About the Authors

**Tanya Bondarouk** is an assistant professor of human resource management at the University of Twente, The Netherlands. She holds her PhDs in the fields of didactics and business administration. Her main teaching and research interests are in the area of social aspects of implementation of information technologies and human resource management, with a special reference to the interpretive research methods. More recently, she is involved in the research into e-HRM, conducting research projects in different private and public sector organizations.

**Norman L. Chervany**, Carlson professor of information and decision sciences at the Carlson School of Management, University of Minnesota, USA, received his doctorate in decisions sciences from Indiana University. His research interests focus on the human issues involved in the use of technology. His specific research revolves around the relationships among information technology/systems and organizational strategy, the role of trust in an organization’s information management enterprise, work design issues in systems development, and the implementation of systems projects. Professor Chervany is widely published in such outlets as *MIS Quarterly*, *Management Science*, and *Decision Sciences*. He is a fellow of the Decision Sciences Institute.

**Ronald Dattero** is a professor of computer information systems at Missouri State University, USA. He holds a PhD from Purdue University. His research interests include applications development, knowledge management, database management, IT professional and personnel issues, and applied statistics. His work appears in such

**Neil F. Doherty** is a senior lecturer in information systems in the Business School at Loughborough University, UK. In addition to information security, his research interests include the interaction between organizational issues and technical factors in information systems development, understanding the reasons for failures of information systems projects, strategic information systems planning, and e-commerce. Neil has had papers published in a range of academic journals, including *European Journal of Information Systems*, *Journal of Information Technology*, *Journal of Strategic Information Systems*, *Information Resources Management Journal*, *IEEE Transactions in Engineering Management*, *Journal of Business Research*, *Journal of End User Computing*, *Information Technology & People*, *Behaviour & IT*, and *Information & Management*. Doherty is also an associate editor for the *International Journal of Electronic Business Research*.

**Manal M. Elkordy** is an assistant professor at Alexandria University, Egypt. She has a PhD from City University of London. Her research interests include information systems effectiveness and information systems management.

**Deirdre A. Folkers** has taught for The Pennsylvania State University’s York Campus, USA, for more than 23 years. During this time, she has served as an instructor of computer science and curriculum developer (as well as coordinator and instructor) of Penn State York’s noncredit computer seminar series. Currently, she teaches and advises students as an Instructor of Information Sciences and Technology. She holds degrees in computer science (The Pennsylvania State University), man-environment relations (The Pennsylvania State University), and information systems (University of Maryland, Baltimore County). She has written and presented on the topics of distance education and educational technology, including the use of course management software.

**Heather Fulford** is a lecturer in information systems in the Business School at Loughborough University, UK. Her research interests include security management in large and small enterprises, electronic commerce adoption, Web site design, and knowledge management. She is currently managing an EPSRC-funded project investigating the adoption of IT by UK SMEs, and has also gained government funding for an e-commerce adoption project. Fulford has had her papers published in a range of academic journals, including *Information Management & Computer Security*, *Information Resources Management Journal*, *International Journal of
Retail & Distribution Management, and Terminology. She is also joint editor of the Journal of Specialised Translation.

Stuart D. Galup is an associate professor of IT at Florida Atlantic University, USA. He holds a DBA from Nova Southeastern University and is a certified computing professional. His professional work in the transformation of information technology organizations was featured in Computerworld and Datamation. His research appears in such academic journals as Communications of the AIS, Communications of the ACM, Information Resources Management Journal, Communications Research, ACM Computer Personnel, and Journal of Computer Information Systems. He is co-author of Building the New Enterprise: People, Processes, and Technology and The IT Organization: Building a World-Class Infrastructure, both published by Prentice Hall.

Tor Guimaraes has been rated by several independent sources as one of the top researchers in the world based on publications in the top IS journals. He holds the Jesse E. Owen Chair of Excellence at Tennessee Technological University, USA. He earned a PhD in MIS from the University of Minnesota and an MBA from California State University, Los Angeles. Guimaraes was department chairman and professor at St. Cloud State University. Before that, he was an assistant professor and director of the MIS Certificate Program at Case-Western Reserve University. He has been the keynote speaker at numerous national and international meetings sponsored by organizations such as the Information Processing Society of Japan, Institute of Industrial Engineers, Sales and Marketing Executives, IEEE, Association for Systems Management, and the American Society for Quality Control. Guimaraes has consulted with many leading organizations including TRW, American Greetings, AT&T, IBM, and the Department of Defense. He is on the board of directors of several national and international business organizations and is a senior strategic advisor to their CEOs. Working with partners in more than 30 countries, he has published over 200 articles dealing with the effective use and management of IS and related technologies.

William David Haseman is Wisconsin distinguished professor and director of the Center for Technology Innovation at the University of Wisconsin – Milwaukee, USA. He received his PhD from the Krannert Graduate School of Management at Purdue University and served previously on the Faculty at Carnegie-Mellon University. His research interests include groupware, Web services, decision support systems, services oriented architecture, and emerging Internet technologies. Dr. Haseman has published a book and a number of research articles in journals such as Accounting Review, Operations Research, MIS Quarterly, Decision Support Systems, Information Management, Information Systems, and Database Manage-

Omar E. M. Khalil is currently a professor of information systems at Kuwait University, Kuwait. He has a PhD in information systems from the University of North Texas. His research interests include information systems effectiveness, global information systems, information quality, and knowledge management.

Laura Lally is an associate professor at the Frank G. Zarb School of Business at Hofstra University, USA. She holds a PhD in information systems from the Stern School of Business at New York University, and an MBA from Baruch College of the City University of New York. She has published articles in *Decision Sciences*, *the Journal of Global Information Management*, *the Journal of End-User Computing*, *the Information Society*, and *the Journal of Business Ethics*. She has received two National Science Foundation Grants to support her research in applying normal accident theory and the theory of high reliability organizations to information technology.

Margi Levy is a senior lecturer in information management at Warwick Business School, University of Warwick, UK. Before becoming an academic she worked as an IS consultant with Coopers and Lybrand in W. Australia, for a number of financial and software development organizations in London. Currently, she is researching into getting value from information systems for small and medium sized enterprises,

**D. Harrison McKnight** is an assistant professor at the College of Business at Michigan State University, USA. He earned his PhD in MIS from the University of Minnesota. His research interests include trust building within e-commerce and organizational settings and the retention and motivation of information systems professionals. His work has appeared in such journals as *Information Systems Research, Journal of Strategic Information Systems,* and *the Academy of Management Review.*

**Abhishek Nirjar** (abhishek@iiml.ac.in) is an associate professor of strategic management at the Indian Institute of Management, Lucknow, India. He has served Malaviya Regional Engineering College, Jaipur, FORE School of Management, New Delhi, and Management Development Institute, Gurgaon. He has been the recipient of the Career Award for Young Teachers (research grant) instituted by the All India Council for Technical Education, New Delhi. He teaches courses on strategic management and entrepreneurship. He is currently researching innovation capability and firm performance, steps in new venture creation, and growth strategies of high-tech SMEs. Nirjar has a BS (Bundelkhand University), an MBA (Lucknow University), and recently completed his PhD at the University of Sheffield, UK.

**Souren Paul** is an assistant professor of MIS at the College of Business and Administration at Southern Illinois University Carbondale, USA. He holds a bachelor’s degree and a master’s degree in electronics and telecommunications engineering from Jadavpur University, India, and a PhD in MIS from the University of Wisconsin-Milwaukee. His current research interests include cognition and knowledge sharing in collaborative technology supported group work, virtual teams, and organizational knowledge management systems. He has published research articles in the *Journal of Management Information Systems, Decision Support Systems,* and *Information & Management.*

**Alan R. Peslak** is an assistant professor of information sciences and technology at Penn State University – Worthington Scranton, USA. He received his PhD in information systems from Nova Southeastern University, Fort Lauderdale, Florida. His research areas include information technology social, ethical, and economic

**Philip Powell** is deputy dean, professor of information management and was director of the Centre for Information Management in the School of Management at the University of Bath, UK. He is also honorary professor of operational information systems at the University of Groningen. Formerly a professor of information systems with the University of London and director of the Information Systems Research Unit at Warwick Business School, he has worked and taught in Australia, Africa, the U.S., and Europe. Prior to becoming an academic he worked in insurance, accounting, and systems analysis. He is the author of six books on information systems and financial modeling. He has published numerous book chapters and his work has appeared in over 80 international journals and at over 100 conferences. He is managing editor of the *Information Systems Journal*, book review editor of the *Journal of Strategic Information Systems*, and on a number of other journal editorial boards. He is a past president of the UK Academy for IS. His research concerns the role and use of information systems in organizations especially issues of strategy and evaluation in the context of small firms. More recently he has contributed to research on e-business and knowledge management.

**Jing “Jim” Quan** is an assistant professor in the Department of Information and Decision Sciences in Purdue School of Business, Salisbury University, USA. He holds a PhD from the University of Florida and is an MCT/MCSE and CNI/CNE. His research interests include information technology (IT) and organizations, IT human resource management, and e-commerce. His work has appeared in such journals as *Journal of Management Information Systems*, the *Communications of the ACM*, the *Communications of the AIS, Information Resources Management Journal, International Journal of Information Management, Journal of Information Technology and Information Management*, and *Journal of Computer Information Systems*. He presented papers at the national and international conferences on information systems and technology.

**Carol Stoak Saunders** is a professor of MIS at the University of Central Florida, USA. She served as general conference chair of ICIS’99 and Telecommuting ’96. She was the chair of the executive committee of ICIS in 2000 and inducted as an AIS fellow in 2003. Currently she is editor-in-chief of *MIS Quarterly*. Her current research interests include the organizational impacts of information technology,

**Klaas Sikkel** has an MSc in software engineering and a PhD in theoretical computer science. From 1994 he was involved in the design and implementation of groupware systems. At GMD, the German National Research Institute for Computer Science he was one of the founders of the project “Basic Support for Cooperative Work,” one of the first to deliver Web-based groupware services. Currently he is an assistant professor with the Information Systems Group at the University of Twente. His interests include requirements analysis, evolutionary use of groupware and the use of ICT in higher education.

**Monideepa Tarafdar** is an assistant professor of information systems at the University of Toledo, Ohio, USA. She has an undergraduate degree in physics and a graduate degree in telecommunications and electronics engineering from the University of Calcutta, India. Her doctoral degree is from the Indian Institute of Management, Calcutta. Her current research and teaching interests are in the areas of strategic information systems management, management of IT, enterprise systems and organizational aspects of IS. Her teaching has been in the areas of management information systems, data management, data communications, and e-commerce. Her research has appeared in *Journal of Information Technology Cases and Applications, Journal of Global Information Technology Management, Information Resources Management Journal, and Journal of Cases in Information Technology*.

**Andrew Tylecote** (a.tylecote@shef.ac.uk) is a professor of the economics and management of technological change at University of Sheffield Management School, UK. He was educated at Oxford and Sussex in philosophy, politics, sociology, history, and economics. Most of his current work focuses on the impact on technological change of finance and corporate governance. During 1998-2002 he coordinated a six-country project finance by the European Union on corporate governance and product innovation in European firms. He is currently working with Economic and Social Research Council funding on corporate governance and technological development in China, and completing a book for Routledge on corporate governance and the technological advantage of nations.

**Les Worrall** (PhD, Liverpool, UK) is an associate dean (Research) at the University of Wolverhampton Business School, UK, where he leads the Management Research Centre. He is a council member of the British Academy of Management.
and a member of the Association of Business School’s Research Committee. He has published extensively on regional economic analysis and has a particular research interest in the management of information and communications technology in UK local government. Professor Worrall is a member of the editorial boards of four journals and has published extensively in several areas of applied management research. He has also conducted research and consultancy for several “blue chip” companies and over 200 UK local authorities.

**Jie (Jennifer) Zhang** is an assistant professor of information systems at the College of Business Administration, University of Toledo, USA. She received her PhD in computer information systems from the Simon School of Business, University of Rochester. She employs analytical and empirical techniques to examine such issues as intermediation, advertising strategies for portal Web sites, online media concentration, software licensing, and consumer online searching and shopping behaviors in electronic commerce and management of information systems. Her research appears in *Journal of Economics and Management Strategies, Journal of Management Information Systems, Information Resources Management Journal,* and *Journal of Computer Information Systems.*
