About the Contributors

Mehdi Khosrow-Pour (DBA) received his Doctorate in Business Administration from the Nova Southeastern University (FL, USA). Dr. Khosrow-Pour taught undergraduate and graduate information system courses at the Pennsylvania State University—Harrisburg for 20 years where he was the chair of the Information Systems Department for 14 years. He is currently president and publisher of IGI Global, an international academic publishing house with headquarters in Hershey, PA and an editorial office in New York City (www.igi-global.com). He also serves as executive director of the Information Resources Management Association (IRMA) (www.irma-international.org), and executive director of the World Forgotten Children’s Foundation (www.world-forgotten-children.org). He is the author/editor of over twenty books in information technology management. He is also the editor-in-chief of the Information Resources Management Journal, the Journal of Cases on Information Technology, the Journal of Electronic Commerce in Organizations, and the Journal of Information Technology Research, and has authored more than 50 articles published in various conference proceedings and journals.

* * *

Salim Al-Hajri is an Associate Professor in the Department of Business Studies at the Higher College of Technology in Muscat, Oman. His PhD involved a study in Internet Technology in the Banking Industry in which he investigated the inhibitors and enablers of Internet technology in the Omani banking industry compared with the Australian banking industry. His research interests include information technology, information systems in business organisations, technological innovation, electronic commerce, electronic business and electronic banking. He has published numerous, journal articles, conference papers, and book chapters and recently he is working on editing his new book the Electronic banking.

Lei Chen received a BE in Computer Science from the Nanjing University of Technology, China in 2000 and a PhD in Computer Science and Software Engineering from the Auburn University in 2007. He was a Vodafone Research Fellow from 2006 to 2007. He is currently an assistant professor in the Department of Computer Science at the Sam Houston State University. His research interests include computer networks, network security, and wireless & multimedia networking.

Stathes Hadjieftymiades received his B.Sc., M.Sc. and Ph.D. degrees in Informatics from the Dept. of Informatics and Telecommunications, University of Athens (UoA). He also received a Joint Engineering-Economics M.Sc. from the National Technical University of Athens. In 1992 he joined the Greek consulting firm Advanced Services Group. In 1995 he joined the Communication Networks
Laboratory (CNL) of UoA. During the period 2001–2002, he served as a visiting assistant professor at the University of Aegean, Dept. of Information and Communication Systems Engineering. On the summer of 2002 he joined the faculty of the Hellenic Open University, Patras, Greece, as an assistant professor. Since December 2003, he is in the faculty of the Dept. of Informatics and Telecommunications, University of Athens, where he is presently an assistant professor. He has participated in numerous EU & National projects. His research interests are in the areas of web engineering, mobile/pervasive computing and networked multimedia. He has contributed to over 100 publications in these areas. Since 2004 he co-ordinates the Pervasive Computing Research Group of CNL.

Wen-Chen Hu received a BE, an ME, an MS, and a PhD all in Computer Science from the Tamkang University, Taiwan, National Central University, Taiwan, University of Iowa, Iowa City, and University of Florida, Gainesville in 1984, 1986, 1993, and 1998, respectively. He is currently an associate professor in the Department of Computer Science at the University of North Dakota. Dr. Hu has published over 70 articles on refereed journals, conferences, and books and advised more than 50 graduate students. He is the Editor-in-Chief of the International Journal of Handheld Computing Research. His current research interests are in handheld computing, electronic and mobile commerce systems, Web technologies, and databases.

Naima Kaabouch received a BS and an MS from the University of Paris 11, France in 1982 and 1985, respectively, and a PhD from the University of Paris 6, France in 1990. She is currently an assistant professor and graduate director in the Department of Electrical Engineering at the University of North Dakota. Her research interests include signal/image processing biomedical engineering, bioinformatics, embedded systems, digital communications, and nondestructive techniques.

Christine Legner is Deputy Chair of Enterprise Systems and Electronic Business at European Business School in Oestrich-Winkel (Germany). Before joining EBS, she was senior researcher and lecturer at University of St. Gallen (Switzerland). She has practical and academic experience in designing e-business solutions. Her research interests include business networking, collaborative business processes, inter- and intra-enterprise systems and service-oriented architectures. Her work has been published in leading academic journals, including the Journal of the Association of Information Systems, the International Journal of Technology Management, Electronic Markets and IEEE Pervasive Computing, and proceedings of international conferences, such as those of the European Conference on Information Systems and the Bled eConference. She holds a PhD in Information Management from the University of St. Gallen, a Master in Applied Economics from Université Paris-Dauphine (France) and a Master in Industrial Engineering from Technical University of Karlsruhe (Germany).

Ioannis Priggouris received his BSc in informatics from the Department of Informatics & Telecommunications at the University of Athens, Athens - Greece in 1997 and his MSc in communication systems and data networks from the same Department in 2000. Over the last years he has been a PhD candidate in the department. Since 1999, he has been a member of the Communication Networks Laboratory (CNL) of the University of Athens. He has participated in the EUROCITI (EUROpean CITIes platform for on-line transaction services) and the PoLoS (Integrated Platform for Location Based Services) project implemented in the context of IST. His research interests are in the areas of mobile computing, QoS and mobility support for IP networks. He is the author 20 publications in the above areas. He works for the Hellenic Telecommunications Organization since 2006.
Pauline Ratnasingam, is an Associate Professor of MIS, Department of Computer Information Systems, Harmon School of Business Administration, University of Central Missouri (UCM), Warrensburg, Missouri. Before joining UCM, she was an Assistant Professor at the School of Business Administration, University of Vermont, Burlington, Vermont. She received her Ph.D titled “Inter-organizational Trust in Business to Business Electronic Commerce” from Erasmus University, Rotterdam School of Management, The Netherlands in 2001. She lectured on topics such as; Project Management, Management of Information Systems, and Electronic Commerce in Australia, New Zealand, Europe and America. She is an associate member of the Association of Information Systems, and is a member of the Information Resources Management Association and Academy of Management. Her research interests include Business Risk Management; Internet based B2B E-Commerce, Organizational Behavior, Knowledge Management and Trust. She is a recipient of a National Science Foundation Grant and has published several articles related to this area in national and international conferences, refereed journals and chapters in books. Her biography is also published in the 58th Edition of Marquis Who’s Who – Who’s Who in America.

Dimitris Spanoudakis received his diploma in Electronic and Computer Engineering from the Department of Electronic and Computer Engineering, Technical University of Crete, Chania, Greece, in 2002, and his M.Sc. in Communication Systems & Networking, from the Department of Informatics and Telecommunications, University of Athens, Athens, Greece, in 2005. He has performed research on network traffic analysis and modelling, as well as architectures for mobile and wireless systems. He has been a member of the Information Systems Centre at the Technical University of Crete (ISC-TUC) from 1997 till 2000, and member of the Telecommunications Laboratory from 1999 till 2002. Since 2004 he has been a member of the Communication Networks Laboratory of the University of Athens (UoA-CNL). His current research interests are in the areas of network modelling, mobile computing, and autonomic communications. Since September 2006, he works as Informatics Teacher in Public Secondary Education.

Manos Spanoudakis received his B.Sc. in Computer Science and Telecommunications from the Department of Informatics and Telecommunication, University of Athens, Athens, Greece in 2000 and his M.Sc. (with honours) in Computer Systems Technology from the same Department in 2003. He is currently a Ph. D candidate at the same Department, specializing on Content Distribution Networks. He has performed research on WWW architectures for wireless/mobile systems and caching. Since 2000, he has been a member of the Communication Networks Laboratory of the University of Athens (UoA-CNL). He has been involved in the IST projects EURO-CITI (EUROpean CITIes platform for on-line transaction services) and PoLoS (integrated Platform for Location-based Services). Currently he is working as a software engineer for Credit Suisse, Switzerland. His research interests are in the area of wireless/mobile computing, caching technologies, CDNs.

Arthur Tatnall is an Associate Professor in the Graduate School of Business at Victoria University in Melbourne, Australia. His PhD, from Central Queensland University, involved a study in curriculum innovation in which he investigated the manner in which Visual Basic entered the curriculum of an Australian university. His research interests include technological innovation, history of technology, project management, information systems curriculum, information technology in educational management and electronic commerce. He is a Fellow of the Australian Computer Society, active in the International Fed-

eration for Information Processing (IFIP) and Chair of IFIP WG9.7 – ‘History of Computing’. He is also Editor-in-Chief of the International Journal of Actor-Network Theory and Technological Innovation.

Yanjun Zuo received an MBA from the University of North Dakota in 2000, and an MS and a PhD in Computer Science from the University of Arkansas in 2003 and 2005, respectively. He is currently an assistant professor in the Department of Information Systems and Business Education at the University of North Dakota. His research interests include information and computer security, trustworthy computing, and database security.
