About the Contributors

Tasos Spiliotopoulos is a researcher at the Department of Informatics and Telecommunications, National and Kapodistrian University of Athens, Greece. As a member of the Information Systems Laboratory Research Group since 2000 he has participated in numerous EU and national research projects. His current research focuses on human-computer interaction, computer systems usability, the social web and online security and privacy.

Panagiota Papadopoulou is currently a research associate at the Department of Informatics, University of Athens. She holds a B.Sc (Hons) from the Department of Informatics, University of Athens, an MSc with distinction in Distributed and Multimedia Information Systems from Heriot-Watt University, U.K. and a PhD from the Department of Informatics, University of Athens. She has worked as a visiting professor at the University of Athens, University of Pireaus and the University of Peloponnese. Dr. Papadopoulou has also actively participated in a number of European Community and National research projects. Her current research interests focus on web-based information systems, interface design and online trust.

Drakoulis Martakos is an associate professor and head of the Sector of Computer Systems and Applications at the Department of Informatics and Telecommunications of the National and Kapodistrian University of Athens, Greece. He is also director of the Information Systems Laboratory (ISLab) Research Group within the department. Professor Martakos is a consultant to public and private organizations, a project leader in numerous national and international projects and the author or co-author of more than 70 scientific publications and a number of technical reports and studies.

Georgios Kouroupetroglou holds a B.Sc. in physics and a Ph.D. in Communications and Signal Processing. He is the Director of the Speech Laboratory, Department of Informatics and Telecommunications, University of Athens and Head of the e-Accessibility Unit for Students with Disabilities. His current research interests focuses on the area of Speech Communication and Accessibility, as parts of the major domain of Multimedia and Human-Computer Interaction. Dr. Kouroupetroglou has actively participated in a number of European Union funded and National research projects. He has been reviewer/evaluator and member of working groups/technical panels of various European Union’s projects/programs.

Jim Aitchison currently works as an international trade and compliance manager at Selex Galileo, UK, which is part of the Finmeccanica group. Jim has worked in the Aerospace Industry for over 25 years working on import and export control and international licensing. For the past five years Jim has...
been focusing on the introduction of new export controls within the UK and also in design and implementation of compliance systems for international trade. Jim is currently involved in numerous projects to ensure compliance with international legislation covering the import and export of commercial and military goods and the wide ranging controls required by Customs. He has also been involved in a number of prizes for innovation within his field of expertise and remains committed to improving business processes at all levels within a fast moving and complex environment.

Daniela Andrei is an assistant professor and PhD student at the Faculty of Psychology and Education Sciences, Babes-Bolyai University, Cluj-Napoca, Romania. She is a licensed psychologist and holds a Master degree in Human Resources Management and Marketing. She has participated in several international training programs in the field of human-computer interaction and interaction design and recently became involved in COST Action IC0904 on the Integration of Transectorial IT Design and Evaluation. Her current research focuses on integrating the use social sciences methods in interactive systems design, implementation of interactive systems in organizations, compatibility between interactive systems’ design and organizational culture.

Tanja Arh, M.Sc. graduated of Computer Science at the Faculty of Organizational Sciences, University of Maribor. She obtained her Master’s degree at the Faculty of Organizational Sciences, University of Maribor. She is a PhD candidate at Faculty of Economics, University of Ljubljana. She works in Laboratory for Open Systems and Networks at Jožef Stefan Institute as a researcher in the field of e-learning and organizational learning. Her current research is performed mostly for European-wide research programmes (e4VET, MeRLab, iCooper, etc.) with focus on e-learning, applications of ICT in education, education and transfer of knowledge, human resource development and organizational learning. Tanja Arh is member of Executive Board of Slovenian Project Management Association. She is Technical editor of Slovenian scientific journal Project Management Review.

Andrew H. Bott, Metallurgical Engineer from Sheffield, UK, worked in industrial research and development at the British Steel Corporation in England, before becoming a visiting lecturer at Sheffield City Polytechnic (SCP). As a UKAEA CASE Award Associate and EURATOM Research Fellow at SCP he worked on alloy design for fast breeder fission and tokomak fusion reactors. From 1986 to 1998 he continued in metallurgical and electron microscopy research at the Federal University of Rio de Janeiro (UFRJ) in Brazil. In 1998 Andrew accepted an administrative post as Coordinator at the COPPETEC Foundation, a non-profit institution which administers the R&D projects of UFRJ’s post-graduate and engineering research school, COPPE. His work at COPPETEC has involved strategic planning and organizational reengineering, including integrated management software development. He is a Director of the Brazilian National Council for Higher Education Scientific and Technological Research Support Foundations (CONFIES).

Tayana Conte is an Assistant Professor of Computer Science Department at UFAM - Federal University of Amazonas – Brazil. She received her doctorate degree from COPPE/UFRJ (Federal University of Rio de Janeiro) in 2009. Her current research interests include Usability Evaluation for Web, Web Engineering, Experimental Software Engineering and VV&T. Tayana Conte is member of the Brazilian Computer Society (SBC).
**Tania Di Mascio** obtained a Ph.D. degree in Electric and Information Engineering at the DIEI of L’Aquila University, working on HCI, more precisely, on UCDM, usability and information visualisation. Since 2006, Di Mascio is employed at the University of L’Aquila. Since 2008, Di Mascio is also a researcher at IASI LEKS of CNR, in Rome. Her research works are mainly in HCI design, information visualisation and usability.

**Sanda Erdelez** is an Associate Professor at the University of Missouri, U.S.A., School of Information Science and Learning Technologies and the founder of the Information Experience Laboratory (http://ielab.missouri.edu). She obtained bachelors and masters degrees from the University of Osijek, Croatia; and a Ph.D. from Syracuse University, where she studied as a Fulbright Scholar. Dr Erdelez conducts research, teaching, and consulting in human information behavior, Internet search behavior, and usability evaluation. Her research in accidental aspects of information behavior (information encountering) has been funded by SBC Communication and Dell Inc and she also served as a research team member and a co-PI on research projects funded by the U.S. Department of Education and the National Science Foundation. Dr. Erdelez co-edited (with K. Fisher and L. McKechnie) the Theories of Information Behavior (Information Today, 2005) and authored more than 80 research papers and presentation.

**André P. Freire** is a researcher at the University of York. His research interests are related to techniques and methods to help in the inclusive design and evaluation of web systems. In his previous research projects at the University of São Paulo, he conducted research on the awareness of web developers in Brazil regarding web accessibility. He has also conducted wide studies on the accessibility of governmental web sites at Brazil over time. His current work is focused on the investigation of issues regarding the impact of the involvement of users with disabilities on quantitative metrics in the accessibility evaluation of web sites.

**Rosella Gennari** obtained a Ph.D. degree in Computer Science at the ILLC institute of the University of Amsterdam, working on constraint programming and automated reasoning for modal logic. Since 2005, Gennari is employed as assistant professor at the Department of Computer Science of the Free University of Bozen-Bolzano. Previously, she was post-doc ERCIM fellow at CWI, Amsterdam, The Netherlands, and then post-doc fellow at the Automated Reasoning Systems division of ITC-irst (now FBK-irst), Trento, Italy. Her research work is in constraint programming, modal automated reasoning and, more recently, AI educational tools. Lately, she has worked on e-LIS and LODE, two projects and intelligent educational web tools for deaf people.

**Petros P. Georgiakakis** holds a PhD from Department of Technology Education and Digital Systems, University of Piraeus. His research interests include Usability Evaluation of Network Supported Collaborative Learning systems, based in advanced educational technologies with the use of Design Patterns. He has participated in a great number of European R & D projects. He is member of the CoSy LLab (Computer Supported Learning Engineering Laboratory) [http://cosy.ted.unipi.gr]. He has written more than 20 papers which have been presented in international workshops and conferences. He is the CEO of ITisART.Ltd [http://www.itisart.com.gr], which is a company specialising in creating integrated innovative interactive technological solutions mainly in the sectors of e-commerce, e-learning and digital
art. He is also one of the founders of VideoAnnotator.Ltd [http://www.vannotator.com]. He is a member of many International Forums such as the Educational Technology & Society and the International Forum Community “Quality Assurance in VET”.

**Juan Manuel González Calleros** is a Researcher assistant of the University catholic of Louvain (UCL). He is member of the Belgian Lab of Human Computer Interaction and of the UsiXML consortium. Having received a scholarship award, he came to Belgium and completed his DEA in computer Science at UCL. He received a master degree in Computer Sciences at National Institute of Astrophysics, Optics and Electronic (Mexico). Juan Manuel Gonzalez Calleros is pursuing a PhD in Computer Sciences with the thesis model Driven engineering of 3D User Interfaces at UCL, Louvain School of Management (IAG-LSM). He is responsible of HCI activities of the Human project (The European project to develop a methodology with techniques and prototypical tools based on a cognitive model of the crew behaviour, to support the prediction of human errors in ways that are usable and practical for human centred design of systems operating in complex cockpit environments).

**Adriana-Mihaela Guran** is lecturer at the Department of Computer Science of the Faculty of Mathematics and Computer Science, Babeş-Bolyai University of Cluj-Napoca (Romania). She holds a bachelor’s degree in computer science and a master’s degree in computer science (both from the University of Cluj-Napoca). She has a PhD focusing on ergonomic modeling of user interfaces obtained from the same university. Her current research focuses on integrating social sciences methods in interactive systems design, automatic usability evaluation methods, and intelligent interfaces.

**Steven Hogg** is currently working as an IT Business Analyst at Selex Galileo, UK, which is part of the Finmeccanica group. He studied Computer Science at Heriot-Watt University (Edinburgh) and was awarded an MPhil by research. Steven has been in the Aerospace Industry for over 30 years working mostly in Manufacturing and Operations. For the past seven years Steven has been focusing on the design of web systems to support manufacture. Through the years Steven has been involved in numerous high technology projects to improve manufacture and these e.g. include the design and development of wearable computers with augmented virtual reality displays. He has been awarded a number of prizes for innovation. Steven’s current work is focused on the design of a new web portal system to enhance ITAR compliance within the USA.

**Tomayess Issa** is a Lecturer at school of Information Systems – Curtin University of Technology, Western Australia. She is holding a Doctor of Philosophy degree from Curtin University – Western Australia, Master of Science (Telecommunication Management) and Bachelor of Science (Information Systems) from Murdoch University – Western Australia. From 2001, she worked at Curtin University, as Unit Leader for Undergraduate and Postgraduate units, which are focusing on Business Technology, Networking Telecommunication Management, Web Design and Usability. In addition, she is supervising postgraduate students. Her research interest included Web Design, Usability, Websites Methodologies, Human Computer Interaction, and Social Networking. She is also interested in establishing teaching methods and styles to define the positive aspects of learning experiences and problems, which are facing students during the semester in order to enhance the positives and address concerns.
About the Contributors

**Borka Jerman Blažič** is working as a head of the Department for Open Systems and Networks at Jožef Stefan Institute and in the Department of Economics, University of Ljubljana as Full Professor teaching Telecommunication Services and Technologies (post-graduate) and Legal aspects and standards in ICT. The main field of applications and research are computer communications, internet technologies, security in networking, privacy and internationalisation of Internet services, etc. Borka Jerman-Blazačič is a member of many professional associations and is appointed expert to UNECE UN (Economic Commission for Europe), appointed member of UNECE/CEFAT Team of specialist on Internet enterprise development, appointed member of eTEN management committee of EU, member of FP7 PC on security, chair of the Execom of the Internet Society of Europe (www.isoc-ecc.org), member of New York Academy of science 1999, IEEE, ACM, distinguished member of Slovene Society for Informatics, member of IEEE on Computers, ACM. She is also chair of Slovenian Standardisation Committee on ICT as well as chair of the Slovenian chapter of Internet Society and a member of the European ICT Standardisation Board. She is holding Plaque of appreciation of Thai branch of IFIP and ACM for her services in Internet development. She has published more than 80 papers in refereed journals, 154 communications scientific meetings, 15 chapters in scientific books, 6 books and other 142 non-classified contributions.

**Kathy Keeling** is a Senior Lecturer in Marketing Research at Manchester Business School. She has worked closely and gained research support from many organisations, the larger including Boots, British Airways, the Co-operative Bank (now Co-operative Financial Services), CWS, Manchester Evening News and Microsoft; cross-disciplinary interests are reflected in the research funding obtained from both the ESRC and EPSRC. Her most recent project under the Realising Our Potential Award (ROPA) scheme is entitled Human Computer Relationships And Persuasiveness In E-Retailing. She has published a number of papers across retailing, marketing, e-commerce and human-computer interaction and universal access to IT fields.

**Aidan Kehoe** has worked in industry for more than 20 years in a variety of software development roles, including at Logitech USA as Director of Software Engineering. He has worked on product and middleware development for peripherals on a variety of gaming platforms including PC, Sony and Nintendo. He recently completed his PhD studies at the Department of Computer Science at University College Cork, Ireland where he is also a researcher for the IDEAS Research Group. His area of research is multimodal user assistance and he currently works for Logitech, Ireland in product development for the Gaming Business Unit.

**Georgios Kouroupetroglou** holds a B.Sc. in Physics and a Ph.D. in Communications and Signal Processing. He is the Director of the Speech Laboratory, Department of Informatics and Telecommunications, University of Athens and Head of the e-Accessibility Unit for Students with Disabilities. His current research interests focuses on the area of Speech Communication and Accessibility, as parts of the major domain of Multimedia and Human-Computer Interaction. Dr. Kouroupetroglou has actively participated in a number of European Union funded and National research projects. He has been reviewer/evaluator and member of working groups/technical panels of various European Union’s projects/programs.

**Linda Macaulay** (B.Sc, M.Sc, PhD, CEng, Cert. Ed., FBCS) Professor of System Design at Manchester Business School (MBS) is twice holder of the prestigious IBM Faculty Award 2004 and 2006 for work on e-business patterns. She is Director of the MBS Centre for Service Research and Principal
About the Contributors

Investigator on the EPSRC funded SSME UK network project. She has led over 25 externally funded projects won through competitive bids and her work is widely published in over one hundred journal papers and articles.

**Jobson Massolar** has B.Sc. in Computer Science from Universidade Federal Fluminense (1990) and M.Sc. in Systems and Computer Engineering from COPPE / UFRJ (1993). Currently he is a doctoral student in Systems and Computer Engineering at COPPE / UFRJ, with emphasis on Software Engineering. He have taught disciplines regarding Project Management, Software Project Planning and Estimation, ER and OO modeling, Modeling with UML and Programming for Web in several post-graduate courses. In the area of Software Engineering, he has worked in the following subjects: Web Engineering, Experimental Software Engineering, Usability Evaluation for Web and VV&T. He has extensive experience in software systems development, participating for more than fifteen years in various projects in the areas of sales, marketing, logistics, HR and finance.

**Emilia Mendes** is Associate Professor in Computer Science at the University of Auckland (New Zealand). She has active research interests in the areas of Empirical Web & Software Engineering, Evidence-based research, Hypermedia, Computer Science & Software Engineering education, in which areas she has published widely and over 120 refereed publications, which include two books (one edited (2005) and one authored (2007)). A/Prof. Mendes is on the editorial board of the International Journal of Web Engineering and Technology, the Journal of Web Engineering, the Journal of Software Measurement, the International Journal of Software Engineering and Its Applications, the Empirical Software Engineering Journal, the Advances in Software Engineering Journal, and the Software Quality Journal. She worked in the software industry for ten years before obtaining in 1999 her PhD in Computer Science from the University of Southampton (UK), and moving to Auckland (NZ).

**Joi L. Moore** is an Associate Professor in the School of Information Science & Learning Technologies at the University of Missouri where she manages and teaches courses in the Digital Media Curriculum. Dr Moore’s current research interests include: constructing knowledge in online learning environments; analyzing information architecture in Electronic Performance Support Systems and Interactive Learning Environments; and designing user-centered web applications (Human Computer Interaction and Human Information Behavior).

**Jaime Muñoz Arteaga** is Professor in Computer Science at Universidad Autónoma de Aguascalientes in Mexico. He is a researcher in Human-Computer Interaction, and web technologies. He holds a Ph.D. in Computer Science, Human-Computer Interaction (University Toulouse 1 (UT1), Toulouse, France, 2000). He has reported his work in journals, book chapters, conference papers, and technical reports, and so far has supervised several students at the graduate and undergraduate level. He is coordinator of Instructional Technology for Multicultural Learning Objects project .His current research interests include topics on: Human-Computer Interaction, Software Engineering and E-learning.

**Flaithrí Neff** is a researcher for the IDEAS Research Group at the Department of Computer Science, University College Cork, Ireland where he has recently completed his PhD studies. He is also an assistant lecturer at the Limerick Institute of Technology, Ireland since September 2009. His research interests are in virtual sonic interface design and intelligent hearing systems. He is particularly focused
on applying his research to accessibility issues pertaining to visually disabled users of technology. In 2002 he attained a first class honours MSc degree at the University of Limerick, Ireland specializing in Audio Technology.

**Patrik O’Brian Holt** is Research Professor of Computing (Human Factors Engineering) at the School of Computing, the Robert Gordon University, Aberdeen. He is also Director of the Computational Systems Joint Research Institute, which is part of the Northern Research Partnership in Engineering, a joint venture by the Universities of Dundee, Aberdeen and Robert Gordon. Professor Holt has been a Computer Scientist for over 20 years but has a background in Experimental Cognitive Psychology, Statistical Modelling and Cognitive Science. He has published widely and has received research funding from diverse sources, including EPSRC, BBSRC, Scottish Executive, New Opportunities Fund (UK National Lottery) and various industrial organisations such as BAE SYSTEMS (Edinburgh) and Lockheed-Martin (Atlanta, USA). Professor Holt’s current research interests are focused on modelling human errors in telehealth and advanced visualisation in tele-operation.

**Wendy Olphert** is a Senior Research Fellow in the Department of Information Science at Loughborough University. Wendy’s broad research area is the human, social and organisational aspects of information and communication technologies, and in particular the way in which such technologies can be designed and shaped to meet human, organisational and social requirements. ICTs. She has led numerous research and consultancy projects around these themes. Her current research focus is the use of ICTs by older people and in the voluntary sector. Wendy has previously published in journals including the Journal of the Association for Information Systems, the Journal of the Operational Research Society, Behaviour and Information Technology, and the European Journal of Work and Organizational Psychology. She is co-author (with Leela Damodaran) of a book entitled “Informing Digital Futures: Strategies for Citizen Engagement” (Springer, 2006).

**Catherine Parkinson** is a freelance researcher and information scientist, with a background in information provision for disabled people. She trained in information science at Loughborough University and was the winner of the Dunn and Wilson Ltd. Prize for best performance on the MA/MSc Information and Library Management Programme. She was also awarded the Library and Information Research Group (LIRG) postgraduate prize in 2007 for her dissertation ‘Website accessibility statements: A comparative investigation of local government and high street sectors.’ The dissertation was supervised by Wendy Olphert.

**Anindita Paul** is a Doctoral Candidate at the School of Information Science and Learning Technologies at the University of Missouri. She is also a senior usability researcher at the Information Experience Lab where she is actively involved in planning, conducting, managing, and reporting usability related issues of the different projects. She is also actively involved in training in the usability area and has done cross-cultural training for the labs many international collaborators and visitors. Her dissertation research is in web analytics and its use for understanding the users’ online behavior. Her research interests include online users’ information behavior, usability techniques, and cultural aspects of information behavior. Anindita did her Masters in Business Administration, and then gained industry experience before joining the school.
Jean-Eric Pelet has a PhD in marketing with distinction from Nantes University (France) and a MBA in information systems with distinction from Laval University (Québec, Québec, Canada). He works as a research associate at ISG Paris on issues dedicated to the interface and to the consumer behaviour facing a website or any information system (e-learning, CRM, ERP, KM, BI, SCM platforms). His main interest lies on the variables that enhance navigation in order to help people to be more efficient. He works as a visiting professor in several places in France in Design School (Nantes), Business Schools (Paris, Reims), and Universities (Paris Dauphine – Nantes), on lectures focused on e-marketing, ergonomics, usability, and consumer behaviour. Dr. Pelet has also actively participated in a number of research projects around e-commerce.

Helen Petrie is Head of the HCI Group as a Professor of Human-Computer Interaction in the Department of Computer Science. She has been involved in many research projects on the design and evaluation of technology for disabled and elderly people, including 12 EU-funded projects; for the EU-funded MultiReader Project she was Project Leader. She led the team that conducted the largest and most comprehensive study of website accessibility for the Disability Rights Commission of Great Britain and the same team conducted a similar study of web accessibility for the UK Council of Museums, Libraries and Archives (MLA). She also led the academic work on the UK funded VISTA Project on the accessibility of digital television which won the Royal Television Society Award for Technical Innovation in 2003. She is on the board of a number of academic journals, is a Lay Advisor to the Royal College of Ophthalmologists and is a trustee of the Foundation for Assistive Technology (FAST).

Matija Pipan, M.Sc. obtained his Master’s degree at Faculty of Economics, University of Ljubljana. His master thesis was Methods and Techniques for Usability Evaluation of Software Solutions. He works in Laboratory for Open Systems and Networks at Jožef Stefan Institute as a researcher. His key qualifications are focused on usability evaluation of information communication technologies (ICTs) and on development of technology enhanced learning systems and technologies. Currently he is involved in several EU research projects from the field of usability evaluation and e-learning. Matija Pipan is representative of Slovenia in EU COST project MAUSE - Towards the MAturation of Information Technology USability Evaluation.

Horia D. Pitariu is a professor of work and personnel psychology at the Faculty of Psychology and Education Sciences, Babes-Bolyai University, Cluj-Napoca, Romania. His expertise is in personnel selection, professional performance assessment, stress and emotions in organizations and human-computer interaction. He was involved in several projects and actions in the field of human computer interaction at the European level (program of the Institut für Arbeitsphysiologie Universität Dortmund - Germany: Psycho physiological correlates in learning a novel VDU task, COST Action 294 (MAUSE) on usability evaluation, COST Action IC0904 on the Integration of Transectorial IT Design and Evaluation). He introduced courses of cognitive ergonomics and human computer interaction at undergraduate and postgraduate levels at the Faculty of Psychology and Education Sciences. His current research interests in this field are represented by the role of emotions and personality variables in interactive systems usability and acceptance.

Ian Pitt is a lecturer in Usability Engineering and Multimedia at University College Cork, Ireland. He attained his PhD at the University of York, UK, then spent a year as a post-doctoral research fellow
About the Contributors

Christopher Power is a Research Fellow in the University of York HCI Group. Coming from a software engineering background, he has participated in multiple research projects relating to web accessibility, specifically working on the development of test methodologies for web accessibility. Further, he has worked in the management of requirements for people with disabilities in the creation of websites and in the establishing the accessibility of web authoring tools.

David Prytherch is Senior Research Fellow in Haptics and Computer Interface Design working in User-lab, a dedicated research and development lab in User Centred Design, Human Computer Interaction and Haptics. Prior to this, he had 30 years professional experience as a freelance glass engraver/sculptor and is a Fellow of the Guild of Glass Engravers. Research interests include Haptic (tactile) learning and teaching, the role of haptics in skill development, particularly in the arts, haptic implications in activity satisfaction and motivation, and issues surrounding tool use and material embodiment, particularly with regard to computer interface systems. A particular interest lies in the development of inclusive interface systems that facilitate transparent access to creative processes for people with disabilities.

Symeon Retalis is associate professor at the Department of Digital Systems, University of Piraeus, Greece. He has performed research in the field of elearning engineering since many years. He is coordinating the activities of the research group called CoSy Learning Lab. He has participated in and coordinated various EU funded projects in the area of technology enhanced learning. His publications concern the creation of elearning design patterns, design of learning tools for children and lifelong e-learning and human computer interaction.

Andy Saxon is Director of e-Learning at Birmingham City University’s Institute of Art and Design, and a University Senior Learning and Teaching Fellow. His research interests lie in the application of arts-based models of designing to software user interface development, the evaluation of the software user interface and user experience design for software. The main focus of this work has been toward web and multimedia software. He is also involved in the development of e-learning initiatives within the Institute’s Learning and Teaching Centre, which he leads. These include the design and evaluation of reusable learning objects, and research into e-pedagogies for art and design. He supervises Doctoral and Masters’ students in the School of Visual Communication, where he is also Head of Research.

Shawren Singh is a PhD candidate at the University of South Africa and a faculty member. His research interest include: Problem-Based Research in Information Systems, Human Computer Interaction (HCI), Web-based Courseware Tools, Internet Applications, Blended Education, E-commerce and Accounting Information Systems.

Mikael B. Skov is an associate professor at the HCI Lab, Department of Computer Science, Aalborg University, Denmark. Mikael completed his PhD in 2002 at Aalborg University on design of interactive narratives. He teaches general human-computer interaction to undergraduate computer science and informatics students as well as advanced human-computer interaction to graduate students. Mikael has
About the Contributors

supervised more than 25 Masters students on various topics within interaction design or human-computer interaction. His research interests are human-computer interaction and interaction design especially within mobile, pervasive, and ubiquitous computing. Mikael is currently involved in a major research project on improving web portal usability in close collaboration with several industry partners.

Dimitris Spiliotopoulos holds a BSc in Computation, an MA in Linguistics, an MPhil in Computation and studying towards a PhD in Language Technology. He is a researcher of the Speech Laboratory, Department of Informatics and Telecommunications, University of Athens. His research focuses on speech processing, human-computer interaction, universal accessibility and natural language dialogue systems. He has participated in several EU and National projects.

Jan Stage is full professor at the HCI Lab, Department of Computer Science, Aalborg University, Denmark. Jan holds a PhD in computer science from University of Oslo. His current research interests are in usability evaluation and user interaction design, with emphasis on reduction on the effort needed to conduct usability evaluations. He has published several journal and conference articles in these topics as well as in information system development and methods for software development. Jan teaches human-computer interaction and usability engineering to undergraduate, graduate and PhD students in computer science, informatics and information technology. He is also conduction training and consulting in software companies. Jan is currently involved in a major research project on improving web portal usability in close collaboration with several industry partners.

Guilherme H. Travassos is an Associate Professor of Software Engineering in the Systems Engineering and Computer Science Program at COPPE – Federal University of Rio de Janeiro – Brazil CNPq – Brazilian Research Council researcher and FAPERJ State Scientist. He received his doctorate degree from COPPE/UFRJ in 1994. He has been with the Experimental Software Engineering Group at the University of Maryland – College Park for a post-doctoral position (1998/2000). He leads the Experimental Software Engineering Group at COPPE/UFRJ. His current research interests include experimental software engineering, e-science, software quality, software engineering environments and verification, validation and testing concerned with object-oriented software. He is is member of the ISERN, ACM and SBC – Brazilian Computer Society. Director of Planning and Administration of COPPE/UFRJ. Most of the information regarding his research projects and working activities can be found at http://www.cos.ufrj.br/~ght

Andrew Turk has degrees in Surveying, Applied Science (Cartography) and Arts (Psychology Honours and Philosophy) and a PhD. From 1993 he worked at Murdoch University, Western Australia, teaching undergraduate students, supervising postgraduate students and carrying out research and consultancy projects specializing in: design and usability evaluation of user interfaces and websites; ethnographic and socio-technical methodologies for developing information systems; Geographic Information Systems; human factors aspects of interactive television; and cultural and ethical aspects of Information and Communications Technology. He has worked on projects with Indigenous communities in the Pilbara and the Ngaanyatjarra Lands areas of WA. Currently his main research concentrates on Ethnophysiography (cultural / linguistic aspects of conceptions of landscape). In July 2007 he retired but continues as an Adjunct Associate Professor at Murdoch University.
Jean Vanderdonckt is Full Professor in Computer Science at Université catholique de Louvain (Belgium), Louvain School of Management (IAG-LSM) where he leads the Belgian Laboratory of Computer-Human Interaction (BCHI). This laboratory is conducting research, development, and consulting services in the domain of user interface engineering, a domain that is located midway between software engineering, human-computer interaction, and usability engineering. Jean Vanderdonckt is the founder and the coordinator of the UsiXML Consortium that structures activities towards the definition and the usage of UsiXML (User Interface eXtensible Markup Language) as a common User Interface Description Language. He is the scientific coordinator of the ITEA2 Call 3 project on UsiXML. He is the coordinator of HCI activities within the Similar network of excellence (The European research taskforce creating human-machine interfaces SIMILAR to human-human communication). He is also a member of the European COST n°294 Action MAUSE on usability engineering and of the SESAMI Working Group. He is a Senior member of IEEE, ACM, and SIGCHI. He is also co-editor in chief of Springer HCI Series of books.

Konstantina Vassilopoulou (B.Sc, M.B.A., M.Sc, PhD) is a Lecturer in Usability and Electronic Commerce at Harokopio University in Athens Greece. She has worked in numerous EU funded and National research projects, both in UK and Greece. Her main research interests are directed towards the role of usability and social attitude theories in designing e-commerce sites (i.e. retail, e-government and e-learning sites). She has published a number of papers across human computer interaction and social attitude theories and the usability of retail sites and e-learning.

Verônica Taquette Vaz is an undergraduate student in Computer Engineering of the Federal University of Rio de Janeiro. Her current research interests are: Requirements Engineering, Software Quality and Experimental Software Engineering.

Shane Walker is Director of Knowledge Transfer Partnerships at Birmingham City University’s Institute of Art and Design. This role determines current opportunities to develop capability and identify barriers to growth faced by creative industries in the West Midlands region and beyond. As a member of the University’s Human Computer Interaction Design Research Group his research centres on the role of the users’ motivation and emotion in software user interface evaluation and user experience design for software.

Martin West is Associate Professor in the School of Information Systems at Curtin University of Technology, in Perth Australia. His current research interests include information systems strategy, supply chain management and logistics information systems.

Borchuluun Yadamsuren is a doctoral candidate at the School of Information Science and Learning Technologies of the University of Missouri. She has worked as a senior researcher at the Information Experience Laboratory since 2005. She has been involved in managing various usability studies of websites in the laboratory and remote setting applying various usability techniques. She was involved in the planning and management of more than 20 client and research projects on usability of different websites and information systems. She has an extensive experience in conducting training sessions on usability testing with the usage of Morae both in house and internationally (Croatia, and Taiwan). Her
research interests are in user behavior studies, user-centered design and usability. Borchuluun Yadamsuren received her Master’s degree in Journalism from the University of Missouri, master’s degree in computer science from the Mongolian Technical University and bachelor’s degree in computer science from the Novosibirsk State Technology University in Russia.
