additive colored Gaussian noise (ACGN) 65
additive white Gaussian noise (AWGN) 24
air traffic control 233
algorithm performance 196
ambience 4
analog
gap 248
hole 239, 248
to digital (A/D) 34, 238, 248
analysis-by-synthesis (ABS)
160, 163, 169, 235
a priori 166
audio
host signal 2
watermarking method 123

B

background noise 250
Bayesian statistics 61
binary data 50
biometrics security 234
bit error rate (BER) 54, 99, 165, 181, 199
bits per second (bps) 2
blind detection 3, 6
blind source separation (BSS) 289
Bose-Chaudhuri-Hocquenghem (BCH) 201
Broadcast monitoring 232

c Critical bandwidth (CBW) 58

D

DA/AD conversion 256
data payload 232
daubechies wavelet 38
decoder 30
decoding process 144
desynchronization attacks 43
DFT-based psychoacoustic model 42
diffie-hellman’s terminology 283
digital
audio signals 50
Index

right management (DRM) 82, 187, 188, 191, 279
to analog (D/A) 34, 248
to analogue (D/A) 238, 248
versatile disk (DVD) 187
watermarking 278
direct sequence spread spectrum (DSSS) 13, 289
discrete cosine transform (DCT) 16, 110, 174, 183, 234
transform domain (DCT) 200
Fourier transform (DFT) 29, 82, 83, 124, 183
polynomial phase transform (DPPT) 200
wavelet packet transform (DWPT) 11, 36
transform (DWT) 31, 36, 183
dynamics 4

E

echo kernel 123, 158
parameters 156
echo hiding scheme, using the positive, negative, backward, and forward echo kernels (EHPNBF) 164
echo hiding scheme using the positive and negative echo kernels (EHPN) 164
electronic distribution of multimedia (EDM) 187
embedded watermark 191
coder 30
encryption 191
environmental characteristics 250
equal error rate (EER) 99
error detection code (CRC) 207
expectation-maximization (EM) 54
eXtensible rights markup language (XrML) 189

F

fast Fourier transform (FFT) 234, 253
FFT model 270
Filtering 4, 250
FIM noninvertible 290

fingerprinting applications 6
finite impulse response (FIR) 108
Fisher’s Measure 285
Fisher information matrix (FIM) 284
forward error correction (FEC) 201
Fourier-Mellin transform 29
Fourier transform 128
fragile audio watermarking algorithm 2
frequency-scale modification 168
frequency hopping spread spectrum (FHSS) 13, 24
frequency limen (FL) 63
Frobenius-Perron (FP) 88, 89

G

Gain Fading (GF) 68
Gaussian
noise 64
window 59
generalized patchwork algorithm (GPA) 173, 183
geometric attack 239
graph nonisomorphism 210

H

High-rate encoding 63
Hough-Radon transform (HRT) 199
human auditory systems (HAS) 1, 12, 193, 230

I

IMF-based watermarking 197, 198
improved spread spectrum (ISS) 22
independent component analysis (ICA) 294
information embedding rate 238
instantaneous frequency (IF) 192
instantaneous mean frequency (IMF) 193
intellectual property rights (IPR) 83
inverse
discrete cosine transform (IDCT) 113
Fourier transform 106, 128, 130
sine (IS) 234

J

just audible distortion (JAD) 90
just noticeable difference (JND) 55
Index

K

k-means algorithm 294
Kerckhoff’s Principle 282
known message attack (KMA) 283
known original attack (KOA) 283

L

LAR coefficients 235
least-square-error (LSE) 241
least significant bit (LSB) 105
linear prediction (LP) 28, 51, 56, 234
coefficients 241

model 237
modeling 241
parameters 241
line spectrum pair (LSP) 234
coefficients 235
log area ratio (LAR) 234
long-term parametric code 241
losing synchronization 168
lossless/lossy compression 153
lossy compression 4
low-pass (LP) 24
Low pass filter (LPF) 27

M

malicious attacks 169
masking 124
mathematical framework 53
maximum-likelihood (ML) 64
maximum likelihood estimator (MLE) 293
mean squared error (MSE) 237
metadata 279
model output variables (MOVs) 270
modified discrete cosine transform (MDCT) 207
modified patchwork algorithm (MPA) 173, 183
modulated complex lapped transform (MCLT) 27
modulation 4
motion picture experts group (MPEG) 188
MP3
audio 206
files 221
compression 32
MPA
audio watermarking 173
MPEG 4
audio files 220
coding 243
compression 6, 7, 91
algorithm 207
multi-attack (MUL) 136
multi-objective evolutionary algorithm (MOEA) 116
multiple-echo kernel 157
multi stimulus with hidden reference anchors (MUSHRA) 269

N

negative kernels 158
noise 4
non-LP detection 28
nonblind
watermarking scheme 104
nonblind audio
watermarking technique 106
novel psychoacoustic model 36

O

objective difference grade (ODG) 270
Objective Evaluation Standards 260
og-polar mapping 30
open digital rights language (ORDL) 189

P

parameters, and reflection (PARCOR) 234
parametric
model 52
tool 199
watermarking 241, 242
PCM format 254
peak-signal-to-noise-ratio (PSNR) 271
peak points extraction (PPE) 110
PEAQ method 270
peer-to-peer (P2P) 188
per-frame encoding 63
per-trajectory encoding 63
perceived audio quality (PEAQ) 270
piecewise-linear Markov 88
maps 89
pitch
  scaling 144
  shift 4
synchronous overlap and add (PSOLA) 244
power spectral density (PSD) 89
pre-echo problem 41
predictive modeling 51
presented objective measurement method (PEAQ) 275
probability density function (pdf) 28
protocol attacks 239
pseudo noise (PN) 157
  sequences 124
pseudo random
  number generator (PRN) 17
  sequence (PN sequence) 25
psychoacoustic
  frequency masking (PAFM) 23
  model 41, 42, 43, 153, 207

Q
quadratic interpolation of the log-magnitude spectrum (QI-FFT) 58
quantization index modulation (QIM) 54

R
receiver operating characteristic (ROC) 70, 86
Recording Industry Association of America (RIAA) 188
recovered speech 231
registration pattern 231
Reverberation (RVB) 66
Rich site summary (RSS) 147
rights expression languages (REL) 189
robust audio watermarking 30
robust watermarking method 197
root-mean-square (RMS) 63

S
Secure Digital Music Initiative (SDMI) 6, 50
