About the Contributors

Shai Rozenes is the head of the Engineering and Management of Service Systems Department in Afeka Tel Aviv Academic College of Engineering. He obtained his PhD in Industrial Engineering from the Coventry University in the United Kingdom. His major filed of expertise are: service management project management. He is involved in international research within European and international research networks. Dr. Rozenes has published in refereed scientific journals and conferences. Shai is the co-founder and Chief Academic Officer of the Afeka Center for Service Engineering and Management. Dr. Rozenes is also a consultant in industry.

Yuval Cohen is a Senior faculty member (Ph.D) at Afeka Tel-Aviv Academic College of Engineering. Previously he was the head of the Industrial Engineering program at the Open University of Israel. His areas of specialty are production planning, industrial learning, design of manufacturing control systems, and logistics management. He has published several papers in these areas. He served several years as a senior operations planner at FedEx Ground (USA) and received several awards for his contributions to the hub and terminal network planning. He received his Ph.D. from the University of Pittsburgh (USA), his M.Sc. from the Technion —— Israel Institute of Technology, and B.Sc. from Ben-Gurion University. He is a Fellow of the Institute of Industrial Engineers (IIE), and a full member of the Institute for Operations Research and Management Sciences (INFORMS).

***

Tindara Abbate is Assistant Professor of Business Economics and Management at the University of Messina (Italy). She teaches Service Marketing and Territorial Marketing. She has been involved, as presenter or chairman, in several national and international conferences. Also, she has been involved in research projects, as member and scientific coordinator. Her research interests refer to market orientation; open innovation; territorial marketing.

J. M. (Hans) Akkermans is a full professor of Business Informatics at VU University Amsterdam. He holds cum laude Master and PhD degrees in theoretical physics from the University of Groningen. He has published over 200 articles and papers in peer-reviewed international journals and conferences. For his work, he won European Innovation Awards in 1992 and 1998. He is an author of the textbook Knowledge Engineering and Management - The CommonKADS Methodology (MIT Press, 2000), which was also translated into Chinese and separately published in India. He is the Founding Director of the interdisciplinary Network Institute (www.networkinstitute.org) in which 300 researchers from
information and computing sciences, communication science, social science, organization and business research and humanities investigate the networked connected world in all its technological, social, and economical facets. With Jaap Gordijn, he developed the e3value methodology and tool for analysing networked business models (www.e3value.com). He is furthermore an originator of innovative solutions for intelligent decentralized coordination of (“smart and green”) energy in networks, markets and buildings, resulting in a Smart Grids open-source platform system known as PowerMatcher (flexiblepower.github.io); results have been integrated in commercial solutions through parties such as ECN, IBM, VITO, Alliander, CGI, Accenture, Stedin, DHPA, TNO and others. Currently, he directs the W4RA research and education program, the Web alliance for Regreening in Africa (w4ra.org). The mission of W4RA is to support farmer-led regreening activities specifically by enhancing information, communication and knowledge sharing for rural development.

Jesús Alcoba, MsC, MBA, PhD, is a researcher and international speaker. He is the Dean of La Salle International Graduate School of Business and a member of the Board of La Salle University College, which is affiliated to the Autónoma University of Madrid.

Marco Atonio Amaral Feris has a PhD in Project Management at the Australian National University (ANU), Master’s Degree in Computer Science at Universidade Federal do Rio Grande do Sul (UFRGS), Lato Sensu Graduate Course in Business Management at Fundação Getulio Vargas (FGV), Bachelor’s Degree in Computer Science at Pontifícia Universidade Católica (PUC-RS) and Six Sigma Black Belt and Green Belt certifications. During 28 years of work experience, he worked as a program manager at AEL/Elbit Systems (responsible for five avionics and defense systems for the KC-390), project management specialist at ANU (responsible to coach project managers and implement project management processes, tools, guidelines and templates in the university), R&D manager at Hewlett-Packard (responsible for the development of a platform for providing extensibility for LaserJet Printers), IT project manager at Dell Computers (responsible for the stabilization of Brazil and Latin America on-line stores), new product introduction engineer at Dell Computers (responsible for launching servers, notebooks and desktops in the Latin American market), project manager at Altus Sistemas de Automação (responsible for the automation of fire, gas and shutdown systems of Garupoa oil rig platform and the steel-making plants of Cosipa and Usiminas), and assembler, C and C++ developer at Altus Sistemas de Automação (industrial automation) and Chronos (commercial automation).

V. E. Annamalai is a doctorate in cutting tools, from Indian Institute of Technology, Madras. He has sixteen years of industrial experience prior to the current ten years of academic experience. His interest is to induct industrial practices into academic circles in order to make the graduates industry ready and employable.

Barbara Aquilani is Associate Professor of Management at the Department of Economics and Management (DEIM) of ‘Tuscia’ University of Viterbo (Italy) where she held the courses of Management and International Marketing. She worked as Assistant Professor at the Siena University from 2005 to 2009 - Communication Department, Faculty of Letter and Philosophy where she held the courses of Marketing and Marketing Communication. She has been involved, as presenter, in several national and international conferences and in several national/international research projects, as member or scientific
About the Contributors

Coordinator. Her research interests refer to: (1) firm management and especially on firm growth (on which she published a book) and corporate governance; (2) marketing (among others she published papers on university marketing and online marketing); (3) innovation and open innovation.

**Ralph Badinelli** holds the Lenz Chair in the Department of Business Information Technology, Pamplin College of Business of Virginia Tech. His research interest are in the field of service science. He has published a book on modeling service systems as well as refereed articles in Operations Research, Service Science, Management Science, Decision Sciences, European Journal of Operational Research, Computers and Operations Research, International Journal of Production Research and other international journals. He is a former Chairperson of the INFORMS Service Science Section, Board Member and President (2017) of the International Society for Service Innovation Professionals (ISSIP), a member of the Institute for Operations Research and Management Science (INFORMS), Project Management Institute (PMI). His teaching responsibilities are in the areas of analytics, operations management and project management at the undergraduate, MBA and doctoral levels.

**Neeta Baporikar** is currently Director/Professor (Business Management) at Harold Pupkewitz Graduate School of Business (HP-GSB), Namibia University of Science and Technology, Namibia. Prior to this she was Head-Scientific Research, with Ministry of Higher Education CAS-Salalah, Sultanate of Oman, Professor (Strategic Management and Entrepreneurship) at IIIT Pune and BITS India. With more than a decade of experience in industry, consultancy and training, she made a lateral switch to research and academics in 1995. Dr. Baporikar holds D.Sc. (Management Studies) USA, PhD in Management, University of Pune INDIA with MBA (Distinction) and Law (Hons.) degrees. Apart from this, she is also an External Reviewer, Oman Academic Accreditation Authority, Accredited Management Teacher, Qualified Trainer, Doctoral Guide and Board Member of Academics and Advisory Committee in accredited B-Schools. Reviewer for international journals, she has to her credit 5 conferred doctorates, several refereed research papers, and authored books in the area of Entrepreneurship, Strategy, Management and Higher Education.

**Anna Bon** works at the Centre for International Cooperation (CIS-VU) of the Vrije Universiteit Amsterdam, the Netherlands. Her research focuses on development of innovative ICTs and e-services for people living in remote rural regions of the world, not connected to the internet. Anna Bon was one of the initiators of the interdisciplinary research program W4RA: The Web Alliance for Regreening in Africa. From 2006 - 2015 she initiated and coordinated international projects on academic cooperation / ICT for Development between VU Amsterdam and universities in Africa (Ghana, Sierra Leone, Ethiopia) and South America (Colombia, Surinam).

**Sergio Cavaliere** is a Full Professor of Operations Management at the Department of Management, Information and Production Engineering, University of Bergamo (http://www.unibg.it). Director of CELS – Research Group on Industrial Engineering, Logistics and Service Operations – established within the Department of Engineering, University of Bergamo. The Group currently counts on 4 senior researchers and 8 fellow and associate researchers (for more details on CELS activities please refer to: http://cels.unibg.it).
Weisheng Chiu is an Assistant Professor of Sport Management at Keimyung University, South Korea. Prior to joining Keimyung, he was on the Faculty at the University of Suwon, South Korea. He earned his PhD from the Yonsei University, South Korea and an MEd from the Graduate Institute of Sport and Leisure Management at the National Taiwan Normal University. His research interests are in the areas of sport consumer behavior and marketing issues in the sport industry.

Francesca Costanza is a PhD in the International PhD program of the ‘Model Based Public Planning, Policy Design and Management’, a joint program of: University of Palermo (Italy), University of Bergen (Norway) and Nijmegen school of Management Radboud University (The Netherlands). Francesca is a certified accountant, holds a MD in Business Economics and Administration, and a Msc in Healthcare Management. She was guest researcher at the Universities of Bergen and Nijmegen, and also conducted EU funded research at the Italian National Council of Research (ICT for Education). She is member of the System Dynamics Society and has a teaching assistant position in Business Management and Administration at the LUMSA University of Palermo.

Haluk Demirkan is a Professor of Service Innovation & Business Analytics at the Milgard School of Business, University of Washington Tacoma. His doctorate is in Information Systems and Operations Management from University of Florida, and his research in analytics, digital & service innovation and service-oriented technology & management have included recent industry-sponsored research projects with IBM, American Express, Intel and Teradata. He has almost 20 years of professional work experience on maximizing the return on the companies’ resources by effectively implementing strategic data and analytic solutions for 40+ Fortune 500 companies. He has more than 150 publications. He is a board of director for the International Society of Service Innovation Professionals, and an advisory board member for the INFORMS Service Science Section.

Monica Dragoicea is a Full Professor, Systems Engineering, University Politehnica of Bucharest, Faculty of Automatic Control and Computers.

Romano Angelico T. Ebrón, MAE, is the current Associate Dean of the College of Business Administration and Accountancy and former Department Chair of the Allied Business Department at De La Salle University – Dasmariñas (DLSU-D), Philippines where he also finished his Bachelor of Science in Business Administration major in Economics in 2005. He completed his academic units in Master in Applied Economics at De La Salle University – Manila in 2009. He is a Licensure Examination for Teachers (LET) Board Passer. He taught at Cavite State University – College of Business and Entrepreneurship for four years and is presently an assistant professor at DLSU-D College of Business Administration and Accountancy. He is a member of the Philippine Economic Society (PES) and the former President of the Entrepreneurship Educators Association of the Philippines (ENEDA) – Cavite Chapter. His fields of interest include microeconomics and macroeconomics, mathematical economics, development economics, and service science.

Maya Golan is a senior lecturer at the department of Industrial Engineering and Management at Afeka Tel Aviv Academic College of Engineering. Current research interests include employee helping and service processes, work-family conflict and human-machine interfaces. She received her Ph.D. in behavioral sciences and management from the Technion – Israel institute of Technology in 2009.
Jaap Gordijn is an associate professor of e-business at the Faculty of Exact Sciences of the Free University, Amsterdam. He obtained his PhD degree from the Free University Amsterdam on e-business modeling. His research interest concentrates on innovative e-business the key developer of, and has internationally published on, the e3value e-business modeling methodology, addressing the integration of strategic e-business decision making with ICT requirements and systems engineering. He has been working on EC-funded projects in the field of e-business such as Obelix, BusMod, Interop and FENIX. Before joining the Free University, he was a member of Cisco’s world-wide Internet Business Solution Group and senior manager of the e-business group at Deloitte & Touche. As such, he was involved in rolling out e-business applications in the banking, insurance, and digital content industries.

Abrar Haider is an academic at the University of South Australia. His professional experience spans two decades, working in the IT and education sectors in Australia, Pakistan, North America, Middle East, South East Asia, and the Far East. He has taught at undergraduate and postgraduate levels in Australia, Hong Kong, Malaysia, and Singapore. His areas of research interest include technology management and institutionalisation, IT governance, organisational transformation, and IT-based engineering infrastructure asset management.

Alan Hartman is an Assistant Professor at the University of Haifa and Afeka Academic College of Engineering. After a post-doctoral fellowship at the University of Waterloo in Canada, Alan joined the IBM Haifa Research Lab in 1983. Since then, his industrial research focused on storage technologies, mathematical optimization, hardware and software verification, and model based software, systems and services engineering. In parallel, he continued his pure mathematical research into combinatorial configurations. He spent 2.5 years at the IBM India research lab in Bangalore serving as the Services Science, Management, and Engineering (SSME) focal point for the IBM India Research Laboratory. He has held visiting positions in the Mathematics Department at the University of Toronto and at Telstra Research Labs. He has also coordinated and managed several European Commission research projects (AGEDIS, MODELWARE, MODELPLEX, COCKPIT). Alan has a Ph.D. in mathematics from the University of Newcastle in Australia, an M.Sc. in mathematics from the Technion – Israel Institute of Technology, and a B.Sc. in mathematics from Monash University in Australia. He has published over 70 research papers and holds 17 patents.

Kijpokin Kasemkap received his BEng degree in Mechanical Engineering from King Mongkut’s University of Technology, Thonburi, his MBA degree from Ramkhamhaeng University, and his DBA degree in Human Resource Management from Suan Sunandha Rajabhat University. He is a Special Lecturer in the Faculty of Management Sciences, Suan Sunandha Rajabhat University, based in Bangkok, Thailand. He is a Member of the International Association of Engineers (IAENG), the International Association of Engineers and Scientists (IAEST), the International Economics Development and Research Center (IEDRC), the International Association of Computer Science and Information Technology (IACSIT), the International Foundation for Research and Development (IFRD), and the International Innovative Scientific and Research Organization (IISRO). He also serves on the International Advisory Committee (IAC) for International Association of Academicians and Researchers (INAAR). He has had numerous original research articles in top international journals, conference proceedings, and books on the topics of business management, human resource management, and knowledge management, published internationally.
**Hyun-Woo Lee** is an Assistant Professor of Sport Management at Georgia Southern University.

**Paul Lillrank** is Professor of Quality and Service Management at Aalto University since 1994. He received his Ph.D. from Helsinki University in 1988 after post-graduate studies in Japan. He has worked at Science University of Tokyo, The Boston Consulting Group, and Stockholm School of Economics. His recent research is focused on health service management.

**Susan T. Mostajo** is the Director of Human Resource Management Office of De La Salle University–Dasmariñas (DLSU-D), Philippines and currently the President of Asian Association of School HRMD Practitioners, Inc (AASHPI). She obtained her PhD in Counseling Psychology at DLSU-D with the “Highest Distinction” and a recipient of the “Most Outstanding Dissertation”. Her affiliations to professional organizations are both in the fields of Industrial Organization, Human Resources, Psychology and Counseling such as Psychological Association of the Philippines (PAP), Philippine Guidance and Counseling Association (PGCA), AASHPI and American Psychological Association (APA) as Affiliate member. She has been a resource speaker in topics in Human Resource Management and in Psychology. She also has several researches in her field published and presented in national and international conferences.

**Tanushri Mukherjee**, Asst. Prof, Amity University Rajasthan, is a top-performing result-oriented teaching professional of over 11 years teaching experience with comprehensive teaching and administrative skills. Highly experienced in teaching Journalism and Mass Communication students specialized subjects like Public Relations, Corporate Communication, Event Management, Media organization and Management, Media Laws & Ethics and Media Analysis. Presently working as Assistant Professor in Amity School of Communication, Amity University Rajasthan, teaching three year Degree, Masters Degree of Journalism and Mass Communication and Bachelors of Business Administration students. Have been the Recipient of many Awards like, “Empowered Women Award” from the panel of Yadam Institute Research, India’s first Human Rights and Duties Research Centre, Odisha in the category of “Best Research Work” on the occasion of “1st International Women’s Rights Assembly”, Teaching Excellence Award in “PR and Communication” from Public Relations Society of India and Medal, Citation & Certificate of Merit in The “Gold Medallion National Award for the best PR Case Study”. Personal Achievements include Presentation of Research Papers dealing with different subjects related to the recent trends in the field of Public Relations and Mass Media Industry at various National & International Conferences as well as Publication of Research Papers in different journals. An active member of Public Relations Society of India and a member of the Editorial Board of Amity Journal of Media and Communication Studies.

**Costanza Nosì** is Associate Professor of Management and Marketing in the Department of Human Sciences, LUMSA University, where she teaches an Advanced Marketing course. Her main research interests are consumer behavior, entrepreneurship, food, wine, as well as hospitality management and marketing. She participated to numerous research projects in Italy and abroad, and is the author/co-author of multiple publications of both national and international relevance. She undertakes regularly consulting activities either through her Department or independently (in compliance with the conditions under which University employees may conduct work outside the University) for government, public sector organizations, community groups and business.
About the Contributors

**Marta Ormazabal** has studied Industrial Engineering at TECNUN, University of Navarra, where she also received her Ph.D degree in 2013. She is currently teaching “Economics and Business” and “Business Administration” and holds sessions about environmental management at the Industrial Management Department at TECNUN. Her research area is focused on environmental management within industrial companies and she has actively published works in this area.

**Rowell Paras** is the Dean of College of Tourism and Hospitality Management in De La Salle University- Dasmariñas (DLSU-D). He has been teaching in DLSU-Dasmariñas for 11 years now. He mentors HRM students competing in various international and national competitions. He is an active member of the Lasallian Association of Tourism and Hospitality Education (LATHE), Council of Hotel and Restaurant Educators of the Philippines (COHREP), and Hotel and Restaurant Association of the Philippines (HRAP). Rowell graduated from DLSU-Dasmariñas major in Bachelor of Science in Hotel and Restaurant Management in 2003. He received his Master of Science in Hotel and Restaurant Management from Philippine Women’s University (PWU) in 2011. Currently, he is completing his dissertation for Doctor of Business Management with specialization in Hospitality Management in PWU. Rowell is into researches which can contribute to the betterment of hospitality and tourism experiences in the Philippines. He co-authored Development and Industry- Academe Validation of A Competency Based Food and Beverage Service Workbook. He also co-authored a research entitled Tourism as a Life Experience: A Service Science Approach and presented it at the 6th International Conference on Exploring Service Science, Porto, Portugal in 2015. In 2016, he presented the research entitled Framing Meaningful Experiences Towards a Service Science Based Tourism Experience Design at the 7th International Conference on Exploring Service Science Bucharest, Romania.

**Giuditta Pezzotta** is Researcher at CELS (Research Group in Industrial Engineering, Logistics and Service Operations) at the Engineering Department - University of Bergamo. She received her PhD degree in Management, Economics and Industrial Engineering from Politecnico di Milano in 2010. During her PhD studies, she was a visiting PhD student at DIAL - Institute for Manufacturing - University of Cambridge in UK. Her current research interests are Service Engineering and Product-Service System. Through her work, since 2006 she has been involved and has coordinated several industrial and research projects related to the Product-Service field. She is author of more than 40 refereed international and national journal and conference papers.

**Rogério Puga-Leal** received his PhD in Industrial Engineering from the Universidade Nova de Lisboa in 2000. He also holds post-graduations in Bank Management and Quality Engineering. He is a Professor at the Universidade Nova de Lisboa and is currently the Coordinator of the Master Degree in Industrial Engineering and Management as well as of the Quality Engineering Group, from the Department of Mechanical and Industrial Engineering. His research interests are focused on Industrial and Quality Engineering, notably as regards service’s environments. Among others, his research topics include SPC in services, Lean Services, etc. He has authored several publications in those fields and is a regular speaker at conferences and seminars.

**David Romero** is Senior Research Scientist and Scientific Project Manager at the Center for Innovation in Design and Technology of the Tecnológico de Monterrey University in Mexico. His research interest include: Circular Manufacturing, Service Engineering, Cyber-Physical Systems & Human Systems, Ad-
vanced Production Management Systems, Green Virtual Enterprises, and Technology and Engineering Management. He is a member of the Society of Collaborative Networks, the IFAC TC5.3 on Enterprise Integration and Networking, the IFIP WG5.7 on Advances in Production Management Systems, the IFIP WG5.12 on Architectures for Enterprise Integration, the IEEE Technology and Engineering Management Society and the IEEE Internet of Things Community. He has published more than 80 journal and international conference articles and serves at different editorial and scientific committee boards in the disciplines of business and industrial engineering.

Sureerat Saetang has recently completed her doctoral studies and is currently working as a consultant.

Sunyun Shin is a Postdoctoral Researcher of Sport Management at Yonsei University, Korea.

Md. Abul Kalam Siddike is a distinguished visiting scholar at IBM Research, Almaden, San Jose, CA, USA and currently a PhD Candidate at the Knowledge Science in Japan Advanced Institute of Science and Technology, Japan. He has completed his Master in Knowledge Science from Japan Advanced Institute of Science and Technology, Japan. His areas of research include service system, value co-creation, service science, wise service system, smart service system, etc.

Bertrand Verlainé holds a PhD in economics and business administration. He also completed several degrees in the field of education sciences. Currently, Bertrand is senior researcher and lecturer at the University of Namur, Belgium. Bertrand’s principal research interest is in methods and models of software engineering, and their relations with economics and the management of organization in service-oriented environments. He mainly focuses his research work on the relations between the governance, the strategy and the processes of organizations, and the ICT used in their daily operations.
