About the Contributors

Saqib Saeed is an assistant professor at the Computer Information System department at University of Dammam, KSA. He has a Ph.D. in Information Systems from University of Siegen, Germany, and a Masters degree in Software Technology from Stuttgart University of Applied Sciences, Germany. He is also a certified software quality engineer from American Society of Quality. His research interests lie in the areas of human-centered computing, computer supported cooperative work, empirical software engineering and ICT4D. He has more than 50 publications to his credit.

Yasser A. Bamarouf is an Assistant Professor and Vice Dean of Development and Quality at the University of Dammam in Saudi Arabia, where he has been since 2014. He completed his higher education in the UK. He received a B.S. from Brighton University in 2003, and an M.S. from Bradford University in 2007. He received his Ph.D. in Computer Science from Durham University in 2013. His research interests span both e-commerce and human computer interaction mainly through the application of haptic interaction.

T. Ramayah has an MBA from Universiti Sains Malaysia (USM). Currently he is a Professor at the School of Management in USM. He teaches mainly courses in Research Methodology and Business Statistics. Apart from teaching, he is an avid researcher, especially in the areas of technology management and adoption in business and education. His publications have appeared in Computers in Human Behavior, Resources Conservation and Recycling, Journal of Educational Technology & Society, Direct Marketing: An International Journal, Information Development, Journal of Project Management (JoPM), Management Research News (MRN), International Journal of Information Management, International Journal of Services and Operations Management (IJSOM), Engineering, Construction and Architectural Management (ECAM) and North American Journal of Psychology. He is constantly invited to serve on the editorial boards and program committees of many international journals and conferences of repute. His profile can be accessed from http://www.ramayah.com.

Sardar Zafar Iqbal has done Masters in Computer Science from IQRA university Karachi Pakistan. He is currently working as lecturer in Computer Information Systems department at University of Dammam. His research interest includes Big data, Software Process Modeling and Algorithms and Software Quality Assurance.

***
Izzat Alsmadi obtained his Ph.D degree in software engineering from NDSU (USA) and his second master in software engineering from NDSU (USA) and his first master in CIS from University of Phoenix (USA). He had a B.Sc degree in telecommunication engineering from Mutah University in Jordan. He has several published books, journals, and conference articles largely in software engineering and information retrieval fields.

Athary A. Alwasel is an academic at the department of Management Information Systems (MIS), School of Business Administration, King Saud University. She teaches, trains and researches into information systems management. She has a BSc from Oakland University (USA) and an MSc from Quinnipiac University (USA). She has taught several undergraduate courses, including Information Systems Analysis and Design and E-Healthcare Information Systems. She has been supervising MIS undergraduate students during their internships in different sectors. Mrs. Alwasel has been collaborating with Pearson Education on their Global Editions Program, and has contributed content to list of MIS titles. She is a member of the Association for Information Systems (AIS).

Pradeep Bhatia is currently working as Professor in department of Computer Science and Engineering, Guru Jambeshwar University Science and Technology, Hisar. His areas of research are Software Quality, Software Metrics, Software Measure with fuzzy Technique and COTS, Computer Graphics. Prof. Bhatia has 58 publications in refereed journals and conferences of international and national repute. He has been a member of a number of committee for various universities in various capacities.

Ben Clegg is a Professor of Operations Management at Aston Business School. His areas of expertise are systems thinking, managing multi-organisational enterprises and enterprise systems, and operations improvement. He has over 100 refereed publications and a leading text book on Operations Management (McGraw-Hill, 2011). He has been a visiting Scholar at Stanford University (USA) and an Advance Institute of Management (AIM) Scholar in the UK. He is a Chartered Engineer, a Fellow of the Institute of Engineering and Technology (IET) and an elected Board member for the European Operations Management Association (EurOMA). He consults for organisations on the above fields.

Jabulani Sifiso Dlamini is an IT Officer at Swaziland Industrial Development company. He has completed his M-Tech in Computer Science (Information Networks) at Tshwane University of Technology and awaiting graduation. He has submitted conference articles and Chapter in book under review. He has a B-Tech in IT(IS and Technology management ) Obtained from the University of Johannesburg, National Diploma in Information Communication Technology obtained from Vaal University of Technology and did a CCNA training course. He did his internship at Swaziland Water and Agricultural Development Enterprise attached under the MIS department for 3 months. He has worked for Inyatsi Construction Company as a helpdesk support technician for 6 months; has also worked as ICT Teacher and Systems administrator at Mbekelweni High School. He joined World Vision Swaziland as Network and Infrastructure administrator and worked there for 2 years and 2 months.

Mariam Elhussein is an Assistant Professor at the Computer Information Systems Department, College of Computer Sciences and Information Technology, University of Dammam. Graduate of Informatics Research Center, Henley Business School, at the University of Reading, UK.
Hasnain Falak is working as Research Assistant in Institute of Social Informatics and Technological Innovations (ISITI), Universiti Malaysia Sarawak.

Pei Leng Gan is a PhD student in Universiti Sains Malaysia. She is now working as graduate research student under School of Management in Universiti Sains Malaysia. Her research interests are Green IT and Technology Management.

Angel García Crespo is Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. Angel holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Has led and actively contributed to large European Projects, and also in many business cooperations. Author of more than a hundred publications in conferences, journals and books, both Spanish and international. “If you sit by the river long enough, you will see the body of your enemy float by.”

Alejandro Garcia-Ramirez is an Associate Professor and researcher at the Universidade do Vale de Itajai, Santa Catarina, Brazil. Graduate in Electronic Engineer from the Instituto Superior Politécnico José Antonio Echeverría, Havana, Cuba. Holds the MSc in Electrical Engineering and Ph.d. in Control and Automatic Systems from the Universidade Federal de Santa Catarina, Brazil. Knowledgeable in applied computing, robotics, embedded systems and assistive technologies. Supervised several international cooperation projects, having a status of Productivity, Technological and Innovative Extension, from the Conselho Nacional de Desenvolvimento Científico e Tecnológico - CNPq.

Israel Gonzalez-Carrasco is a visiting professor in the Computer Science Department of Universidad Carlos III of Madrid. Holds his PhD degree in Computer Science by the Universidad Carlos III of Madrid. Co-author of several papers in international journals and conferences. Knowledgeable in Neural Networks, Expert Systems and Software Engineering. He is involved in international projects and he is also a Editorial Board and Review Board Member for several international journals.

Hina Gull has done Masters in Computer Software Engineering from National University of Science and Technology Pakistan. She is currently working as lecturer in Computer Information Systems department at University of Dammam. Her research interest includes Human Computer Interaction, Software Process Modeling and Algorithms.

S. M. Muzahidul Islam is a final year student of Software Engineering Department at Daffodil International University. His research interest includes Artificial Intelligence, Methods of software analysis and design, Cloud Computing, Human-Computer Interaction (HCI) and Social and ethical aspects of software engineering. At the moment, Mr. Muzahidul is working as a software engineering at Tekno Pole, an ICT Development organisation that offers health and educational software solutions to developing and emerging countries.
Bernadette Imuetinyan Iyawe has obtained a Masters degree in Business Information Systems from University of East London, United Kingdom and has been a Computer Science lecturer at the University of Benin, Nigeria since 2011. Her research interests include Human Computer Interaction (HCI), E-Learning, Project Management, Usability and Service Sciences.

Gustavo Jasper is an undergraduate student in the Computation Engineering Course, at the Universidade do Vale de Itajai. Actively participates in various scientific projects.

Okuthe P. Kogeda obtained a doctorate degree in Computer Science from University of the Western Cape in Cape Town, South Africa in 2009. He is currently a Senior Lecturer, Chair of Departmental Research & Innovation Committee, and Head of Postgraduate Section in the Computer Science Department at Tshwane University of Technology, South Africa. He was a Senior Lecturer in the Computer Science Department at University of Fort Hare in Eastern Cape, South Africa from 2009 to 2011. He was a Lecturer in the Computer Science Department at University of the Western Cape in Cape Town, South Africa from 2004 to 2009. He was a Lecturer at University of Nairobi in Nairobi, Kenya from 1999 to 2000. He is a member of IITPSA and IAENG. He is NRF rated researcher since 2015. He has published over fifty internationally refereed conference and journal papers, author of four book Chapters and author of an edited book, Modelling of Reliable Service Based Operations Support System.

Renato Livramento da Silva is a Professor at the Universidade Federal da Paraíba, Brazil. Graduate in Design from Faculdade Barddal de Artes Aplicadas, Brazil. Holds the MSc in Architecture and Urbanismo from the Universidade Federal de Santa Catarina, Brazil. Knowledgeable in inclusive design, user-centered design, multisensoriality and accessibility.

Amarilys Lopez is a researcher at Univali. MSc in Electrical Engineering from the Federal University of Santa Catarina, Brazil. Graduated in Automated Systems from Higher Polytechnic Institute Jose Antonio Echeverria, Havana, Cuba. Knowledgeable in computer science, with emphasis on basic software, robotics, fuzzy control, genetic algorithms and financial control systems.

Imran Mahmud is working as an Assistant Professor at the Department of Software Engineering, Daffodil International University, Bangladesh. At the moment he is pursing PhD in Management Information System at the School of Management in Universiti Sains Malaysia. His research interests are human-computer interaction, usability testing, software engineering measurement / models and management information systems. Imran Mahmud has several research papers published on enterprise resource planning (ERP) and information system published by Elsevier, Sage publications and IEEE. His full profile can be accessed from: http://faculty.daffodilvarsity.edu.bd/profile/swe/imahmud.html.

Ana Isabel Martins is a researcher in the Medical Sciences Department of the University of Aveiro and in the Institute of Electronics and Informatics Engineering of Aveiro. She has a PhD in Health Sciences and Technology (2016), MSc in Gerontology, specialization in Management of Social Equipments (2011) and BSc in Gerontology (2009) at the University of Aveiro. Her research work is focused on technology assessment for the elderly, including Ambient Assisted Living (AAL) products and services. Her recent work includes the development of a methodology for evaluation of AAL products and services usability using the International Classification of Functioning Disability and Health in a Living Lab approach.
About the Contributors

She also developed work in the field of assistive technologies use and evaluation of human functioning and environmental factors using the International Classification of Functioning, Disability and Health.

**Deepti Mehrotra** is currently working as Professor in Amity School of Engineering and Technology in IT department. She completed her PhD from Lucknow University. She has more than 20 year of research, teaching and content writing experience. She had published more than 80 papers in international refereed Journals and conference Proceedings. She is editor and reviewer for many books, refereed journal and conferences. She is regularly invited as resource person for FDPs and invited talk in national and international conference. She guided Ph.D. and M.Tech students.

**Renuka Nagpal** is working as Assistant Professor in Department of Computer Science, Amity School of Engineering and Technology, Amity University, Uttar Pradesh. Currently she is pursuing her PhD in the field of Computer Science and Engineering from Uttar Pradesh Technical University, Lucknow. She completed her M.Tech in CSE from Guru Jambeshwar University Science and Technology, Hisar in 2001.

**Md. Mahedi Hasan Nayeem** is pursing BSc. in Software Engineering at the Department of Software Engineering in Daffodil International University. His research interest includes Machine Learning, Human-Computer Interaction (HCI), Cloud Computing, Cryptography, and Knowledge Management. He has beginner level expertise on IT security.

**Oluwasola Oni** is a lecturer at Pan-Atlantic University, Nigeria. She teaches information systems at undergraduate and postgraduate level. She has been involved in research considering challenges involved in the effective diffusion of innovation technologies among individuals and Small and Medium Size Enterprises (SMEs). In addition to the study of diffusion and adoption of technologies, she is also interested in and is currently investigating mobile customer relationship management (mCRMs), mobile money, digital ecosystems and knowledge sharing.

**Pablo Penas Franco** is a Freelance Consultant, Professor of Management at Syracuse University (Madrid campus) and Associate Professor at Galicia Business School in Spain.

**Vivian Pereda** is a Technology Management M.S. student at Central Connecticut State University. She currently works at a precision machining metallurgy factory in Newington, CT as a project engineer, focusing on continuous improvement and lean opportunity. Vivian received her B.S. in Management and Engineering for Manufacturing from the University of Connecticut.

**Alexandra Queirós** is Coordinator Professor of the Health Sciences School of the University of Aveiro. She received her BSc degree in Information and Communication Technologies in 1998, her MSc degree in Information Management in 2001 and her PhD in Health Technologies in 2006, from the University of Aveiro. She is currently member of the Scientific Council of the University of Aveiro. Her current research interests include human functionality, ambient assisted living services and the application of information and communications technologies to healthcare and social care services. She has been involved in various European and national funded research projects, has supervised several MSc students and has more than thirty research publications distributed by books, book chapters, journals and proceedings of international conferences.
Mohammad Rahman is serving in the Manufacturing and Construction Management Department at the Central Connecticut State University. His research and teaching focused on supply chain strategy, decision making under uncertainty, and lean six sigma processes for quality. His research articles appeared in academic journals. He published book chapters and presented topics in national and international conferences and forums. His funded research projects are sponsored by American Association of University Professors (AAUP), US Department of Transportation (USDOT) and Mississippi Department of Education (MDE). He served as a member in executive board and committees in research centers and international conference forum at various responsibilities. He regularly reviews paper for major journals and conferences.

Nelson Pacheco Rocha is Full Professor of the University of Aveiro. He received his BSc degree in Electronics and Telecommunications Engineering in 1983 and his PhD in Electronics Engineering in 1992, from the University of Aveiro. He was the Head of Health Sciences School (2001-2011), the Head of the Health Sciences Department of the University of Aveiro (2001-2014) and Pro-Rector of the University of Aveiro (2005-2010). His current research interests include the application of information and communications technologies to healthcare and social services, the secondary use of electronic health records, and the interconnection of human functionality and ambient assisted living services. He has been involved in various European and national funded research projects, has supervised several PhD and MSc students and has a patent and more than one hundred research publications distributed by books, book chapters, international journals and proceedings of international conferences.

Kamaljeet Sandhu’s teaching and research expertise are in Information Systems Adoption, Management Accounting and Corporate Governance Adoption, and E-Learning Acceptance at Universities.

Andreas Schroeder is a Senior Lecturer for Information Systems at Aston University. Prior to this he was teaching and researching information systems at Buckingham University and City University of Hong Kong. He has also worked as a research fellow at the Open University, UK. Before working in academia I worked as a project manager in the chemical Industry in Germany.

Dalibor Stanimirovic is a researcher in the field of Informatics and a member of Institute for Informationization of Administration. He has been actively involved in the academic community and teaching in the last years, while his papers and research work on ICT enabling reform and development of public administration and health care system have been published in several major national and international journals. Throughout his work he has been involved in various projects and research work and collaborates in a number of research groups concerning this field of expertise. He has been an invited session chair on numerous prestigious venues, whereas his scientific work was presented at various significant international conferences (EGOV, EGPA, ECEG, eHEALTH, etc.). His general research interests include ICT in public administration, government Enterprise Architecture, e-government, Health Information Systems, evaluation models and indicators, edemocracy and social dimensions of ICT policy.

Sathiyamoorthi V. is currently working as an Associate Professor in Computer Science and Engineering Department at Sona College of Technology, Salem, Tamil Nadu, India. He was born on June 21, 1983, at Omalur in Salem District, Tamil Nadu, India. He received his Bachelor of Engineering degree in Information Technology from Periyar University, Salem with First Class. He obtained his Master of
About the Contributors

Engineering degree in Computer Science and Engineering from Anna University, Chennai with Distinction and secured 30th University Rank. He received his Ph.D degree from Anna University, Chennai in Web Mining. His areas of specialization include Web Usage Mining, Data Structures, Design and Analysis of Algorithm and Operating System. He has published five papers in International Journals and eight papers in various National and International conferences. He has also participated in various National level Workshops and Seminars conducted by various reputed institutions.

Tariq Zaman earned his Ph.D. from the Faculty of Computer Science and Information Technology, Univeristi Malaysia Sarawak, Malaysia. He is working as Postdoctoral research fellow in the Institute of Social Informatics and Technological Innovation UNIMAS. He currently has 30 research publications, conference proceedings, presentations and invited talks. Furthermore, Tariq’s Ph.D. project garnered 6 international, 1 national and 1 university level award, including ISIF Asia 2013, iENA 2013, PECIPTA 2013 and MTE 2014. His Postdoctoral research project is amongst the 11 recipients (out of 139 applicants) of ISIF Asia grants 2014 and SIGCHI Best of CHI Honorable Mention Award (2015) Winner. He is recently selected as research associate in IPinCH Project Simon Fraser University, Canada. His research interests include Indigenous Knowledge Management (Governance), Indigenous Communities, Rural ICT, Community Informatics and ICT4D. His projects and research publications equally reflect the multiple voices of indigenous wisdom and cultural understanding by converging local, scientific, traditional and cultural knowledge.
