About the Contributors

Mehdi Khosrow-Pour, DBA, received his Doctorate in Business Administration (DBA) from the Nova Southeastern University (FL, USA). Dr. Khosrow-Pour taught undergraduate and graduate information system courses at the Pennsylvania State University – Harrisburg for 20 years where he was the chair of the Information Systems Department for 14 years. He is currently president and publisher of IGI Global, an international academic publishing house with headquarters in Hershey, PA and an editorial office in New York City (www.igi-global.com). He also serves as executive director of the Information Resources Management Association (IRMA) (www.irma-international.org), and executive director of the World Forgotten Children’s Foundation (www.world-forgotten-children.org). He is the author/editor of over twenty books in information technology management. He is also the editor-in-chief of the Information Resources Management Journal, the Journal of Cases on Information Technology, the Journal of Electronic Commerce in Organizations, and the Journal of Information Technology Research, and has authored more than 50 articles published in various conference proceedings and journals.

Before joining the ‘Electronic Voting and Electoral Inclusion: Implications for South Australia,’ project as a PhD candidate in 2004, Kate Alport was a social researcher in the Centre for Internet Research, University of Adelaide and in the Anthropology Department at the South Australian Museum. She has a BA Hons in anthropology and an MA in international studies. Her areas of interest are social inclusion, social aspects of technology uptake and Indigenous issues. She is currently working at the Centre for Appropriate Technology in Alice Springs, Northern Territory.

William Barlow is the deputy director of the Integrated Information and Communication Technology (ICT) Support Directorate of the Office of the Assistant Secretary of Defense for Networks and Information Integration, Department of Defense Chief Information Officer (OASD(NII)/DoD CIO). His primary responsibilities include developing policy and guidance for information sharing in security, stability, transition and reconstruction operations between non-governmental and private organizations and the U.S. government. Prior to this position, he served as an information technology (IT) specialist (policy) in the Architecture and Interoperability Directorate where he developed policy and guidance for business, logistics and medical system’s information support plans (ISPs).

Michael P. Dowdy is a senior systems analyst with Femme Comp Inc. (FCI) supporting the Integrated ICT Support Directorate, Office of the Assistant Secretary of Defense for Networks and Information
Integration. He holds a Master’s degree in security management from Webster University, St Louis, Missouri and a Bachelor’s of computer science degree from Old Dominion University, Norfolk, Virginia. He is a retired U.S. Army Signal Corps officer, and graduate of the Army Command and General Staff College, the Army Systems Automation Officer Course, and the Marine Corps Command and Control Systems Course.

Suleyman Guleyupoglu is a principal scientist with the Advanced Engineering & Sciences, a division of ITT Corporation. He has been involved with online collaboration research since 2002. His other interests include expert systems, knowledge engineering, evolutionary algorithms and intelligent decision making. He holds MS/PhD degrees in engineering science & mechanics from The University of Alabama and an MBA degree from the University of Maryland.

Bidyut Gupta received both his MTech and PhD degrees from University of Calcutta, Calcutta, India. He joined Indian Statistical Institute, Calcutta in 1982. In 1986, he was a visiting member of the faculty at the Computer Science Department, Colorado State University, Fort Collins. In 1988 he joined the Computer Science Department, Southern Illinois University, Carbondale, where at present he is a professor and the graduate program director. His research interest includes fault-tolerance in distributed systems, mobile computing, multi-agent systems, and routing in ad-hoc networks. He is a senior member of IEEE.

Before taking up her position as an associate professor of politics at the University of Adelaide, Lisa Hill taught at the University of Sydney, was a five-year fellow in political science at the Research School of Social Sciences, ANU, and a five-year ARC fellow at the University of Adelaide. Her current areas of interest are in political theory and issues in electoral behaviour and law, with a particular focus on compulsory voting. Recent publications include: ‘Low Voter Turnout in the United States: Is Compulsory Voting a Viable Solution?’ Journal of Theoretical Politics, 18 (2) 2006; ‘Protest or Error? Informal Voting and Compulsory Voting’ (with Sally Young), Australian Journal of Political Science, 42 (3), pp. 515-521, 2007; The Passionate Society: The Social, Political and Moral Thought of Adam Ferguson, Dordrecht: Springer Academic 2006 and The Politics of Women’s Interests: New Comparative Perspectives (co-edited with L. Chappell) Oxford: Routledge, 2006.

Marijn Janssen is a director of education of the SEPAM (Systems Engineering, Policy Analysis and Management) and an associate professor at the Faculty of Technology, Policy and Management of Delft University of Technology. He holds a PhD (2001) in the field of management information systems and has been a consultant and information architect for the Ministry of Justice. His research is focused on ICT-service engineering of public service networks (e-government). He is particularly interested in intermediaries, like business process orchestrators, shared service centers and information brokers. His research is published in a large number of conference proceedings, book chapters, and international journals. More information: www.tbm.tudelft.nl/marijn, he can be contacted at: m.f.w.h.a.janssen@tudelft.nl.

Jonna Järveläinen has worked as an assistant professor of information systems science at Turku School of Economics in Finland. She has lectured and researched in the areas of electronic business and electronic government. She has also supervised bachelor’s and master’s theses. She has published
in International Journal of Electronic Government and Electronic Markets and several conference proceedings.

**Timo Kestilä** is doctoral student of information systems at the Turku School of Economics. Currently he is working as a researcher. He gained his master’s in computer science at the University of Turku. He has over 20 years experience of different tasks in the information systems field. He has also worked as IS manager at the Finnish National Board of Taxes. His research interests are e-government and strategic information systems planning in an inter-organizational network. He has published in International Journal of Electronic Government.

**Jarmo Kinos** is currently an adjunct professor and senior lecturer in the Department of Teacher Education at the University of Turku. His main research interests and themes are in history, professionalism and the pedagogical practices of early childhood education. His latest research topic deals with the academization and scientification of ECE in Finnish universities. He has also worked as a kindergarten teacher in day-care centres. He has published in International Journal of Electronic Government.

**John Korah** is a doctoral candidate in the Department of Computer Science at the Virginia Polytechnic Institute & State University. He received his BE degree in electronics and instrumentation engineering from the Govt. College of Technology, Coimbatore, India. He has a Master’s degree in electrical engineering from Virginia Tech. His research interests are focused on parallel/distributed computing, numerical algorithms, large scale network modeling/simulation and information retrieval. He also serves as a reviewer for the Journal of Supercomputing.

**Eija Koskivaara** is currently an assistant professor in the Department of Management at the Turku School of Economics. She obtained her doctoral degree in economics and business administration, majoring in information systems science. Her doctoral research focuses on continuous auditing and IS tools to support decision making. She is interested in creating an interactive virtual environment to support families and their well-being. She has published in International Journal of Electronic Government, Journal of Emerging Technologies in Accounting, Journal of Information Systems and Technology Management, Managerial Auditing Journal, and Journal of Operational Research Society.

**George Kuk** is an associate professor in strategy and information systems at the Nottingham University Business School. His research focuses on strategic dynamics, open source, knowledge networks and user innovation. He received his PhD in applied psychology from Nottingham University. He can be contacted at: g.kuk@nottingham.ac.uk.

**Roy Ladner** is the director of the Data Architecture and Administration Division at the Naval Meteorology and Oceanography Command. He serves as staff lead for the development and management of data and information that is needed to support the Naval METOC Command. He directs technical, programmatic and administrative aspects of the data and information life cycle to support all METOC and geospatial information and services information requirements for the Department of Navy Battlespace. Dr. Ladner also performs as the agent for the Command’s navy-wide role as the functional data manager and also as co-lead for METOC data and information standardization across the Department of Defense.
About the Contributors

Deqing Li is a graduate student in the Thayer School of Engineering at Dartmouth College. She received her BS degree in Internet and multimedia technology from Hong Kong Polytechnic University. Her research interests include artificial intelligence, information retrieval, intent inference and deception detection.

Clement Macintyre has degrees from Murdoch University and the University of Cambridge. He teaches politics at the University of Adelaide. In 2002-03 he was chair of the ‘Panel of Experts’ appointed by the South Australian Parliament to advise on the State Constitutional Convention held in 2003. He has expertise in European and Australian State and Federal politics and has recently published papers on South Australian political history and Australian constitutional arrangements. He is a regular media commentator on Australian state and federal politics.

Sean McCarthy works as a consultant for Femme Comp, Inc. (FCI) to the Department of Defense (DoD) CIO. He works to enable the DoD to more effectively communicate with non traditional participants during stability operations. Prior to coming to the DoD he has lead and assisted the development of information systems to the Federal Aviation Administration (FAA) and the Federal Communications Commission (FCC). He holds a Bachelor’s degree in economics from the University of Virginia and is working on a Master’s degree on the management of information technology from the University of Virginia.

Ranjeev Mittu is head of the Intelligent Decision Support Section, within the Advanced Information Technology Branch of the Information Technology Division at the Naval Research Laboratory. His team is currently leading the development and integration of the ShareInfoForPeople portal, which is sponsored by the Office of Secretary of Defense (OSD) Networks and Information Integration (NII). He is a member of The Technical Cooperation Program, which is an international organization that promotes scientific collaboration among the US, UK, New Zealand, Australia and Canada. He holds a Master of Science degree in Electrical Engineering from The Johns Hopkins University in Baltimore, MD.

Hien Nguyen is an assistant professor at the Department of Mathematical and Computer Sciences at the University of Wisconsin-Whitewater. She received a PhD in computer science from the University of Connecticut in 2005. Her research interests include user modeling, information retrieval, collaborative information retrieval, recommender systems with a current focus on hybrid user model for improving a user’s performance in information retrieval. Professional services and committee work include program committee for 2007 and 2006 IEEE International Conference on Systems, Man, and Cybernetics (IEEE SMC2007 and SMC2006). She also is a member of User Modeling-User Adapted Interactions Journal Special Reviewers Board. She also serves as a reviewer for User Modeling Conference (2007), IEEE Transactions on Systems, Man, and Cybernetics, Part B, Information Processing and Management, and AAAI 2006 (Poster).

Kevin O’Toole is an associate professor in the School of International and Political Studies at Deakin University where his major research is related to economic and social development in rural areas. His most recent work has focused on six areas: catchment to regional scale indicators of sustainability; integrating environmental, social and economic measures at local level; community governance; demand management for domestic water; comparative land use analysis; and evaluation of allied health retention.
in rural areas. Dr O’Toole has published over fifty journal and conference papers in recent years and is on the editorial panel of the journal *Rural Society* that reports on a range of issues in rural Australia.

**Long Pan** is a postdoctoral associate in the Laboratory for Computation, Information & Distributed Processing (LCID) at the Virginia Polytechnic Institute & State University. He received his PhD degree from CS department of Virginia Tech. He got his BS and MS degrees from the Automation Department of the Tsinghua University. His research interests are focused on SNA (social network analysis) on large and dynamic networks, SNA with culture infusion, parallel/distributed computing, data mining, and information retrieval. He is a member of IEEE, ACM, and INSNA. He serves as a reviewer for Journal of Supercomputing, and the International Conference on Parallel Processing (2007).

**Fred Petry** received the PhD in computer science from The Ohio State University in 1975. He has been on the faculty of the University of Alabama in Huntsville, Ohio State University and Tulane University and is currently with the Naval Research Laboratory. Dr. Petry has over 300 scientific publications including 115 journal articles/book chapters and 7 books written or edited. His monograph on fuzzy databases has been widely recognized as the definitive volume on this topic. He was selected as an IEEE fellow in 1996 for his research on the use of fuzzy sets for modeling imprecision in databases and in 2003 was made a fellow of the International Fuzzy Systems Association. In 2002 he was chosen as the outstanding researcher of the year in the Tulane University School of Engineering and in 2004 received the Naval Research Laboratory’s Berman Research Publication award.

**Päivi Pihlaja** is a lecturer in special pedagogy in the Faculty of Education at the University of Turku. Her research interests lie in special education in early childhood and social relationships in special groups. She teaches special pedagogy, early childhood education and continuing professional development. She has also worked as a day-care teacher and as a coordinator in the Centre for Extensive Studies in Education at the University of Turku. She has published in *International Journal of Electronic Government*.

**Shahram Rahimi** is an associate professor and the director of undergraduate programs at the Department of Computer Science at Southern Illinois University Carbondale. He received his BS degree in computer engineering from National University of Iran (Shahid Beheshti), a MS degree in computer science and a MS degree in computer engineering from University of Southern Mississippi and his PhD degree from Center for Computational Sciences, Stennis Space Center. At the present he is the editor-in-chief for *International Journal of Computational Intelligence Theory and Practice*, the associate editor for *Informatica Journal*, and an editorial board member for several other journals. Dr. Rahimi’s research interest includes distributed computing, multi-agent systems, and soft computing. He has over 110 peer reviewed journal articles, proceedings and book chapters in these research areas.

**Pravab J. Rana** received his BS degree from Nepal and his MS degree from Southern Illinois University. The subject of his thesis was Ontology Mediation in Multi-Agent Systems, directed by Dr. Shahram Rahimi.

**Hannu Salmela** is acting professor of information systems at the Turku School of Economics. His research interests include strategic planning of information systems, IT governance in inter-organizational networks and the use of IT in social and health services. He has conducted several collaborative

**Eugene Santos, Jr.** is a Professor of Engineering in the Thayer School of Engineering at Dartmouth College. He received his BS (‘85) in mathematics and computer science from Youngstown State University, a MS (‘86) in mathematics (specializing in Numerical Analysis) from Youngstown State University, as well as ScM (‘88) and PhD (‘92) degrees in computer science from Brown University. His areas of research interest include artificial intelligence, intent inferencing, information retrieval, automated reasoning, decision science, adversarial reasoning, user modeling, natural language processing, probabilistic reasoning, and knowledge engineering, verification and validation, protein folding, load balancing, virtual reality, and active user interfaces. He has served on many major conference program committees from intelligent agents to evolutionary computing. He is currently editor-in-chief for the IEEE Transactions on Systems, Man, and Cybernetics: Part B, an associate editor for the International Journal of Image and Graphics, and is also on the editorial advisory board for System and Information Sciences Notes.

**Eunice E. Santos** has BS and MS degrees in both mathematics and computer science, and received a PhD in 1995 from the University of California, Berkeley in computer science. Dr. Santos is the director of the laboratory for Computation, Information & Distributed Processing, and an associate professor in the Department of Computer Science at Virginia Polytechnic Institute & State University. Her research interests include parallel and distributed processing, computational science and engineering, intelligent systems, networking, and modeling & simulation. Dr. Santos has been awarded an NSF CAREER grant, the Spira Award for Excellence in Teaching in Engineering, and the Robinson Faculty Award. She is subject area editor for the Journal of Supercomputing and a member of the DARPA/IDA Defense Science Study Group.

Senior researcher **Jarmo Tähtiäppä** is currently working at the Turku School of Economics as a lecturer in information systems science. His research interests focus on IS in the public sector and the health care environment, and his doctoral thesis was about managing the IS resource in health care. His teaching includes IS evaluation and qualitative methodologies, and he is also supervising master’s and bachelor’s theses. He has published in International Journal of Electronic Government.

**Lucas Walsh** is a researcher whose interests include the use of information and communication technologies in government and education. He has published internationally in these areas. During the last several years Lucas has held three Research Fellowships at Monash University, Deakin University and was postdoctoral research fellow in the School of Communications and Multimedia at Edith Cowan University. He has also worked for the international Baccalaureate Organisation and was a civil society delegate to the World Summit on the Information Society as a member of the WSIS Working Group for Education, Research and Academia, which deals both with online shared educational content (e.g. open course-ware) and with research related to education. In 2006, he was invited by the Darebin City Council to review its online consultation initiative and secured funding to develop a set of guidelines for public officials seek to implement their own online consultation strategies.
Huadong Xia is a graduate student in the Department of Computer Science at the Virginia Polytechnic Institute & State University. He received his BS degree in information science from Peking University and got his ME degree in computer science from the Chinese Academy of Sciences. His research interests include distributed computing, information retrieval and social networks analysis. He also serves as a reviewer for the Journal of Supercomputing.

Fei Yu is a graduate student in the Thayer School of Engineering at Dartmouth College. She received her BS degree in information technology from Hong Kong Polytechnic University. Her research interests include artificial intelligence, information retrieval, user modeling, natural language processing and intent inferencing.
