A
asymmetric digital subscriber line (ADSL) 2, 243, 263

B
Bartlett's test of sphericity 120
British Telecommunication (BT) 5
broadband 2–15
adoption in Bangladesh and the Kingdom of Saudi Arabia (KSA) 285–295
findings 288–292
theoretical basis 286
adoption studies 6, 138, 173
adopters 139
non-adopters 139
attitudinal constructs 27, 173
facilitating conditions resources (FCR) 99
hedonic outcomes (HO) 30, 99, 176
relative advantage (RA) 29, 99, 175
service quality (SQ) 31, 99, 177
utilitarian outcomes (UO) 29, 99, 175
conceptual model 22, 77
description 25
foundation 22
control constructs 33, 179
facilitating conditions resources 34, 180
knowledge (K) 35, 99, 181
self-efficacy (SE) 35, 99, 180
demographic variables 36, 184
age 37, 141
education 38, 143
gender 37, 143
occupation/income 39, 145
dependent variables
behavioural intentions (BI) 40
behavioural intention to change the service provider (BISP) 99
broadband adoption behaviour (BAB) 40
factor analysis 120
in Dutch education 261–284
accessibility 269
classroom usage 273–275
current subscriptions 263
results 272
thresholds 268
value for education 267
instrument development process
78, 117–134
confirmatory survey 117–134
content validation (stage 2) 84
findings 87
exploratory survey (stage 1) 79
findings 80
findings 135–163
respondents' profile 136
instrument testing (stage 3) 90
in The Netherlands (broadband vs. narrowband study) 241–260
results 247–253
normative constructs 31, 178
influences 32
primary 178
secondary 179
quality regulation 209–221
