About the Authors

**Linda K. Lau**, Ph.D. (Rensselaer Polytechnic Institute) is a financial consultant associate with Salomon Smith Barney, Inc. in Richmond VA. For the past five years, she was Assistant Professor and Discipline Coordinator for MIS in the School of Business and Economics at Longwood College, Farmville VA. She was the author and coauthor of numerous articles and an ad-hoc reviewer of the *Information Resources Management Journal* and *SAM Advanced Management Journal*. Her name was also published in the Who’s Who Among America’s Teachers, 5th edition (1998) and International Who’s Who of Professionals for the Year 1997. Her past research interests include using Behavioral Anchored Rating Scales (BARS) for employee performance evaluations, developing Web pages, writing applets using Java programming language, and distance learning.

***

**Eric C. Adams** is a Technology Coordinator for the Catholic Diocese of Monterey. Eric’s primary duties include providing technical support and professional development to school staff personnel on the integration of technology with classroom curriculum and the use of technology to support instructional methodologies. He also manages the acquisition, installation and troubleshooting of technological hardware, software and infrastructure on the school site. He has previous experience training teachers and developing curriculum for schools in Shanghai, P.R.C. and Hiroshima, Japan. Adams received a BBA in Entrepreneurship from Pace University in 1992, and a MST in Elementary Education from his alma mater in 1995. Eric is presently a Doctoral student in Pepperdine University’s Educational Technology program.

**Mitchell Adrian** is an Assistant Professor of Management at Longwood College. He earned his D.B.A. in Management from Mississippi State University and has published in a number of academic journals and proceedings including the *SAM Advanced Management Journal, Journal of the Academy of Business Administra-

Zane Berge is currently Director of Training Systems, Instructional Systems Development Graduate Program at the University of Maryland UMBC Campus. Of his work in computer-mediated communication in education, most notable are his series with Mauri Collins. In 1995, a three volume set, Computer-Mediated Communication and the Online Classroom, was published that encompasses higher and distance education, and then in late 1997 a four-volume set of books, Wired Together: Computer-Mediated Communication in the K-12 Classroom was published. In 1998 he co-edited the book, Distance Training: How Innovative Organizations are Using Technology to Maximize Learning and Meet Business Objectives, (Jossey-Bass).

Richard Discenza is Dean of the College of Business of the University of Colorado, Colorado Springs. His primary research areas are Production and Operations Management, Information Systems; and Productivity and Quality Management. He has authored over 100 publications in the area of business. He is married to Suzanne, a speech pathologist who is currently pursuing a Ph.D. in Public Administration with a Health Policy Emphasis. They have four grown children.

Christopher Freeman is currently a Master Teacher at the University of Tulsa working on a NSF funded grant to improve Math and Science education in Oklahoma. One of Chris’ main duties at TU is revising math and science courses that are taken by pre-service teachers. Chris is also working on an internally funded mini-grant to develop web based instructional material and the development of a faculty technology-training center at TU. Chris also helped revamp the masters in Mathematics and Science Education program at TU, which has a large emphasis on technology. He has previous experience teaching math and science in grades 7 through 12. He has his B.S. in Physics & Mathematics from Auburn University and his M.S. in Mathematics and Science Education from the University of Tulsa. Chris is presently a Doctoral student in Pepperdine University’s Educational Technology program.

Caroline Howard is on the faculty of the Goizueta School of Business of Emory University where she teaches Information Systems and Statistics. Her primary areas of research are information systems with an emphasis on distance education, using telecommunications to substitute for transportation and systems development. She is married to Peter Dolid, a manager for Hewlett Packard. They have two children, Anne age 12 and Tommy age 9.

Janet Hugli is a recent graduate of the Master of Business of Administration program at the University of Ottawa. She also holds an honors undergraduate
degree in Business Administration from Brock University and a Diploma in Adult Education from St. Francis Xavier University. Janet has over 20 years experience in corporate management in the telecommunications industry, which has included roles in strategic planning, business development, marketing, sales and training. She has been involved with the network marketing industry for the past five years, and has developed leader-led training materials to support the development of the associates.

**Sherif Kamel** is an Assistant Professor of Management Support Systems at the American University in Cairo. He is also the director of the Regional Information Technology Institute in Cairo, Egypt. His research interests include management support systems and information technology transfer to developing countries and its implications on socioeconomic development. He is a graduate of London School of Economics and Political Science and the American University in Cairo. He designed and delivered professional development programs in information systems applications for public and private sector organizations in Africa, Asia, the Far East and Eastern Europe. He is one of the founding members of the Internet Society of Egypt. He serves on the editorial and review boards of a number of information systems and management journals and has published several articles and chapters on the application of information and communication technology in developing countries.

**Dennis S. Kira** is an Associate Professor of MIS in the Department of Decision Sciences and MIS at Concordia University, Montreal. He received his BSc in Mathematics from Simon Fraser University, and Ph.D. from University of British Columbia. He has published in *Management Science*, *IEEE Transactions*, *Journal of the Operational Research Society*, and *Omega* as well as many other scientific journals. His research interests include e-commerce, web design, distance learning, decision making under uncertainty, neural networks, Artificial Intelligence, financial modeling, and knowledge management.

**Jens O. Liegle** has recently joined the CIS faculty of Georgia State University. He received his Ph.D. in Management Information Systems at Kent State University. His areas of specialization are web-based intelligent tutoring systems and Web-based system development. He has participated in the development of the Web-based training system PageMaster for Goodyear Tire and Rubber, developed the Web-based surveying tool IntQuest, and is currently developing an adaptive Web-based intelligent tutoring system for computer programming languages.

**Peter N. Meso** is a doctoral student at Kent State University majoring in Management Information Systems. His areas of specialization are Knowledge Management and Information Infrastructure. He developed an intelligent web-based knowledge acquisition system, designed course supplemental web sites for the MIS department, and has experience in computer-mediated communication technologies and educational administration.
Lorraine Meyer-Peyton was a foreign language teacher and a career counselor before her life changed with the advent of personal computers. Thoroughly hooked on technology, she started teaching computer science. She eventually joined the Department of Defense Education Activity’s distance learning program in its infancy, at first teaching Pascal programming and AP Computer Science. When tasked with exploring the educational possibilities offered by Lotus Notes, Lore and a colleague were soon piloting projects in several countries. Today Lore provides technical support for DoDEA schools in Europe and the United States as well as database development support for the DoDEA Electronic Schools’ instructors. Lore can be reached at lore_peyton@hotmail.com.

Valerie N. Morpew, Assistant Professor of Education at West Virginia Wesleyan College in Buckhannon, West Virginia, received her doctorate in Curriculum and Instruction from West Virginia University in 1994. She taught education and science at Longwood College in Farmville, Virginia, before joining the faculty at West Virginia Wesleyan College in Fall 1999. Dr. Morpew’s areas of expertise include science education, curriculum and instruction, and obsessive compulsive disorder education. Dr. Morpew is the author of two books and numerous articles. She enjoys writing nonfiction and fiction.

Dat-Dao Nguyen is an Assistant Professor of MIS in the Department of Accounting and MIS at California State University, Northridge. He holds a BA in Economics, a BCom in Quantitative Methods, and an MSc in Decision Sciences. He is finishing his Ph.D. in MIS at Concordia University, Montreal. His current research interests include Artificial Intelligence methodology and applications, behavioral decision theory, knowledge management, distance learning, and e-commerce. His works have been presented and published in Proceedings of AIS, ASAC, DSI, APDSI, NEDSI, WDSI, SCI, and other conferences.

Daniel F. Purcell Sr has been working in the Information Technology industry for over 20 years. He is currently employed by Logicon Incorporated on a contract to a government agency providing information technology and project management support. Mr. Purcell is also a member of the on-line faculty for the University of Phoenix On-line where he teaches primarily project management within a text-based asynchronous environment. His e-mail address is dfpurcel@email.uophx.edu.

Rita Purcell-Robertson is a consultant with the Arcadia Group Worldwide, Inc., in support of the International Medical Program of the Partnership for Peace Information Management System. She has developed, facilitated, and taught graduate and undergraduate level courses using distance media including the World Wide Web, the internet, two-way audio/one-way video, and two-way audio-video. Her current position involves telehealth instructional media for central and eastern European countries.

Arkalgud Ramaprasad is a Professor in the Department of Management and Director of the Pontikes Center for Management of Information. He teaches and
conducts research in Strategic Management and Management of Information, and promotes industry-university cooperation in education and research related to management of information. He obtained his Ph.D. from the University of Pittsburgh in 1980. Prior to that he obtained his MBA from Indian Institute of Management, Ahmedabad, India, and B.E. (Electrical) from the University of Mysore. He has published in *Behavioral Science, Management Science, Academy of Management Review, Omega, Decision Sciences*, and other journals. He has received research grants from major corporations such as Comdisco, Chrysler, IBM, and Bozell Worldwide.

**William E. Rayburn** teaches Management Information Systems classes at Austin Peay State University. His research interests include the strategic management of technology and the role of technology as an agent of change. His recent research has focused on the organizational aspects of distance learning technology. He obtained his DBA degree from Southern Illinois University in Carbondale in 1997. Prior to that he obtained his MBA degree and BE degree from Vanderbilt University.

**Lynne Schrum** is an Associate Professor in the Department of Instructional Technology at the University of Georgia. She received a Ph.D. in Curriculum and Instruction with an emphasis on Distance Learning and Educational Telecommunications from the University of Oregon. Prior to her university work, she taught in an elementary school for several years. She is currently President of the International Society for Technology in Education (ISTE), a 47,000 member organization focused on implementing technology in schools. Dr. Schrum’s current research and teaching focus on distance learning, online course development and delivery, ethical electronic communications, telecommunications, and technological innovations in education. She has written two books and numerous articles on these topics.

**Major Todd Smith** and **Major Scot Ransbottom** are United States Army Officers who have served in a variety of Command and Staff positions both overseas and in America. They have been responsible for training combat soldiers and educating future leaders. They are currently Assistant Professors at the United States Military Academy at West Point.

**Ira Yermish** is an Assistant Professor of Management and Information Systems at St. Joseph’s University in Philadelphia, Pennsylvania. His education includes degrees from Case-Western Reserve University, Stanford University and the University of Pennsylvania in operations research and computer science. His areas of expertise include strategic applications of information technology, database systems and systems analysis and design. With over thirty-five years of experience in the computer industry as a software developer and consultant he provides a balanced approach for his undergraduate and graduate students.
