania and the University of Technology of Compiègne, France, in 2008. She is currently a member of the Software Engineering Department, University of Craiova. Her research interests include technology enhanced learning, adaptation and personalization in Web-based systems, intelligent and distributed computing. She authored and co-authored more than 30 papers in international journals and conferences. She received several scholarships and participated in several national and international research projects. Dr. Popescu is actively involved in the research community by serving as program committee member and reviewer for numerous conferences, and co-organizing two international workshops in the area of social and personal computing for web-supported learning communities (SPeL 2008, SPeL 2009).

Francesca Pozzi is presently researcher at the Institute for Educational Technology of the Italian National Research Council (CNR) and has got a PhD in Cultures, Languages and ICT (University of
About the Contributors

Genoa). Her major research interests include the design and run of online courses in collaborative learning environments (CSCL), the design of strategies and techniques for fostering collaboration within these contexts, the issues related to monitoring and evaluating the learning process in CSCL field. In her work the theoretical study of models and methods has always been supported by application in real contexts as part of collaboration with a number of state schools, local and national training agencies, public bodies, etc.

Steve Rayner is Professor of Leadership and Diversity in the Department of Education at the University of Gloucestershire, UK. Current activities include work on knowledge transfer in cognitive style research, the development of differential pedagogy in practice, developing educationists’ professional learning at doctoral level, intellectual leadership amongst the professoriate in the University sector, and investigating leadership policy to provision for an inclusive and special education. He has in the past fifteen years authored more than 90 publications on individual differences and managing educational inclusion and diversity. He also co-founded and currently leads the European Learning Styles Information Network (ELSN). Recent publications include Managing Special and Inclusive Education. London: Sage; Rayner S., & Peterson, E. (2009) Re-affirming Style as an Individual Difference – Global Paradigm or Knowledge Diaspora? In, L.F. Zhang, & R. Sternberg (Eds). Perspectives on the Nature of Intellectual Styles. New York: Palgrave Pubs.

Richard Riding has had a long-term research interest in individual differences in learning and behaviour and the ways in which they can be assessed. He has been involved in research work using computer technology in education and training since the early days of personal computers. He studied psychology at the Universities of Hull and Birmingham in the UK. He is a Chartered Psychologist and a Fellow of the British Psychological Society. For over twenty years he was Director of the Assessment Research Unit in the School of Education at the University of Birmingham.

Peter Robinson is Professor of Computer Technology and Deputy Head of the Computer Laboratory at the University of Cambridge in England, where he leads the Rainbow Group working on computer graphics and interaction. His research concerns new technologies to enhance communication between computers and their users, and new applications to exploit these technologies. Recent work has included desk-size projected displays and inference of users’ mental states from facial expressions, speech, posture and gestures. He is a Chartered Engineer and a Fellow of the British Computer Society.

Sandra Regina Rodrigues da Cruz is graduated in Science, and Math at the (Pontifícia Universidade Católica - PUC). She is also a pedagogue postgraduated at Universidade de Arara Professor Edmuldo Ulson - UNAR. She works for the São Paulo Municipal School Network. Currently, she is an Information and Communication Technology Facilitator at the Laboratory of a Primary Municipal School Network in the city of São Paulo.

Mien Segers (PhD, 1993, Maastricht University) is a Professor of Educational Sciences at the department of Educational Studies of Leiden University (the Netherlands) and at the department of Educational Development and Research of the University of Maastricht (the Netherlands). Her major research interest are the evaluation and optimisation of collaborative learning in learner-centred learning environments and the qualities of new modes of assessment within these environments in school
as well as organizational settings. Professor Segers has authored numerous publications in this area, including articles in Review of Educational Research, Learning and Instruction, European Journal of Psychology of Education and Instructional Science.

**Dominique Sluijsmans** studied Educational Sciences at the Radboud University of Nijmegen. In 2002, she finished her thesis on *Student involvement in assessment* at the Centre for Learning Sciences and Technologies (CELTEC) of the Open University of the Netherlands. For her thesis, she was awarded by the Netherlands Educational Research Association (NERA). Besides her work as a PhD-student, she also advised teacher teams in higher education in the design of various forms of assessment. Since March 2002 she has been working as an educational technologist at CELTEC. Currently, she combines this position with an associate professorship at HAN University in Nijmegen, which focuses on sustainable assessment. Her main interests include peer assessment, self assessment, and the effects of assessment on long term learning.

**George Ch. Spanoudis** received his B.S. and an Msc degree in Developmental Psychology from Aristotle University of Thessaloniki and his PhD degree in Cognitive Psychology with emphasis in developmental and educational Psychology from the University of Cyprus. He is a Lecturer of Psychology at the Psychology Department at the University of Cyprus, Cyprus. His academic interests include developmental psychology, memory, research methods, and learning disabilities. His areas of expertise and research interest include topics related to children’s cognitive development, intelligence and language learning impairments. Dr. Spanoudis is currently investigating age-related changes in intelligence using behavioral and event-related potential (ERP) techniques.

**Jan-Willem Strijbos** (postdoctoral research fellow, Leiden University, the Netherlands). He received his PhD on *The effect of roles in computer-supported collaborative learning* (summa cum laude) in 2004 at the Open University of the Netherland. His fields of expertise are collaborative learning, peer assessment, and peer feedback – in face-to-face and computer-supported settings. He has published widely in the area of computer-supported collaborative learning (CSCL), for example, editing the third volume in the Springer computer-supported collaborative learning (CSCL) book series *What we know about CSCL: And implementing it in higher education* (2004) and a Learning Instruction special issue on *Methodological challenges for collaborative learning research* (2007).

**Harm Tillema** (senior lecturer, Leiden University, the Netherlands). His field of expertise is professional development and learning, with a special focus on teaching and teacher education. His interest in particular is assessment as a tool of professional learning. He studied the role of (student) teacher beliefs as it affects learning for and in the profession. In his consultancy work, he is involved in establishing powerful learning environments which make use of assessment tools for learning.

**Aimilia Tzanavari** is an Associate Professor at the Department of Design and Multimedia, University of Nicosia, Cyprus. She is a computer scientist and holds a PhD in Human-Computer Interaction from the University of Bristol, UK. Dr. Tzanavari has previously held academic and research positions at the University of Bristol (UK), Miami University, OH (USA) and the University of Cyprus (CY). She has published and is interested in the areas of Human-Computer Interaction, e-Learning and Accessibility in Design.
About the Contributors

Valkiria Venâncio is graduated in Math Education and specialist in interactive technologies applied to education. She does her master course in Electrical Engineering at (the Escola Politécnica da USP’). She is a researcher at the Laboratório de Sistemas Integráveis da POLI-USP and the NATE (Núcleo de Aprendizagem, Trabalho e Entretenimento), in which she collaborates with the development of two educational projects Nave Mário Schemberg and UCA – Um Computador por Aluno. She works as a primary education teacher for the São Paulo Municipal School network. In this network she coordinated the work of the school computers lab. She also trained educators teaching the discipline of Technological Resources in Education.

Michael Workman earned his PhD at Georgia State University in organizational development, and is an associate professor of management at the Florida Institute of Technology. Prior to coming into academic life in 2001, Dr. Workman spent nearly 30 years managing “knowledge workers” and virtual teams at companies such as Digital Equipment Corporation, Unisys and France Telecom/Euant. He has published over 30 manuscripts in scholarly research journals, several textbooks, and dozens of conference proceedings. His research interests are in human-computer interactions and those impacts on human behaviors.

Yin Zhang is an Associate Professor at the Kent State University School of Library and Information Science. She received her B.S. and MS degrees in Information Science from Wuhan University in China and her PhD in Library and Information Science from the University of Illinois at Urbana-Champaign in the United States. Dr. Zhang’s research and teaching interests include user information-seeking behavior, information uses and services, information organization, and distance learning. She has published over 30 papers. Dr. Zhang’s research has been funded by Institute of Museum and Library Services (IMLS) and her work has been recognized by the Association for Library and Information Science Education (ALISE). Dr. Zhang is currently serving on the Editorial Board for The Journal of the Research Center for Educational Technology and the Advisory Board for The American Society for Information Science & Technology Bulletin.

Robert Z. Zheng is a faculty member in the Department of Educational Psychology at the University of Utah. His research interests include online instructional design, cognition and multimedia learning, and human-computer interaction. He edited and co-edited several volumes including Cognitive Effects on Multimedia Learning; Online Instructional Modeling: Theories and Practices; and Adolescent Online Social Communication and Behavior: Relationship Formation on the Internet. He has published numerous book chapters and research papers in the areas of multimedia, online learning, and cognition. He has presented extensively at national and international conferences.

Marcelo Knôrich Zuffo is titular Professor in the Department of Electronic Systems Engineering at Polytechnic School of the University of São Paulo - USP. His master and PhD courses were in Electrical Engineering. He works for the Laboratory of Integrated Systems of the Polytechnic School at USP where he coordinates research and development related to interactive electronic media focusing on digital TV, telemedicine, virtual reality, computer graphics, and scientific visualization. In 2001 he coordinated the development of the first totally immersive virtual reality system in Brazil called Caverna Digital™. He has coordinated the telemedicine onconet network.
