### Index

**A**
- abstraction levels 61
- adaptation actions 88
- adaptation decision making 90
- adaptation engine 86
- adaptation engineering 36, 40, 50
- adaptation model 45, 62
- adaptive behavior 104
- adaptive composition engine 213
- adaptive concept-based systems 36
- adaptive hypermedia (AH) 45, 65, 208, 246, 266
- adaptive hypermedia applications 3, 150
- adaptive navigation support 22
- adaptive navigation techniques 218
- adaptive system 108, 130, 285
- adaptive task-based systems 38, 49
- adaptive user interfaces 2
- adaptive virtual documents 209
- adaptive virtual reality museums 190
- adaptive web information systems 44
- adaptive web system 126
- adaptivity effects 292
- advertisements 264
- aggregate user model 126

**AHA!** 47, 72
- AHAM reference model 45
- AHS 81
- application model 43
- artificial neural networks (ANNs) 113
- association rule mining techniques 138
- associative links 30
- authoring systems 70
- automatic indexing 172
- automatic term recognition 171
- average connected distance 29

**B**
- Bayesian learning 112
- behavioural patterns 126
- broadcast stream 251
- browsing history 169
- browsing support system 181

**C**
- CF method 174
- cluster mining 131
- clustering 131
- clusters 25
- collaboration 233
- collaborative filtering (CF) 267
composition engine 207
cornerstone-based systems 37
context-based filtering (CBF) 267
context modelling server (CMS) 96
contextual navigation aids 20
continuity 259
control conditions 289
conversational agents 236
course-related authoring activities 52

crawlers 22

data cleaning 129
data collector agent 200
data manipulation services 69
data mining 127
data transformation 129
data-intensive 38
database-driven sites 304
digital libraries (DLs) 2
digital television 246
digital TV 264
direction mapping and sequence chart 302
distribution interactivity 248
domain model 41
domain-related authoring activities 52
dynamic personalisation server (DPS) 95

Dynamo 38

E
E-ACM 59
e-commerce 228
e-learning 228
electronic programme guide (EPG) 248
explicit knowledge 227
extended abstract categorisation map 59
extended-for-fuzziness adaptive
hypermedia model 153
extra-programme interactivity 249

feedback 106

filtering 217
first-order logic (Foil) 115
formative evaluation 287

G
generic information server (GIS) 94
goal-question-metric method 291
graph theory 22

H
hubs 25
human-computer interaction 2
hyperspace 20

I
implicit social relationships 159
in vitro 289
information seeking models 3
Information systems 37
information-seeking behaviour 8
interest relevancy measure (IRM) 179
Internet 19
intra-programme interactivity 250
iTV 248

K
keyword selection 171
knowledge management systems
(KMSs) 225

L
LABYRINTH 154
link analysis 22
logging methods 305
lostness 28

M
machine learning 105
map user profiles 72
MAZE model 150
MAZE-based architecture 158
mean absolute error (MAE) 273
model-update actions 90
multi-layer perceptron (MLP) 113
Naive Bayesian classifiers (NBCs) 110
natural language processing (NLP) 170
navigation patterns 28
networking 233

page return rate 29
pairwise clustering 181
PALIO 94
pattern discovery 130
personalisation 37, 264
personalized TV 246
probabilistic methods 22

query tips 11

recommender systems 266
reference models 60
refined information-seeking model 5
relational learning 115
repository 39
resource-related authoring activities 53

SCARCE 206
self-organising maps (SOMs) 115
sequential pattern mining techniques 140
server session 128
similarity-based clustering 181
site maps 30
site structure 19
spiders 22
stretch media 253
structural context 30
student’s skills 109
summative evaluation 287
surfing 27

tacit knowledge 227

temporal context 30
text analysis 22
tfidf 170

usage data recorder 195
user access data 128
user model (UM) 45, 62, 126
user modelling 151, 176, 225, 231
user modelling engine 200
user navigation 19, 26
user ontology 228
user paths 307
user profile 43
user segmentation 22
user support 8
user visit 128
user’s feelings 109
user’s plan 108

VALS (values and lifestyles) 271
virtual environment generator 198, 202
virtual museum 191
virtual reality (VR) 191
virtual reality museum 191
visualisation tools 300
VRML content database 198

web information system (WIS) 41
web information systems 38
web mining 21
web personalisation 21
web usage mining 125
web user modelling 126
web-based content 300
web-based hypermedia systems 80
web3D personalisation rules 195
WebMate 176
word weighting 169, 176
