About the Authors

Namchul Shin is Associate Professor of Information Systems at Pace University. He received his PhD in MIS from the University of California at Irvine, an MBA from the University of Toledo, and a BA from Seoul National University. His current research interests lie in the areas of IT business value, organizational and strategic impacts of IT, electronic business, and enterprise commerce management. He is an associate editor of the Journal of Electronic Commerce Research. His work has been published in journals such as European Journal of Information Systems, Logistics Information Management, Journal of Electronic Commerce Research, International Journal of Services Technology and Management, and Business Process Management Journal. His recent work can be viewed at http://csis.pace.edu/~shin.

Susan J. Chinburg is completing a doctorate in telecommunications from the Management Department of the College of Business Administration, Oklahoma State University, Stillwater, OK. She has a BS from Mankato State University, Mankato, MN, and a MS from San Jose State University, San Jose, CA. After school Susan joined Conoco working in many areas related to oil and gas exploration and development. Her interests in technology led her into research, working on projects integrating technology into workflow. Susan returned to school to study networking and computer science. Currently, she is in the optical architecture group of Williams Communications working on developing and implementing state-of-the-art optical networks.

Ron Craig is a Professor of Business at Wilfrid Laurier University and Area Coordinator of the Operations & Decision Sciences Group. He holds a PhD and MASc in Management Sciences, and a BASc in Chemical Engineering, all from the University of Waterloo. His research interests are in the areas of small business and
technology management. Co-founder of a computer peripheral manufacturer prior to joining Laurier, Professor Craig also served more recently as the university’s first IT Officer.

Bahador Ghahramani is an Associate Professor in the Information Systems and Quantitative Analysis, University of Nebraska at Omaha (UNO). Prior to joining the academia, he was a Distinguished Member of the Technical Staff (DMTS) at the AT&T-Bell Laboratories. His work experience covers several years in academia, industry, and consulting. He has extensive R&D experience in *Advanced Systems Design and Development, Advanced Management Information Systems, Advanced Business Applications Programming, Object Oriented Programming Environment, Expert Systems and Decision Support Systems, Database Management, Design of Human Machine Systems, Business Data Communications, Organization of Impact of Information Technology, Business Systems Analysis and Design,* and *Business Data Structure.* Dr. Ghahramani has presented and published numerous papers and has been an active participant and officer in several national and international organizations and honor societies. He holds five patents, “The Eye Depth Testing Apparatus,” “A Method for Measuring the Usability of a System,” “A Method for Measuring the Usability of a System and for Task Analysis and Re-engineering,” “Electronic Depth Perception Testing Systems Apparatus for Conducting Depth Perception Tests,” and “Emergency Marking System, Marking Device, Components Therefore and Methods of Making the Same,” and applied for and maintains copyrights on five other AT&T designs. Dr. Ghahramani received his Ph.D. in Industrial Engineering from Louisiana Tech University, MBA in Information Systems from Louisiana State University; MS in Industrial Engineering from Texas Tech University, MS in Applied Mathematics and Computer Science from Southern University, and BS in Industrial Engineering and Management from Oklahoma State University.

Jatinder N. D. Gupta is currently Eminent Scholar of Management, Professor of Management Information Systems, and Chairperson of the Department of Accounting and Information Systems in the College of Administrative Science at the University of Alabama in Huntsville, Alabama. Most recently, he was Professor of Management, Information and Communication Sciences, and Industry and Technology at the Ball State University in Muncie, Indiana. He holds a PhD in Industrial Engineering (with specialization in Production Management and Information Systems) from Texas Tech University. Co-author of a textbook in Operations Research, Dr. Gupta serves on the editorial boards of several national and
international journals. Recipient of the Outstanding Faculty and Outstanding Researcher awards from Ball State University, he has published numerous papers in such journals as Journal of Management Information Systems, International Journal of Information Management, INFORMS Journal of Computing, Annals of Operations Research, and Mathematics of Operations Research. More recently, he served as a co-editor of a special issue on Neural Networks in Business of Computers and Operations Research and a book entitled, Neural Networks in Business: Techniques and Applications. His current research interests include information and decision technologies, scheduling, planning and control, organizational learning and effectiveness, systems education, and knowledge management. Dr. Gupta is a member of several academic and professional societies including the Production and Operations Management Society (POMS), the Decision Sciences Institute (DSI), and the Information Resources Management Association (IRMA).

**Daniel C. Kinsella, Jr.** is with the Enterprise Risk Services (ERS) group of Deloitte & Touche. Mr. Kinsella specializes in assessing technology and business risk and developing implementation plans to mitigate those risks. Industry experience includes insurance, banking, manufacturing, health care, and managed care. Technology experience spans across a variety of computer platforms including IBM OS/390, AS400, Windows NT, and various UNIX implementations. Due to the number of clients served, Mr. Kinsella understands key business process and has the opportunity to share best practices and add value to clients.

**Kenneth L. Kraemer** holds the Taco Bell Chair in Information Technology for Management at the Graduate School of Management, University of California, Irvine, where he is also the Director of the Center for Research on Information Technology and Organizations (CRITO). He has studied critical issues in management, information technology and organizations for over thirty years. He is currently doing international research on the globalization of information technology production and use.

**Arlyn J. Melcher** is a Professor of Management at Southern Illinois University. He has an MBA from UCLA and a PhD from the Graduate School of Business at University of Chicago. He has written widely on organization and strategic management issues. He works with both small and large businesses in managing change and reengineering their organizations. Currently, his central focus is on how to design and manage high performance organizations.
Carlos J. Navarrete is Associated Professor in the Computer Information Systems Department at the College of Business Administration of the California State Polytechnic University, Pomona. He holds a BSc from Instituto Politecnico Nacional, Mexico, and a PhD in Management Information Systems from Claremont Graduate University in Claremont, California. Before joining California State Polytechnic, Professor Navarrete worked for Universidad Iberoamerican, Mexico, where he was the Chair of the Information Systems Department. His research interest is the use of Information Technology to support individuals, groups, and organizations’ productivity. Professor Navarrete has received several awards through his academic carrier. He was Fulbright scholar from 1991 to 1994.

James B. Pick is Professor in School of Business at University of Redlands and former department chair of management and business. He holds a BA from Northwestern University and a PhD from University of California, Irvine. He is the author of seven books and 100 scientific papers and book chapters in the research areas of management of information systems, geographic information systems, environmental systems, population, and urban studies. In the fall of 2001, he was senior Fulbright scholar in Mexico.

Simpson Poon is Chair Professor of Information Systems at Charles Sturt University, Australia. He is also a Visiting Professor at the University of Hong Kong. Dr. Poon earned his PhD in Information Systems from Monash University, Australia. He was the Founding Director of the Centre of E-Commerce and Internet Studies at Murdoch University, Australia. Dr. Poon has been an e-business consultant and has worked with both government and business organizations in Australia and Asia. He has published widely in the area of e-business in both academic and professional journals.

Arun Rai is the Harkins Professor of Electronic Commerce in the eCommerce Institute, Robinson College of Business, Georgia State University. His research focuses on digitally enabled transformation of complex processes, enterprises and supply chains and the diffusion and infusion of information technologies and systems. His publications have appeared in several leading journals including Communications of the ACM, Decision Sciences, Information Systems Research, Journal of MIS, MIS Quarterly, among others. He serves as an Associate Editor of Information Systems Research, among other scholarly journals, and has served as associate editor of MIS Quarterly. Leading corporations, including Daimler-Chrysler, Comdisco, IBM, and UPS, among others, have sponsored Arun’s work. He recently received an IBM faculty award for his eCommerce contributions.
Kristina Setzekorn is an Assistant Professor in Oakland University’s Department of Decision and Information Sciences. She earned her PhD from Southern Illinois University at Carbondale in December, 2000. Her research interests involve information technology’s (IT) effects on supply chain and firm efficiency, organizational and market structure, organizational and interorganizational information sharing, decision rights and incentives. Her dissertation studies the performance implications of IT infrastructure’s alignment with market context (complexity and supply chain coordination strategy).

Ra’ed M. Shams worked initially as a general manager of a major computer system integrator in Bahrain. Then joined the University of Bahrain as a research and teaching assistant and participated in establishing the MIS department at the College of Business Administration. His current research and consultancy interest is in the area of strategic IS management, especially strategic alignment. Currently, he is setting for his PhD at the University of Bradford, U.K.

Ramesh Sharda, PhD (University of Wisconsin-Madison), is currently the Conoco Chair of Management of Technology and Regents Professor of Management Science and Information Systems at Oklahoma State University. His extensive research has led to over 60 articles in major journals and books including Management Science, Information Systems Research, Decision Support Systems, Interfaces, INFORMS Journal on Computing, Computers and Operations Research, and many others. He started the MS in Telecommunications Management Program at Oklahoma State. His professional service includes serving as the Editor of the Interactive Transactions of ORMS, and on the editorial board of several journals. He is also a co-founder of iTradeFair.com, a leader in producing virtual trade fairs.

Sushil K. Sharma is currently Assistant Professor of Information Systems at the Ball State University, Muncie, Indiana. He received his PhD in Information Systems from Pune University, India and has taught at the Indian Institute of Management, Lucknow for eleven years before joining Ball State University. Prior to joining Ball State, Dr. Sharma held the position of Visiting Research Associate Professor at the Department of Management Science, University of Waterloo, Canada. Dr. Sharma’s primary teaching interests are E-commerce, computer communication networks, database management systems, management information systems, and information systems analysis and design. He has extensive experience in providing consulting services to several government and private organizations including World Bank funded projects in the areas of information systems, e-commerce, and
knowledge management. Dr. Sharma is the author of two books and has numerous articles in national and international journals. His current research interests include database management systems, networking environments, electronic commerce (e-commerce), knowledge management, and corporate information systems.

**Bongsik Shin** is an Assistant Professor in the Department of Information and Decision Systems at San Diego State University. He earned a PhD from the University of Arizona. He joined the faculty of Management Information Systems at the University of Nebraska at Omaha in 1997 through 1999. His work has been published or accepted in Communications of the ACM, IEEE Transactions on Systems, Man, and Cybernetics, IEEE Transaction on Engineering Management, Journal of Data Warehousing, Journal of Organizational Computing and Electronic Commerce, Journal of Systems Integration, and Journal of Database Management. His current research interests are data warehousing and data mining, telework, and e-commerce.

**Mohini Singh** is a Senior Lecturer in E-Business at RMIT University, Australia. She earned her PhD from Monash University in the area of New Technology Management. Her publications and presentations are in the area of Management and Implementation of New Technologies and Electronic Commerce. Dr. Singh was the Founding Director of the Electronic Commerce Research Unit at Victoria University, Melbourne. She has successfully completed funded research projects in the area of e-commerce, and presented and published widely both locally and internationally. Her current research focus is on electronic commerce management and business issues, evolving e-business models, e-commerce effectiveness metrics and e-business relationship management.

**Bernd Carsten Stahl**, born in 1968, Dipl.-Wi.-Ing., M.A., D.E.A; studied mechanical engineering and commerce at the University of the German Armed Forces in Hamburg from 1990 to 1994. (degree: Diplom-Wirtschaftsingenieur) From 1994 to 1998 he studied philosophy and economics at the University of Hagen (degree: Magister Artium). From 1999 to 2000 he studied philosophy in Bordeaux, France, where he graduated with a Diplôme d’Etudes Approfondies. From 1987 to 1997 he was an officer of the German Armed Forces, his latest assignment was that of a deputy company commander in the artillery regiment 7 in Dülmen. From 1998 to 2000 he worked as research assistant at the University Witten/Herdecke (Germany), at the Institute of Economics and Philosophy. Since September 2000 he has been a Lecturer at the Department of Management Information Systems at the University College Dublin, Ireland. He works on
questions of the relationship of ethics and business with a particular emphasis on the
notion of responsibility. His second field of research is normative problems arising
from the use of information technology in business. Another area of interest includes
normative problems caused by the use of computers and IT in education.

Paul P. Tallon is an Assistant Professor of Information Technology at the Wallace
E. Carroll School of Management, Boston College, and a Research Associate at
the Center for Research on Information Technology and Organizations (CRITO)
at the University of California, Irvine. His research interests include the economic
and organizational impacts of IT, the alignment of IT with business strategy, the
application of real options to IT evaluation, and IT for financial services. His work
has appeared in the Journal of Management Information Systems and in several
conference proceedings. He previously worked as an auditor with PriceWaterhouse,
and as a consultant on the development of computer-based training programs for
the International Trade Center, Geneva.

Mark Weiser is Director of the Masters of Science in Telecommunications
Management Program at Oklahoma State University. He teaches a variety of
networking topics including upper-layer routing protocols and hands-on applied
labs. Dr. Weiser’s research encompasses multiple areas, such as analyzing protocol
proliferation, optimal packet sizes, and distance education technologies and
techniques; with publications in several leading journals and books.

Fredrick P. Wheeler has had a broad interest in the management and application
of information for decision making. He was until recently Senior Lecturer in
Management Science at the School of Management, University of Bradford, and
is currently with the U.K. Competition Commission as their Statistical Adviser.
