About the Authors

EDITOR

Dr. Shirley A. Becker received her MBA from St. Cloud State University and an MS and PhD in information systems from the University of Maryland at College Park. Dr. Becker is a professor of computer science at Florida Institute of Technology, Melbourne, Florida, and co-director of its Software Engineering Research Center. Dr. Becker’s funded research includes Web usability and testing, Web-enabling tools and technologies, e-commerce systems development, and database systems. She has edited several books and published numerous articles and book chapters in these areas. Dr. Becker recently served as editor of the Journal of Database Management, and serves on several editorial review boards. She is a member of IEEE, ACM, and AWC.

CONTRIBUTORS

Firas Alljalad is a PhD student and currently working for a major financial firm as a senior Java architect and technical specialist. His research interests concern distributed components, Java and Web development.

Clare Atkins is a senior lecturer in the Department of Information Systems at Massey University in New Zealand. Her research and teaching interests are mainly in the area of relational database design, particularly in requirements acquisition and conceptual modeling where she considers that full user involvement is essential. She also leads the EBIS Collaboration, an international network of researchers investigating the application of evidence-based practice to information systems. Before emigrating to New Zealand, Ms. Atkins spent a number of years working in the IT industry in the UK and spent several years as the Data Manager for the Statistics Division of the Inland Revenue.

Anirban Bhaumik is a graduate student in the Department of Computer and Information Science at the New Jersey Institute of Technology, Newark, New Jersey. He has a bachelor’s of Engineering in Chemical Engineering from the Regional Engineering College, Durgapur, India and a master’s of Science in Chemical Engineering from the New Jersey Institute of Technology. Mr. Bhaumik is employed at Concero, an Austin, Texas-based software consulting company. When not working or studying, Anirban likes to kayak on the Delaware.

Michael Bieber is associate professor of Information Systems in the Computer and Information Science Department at the New Jersey Institute of Technology, where he also teaches in the distance learning program. He co-directs NJIT’s Collaborative Hypermedia Research Laboratory. Dr. Bieber is affiliated with the New Jersey Center for Multimedia Research and the National Center for Transportation and Industrial Productivity. He holds a PhD in Decision Sciences from the University of Pennsylvania. Dr. Bieber has been performing hypermedia research since 1987, when he embarked on a research path in automating hypermedia support for analytical information systems. He is active in the hypertext community, co-organizing conference minitracks and co-editing special journal issues about hypermedia topics. He has published many articles in this and other areas.
Paloma Cáceres teaches Software Engineering in the Department of Experimental Sciences and Engineering at King Juan Carlos University, Madrid, Spain. She has 10 years of professional experience in projects management, consulting and analysis and design of applications in private enterprise. She has published several articles. Her research interests include methodologies for software engineering research, specially for designing and developing Web applications. Her e-mail address is: pcaceres@escet.urjc.es.

Coral Calero has an MSc in Computer Science (University of Sevilla). Professor Calero is an assistant professor at the Escuela Superior de Informática of the Castilla-La Mancha University in Ciudad Real. She is a member of the Alarcos Research Group, in the same university, specializing in information systems, databases and software Engineering. She is a PhD candidate on Metrics for Advanced Databases, and author of articles and papers in national and international conferences on this subject. She belongs to the ATI association and is a member of its Quality Group. Her e-mail address is: ccalero@inf-cr.uclm.es.

Dr. Mohammad Dadashzadeh is a graduate of M.I.T. (BSc in Electrical Engineering; MSc in Computer Science) and the University of Massachusetts (PhD in Computer and Information Science). He has been affiliated with the University of Detroit and is currently the W. Frank Barton endowed chair in MIS at Wichita State University. Dr. Dadashzadeh has served as the editor-in-chief of the Journal of Database Management (formerly Journal of Database Administration) and as a member of the Advisory Board for the Information Resources Management Association.

Deepti Dixit has an MS in Mechanical Engineering from Maulana Azad College of Technology, Bhopal, India, and a post-graduate course in Foreign Trade from the Indian Institution of Foreign Trade, New Delhi. She has extensive work experience in the field of materials management. She is completing her master’s in Computer Science at the New Jersey Insitute of Technology.

Jorge H. Doorn is full professor in the Computer Science Department at the Universidad Nacional del Centro (UNCPBA), Argentina, since 1989. He has wide experience in actual industrial applications. He has been project leader in several projects, and currently he is the leader of the database research team at the Computer Science and Systems Department. His research interests include compilers design and database systems.

Cheryl Dunn is an assistant professor of accounting information systems at Florida State University. She earned her PhD in accounting at the Eli Broad Graduate School of Management at Michigan State University in 1994. Her research interests include behavioral, cognitive and memory issues involved with enterprise-wide information systems and particularly with the Resources-Events-Agents accounting model. Her research appears in Journal of Information Systems, Advances in Accounting Information Systems, and in the International Journal of Accounting Information Systems.

Viviana E. Ferraginie has received her BS degree in Systems Engineering from the Universidad Nacional del Centro (UNCPBA), Argentina, in 1997. She is currently an auxiliary assistant with the Department of Computer Science and Systems, and a master student in Computer Science at the Universidad Nacional de La Plata. Her research interests include database systems and data structures.
Roberto Galnares received his bachelor’s degree from Universidad la Salle, A.C., Mexico. He has worked in the computer and information systems field since 1980. He was awarded a Fulbright Scholarship for PhD studies in Computer and Information Sciences in 1995. Currently he is conducting research on hypermedia, Web technologies and Web engineering.

Marcela Genero is an assistant professor in the Department of Computer Science at the University of Comahue, Neuquén, Argentina. She received her MS degree in Computer Science from the National University of South Argentina in 1989. She is a PhD student at the University of Castilla-La Mancha, in Ciudad Real, Spain. Her research interests are: advanced databases design, software metrics, object-oriented metrics, conceptual data models quality and database quality. Her e-mail address is: mgenero@inf-cr.uclm.es.

John A. Hoxmeier is an associate professor at Colorado State University. He received his PhD from the University of Colorado-Boulder, where his research included collaborative and group support systems. Prior to joining CSU in 1995, he was an executive VP and CIO at The Fuller Brush Company, where he was actively involved in a major IT reengineering effort and corporate acquisition. Dr. Hoxmeier’s research includes data modeling, database design, information quality and E business system response time. He has published in many IT journals, including Journal of Management Information Systems, Journal of End User Computing, Journal of Business and Management, Software Quality Journal and Journal of Applied Management Studies. Dr. Hoxmeier has more than 20 years of database design, implementation and administration experience, is an active speaker, consultant and educator in the areas of IT strategy, database quality, performance and information management.

Aparna Kishna has a Master's of Science in Computer and Information Science from the New Jersey Institute of Technology, Newark, New Jersey and a Bachelor's of Technology in Computer Science and Engineering from the Jawaharlal Nehru Technological University, Hyderabad, India. Aparna is employed at Lucent Technologies, Holmdel, New Jersey.

Qiang Lu is a professor in the Computer Science Department at Suzhou University in the People’s Republic of China. He currently is visiting at the New Jersey Institute of Technology.

Dr. Ronald Maier, born in 1968 in Linz, Austria, received his Master from the Johannes-Kepler-University of Linz, Austria in 1992 with High Honors. He received his PhD from the Koblenz School of Corporate Management-Otto Beisheim Graduate School of Management (WHU). His dissertation was on "Quality of Data Models". In 1998/1999 he spent a year as Visiting Assistant Professor at the University of Georgia in Athens, GA (USA), Terry College of Business, Department of Management Information Systems. Currently he works towards his habilitation about "Knowledge Management Systems - Concepts for the Application in Organizations" at the Department of Business Informatics at the University of Regensburg, Germany. His experience in data base design is based on a three-year period as software
engineer and data base designer in a software house and numerous projects during his academic career. He published several articles about data management in journals and conference proceedings.

**Esperanza Marcos** is an associate professor in the Department of Experimental Sciences and Engineering at King Juan Carlos University, Madrid, Spain. She teaches Advanced Data Bases and Data Base Design and Information Security. She also teaches master's courses on software engineering. She received a PhD in Computer Sciences from the Politecnical University of Madrid, Spain, in 1997, and has been visiting scholar at the Telecom University, Paris, France. Professor Marcos is co-author of a book and has published several articles and book chapters. Her research interests include object-oriented database design, conceptual modelling and methodologies for software engineering research. Her e-mail address is: cuca@escet.urjc.es.

**Eduardo Fernández-Medina Paton** earned his MSc in Computer Science at the University of Sevilla. He is Assistant Professor at the Facultad de Ciencias Juridicas y Sociales of the University of Castilla-La Mancha at Toledo. He has been a researcher and assistant professor for two years at the Universidad Antonio de Nebrija. He is a member of the ALARCOS Research Group, specializing in software engineering, database and information systems. He is a PhD candidate in secure database and personal data protection. He has an additional research line focused on methods of effort estimation for object-oriented systems. He is author of several articles and papers in national and international conferences on these two subjects. He belongs to the ATI association and collaborates with some working groups (Security Group and Software Engineering Group in AENOR). His e-mail address is: efmedina@jur-to.uclm.es.

**Ido Millet** is an associate professor of Management Information Systems at Penn State Erie. He received a BS in Industrial Engineering and Management from the Technion-Israel Institute of Technology, an MBA from Tel-Aviv University and a PhD in Information Systems from the Wharton School, University of Pennsylvania. His industrial experience includes systems analysis and project management for large-scale information systems, consulting and development of information systems. His research interests include management reporting systems, issue management systems and the analytic hierarchy process. His e-mail address is: ixm7@psu.edu.

**Vincent Oria** received his Diplôme d’Ingénieur in 1989 from the Institut National Polytechnique, Yamoussoukro, Côte d’Ivoire (Ivory Coast), a DEA in 1990 from Université Pierre et Marie Curie, Paris, France, and a PhD in 1994 in Computer Science from the Ecole Nationale Supérieure des Télécommunications (ENST), Paris, France. He worked as a research scientist at the ENST Paris from 1994 to 1996 before joining the Department of Computing Science of the University of Alberta, Canada, as a post-doctorate from 1996 to 1999. He is currently an assistant professor in the Department of Computer and Information Science at the New Jersey Institute of Technology. His current research interests include multimedia databases, geographical information systems, data management issues in e-commerce and e-learning.

**Mehdi Owrang** is currently a professor of Computer Science in the Department of Computer Science and Information Systems at American University in Washington, DC. Dr. Owrang received his BA degree in Economics in 1975 from the College of Economics and Social Sciences, Babolsar Iran, and his MS and PhD degrees in Computer Science from the University of Oklahoma in 1980 and 1986, respectively. He has authored or co-authored 40
papers in computer journals and conferences. His current research interests include rule-based expert systems development, automatic knowledge acquisitions, database modeling, distributed databases, intelligent databases, knowledge discovery in databases, optimization and validation in knowledge discovery. Dr. Owrang has been a program committee member of several ACM, IEEE, ISCA and IASTED conferences. He is a member of the ACM, IEEE and ISMM; editorial board member of the database journal, and the associate editor of the Software and Information Engineering of the ISCA Journal.

David Paper is an associate professor at Utah State University in the Business Information Systems Department. He received his PhD in MIS from Southern Illinois University. He has several refereed publications appearing in journals such as Journal of Technology Cases and Applications, Journal of Systems and Information Technology, Long Range Planning, Knowledge and Process Management, Creativity and Innovation, Accounting Management and Information Technologies and Journal of Computer Information Systems. He has also spent time in industry working for Texas Instruments, DLS, Inc., the Phoenix Small Business Administration and Wides Village Real Estate Company. His teaching and research interests include global electronic commerce, business process reengineering and database management.

Parag C. Pendharkar is assistant professor of Information Systems at Penn State Harrisburg. His research interests are in artificial intelligence and expert systems. His work has appeared in the Annals of Operations Research, Communications of ACM, Decision Sciences and several other publications. He is a member of INFORMS, APUBEF and DSI.

Mario Piattini is an MSc and a PhD in Computer Science from the Poltechnical University of Madrid, is a Certified Information System Auditor by ISACA (Information System Audit and Control Association), associate professor at the Escuela Superior de Informática of the Castilla-La Mancha University, and author of several books and papers on databases, software engineering and information systems. He leads the ALARCOS research group of the Department of Computer Science at the University of Castilla-La Mancha, in Ciudad Real, Spain. His research interests include: advanced database design, database quality, software metrics, object-oriented metrics and software maintenance. His e-mail address: mpiattin@inf-cr.uclm.es.

Mahesh S. Raisinghani is the founder and CEO of Raisinghani and Associates, a diversified global firm with interests in software consulting and technology options trading. As a faculty member at the Graduate School of Management, University of Dallas, he teaches MBA courses in information systems and e-commerce, and serves as the director of research for the Center for Applied Information Technology. As a global thought leader on e-business and global information systems, he has been invited to serve as the local chair of the World Conference on Global Information Technology Management and the track chair for E-Commerce Technologies at the Information Resources Management Association.He has published in numerous leading scholarly and practitioner journals, presented at leading world-level scholarly conferences and has recently published his book E-Commerce: Opportunities and Challenges. He has been invited to serve as the editor of the special issue of the Journal of Electronic Commerce Research on Intelligent Agents in E-Commerce. Dr. Raisinghani was also selected by the National Science Foundation after a nationwide search to serve as a panelist on the Information Technology Research Panel and the E-Commerce Research Panel for Small Business Innovation. He serves on the editorial review board for leading information systems publications and is included in the millennium edition of Who's Who in the World, Who’s Who Among America’s Teachers and Who’s Who in Information
Technology. He can be reached at: mraising@gsm.uditss.edu.

Laura Rivero received her BS degree in Systems Analysis from the Universidad Nacional del Centro (UNCPBA), Argentina, in 1979. She is a professor in the Department of Computer Science and Systems of the UNCPBA and a doctoral student in Computer Science at the Universidad Nacional de La Plata. Her lecturing and research activities concentrate on data structures and database design and integrity.

James A. Rodger is an associate professor of Management Information Systems at Indiana University of Pennsylvania (IUP). He received his Doctorate in MIS from Southern Illinois University at Carbondale in 1997. Dr. Rodger teaches network administration, system architecture, microcomputer applications and Intro to MIS, at IUP. He has worked as an installation coordinator for Sunquest Information Systems, and presently does consulting work on telemedicine connectivity for the Department of Defense and Management Technology Services Inc. Dr. Rodger has published several journal articles related to these subjects. His most recent article, “Telemedicine and the Department of Defense” was published in Communications of the ACM.

Manoj K. Singh is a senior consultant with i2 Technologies Inc., a leader in intelligent e-business solutions and supply chain optimization software. He has extensive experience in architecting and deploying e-business solutions. As part of his job, he has been working with leading players in the high-technology industry sector, like PC manufacturers, semiconductor and telecommunications, and helping them in defining the B2B strategy and solutions for procurement and collaboration with their partners. He has an article on manufacturing optimization in the International Journal of Production Research. He holds a BS in Mechanical Engineering and an MS in Industrial Engineering, and is currently pursuing an MBA in Information Technology. His e-mail address is: manoj_singh@i2.com.

Manolis Tzagarakis holds a Diploma in Computer Engineering and Informatics from the University of Patras, Greece, where he currently is pursuing his PhD. He is collaborating with Research Unit II of the Computer Technology Institute (CTI), Greece, working on hypertext and database systems. His research interests include open hypermedia systems, hypermedia models, structural computing and database management systems.

Michalis Vaitis holds a Diploma in Computer Engineering and Informatics from the University of Patras, Greece, where he also is studying for his PhD. He is collaborating with Research Unit II of the Computer Technology Institute (CTI), Greece, working on hypertext and database systems. His research interests include hypermedia models and services, structural computing and databases interoperability. He is a student member of the ACM.

Suk-Chung Yoon received MA and PhD degrees in Computer Science from Northwestern University, Evanston, Illinois, in 1988 and 1991, respectively. He is currently an associate professor in the Department of Computer Science at Widener University, Chester, Pennsylvania. His main research interests include data mining, data warehousing and Web-based systems. He has published more than 20 papers in journals and international conferences, and has served on program committees for dozens of international conferences and workshops.

Li Zhang received her Bachelor’s degree in Biomedical Engineering from Xi’an Jiaotong University, China. She holds a master’s in Electrical Engineering from Southeast University, China. Currently she is pursuing her PhD in Computer Science at the New Jersey Institute of Technology.
