Dr. Fahim Akhter received his BSc in Management Information Systems from the University of Missouri - St. Louis (USA), M.B.A. from the Lindenwood University (USA), and Ph.D. in Informatics from the University of Bradford (England). Dr. Akhter has more than fifteen years of academic experience in lecturing, curriculum design, and research at the Colgate University of New York, Baruch College at City University of New York and Zayed University. Dr. Akhter’s research activities are in the areas of e-commerce, web services, and information security. He has written numerous papers in the areas of information technology and e-business, which have been published in international journals and proceedings such as Information & Software Technology - Elsevier, International Journal of E-Business Research, IEEE and ACM. He has served in program committees, advisory boards, and editorial review boards for various international Journals and conferences.

Maria Fasli is a Senior Lecturer at the Department of Computing and Electronic Systems of the University of Essex. She obtained her Ph.D. in Computer Science in 2000. Her current research interests lie in agents and their theoretical foundations and practical applications, web service discovery and composition, and social networks. She has published papers on logics for reasoning agents, formal models of multi-agent systems, trading agents and platforms, trust, and web search assistants. She is the author of “Agent Technology for E-commerce” (John Wiley and Sons, 2007). Her interests extend to technology-enhanced learning and she was also awarded a National Teaching Fellowship for her innovative approaches to learning and teaching.

Richard Feinberg, PhD is a consumer psychologist and professor in the Department of Consumer Sciences and Retailing and the director of the Center for Customer-Driven Quality at Purdue University and was head of the Department of Consumer Sciences and Retailing (1989-1998; 2001-2002). He teaches courses in consumer behaviour, retailing, “e”-retailing, customer relationship management and
leadership. He has directed over 85 PhD and masters theses. He is responsible for the development and delivery of executive education programs and has been a consultant for many companies on customer service/satisfaction. He is the author of over 200 research and trade articles, and hundreds of presentations and seminars. With Jon Anton and others he is the author of *Customer Relationship Management* and with Ko deRuyter and Lynne Bennington “*Call Center Management: Great Ideas That Work*.” He is consulting editor and reviewer for professional journals and has been a member of the advisory board for OneBlue World, an Internet start-up, and was a member of the board of directors for Paul Harris Stores, the Purdue University Press, Benchmarkportal and the FightBack Foundation. He has consulted with tens of companies (some big ones) and has served as an expert witness and consultant on some extremely interesting law suits.

**Bob Galliers** is provost of Bentley College, USA, formerly professor of information systems at the London School of Economics, UK where he was research professor in the Department of Information Systems. He retains his link with the LSE as a visiting professor. He was previously professor of information management at Warwick Business School, where he was dean for the period 1994-1998. His research is transdisciplinary in nature and currently focuses on information technology and business innovation, knowledge creation and management, and intra- and extra-organisational impacts of the Internet. He is editor-in-chief of the *Journal of Strategic Information Systems* and co-author of a number of books.

**Dr. Călin Gurău** is Associate Professor of Marketing at GSCM - Montpellier Business School, France, since September 2004. He is a Junior Fellow of the World Academy of Art and Science, Minneapolis, USA. He worked as Marketing Manager in two Romanian companies and he has received degrees and distinctions for studies and research from University of Triest, Italy; University of Vienna, Austria; Duke University, USA; University of Angers, France; Oxford University and Southampton Business School and Heriot-Watt University, United Kingdom. His present research interests are focused on Marketing Strategies for High-Technology Firms and Internet Marketing. He has published more than 30 papers in internationally refereed journals, such as International Marketing Review, Journal of Consumer Marketing, Journal of Marketing Communications, etc.

**Chiquan Guo** is an assistant professor of marketing and international business at the University of Texas-Pan American. His research interests include marketing strategy and management, market orientation, and e-commerce.

**Adam Hagen** is a graduate Ph.D. student in Consumer Behavior in the Department of Consumer Sciences and Retailing at Purdue University. His area of expertise is CRM with a specialty in service recovery management.

**Nan Hu** is an Assistant Professor of Information Systems at the Singapore Management University. Prior to joining SMU, Dr. Hu works as a senior analyst for Capital One Auto Finance at USA. His research interests are in the economics of information, user behavior mining, capital market, online word of mouth, and firm information environment. Dr. Hu’s work has cross-discipline nature and he has published at various Computer Science, Information System, Marketing Science, and Accounting related conferences. Dr. Hu received his PhD in management science from the University of Texas at Dallas. Contact him at nanhu2010@yahoo.com.
Xiaorui Hu is an associate professor of decision sciences and information technology management at the John Cook School of Business at Saint Louis University. She received her PhD in economics from the University of Texas at Austin. Her research focuses on trust related issues in electronic commerce, B2B markets, telecommunication market evolution, information security, and culture impact on international business. Her work has appeared in Information Systems Research, Decision Support Systems, IEEE Computer, Journal of Organizational Computing and Electronic Commerce, International Marketing Review, Journal of Global Information Management, and Journal of Promotion Management, and other outlets.

Sanjeev Jha is a doctoral student at the Department of Information & Decision Sciences at the College of Business Administration, University of Illinois at Chicago (UIC). His research interests include sustained innovation, innovation management, organizational learning, information technology adoption, and strategic information systems. He has published in journals such as Communications of the ACM and IEE Engineering Management, and proceedings of several conferences including the Academy of Management, International Conference in Information Systems, Americas Conference in Information Systems, among others.

Wen-Jang (Kenny) Jih is a professor of computer information systems of the Jennings A. Jones College of Business, Middle Tennessee State University. He obtained his doctorate degree in business computer information systems from the University of North Texas in 1985. His recent research interests include: e-commerce, m-commerce, knowledge management, customer relationship management, and innovative instructional methods in information systems.

Changsu Kim is assistant professor in electronic commerce at Yeungnam University, Korea. He received his PhD in information systems from London School of Economics (LSE). His research interests include ubiquitous computing, electronic commerce, ICT innovation diffusion, and IS strategy.

Jaekyung Kim is a PhD candidate in management at the University of Nebraska-Lincoln. He received his MBA from Miami University of Ohio. His research focuses on knowledge management, decision support systems, and electronic commerce. His work has been published in journals such as Decision Support Systems, Omega, International Journal of Electronic Commerce, Expert Systems with Applications and International Journal of Knowledge Management.

Songpol Kulviwat is assistant professor of marketing and international business at Hofstra University. He received his PhD in marketing from Southern Illinois University. His research interests include Internet marketing, high-tech marketing, international business (cross-cultural research), and information technology. His scholarly works have been published or accepted for publication in the Journal of the Academy of Marketing Science and Journal of Internet Research.

Theresa Lauraeus-Niinivaara is PhD Candidate and Researcher in Information Systems Science at the Helsinki School of Economics. She is finishing her dissertation about “Uncertainty Affects Consumer Decision Making and Buying Behaviour in E-Market”. Her research interests include consumer buying behavior, decision making, information search processes and uncertainty in e-Market. She is also interested in the household robots, the future electronic services. She have published a book article,
several conference papers and working papers about these areas. Before doctoral studies she worked as Leading Consultant and Director of a Finnish internet office, Key Account Manager and Project Leader in the electronic commerce field.

Dr. Zakaria Maamar has published several papers in well-known journals such as Communications of the Association for Computing Machinery (ACM) and the Institute for Electronic and Electrical Engineers (IEEE)'s Internet Computing, and conference proceedings such as “Mobile Data Management and Advanced Information Systems.” Dr. Zakaria Maamar also received two IEEE awards in 1999 and 2001. He regularly co-organizes international workshops on various topics including ubiquitous computing, context-aware Web services, and handheld computing.

Maria Madlberger (maria.madlberger@wu-wien.ac.at) is assistant professor at the Institute for Management Information Systems at the Vienna University of Economics and Business Administration. She received her PhD in commerce from this university in 2002. Her research focuses on how information systems can be used as a basis for efficiency gains in distribution and interfirm networks. Her current areas of interest are interorganizational information sharing in supply chain management, strategic and operational benefits of electronic data interchange, multi-channel retailing, distribution in B2C e-commerce, and Internet marketing. Dr. Madlberger has published in journals and refereed conferences in the fields of e-commerce, marketing, and supply chain management.

Dr. Stuart Madnick is the John Norris Maguire Professor of Information Technology in the MIT Sloan School of Management and Professor of Engineering Systems in the MIT School of Engineering. He received his MBA and Ph.D. in Computer Science from MIT and has been an MIT faculty member since 1972 and head of IT Group for more than twenty years. He is co-Director of PROductivity From Information Technology and Total Data Quality Management research programs. He is the author/co-author of over 250 books, articles, or reports. His research interests include integrating information systems, data semantics, and strategic use of IT.

Makoto Nakayama is Associate Professor at the College of Computing and Digital Media in DePaul University. He holds a Ph.D. from University of California, Los Angeles and an MBA from University of Texas at Austin. Prior to moving into academe, he served as a product marketing manager at Novell Japan. He also worked on business planning and operating system developments at Yokogawa Electric Corporation in Tokyo. His current research interests are in IT use in marketing channels and IT skills portfolio management. His papers appeared in Information & Management, Journal of Information Technology, International Journal of Information Systems and Change Management, and proceedings of international conferences.

Anssi Öörni is assistant professor of information systems at the Helsinki School of Economics. He received his M.Sc. and Ph.D. in economics at the Helsinki School of economics. He has published in the European Journal of Information Systems, Information Technology and Tourism, and the Journal of Travel Marketing. His current research interests include consumer adoption of information technology and diffusion of mobile services.
Carla Ruiz-Mafé (PhD in Business and Economics, Universitat de València, Spain) is Assistant Professor in the Department of Marketing, Faculty of Economics, Universitat de València. Her primary research interests include e-commerce, mobile commerce, communication, interactive marketing and consumer behaviour and she has articles published in Internet Research, Online Information Review, Journal of Electronic Commerce Research, Journal of Consumer Marketing, Journal of Theoretical and Applied Electronic Commerce Research and the best Spanish refereed Journals. She has also presented some papers at AM and EMAC Conferences.

C. Ranganathan is associate professor of information systems at the Liautaud Graduate School of Business, University of Illinois at Chicago. His research interests include e-business transformation, strategic management of information systems, management of IT outsourcing and business value of IT investments. His research has been published or is forthcoming in journals including Communications of the ACM, Decision Sciences Journal, IEEE Transactions on Engineering Management, Information & Management, Information Systems Research, MIS Quarterly Executive, International Journal of Electronic Commerce, among others. Ranga holds a doctorate from the Indian Institute of Management of Management, Ahmedabad and a master’s degree from BITS, Pilani, India.

Timo Saarinen is a professor of information systems and electronic commerce at the department of Business Technology and a Vice-Rector for research at the Helsinki School of Economics. He holds a Ph.D. in information systems form the Helsinki School of Economics. Timo Saarinen has published in major journals as MIS Quarterly, Journal of Management Information Systems, Information & Management and Journal of Strategic Information Systems. His research interests include economics of information systems and the development of efficient market-driven services, with the focus on the multi-channel environment of electronic commerce.

Silvia Sanz-Blas (PhD in Business and Economics, Universitat de València, Spain) is Associate Professor in the Department of Marketing, Faculty of Economics, Universitat de València. Her primary research interests include communication, sales, e-commerce, interactive marketing and consumer behaviour she has articles published in Internet Research, Online Information review, Journal of Electronic Commerce Research, Journal of Consumer Behaviour, Journal of Consumer Marketing, Journal of Vacation Marketing and the best Spanish refereed Journals. She has also presented numerous papers at AM, AMS and EMAC Conferences.

Anne Sunikka is PhD Candidate and Researcher in Information Systems Science at the Helsinki School of Economics. She has M.Sc.’s from both international marketing and information systems. Her research interests include personalization, multi-channel management, information search, and electronic commerce. She has extensive work experience in financial industry, in information systems and education. She has presented research papers in several conferences (ECIS, HICSS, EMAC, IAREP). She expects to finalize her thesis on customer activation in financial industry in 2009.

Norma Sutcliffe is Associate Professor at the College of Computing and Digital Media in DePaul University. She holds a Ph.D. as well as an MBA from University of California, Los Angeles. With extensive experience in industry, Dr. Sutcliffe has been a consultant for many Fortune 500 firms in
About the Contributors

evaluating IT needs, IT implementations, and IT strategies. Dr. Sutcliffe has worked as systems developer on mainframe and client/server systems as well. Her current research interests are in IT enabled organizational change, IT leadership behavior, and IT skills portfolio management. Her papers appeared in Information & Management, Journal of Information Systems Education, International Journal of Information Systems and Change Management, and proceedings of international conferences.

Ramendra Thakur is an assistant professor at UVSC. He received his PhD in marketing from Southern Illinois University. His research interests are in customer relationship management, e-commerce, high-tech marketing, marketing strategies on shareholder value, marketing models, and international marketing. His publications have appeared in the Journal of the Academy of Marketing Science, the Marketing Management Journal, and the Journal of Website Promotion.

Dr. Patricia T. Warrington is an assistant professor of merchandising at Texas Christian University in Fort Worth, Texas. Her research focuses on consumer patronage behavior, particularly as it relates to multichannel retailing and technology. Dr. Warrington's industry experience includes positions in department store buying, retail financial planning/analysis, and small business consulting. Her publications appear in Journal of Retailing, Psychology & Marketing, Journal of Business Research, and other publications. Dr. Warrington holds an MBA from Texas Christian University and a PhD in retailing and consumer sciences from The University of Arizona.

Yuhong Wu was an assistant professor of marketing at Christos M. Cotsakos College of Business, William Paterson University. She received her PhD degree in marketing from the University of Texas at Austin. Her research interests lie in the areas of internet marketing and e-commerce, strategies in network market, and new product development and management. Her works has appeared in Journal of Marketing and other outlets.

Kyung Hoon Yang is currently an assistant professor in the Department of Information Systems at the University of Wisconsin-La Crosse. He received his PhD in management information systems from Purdue University in 1989 and has been a full professor at the Chungang University in Korea from 1989 to 2004. His major research interests include knowledge transfer and knowledge based organization. He has published more than 20 journal articles including Decision Support Systems, Expert Systems with Applications.

Hongwei Zhu is an Assistant Professor of Information Technology at the College of Business and Public Administration, Old Dominion University. He holds a Ph.D. in Technology, Management and Policy from MIT. His research interests include data integration and reuse technologies, data quality management, data mining, information policy analysis, and information economics.
