About the Contributors

Mehdi Khosrow-Pour, DBA, received his Doctorate in Business Administration (DBA) from the Nova Southeastern University (FL, USA). Dr. Khosrow-Pour taught undergraduate and graduate information system courses at the Pennsylvania State University – Harrisburg for 20 years where he was the chair of the Information Systems Department for 14 years. He is currently president and publisher of IGI Global, an international academic publishing house with headquarters in Hershey, PA and an editorial office in New York City (www.igi-global.com). He also serves as executive director of the Information Resources Management Association (IRMA) (www.irma-international.org), and executive director of the World Forgotten Children’s Foundation (www.world-forgotten-children.org). He is the author/editor of over twenty books in information technology management. He is also the editor-in-chief of the Information Resources Management Journal, the Journal of Cases on Information Technology, the Journal of Electronic Commerce in Organizations, and the Journal of Information Technology Research, and has authored more than 50 articles published in various conference proceedings and journals.

* * *

Thomas Abraham is a professor and chair of the management department at Kean University. He received his PGDM (MBA) from the Indian Institute of Management, Bangalore and his PhD from the University of Massachusetts. He is a member of the New Jersey chapter of the Society for Information Management (SIM) and the association for information systems (AIS). His research interests include global supply chains and MIS education. He has been a consultant at various companies including Sony and BMG and his research has appeared in several journals.

Andreas Aresti is a graduate from the computer engineering and informatics department of the University of Patras. His research interests focus on algorithms and techniques for personalized recommendations in e-commerce systems and his diploma thesis dealt with the application of web mining techniques on a pilot e-shop’s usage data for the production of recommendations.

Jeff Baker is a doctoral student in information systems and quantitative sciences at the Rawls College of Business Administration at Texas Tech University. His research interests include electronic commerce, visualization of multidimensional datasets, information systems strategy, and information technology tasks during corporate acquisitions.
Glenn J. Browne is an associate professor and the Wetherbe Professor of Information Technology at the Rawls College of Business Administration at Texas Tech University, where he is also director of the Institute for Internet Buyer Behavior. His research focuses on cognitive and behavioral issues in information requirements determination, systems development, e-business, and managerial decision making. His articles have appeared in Management Science, the Journal of Management Information Systems, MIS Quarterly, Organizational Behavior and Human Decision Processes, and other journals.

Christine V. Bullen joined Stevens Institute of Technology in August 2002, where she is coordinator for strategic issues in IT and director of the IT outsourcing concentration. Her current research focuses on IT workforce trends and the impacts of sourcing practices. Bullen was a distinguished lecturer at Fordham University and for 17 years she was the assistant director of the MIT Center for Information Systems Research where her research focused on strategic planning for the IT function, the organizational impact of IT, and the launching of the concepts of critical success factors and IT strategic alignment. She received her MS in Management from the MIT Sloan School and will shortly be awarded the PhD degree from Stevens Institute of Technology.

Teuta Cata is an assistant professor of MIS at Northern Kentucky University. She completed her PhD in MIS at the University of Nebraska-Lincoln. Her teaching and research interests include e-commerce in the financial industry, global IT, outsourcing, and enterprise solutions. Her papers have been published in several journals, and many research papers have been presented at national conferences.

Hong-Mei Chen is an associate professor of information technology management at the Shidler College of Business, the University of Hawaii at Manoa, and formally served as an associate dean for the College. She earned a PhD in business administration (majoring in MIS) from the University of Arizona. She conducts cross-disciplinary research including electronic customer relationship management, business-IT alignment, service engineering, business intelligence, and multimedia distributed database systems. She was a Fulbright grantee and has directed several multi-year, multi-million-dollar, multi-institution research projects in high performance telemedicine, data mining and data warehousing. She has published in such MIS journals as Journal of Management Information Systems, Electronic Commerce Research, Journal of Database Marketing & Customer Strategy management, Journal of Electronic Commerce in Organizations, and Journal of Business Environment as well as other computer science and software engineering journals.

Qimei Chen is an associate professor of marketing in the Shidler College of Business at the University of Hawaii at Manoa and an advisory professor at Fudan University, Shanghai, China. She received a BS in literature from Nanjing Normal University (JiangSu, China) and a MA and a PhD in mass communication from the University of Minnesota, Twin Cities. Her research interests include advertising effectiveness, online/offline consumer behavior, and innovation/knowledge. She has published in journals such as Journal of Advertising, Journal of Advertising Research, and Journal of Retailing.

Sandy Chong, PhD in information systems, is a lecturer in the School of Marketing at the Curtin University of Technology. She conducts research in the area of innovative business and technology adoption strategies, Web-based social marketing, business process management, collaborative organisational structures, costing model for IT procurement, as well as sustainability in supply chain management. She
About the Contributors

has presented papers at major conferences, and her research appears in information systems, marketing, and global business management journals. Her industry experience includes strategic marketing management in the credit card sector, advertising, consultancy and quantitative market research.

**Letha H. Etzkorn** is an associate professor in the computer science department at the University of Alabama in Huntsville. Her primary research interests are in software engineering (including program understanding, object-oriented software metrics, and artificial intelligence applications to software engineering) and mobile agents. She has a bachelor’s and masters degree in electrical engineering from the Georgia Institute of Technology, and a PhD in computer science from the University of Alabama in Huntsville.

**Kevin Gallagher** is an assistant professor in the business informatics department in the College of Informatics at Northern Kentucky University. He holds a PhD in management information systems from the Weatherhead School of Management at Case Western Reserve University in Cleveland, Ohio. Before his career in academia, he worked as an IT manager and consultant. His teaching, research and consulting interests include IT strategic planning, business agility, organization design, and workforce development.

**Bob Galliers** (rgalliers@bentley.ac.uk) is a provost of Bentley College, USA, formerly professor of information systems at the London School of Economics, UK, where he was research professor in the department of information systems. He retains his link with the LSE as a visiting professor. He was previously professor of information management at Warwick Business School, where he was Dean for the period 1994-1998. His research is transdisciplinary in nature and currently focuses on information technology and business innovation, knowledge creation and management, and intra- and extra-organisational impacts of the Internet. He is editor-in-chief of the *Journal of Strategic Information Systems* and co-author of a number of books.

**Edward J. Garrity** is professor of information systems in the Richard J. Wehle School of Business at Canisius College in Buffalo, New York. He holds a PhD in MIS and an MBA from the State University of New York at Buffalo. He has published research in a number of IS journals and also has co-authored a book of readings entitled *Information Systems Success Measurement*, published by Idea Group Publishing. His current research interests are system dynamics and systems thinking, information systems development issues, information systems success measurement, and the design of business and management systems.

**Robert Hinson** is a senior lecturer at the University of Ghana Business School. He is also studying for a doctoral degree at the Centre for International Studies in Aalborg University in Denmark under the supervision of Professor Olav Jull Sorensen. He has had papers accepted for publication in journals like the *Journal of Business and Industrial Marketing*, *Journal of African Business*, *Management Decision* and the *Place Branding Journal*.

**Robert Johnston**, BSc(Hons), MSc, PhD is an associate professor in the department of information systems. His research areas are electronic commerce, supply chain management and theoretical foundations of information systems. He has over 100 refereed publications, many in leading international journals.

Before becoming an academic he was an IT consultant, designing and implementing about 25 large computer systems in a number of leading Australian manufacturing companies.

**Kiku Jones** is an assistant professor of management information systems at The University of Tulsa. Jones received her PhD from the University of Kentucky and is a member of the Association for Information Systems, Decision Sciences Institute, and Information Resources Management Association. Her research interests include knowledge management, electronic commerce, C2C commerce, trust, and human computer interaction. Her publications have appeared in *Knowledge and Process Management, International Journal of Knowledge Management, Journal of Computer Information Systems,* *International Journal of Information Management* as well as in various conference proceedings.

**Kate M. Kaiser**, associate professor of IT at Marquette University, researches future IT skill needs and the impact of offshore outsourcing from Ireland, Russia and India through research grants from the Sloan and 3M Foundations. Kaiser received her MBA from Kent State University and her PhD from the University of Pittsburgh.

**Arjun Kalyanpur** is CEO of Teleradiology Solutions, Bangalore. He obtained his medical education and initial radiology training from the All India Institute of Medical Sciences, New Delhi. He then obtained training in radiology at the Cornell University Medical Center in New York and at the Yale University School of Medicine, New Haven, Connecticut, leading to certification by the American Board of Radiology. In 1999, Dr. Kalyanpur founded Teleradiology Solutions, which currently provides online diagnostic teleradiology reporting services to over 50 hospitals and clinics in the U.S., Singapore and India. Dr Kalyanpur continues to be on the faculty at Yale University and has published several research papers in the field of teleradiology.

**Mira Kartiwi** is a PhD student in information systems at University of Wollongong. Her research interests include e-commerce, SMEs, women in IT, and IT in developing country. She has published several articles on proceedings and journals. She currently teaches at department of information systems, International Islamic University, Malaysia.

**Rick Kazman** is a professor in the Shidler College of Business at the University of Hawaii at Manoa and a visiting scientist at the software engineering Institute of Carnegie Mellon University. Kazman received a BA (English/music) and M.Math (computer science) from the University of Waterloo, an MA (English) from York University, and a PhD (computational linguistics) from Carnegie Mellon University. His research interests are software architecture, human-computer interaction and information retrieval. Kazman is the author of over 100 papers, and co-author of several books, including “*Software Architecture in Practice,*” and “*Evaluating Software Architectures: Methods and Case Studies.*”

**Changsu Kim** (c.kim@yumail.ac.kr) is an assistant professor at Yeungnam University, Korea. He received his PhD in Information Systems from London School of Economics (LSE). His research interests include ubiquitous computing, electronic commerce, ICT innovation diffusion and IS strategy.
About the Contributors

Jaekyung Kim (kjkkej@gmail.com) is a PhD candidate in management at the University of Nebraska-Lincoln. He received his MBA from Miami University of Ohio. His research focuses on knowledge management, decision support systems, and electronic commerce. His work has been published in journals such as *Decision Support Systems, Omega, International Journal of Electronic Commerce, Expert Systems with Applications* and *International Journal of Knowledge Management*.

Yong Jin Kim is associate professor of management information systems at Sogang Business School and the School of Management at the State University of New York at Binghamton. He holds a PhD in MIS from the State University of New York at Buffalo. He participated in large IT consulting and development projects. His research interests are in knowledge management and innovation, IS success, e-commerce, and information technology valuation. He has published papers in outlets such as *MIS Quarterly, Communications of the ACM, Decision Support Systems, International Journal of Information Management, Information Systems Frontiers*, and *Knowledge and Process Management*. He also has published book chapters on IS Success and e-learning.

Firoz Latif is the senior manager for IT at Teleradiology Solutions. He has been working in the healthcare domain for over 3 years, mainly focusing on areas related to radiology like DICOM, PACS and RIS. He has also been involved in infrastructure management and security compliance at Teleradiology Solutions. He holds a bachelor’s degree in instrumentation and electronics engineering.

Lori N. K. Leonard is an associate professor of management information systems at The University of Tulsa. Leonard received her PhD from the University of Arkansas and is a member of the Association for Information Systems and the Decision Sciences Institute. Her research interests include electronic commerce, ethics in computing, C2C commerce, and online trust. Her publications have appeared in *Journal of the Association for Information Systems, Journal of Computer Information Systems, Journal of End User Computing, Information & Management, Journal of Organizational Computing and Electronic Commerce*, as well as in other journals, and *Proceedings* of various Conferences.

Dahui Li is an assistant professor of MIS at University of Minnesota Duluth. His current research areas are business-to-consumer relationships, IT innovation and diffusion, and online communities. His articles have appeared in *International Journal of Electronic Commerce, Journal of the Association for Information Systems, Decision Support Systems, Journal of Computer Information Systems*, and other journals.

Robert MacGregor is an associate professor in the School of Information Systems and Technology at the University of Wollongong in Australia. He is also the former head of discipline in information systems. His research expertise lies in the areas of information technology (IT) and electronic commerce (e-commerce) in small to medium enterprises (SMEs). He has authored a number of journal and conference publications examining the use and adoption of IT in SMEs. Along with Lejla, MacGregor was the recipient of the 2004 Australian Prime Minister’s Award for Excellence in Business Community Partnerships (NSW). MacGregor is also the founding editor of the Australasian Journal of Information Systems and was conference chair of the Australian Conference of Information Systems in 1992. In his spare time, MacGregor writes music. His most recent work is the symphony *Alba*. 
Ross A. Malaga received his PhD in 1998 from George Mason University. He is currently an associate professor of management and information systems in the School of Business at Montclair State University. His research focuses on search engine optimization, online auctions and electronic commerce. He has published articles in *Communications of the ACM, Decision Support Systems, Journal of Organizational Computing and Electronic Commerce, Electronic Commerce Research,* and the *Journal of Electronic Commerce in Organizations.* Malaga serves on the editorial review board of the *Information Resources Management Journal* and the *Journal of Electronic Commerce in Organizations.*

Penelope Markellou is a computer engineer and researcher in the computer engineering and informatics department at the University of Patras. She obtained her PhD in techniques and systems for knowledge management in the Web (2005) and her MSc in usability models for e-commerce systems and applications (2000) from the above University. Her research interests focus on algorithms, techniques and approaches for the design and development of usable e-applications including e-commerce, e-learning, e-government and business intelligence. She has published several research papers in national and international journals and conferences and is co-author of two books and eight book chapters.

Ioanna Mousourouli is a graduate computer engineer from the computer engineering and informatics department of the University of Patras. Currently is a postgraduate student at computer science. Her research areas are personalization and recommendation techniques in e-business and e-learning systems, information retrieval techniques and Web usage mining techniques in adapting content and structure.

Joseph B. O’Donnell, PhD, CPA, is currently an associate professor of accounting information systems at Canisius College. He holds a PhD and MBA from the State University of New York at Buffalo and an undergraduate degree from the University of Notre Dame. He formerly worked as a systems consultant and auditor for an international accounting firm. He has published articles in the *Journal of Marketing for Higher Education, Review of Business Information Systems, The CPA Journal, Journal of College Teaching and Learning,* along with other journals. His research interests include diffusion of innovation, continuous auditing, e-commerce, and accounting information systems education.

Anthony M. Orme is an assistant professor at Athens State University in Athens, Alabama. His primary research interests are in software engineering (software metrics), distributed systems, and knowledge engineering. He received his PhD in computer science from the University of Alabama in Huntsville.

A.B. Patki obtained his MTech from Indian Institute of Technology (IIT), Kharagpur in 1975. Presently, he is working as Scientist —G with the department of information technology (DIT), Government of India. He has been a referee for IEEE Transactions on Reliability for over twenty years. His research areas include soft computing, software engineering and cyber forensics & security. He has been trained in VLSI Design at Lund University, Sweden and Mentor Graphics, USA. He holds a copyright for FU-ZOS®- Fuzzy Logic Based Operating Software. His hobbies include Hindustani music, homoeopathy and vedic studies.

Tapasya Patki is a final semester student of BTech (computer science and engineering), in Maharaja Surajmal Institute of Technology, affiliated to Guru Gobind Singh Indraprastha University, New Delhi.
About the Contributors

She has an internship experience of over four months at the department of information technology, Government of India, where she specialized in applications of fuzzy logic and rough set techniques. Her areas of interest include software engineering, artificial intelligence and bio-informatics. Presently, she is exploring potentials of soft computing to knowledge management practices and software code obfuscation. She is also a violin soloist and an amateur poet.

**Graham Pervan** is a professor at Curtin University of Technology in Perth, Western Australia, has over 30 years experience in education, research, and practice in Information Systems and Information Technology (IS/IT). He has published on various issues related to IS/IT management, electronic commerce and decision support systems in journals such as *Journal of Information Technology, Decision Support Systems, Information and Management, Journal of Computer Information Systems, Journal of Group Decision and Negotiation, Journal of Research and Practice in IT, and Communications of the AIS* as well as most major conferences. He is the Asia-Pacific regional editor for *the Journal of Information Technology*, the IT management editor for the *Australian Journal of Management*, and president of the Australian Council of Professors and Heads of Information Systems.

**Md. Mahbubur Rahim**, BSc (civil engineering, BUET), MS (computer science, UPM), PhD (Melbourne) is currently a lecturer at the Clayton School of Information Technology, Monash University, Australia. Rahim has considerable international teaching experience and has published over 20 research articles in leading IS/IT journals including *IT & People, Behaviour & Information Technology, Information & Software Technology, Information & Management, and International Journal of Information Management*. His research interests include e-business and IT adoption in organizations. He serves on the review panel for *Journal of IT Cases & Applications Research*.

**Cheul Rhee** is currently a PhD candidate in the department of management science and systems at University at Buffalo. He holds his bachelor’s and master’s degrees in agriculture and education from Seoul National University. He has research interests in e-learning, knowledge management, virtual communities, and e-business strategy.

**Sanjay Saini** is a professor of radiology at Harvard Medical School and serves as the vice chair for finance in the Department of Radiology at the Massachusetts General Hospital. He is a specialist in gastrointestinal radiology. He has degrees from Duke (AB), Tufts (MD) and MIT (MSc) and did his post graduate training in radiology at the Massachusetts General Hospital in Boston.

**G. Lawrence Sanders**, PhD, is a professor of management science and systems in the School of Management at the State University of New York at Buffalo. He has taught MBA courses in the Peoples Republic of China and Singapore. His current research interests are in the ethics and economics of software piracy, systems success measurement, and systems development. He has published papers in outlets such as *The Journal of Management Information Systems, MIS Quarterly, Information Systems Research, the Journal of Strategic Information Systems, the Journal of Management Systems, Decision Support Systems, Database Programming and Design, and Decision Sciences*. He has also published a book on database design and co-edited two other books.
Pradipta Sarker is currently a research associate in the department of business information technology, RMIT University. He has received his PhD from Deakin University, Australia. His has also published in e-commerce related journals.

Surendra Sarnikar is a doctoral student in MIS at the University of Arizona. He has an undergraduate degree in engineering and a master’s in management information systems. His research interests are in the area of healthcare data and communication standards, medical information filtering, and medical event reporting systems. He has also presented papers on medical information filtering and information distribution mechanisms at the Americas Conference on Information Systems.

Graeme Shanks is a professor and associate dean of research in the faculty of information technology at Monash University, Australia. His teaching and research interests include information quality, conceptual modelling, identity management, implementation and impact of enterprise systems, and decision support systems. Graeme has published the results of his research in over 100 refereed journal and conference papers. He is a member of several journal editorial boards, a member of IFIP WG8.3 Decision Support Systems, a fellow of the Australian Computer Society and was recently a member of the College of Experts of the Australian Research Council.

Judith C. Simon is a professor of management information systems, director of the Center for Innovative Technology Management, and co-director of the Center for Information Assurance at the University of Memphis. Her bachelors and doctoral degrees were received from Oklahoma State University, and her MBA was earned at West Texas State University. Her research interests include information security management and IT quality. She has written nine textbooks and published numerous articles in academic journals. She also serves as membership chair for the Memphis Chapter of the Society for Information Management.

Spiros Sirmakessis is an assistant professor in the Technological Educational Institution of Messolonghi and the manager of the Internet and Multimedia Technologies Research Unit of the Research Academic Computer Technology Institute. He is also an adjunct assistant professor in the University of Patras, teaching human computer interaction and e-business courses. His research areas include human computer interaction, human factors, e-business strategies, efficient techniques for designing interactive systems and web mining. He is co-author of three books and several research papers published in international journals and conferences.

Jaeki Song is an assistant professor of information systems and quantitative sciences at the Rawls College of Business Administration at Texas Tech University. His research interests include electronic commerce, web design, information systems strategy, and technology adoption. His research appears in Management Science, Information and Management, IEEE Transactions on Professional Communication, International Journal of Information Management, Information Systems Frontier, and International Conference on Information Systems.

Olav Sorensen is a professor of international business at the Centre for International Studies in Aalborg University in Denmark. He is widely published in prestigious journals like the Journal of Business and Industrial Marketing and Electronic Markets. Sorensen is also the author and editor of several
About the Contributors

seminal texts on internationalization, marketing and international business. Sorensen’s current research interests encompass small firm internationalization, foreign direct investment, and e-business.

Athanasios Tsakalidis obtained his diploma in mathematics from the University of Thessaloniki, Greece (1973), his diploma in computer science (1981) and his PhD (1983) from the University of Saarland, Saarbruecken, Germany. His is currently a full professor in the computer engineering and informatics department at the University of Patras and the r&d coordinator of the Research Academic Computer Technology Institute (RACTI). His research interests include data structures, graph algorithms, computational geometry, expert systems, medical informatics, databases, multimedia, information retrieval, and bioinformatics. He has published several research papers in national and international journals and conferences and is co-author of the Handbook of Theoretical Computer Science and other book chapters.

Paul de Vrieze is a senior researcher at SAP research, Switzerland. Previously, he worked as a postdoctoral research fellow at CSIRO ICT Centre, Australia. He worked as an IT consultant at AT-Computing, The Netherlands. He received his PhD in information systems from Radboud University Nijmegen, The Netherlands in 2006. His main research interests are in user modeling, systems modeling, and semantics integration.

James C. Wetherbe is the Stevenson Chair of Information Technology at the Rawls College of Business Administration at Texas Tech University. He is the author of 21 books and over 200 articles on systems analysis and design, strategic use and management of information systems, information requirements determination, and cycle time reduction. He is quoted often in leading business and information systems journals, and was ranked by Information Week as one of the top dozen information technology consultants.

Lai Xu is a senior researcher at SAP research, Switzerland. Previously, she worked as a senior research scientist at CSIRO ICT Centre, Australia. She was a post-doctoral researcher at Organisation and Information Group of the Institute of Information and Computing Sciences of the Utrecht University (2004-2007), the Netherlands and Artificial Intelligence group of the department of computer science of the Free University Amsterdam (2003-2004), the Netherlands respectively. She received her PhD in computerized information systems from Tilburg University, the Netherlands in 2004. Her main research areas are in process integration, multi-party process monitoring, web services and service-oriented applications, development method for product software. Her research has appeared in publications including The European Journal of Information Systems, ACM SIGecom Exchanges, numerous IS conferences’ proceedings and book chapters.

Kyung Hoon Yang (yang.kyun@uw腋.edu) is currently an assistant professor in the department of information systems at the University of Wisconsin-La Crosse. He received his PhD in management information systems from Purdue University in 1989 and has been a professor at the Chungang University in Korea from 1989 to 2004. His major research interests include knowledge transfer and knowledge based organization. He has published more than 20 articles including Decision Support Systems, Expert Systems with Applications and Omega.
