About the Contributors

Angappa Gunasekaran is Professor of Operations Management and Chairperson of the Department of Decision and Information Sciences in the Charlton College of Business at the University of Massachusetts (North Dartmouth, USA). Previously, he has held academic positions in Canada, India, Finland, Australia, and Great Britain. He has a BE and ME from the University of Madras and a PhD from the Indian Institute of Technology. He teaches and conducts research in operations management and information systems. He serves on the Editorial Board of twenty journals and edits a journal. He has published about 200 articles in journals, sixty articles in conference proceedings, and three edited books. In addition, he has organized several conferences in the emerging areas of operations management and information systems. He has extensive editorial experience that includes the guest editor of many high profile journals. He has received outstanding paper and excellence in teaching awards. His current areas of research include supply chain management, enterprise resource planning, e-commerce, and benchmarking.

Timothy Shea, D.B.A., is an Associate Professor of Management Information Systems. Dr. Shea first worked in industry and management consulting developing large systems applications and early CASE tools. He received his D.B.A. in Management Information Systems from Boston University. Dr. Shea’s research has focused on the delivery and management of web-based learning and teaching technologies, corporate universities, end-user training, implementation issues around ERP’s, ecommerce, and communities of practice. He has 18 journal articles published, 7 book chapters, 4 training manuals, and over 50 conference presentations. He teaches undergraduate and graduate MIS classes including Advanced Projects, Database, Networking, and E-Business.

***

Richard Oladele Abiola is a Professor of Business Administration at the Federal University of Technology, Akure, Nigeria. He obtained BSc in Business Education (1976), MBA (1982), and PhD in Business(1995). He is currently the Head, Department of Management Technology of the Federal University of Technology, Akure. His research interests are: Marketing Innovations, Business Policy and Strategic Management, Organizational Behavior and Organizational Aspects of Information Systems

Yousef Aklouf (PhD) is an associate professor at the computer science department of the University of Science and Technology Houari Boumediene (USTHB), and is a member of Artificial Intelligence Laboratory. He got his PhD from the USTHB University in April 2007 and from the University of Poitiers-FRANCE- in June 2007 where he was a member of the data engineering team of LISI/ENSMA.
Aklouf received his engineering and MS degrees in computer science from the University of Science and Technology of Algiers (USTHB) in 1998 and 2002, respectively. He also teaches at USTHB several courses: compiling, databases, algorithmic, web-programming tools, operating systems, etc. His research areas include: e-commerce, business-to-business, web-services, ontology and multi-agents system, Grid services.

**Abdulridha Alshawaf** is an associate professor of management information systems at Kuwait University. He has a PhD in Information Systems from Virginia Commonwealth University. His publications have appeared in journals such as Journal of Global Information Technology Management, Research in Accounting in Emerging Economies, Journal of Global Information Management, and Benchmarking an International Journal. His research interest includes information technology impact on organizations, information ethics, and e-commerce.

**David Bell** (david.bell@brunel.ac.uk) is a Lecturer at Brunel University, West London (UK), carrying out research into pervasive and service oriented software engineering. He holds a BSc (Hons) in Computing and Electronics (Swansea), a MBA (Warwick) and a PhD in Information Systems (Brunel). As part of his research into the adoption and application of novel technologies in a business setting, Dr. Bell is investigating the use of semantic technologies to facilitate software re-use in business grid and pervasive environments. Prior to returning to academia, Dr. Bell spent 15 years working in the IT industry in roles from developer to technology director. Dr. Bell has continued with technology and business consultancy and has authored and presented a number of papers on Semantic Service Discovery, Web Services and Grid Computing.

**Laura Campoy** is a senior lecturer in information systems in the Department of Operations and Information Management at Bristol Business School. After gaining significant research and teaching experience in the area of knowledge management technologies in the UK and overseas, she joined the University of the West of England in 2005. Campoy’s research has been published in several peer reviewed journals. Over the years, she has worked in a number of projects and is currently researching knowledge architectures and tools for collaborative environments.

**Hsiu-Hua Chang** is a doctoral student in Department of Information Management, National Central University; she is also a lecturer in Department of Management Information Systems, Tajen University in Taiwan. Her research interests include knowledge management, electronic commerce, and ERP.

**Shuchih Ernest Chang** is an associate professor at the Institute of Electronic Commerce, National Chung Hsing University (NCHU) in Taiwan. He received his MSCS and PhD degrees from the University of Texas at Austin. He has 15 years of working experience in major computer and financial service firms in USA, including: Unisys, IBM, Sun Microsystems, JP Morgan, Bear Stearns, and UBS. His research interests are in e-learning technologies, electronic commerce, enterprise application architecture, information security management, and voice-enabled web systems. His publications have appeared in IEEE Pervasive Computing, Information and Software Technology, Expert Systems with Applications, International Journal on Artificial Intelligence Tools, Industrial Management & Data Systems, International Journal of Enterprise Information Systems, International Journal of Technology Management, and International Journal of Production Research.

Huey-Wen Chou is a Professor at National Central University. Her research interests include team dynamics, ERP, organizational change. She received her PhD from University of Illinois Urbana-Champaign.

Islam Choudhury has been a lecturer in information systems for several years. He has worked at South Bank University, London Guildhall University, London Metropolitan University and Kingston University. He holds a BSc from the University of Wales College of Cardiff and a PhD, funded by BT, from South Bank University. His research interests include the general systems theory, generic business modeling, enterprise integration, workflow modeling, software process improvement and eBusiness.

Ioannis T. Christou holds a professional diploma in electrical engineering from NTUA (Greece) (1991), an MSc (1993) and PhD (1996) in Computer Sciences from the University of Wisconsin at Madison (USA), and an MBA from the AthensMBA program at NTUA and AUEB (2006). Dr. Christou has participated in several research and industrial projects in the areas of EIS, SCM, web & GRID services infrastructure and applications. He has been with Delta Technology Inc. (Atlanta USA) as project leader for Advanced Decision Support Systems, with Intracom S.A. as “Knowledge and Data Engineering” area leader, and with Lucent Technologies Bell Laboratories. Dr. Christou was adjunct assistant professor at the University of Patras Comp.Eng.&Informatics Dept. (Greece). He is currently assistant professor at Athens Information Technology.

Julie Dawson is Operations Manager at a UK furniture manufacturer undertaking a part time postgraduate research degree at the Lincoln Business School, University of Lincoln, United Kingdom. Her research interests include the implementation of information systems in organisations, particularly ERP systems. The human and organisational issues experienced throughout the planning and implementation of ERP systems are of particular interest. She is a Member of the Chartered Institute of Management.

Sergio de Cesare holds a PhD in information systems from LUISS Guido Carli in Rome (Italy). He is currently a lecturer at Brunel University where he teaches object-oriented modeling and Semantic
Web technologies. Sergio’s broad research interests lay in the areas of business and software modeling, model driven information systems development and the Semantic Web. His current research focuses on the development of ontological models for systems development/re-engineering and the subsequent transformation of such models into platform-independent and platform specific application models. Sergio has (co-)authored several papers published in international journals and conference/workshop proceedings related to object oriented, component-based and ontological modeling.

Ma José Martín De Hoyos holds a Ph.D. in Business Administration and is senior lecturer in the Department of Marketing and Business Management at the University of Zaragoza (Spain). Her main research line is online consumer behaviour and e-commerce. Her work has been published in several journals, such as Industrial Marketing Management, Journal of Business and Industrial Marketing, Internet Research, Technovation, Online Information Review and European Journal of Innovation Management.

Emily Di Florido is a PhD student at the School of Information Systems, Computing and Mathematics at Brunel University. She has a degree in electronic engineering (Università La Sapienza, Rome) and an MSc in information system development (London Metropolitan University). Her broad research interests lay in the areas of model driven information systems, E-Government and digital engagement. Her current research focuses on strategic alignment between information technology and business processes within the public sector. She also has experience as an IT consultant for the voluntary and public sector and as a transport planner in the urban context.

Sandy Eggert is a research assistant at Potsdam University and scientific editor of the journal “ERP Management”. Her research activities concentrate on the areas of adaptability of Enterprise Content Management Systems and the integration of enterprise systems. Before her job at Potsdam University she worked as a consultant at BearingPoint GmbH, focussing on enterprise information portals and knowledge management.

Catherine Equey is a UAS Professor of Accounting and Finance at the Haute Ecole de Gestion of Geneva, Switzerland. Professor Equey teaches all facets of accounting, with a particular focus on Management Accounting. She also focuses on the topical domain of Internal Control and the COSO framework. She spent many years in Swiss audit firms as an accounting auditor, and has now taken on a teaching and management role within a local management school. More recently, she has been CFO of a group of schools, for which she was equally in charge of the implementation of Oracle financials. A specialist in the areas of integrated management systems and Enterprise Resource Planning implementation, Professor Equey devotes a large part of her current activities to coaching companies wishing to implement financial and management accounting systems. Her consulting work is particularly dedicated to SMEs and public sector organisations. Her research areas are ERP and Finance.

Emmanuel Fragnière, CIA (Certified Internal Auditor), is a Professor of service management at the Haute Ecole de Gestion of Geneva, Switzerland. He is also a lecturer at the Management School of the University of Bath, UK. He was previously a commodity risk analyst at Cargill (Ocean Transportation), and a senior internal auditor at Banque Cantonale Vaudoise, the fourth-largest bank in Switzerland. Mr. Fragnière specializes in energy, environmental, and financial risk. He has published several papers
in academic journals, such as the Annals of Operations Research, Environmental Modeling and Assessment, Interfaces, and Management Science. His research is partly focused on the development of risk management models for decision-makers in the fields of energy and production. One of his major achievements in the area was to make several successful bids for research projects from various public utilities in the Canton de Genève. The results of these projects have been implemented in the new long-range planning model used by the Energy Technology Systems Analysis Program (ETSAP) of the International Energy Agency. Mr. Fragnière’s other research interests include modeling systems, for which he has also obtained considerable funding from the Swiss National Science Foundation.

Paul A. Fishwick (fishwick@cise.ufl.edu) is Professor of Computer and Information Science and Engineering at the University of Florida. Fishwick’s research interests are in modelling methodology, aesthetic computing, and the use of virtual world technology for modelling and simulation. He is a Fellow of the Society of Modelling and Simulation International, and recently edited the CRC Handbook on Dynamic System Modelling (2007). He served as General Chair of the 2000 Winter Simulation Conference in Orlando, Florida.

Shiwen Gao is an advanced engineer of China National Space Administration. He holds an Enterprise information management master’s degree in 2003 from Tsinghua University. He is currently pursuing his PhD degree in aerospace manufacture engineering from Nanjing University of Aeronautics and Astronautics, China. His research focuses on virtual manufacturing and enterprise information.

Yu Guo is an assistant professor of mechanical and electrical engineering at NUAA, China. He is currently the Supervisor of CAD/CAM research team. He holds a master’s degree in mechanical and electrical engineering from Xin Jiang University in China, and a PhD degree in mechanical design from Huazhong University of Science and Technology in China. His research interests include design theory and methodology, simulation optimization, and mass customization.

Norbert Gronau studied engineering and business administration at Berlin University of Technology, Germany. Currently he holds a chair of Business Information Systems and Electronic Government at the University of Potsdam. His main research activities concentrate on the areas of Corporate Architectures and Business Management.

Fred Heemstra is a full professor in Management Science and Computer Science at the Open University, the Netherlands. From 1994 until 2000 he was the Dean of the department of Economics, Business and Public Administration. He is also a partner at KWD Resultaatmanagement. Previously he worked at Twente University, Eindhoven University of Technology, Polytech Brabant and as a management consultant at Infologic and Vreelandgroup. Heemstra holds a Master Degree and a PhD degree in Industrial Engineering from Eindhoven University of Technology. His work, interests and research focuses on Management of IT, particularly IT Risk Management, Software Management, IT Cost Benefit Management, Software Cost Estimation and Control, Software Quality Management, Software Requirement Management, IT Project Management and Information Economics.

Blanca Hernandez has a Ph.D. in Business Administration and is lecturer in the Department of Marketing and Business Management at the University of Zaragoza (Spain). Her research interests
include the acceptance of new technologies, knowledge management systems, and e-commerce. Her work has been published in journals such as Industrial Marketing Management, Internet Research, Technovation, Journal of Business Research, Journal of Business and Industrial Marketing and Online Information Review.

**Corrie Huijs**, MSc is a consultant at M&I Partnersbv with a focus on e-government services and information management in the area of education. Former research activities as a researcher in the Department of Computer Science of the University of Twente included business-IT alignment, architecture of information systems, requirements engineering, design methodology, e-government and collaborative learning. Her educational work at the University of Twente included supervision in projects for the design of industrial information systems.

**Guy Janssens** is, after several business functions in the field of information management, employed as assistant professor at the School of Management at Open Universiteit Nederland. He develops courses and teaches the subjects: Enterprise Resource Planning, Project Management and Management and Information Technology. He is currently doing Ph.D. research on the subject ‘estimating costs of ERP implementation projects’.

**Julio Jimenez** has a Ph.D. in Business Administration and is professor in the Department of Marketing and Business Management at the University of Zaragoza (Spain). His research in adoption and diffusion of innovations has been published in several journals, such as Research Policy, Industrial Marketing Management, Internet Research, Online Information Review, European Journal of Marketing and Technovation.

**Omar E. M. Khalil** is currently a professor of information systems at Kuwait University. He has a PhD in information systems from the University of North Texas. His publications have appeared in journals such as the Journal of Global Information Management, Journal of Organizational and End-User Computing, Information Resources management Journal, International Journal of Production and Economics, International Journal of Man-Machine Studies, Journal of Business Ethics, and Journal of Informing Science. His research interest includes information systems effectiveness, global information systems, information quality, and knowledge management.

**Rob Kusters** obtained his master degree in econometrics at the Catholic University of Brabant in 1982 and his PhD. in operations management at Eindhoven University of Technology in 1988. He is professor of ‘ICT and Business Processes’ at the Dutch Open University in Heerlen where he is responsible for the master program ‘Business process Management and IT’. He is also an associate professor of ‘IT Enabled Business Process Redesign’ at Eindhoven University of Technology where he is responsible of a section of the program in management engineering. He published over 90 papers in international journals and conference proceedings and co-authored six books. Research interests include process performance, enterprise modelling, software quality and software management.

**Anne Lämmer** is a software engineer at Capgemini sd&m AG in Germany. Her research activities concentrate on the development of robust and adaptable software architectures. The theme of her doctoral thesis is in the field of self-organisation and self-diagnosis in enterprise systems.
About the Contributors

Wenhe Liao is a professor of mechanical and electrical engineering at NUAA, China. He received his master's and PhD degrees from the Department of Aerospace Manufacture and Engineering at NUAA, in 1990 and 1996, respectively. He is currently the director of Jiangsu Engineering Technology Research Center for Digital Design and Manufacture, the dean of Academy of Frontier Science. Prof. Liao takes charge of many different R&D projects, and concentrates his academic work on manufacturing information technology and CAD/CAM.

Mark Lycett (mark.lycett@brunel.ac.uk) is a Reader in Adaptive Information Systems at Brunel University, examining the complex dynamics that couple people, process, information and technology. His research interests relate to the principles and mechanisms of adaptation/evolution in the natural and social realm and how they can be brought to fruition using modern technologies, in particular to guide and improve people’s experience with technology. Mark has published his work in a number of leading journals and conferences and is engaged in ongoing research with a number of organizations. Prior to returning to education, he spent a number of years in industry, primarily in project management.

Boris Minkin is a guest researcher at the Center for Electronic Commerce and Knowledge Economics Research, National Chung Hsing University (NCHU) in Taiwan. He has more than 16 years of experience working in the areas of information technology and financial services. In his professional career, Boris has successfully completed numerous IT projects, and become an IBM Certified WSAD Enterprise Developer, IBM Certified WebSphere Solution Developer, IBM Certified WebSphere Systems Expert, and Sun Certified Java Programmer. He received a BS in electrical engineering and computer science degree from St. Petersburg Marine Technical University, and a MS in information management degree from Stevens Institute of Technology, New Jersey. His professional interests are in Internet technology, enterprise application architecture, Java technology, multi-platform application, object oriented methodology & application, network management, and relational database design.

Amit Mitra lectures on information systems theory and practice at the Department of Information Systems of Cranfield University. Over the last decade Mitra has been active in a range of research areas including knowledge management, database management systems, electronic commerce, research methods in information systems and public sector information systems implementation. His work has been published in various peer reviewed journals. As a practice-based researcher, Amit is regularly invited to deliver talks in different research led fora within higher education.

Joseph R. Muscatello is an Assistant Professor of Business Management and Related Technology at Kent State University- Geauga. He received his Doctorate from the Cleveland State University and researches in the areas of enterprise systems, supply chain management, forecasting, project management and the impact of technology on organizations. He has published in Omega, International Journal of Operations and Production Management, Information Resource Management Journal, Applied Computing and Informatics, Journal of Business Forecasting, Journal of Safety Research, Business Technology Educator and the Business Process Management Journal. He has also published several book chapters and presented at academic and professional venues over 50 times! Dr. Muscatello is a former Director with Cap Gemini Ernst & Young and has Fortune 500 executive level manufacturing experience in the chemical and metal industries. He is APICS certified at the Fellow level and teaches APICS certification
About the Contributors

courses domestically and internationally. He is the owner of several businesses and sits on 2 for-profit and 2 non-profit Boards of Directors.

Navonil Mustafee (navonil.mustafee@brunel.ac.uk) received his Ph.D. in Information Systems and Computing from Brunel University. Presently he is working as a research fellow in Grid Computing and Simulation in the School of Information Systems, Computing and Mathematics, Brunel University. His research interests are in Grid Computing, Parallel and Distributed Simulation, Healthcare Simulation and Information Systems.

Jonathan D Owens is a Senior Lecturer in Operations and Logistics management at the Lincoln Business School, University of Lincoln, United Kingdom. He has track record for publishing in the fields of Operations, Logistics and Supply Chain Management. He is a Chartered Engineer registered with the UK engineering council and currently a Visiting Professor in Logistics Management at the Tecnológico de Monterrey University, México. He is on the editorial panel for numerous journals in his field.

S. Parthasarathy is a Senior Grade Lecturer in the Department of Computer Applications, Thiagarajar College of Engineering, Madurai, India. He is a B.Sc., (Mathematics), M.C.A. (Master of Computer Applications), M.Phil., (Computer Science), P.G.D.B.A. (Business Administration), P.G.D.P.M. (Planning and Project Management) professional. A habitual rank holder, he has been teaching at the post-graduate level since 2002. He has published research papers in peer reviewed international journals and international conferences. He has written two text books in his area of specialization and they were published by The New Age International Publishers (P), Ltd., New Delhi, India, in the year 2007. He has authored several chapters on Enterprise Resource Planning (ERP) in the Edited Books published by the IGI Global, USA in 2008. He is currently the Editor-in-Chief for the Edited Book “Enterprise Information Systems and Implementing IT infrastructures: Challenges and Issues” to be published by IGI Global, USA in 2010. He is the Principal Investigator for the research project “Requirements Management in COTS Software Projects” funded by the University Grants Commission, New Delhi, India. His current research interests include enterprise information systems, enterprise resource planning and software engineering.

S. T. Ponis is a lecturer in SIMOR/NTUA. Dr. Ponis holds a PhD from NTUA in the area of information systems analysis and design to support SMEs forming networked organizations. Dr. Ponis has worked as an IT Manager on behalf of a leading apparel enterprise, and was involved in several research projects on behalf of NTUA/SIMOR. He has contributed in the areas of production planning and control, supply chain management, business process modeling, networked and virtual enterprises and Web information systems. His current research interests are in supply chain management, knowledge management and logistics, UML and agent modeling, e-commerce.

Lene Pries-Heje is a PhD student in the Software Development Group at the IT University of Copenhagen, Denmark. She received her MSc in computer science and business administration from Copenhagen Business School in 1991 and has worked for more than 10 years as an ERP consultant, ERP project manager and consultant manager. Since 2002 she has worked as a part time lecturer in Information Systems at Copenhagen Business School and The IT University of Copenhagen. Her research interests include ERP systems, implementation methods, socio-technical design, and cooperative design.
About the Contributors

Muthu Ramachandran is currently a principal lecturer in the Faculty of Innovation North: Information and Technology, Leeds Metropolitan University, Leeds, UK. Previously he spent nearly eight years in industrial research (Philips Research Labs and Volantis Systems Ltd, Surrey, UK) where he worked on software architecture, reuse, and testing. Prior to that he was teaching at Liverpool John Moores University and received his PhD was from Lancaster University. His first career started as a research scientist from India Space Research Labs where he worked on real time systems development projects. Ramachandran has widely published articles on journals, chapters, and conferences on various advanced topics on software engineering and education. He did his master’s degrees from Indian Institute of Technology, Madras and from Madurai Kamaraj University, Madurai, India. Muthu is also a member of various professional organizations and computer societies: IEEE, ACM, BCS, HEA.

Alexei Sharpanskykh is a postdoctoral researcher at the Vrije Universiteit Amsterdam. He received his PhD degree at the Vrije Universiteit Amsterdam in the area of artificial intelligence. Currently he is doing research in modeling and analysis of multi-agent organizations in the context of a number of projects in the areas of logistics, incident management and air traffic control.

Huibin Shi, associate professor, school of software engineering, Tongji University, China. Dr. Huibin Shi was awarded PhD in computer science and MSc in software engineering respectively by the University of York, UK. His research interests include: Software engineering, management information system, microprocessor design and performance measurement, instruction level parallelism, compiler techniques, benchmarking, (Stack) microprocessor architecture, system on chip (SOC) design.

Yan Su is a PhD candidate in the college of mechanical and electrical engineering at Nanjing University of Aeronautics and Astronautics (NUAA), China. She received a bachelors degree from the college of aerospace engineering and a master’s degree from the college of mechanical and electrical engineering, at NUAA in 1998 and in 2002 respectively. Her research interests are in the areas of mass customization, enterprise information, and CAD/CAM, with emphasis on virtual manufacture and supply chain management.

Simon J.E. Taylor (simon.taylor@brunel.ac.uk) is the Founder and Chair of the COTS Simulation Package Interoperability Product Development Group (CSPI-PDG). He has served as the Chair of ACM’s Special Interest Group on Simulation (SIGSIM) 2005 to 2008. He is a Reader in the School of Information Systems, Computing and Mathematics at Brunel University.

Lex van Velsen, MSc is working toward the PhD degree in the technical and professional communication department at the University of Twente, Enschede, The Netherlands. His research interests include personalized communication systems, electronic government services and user-centered design. His latest research projects focused on user requirements engineering for e-government services and a comparison of different methods for the evaluation of personalized systems.

Thea van der Geest, PhD is an associate professor at the communication studies/technical and professional communication department of the University of Twente, The Netherlands. She teaches courses in interface & interaction design and research methodology. Her research focuses on information and document design for interactive media, with a special interest on the design and evaluation process and user-centered research methods. She has conducted and supervised numerous user studies on requirement analysis, acceptance, personalization, usability and accessibility of systems. Her recent research projects are focusing on requirements engineering for and evaluation of e-government services and systems for Dutch and international government agencies.

Chun-Po Yin holds a PhD degree in Information Management from National Sun-Yat-Sen University, Taiwan. He is a teacher of Haiching Vocational High School of Technology and Commerce, and concurrently an Assistant Professor of Information Management at the Cheng Shiu University, Taiwan. His current research interests include group supporting systems, organizational communication, and issues of information society.
