About the Contributors

Murray E. Jennex is an associate professor at San Diego State University, editor in chief of the International Journal of Knowledge Management, editor in chief of Idea Group Publishing’s Knowledge Management book series, co-editor in chief of the International Journal of Information Systems for Crisis Response and Management, and president of the Foundation for Knowledge Management (LLC). Dr. Jennex specializes in knowledge management, system analysis and design, IS security, e-commerce, and organizational effectiveness. Dr. Jennex serves as the Knowledge Management Systems Track co-chair at the Hawaii International Conference on System Sciences. He is the author of over 100 journal articles, book chapters, and conference proceedings on knowledge management, end user computing, international information systems, organizational memory systems, ecommerce, security, and software outsourcing. He holds a B.A. in chemistry and physics from William Jewell College, an M.B.A. and an M.S. in software engineering from National University, an M.S. in telecommunications management and a Ph.D. in information systems from the Claremont Graduate University. Dr. Jennex is also a registered professional mechanical engineer in the state of California and a Certified Information Systems Security Professional (CISSP) and a Certified Secure Software Lifecycle Professional (CSSLP).

Minwir Al-Shammari is Professor Operations Management & Technology at the University of Bahrain’s College of Business Administration. He holds a Ph.D in Industrial Management from University of Glasgow, UK (1990) and M.S in industrial management from University of Central Missouri, USA (1986). He has been involved for about 20 years in teaching, research, training, and/or consultancy in the areas of operations management, knowledge management, supply chain management, management information systems, business process re-engineering, project management, spreadsheet modeling, management science, and research methodology. Prof. Al-Shammari served as a member of a number of national, regional, and international professional associations. He has received a number of local, regional, and international research awards, grants, and scholarships. He served as a consultant to the UN on a Knowledge Management project in the ESCWA region. He served on the editorial boards of such refereed international publications as Journal of Systems and Management Sciences, International Journal of Applied Decision Science, International Journal of Management Innovation Systems, and Cross-Cultural Management: An International Journal. He has authored/co-authored over 30 research papers, and served as a reviewer for several regional and international research journals such as Logistics Information Management, International Journal of Production Economics, Journal of Information Systems Education, and International Journal of Production & Operations Management. Al-Shammari’s

**Summer Bartczak** is an adjunct assistant professor of management information systems at the University of Central Arkansas. She also serves as a knowledge analyst and strategy consultant with Sawdey Solution Services, Inc. in support of the Department of Defense. She worked for 21 years in the communications, computer, and information management field as an officer in the US Air Force. She holds a PhD in management information systems (Auburn University), MS in information resource management (Air Force Institute of Technology), a MA in military operational art (Air University), and a BS(US Air Force Academy). Her research interests include knowledge management strategy and implementation.

**James M. Bloodgood** is an associate professor of management at Kansas State University. He received his Ph.D. in strategic management from the University of South Carolina. His research interests include knowledge management, organizational change, international entrepreneurship, and business ethics. He has published in a variety of journals including Academy of Management Review, Decision Support Systems, Journal of Management, and Journal of Management Studies.

**Amer Celjo** is a lecturer at Sarajevo School of Science and Technology and Application Manager at MIMS Group. He completed his bachelor of EET at Oklahoma State University, USA and MBA at Schiller International University, Germany. Amer’s interest is in information technology. His work focuses on researching technical factors contributing to effective organisational learning and knowledge management.

**Bonnie Cheuk** has over 10 years of experience facilitating knowledge sharing and managing information in both private and public organisations. Since 2006, she has worked for Environmental Resources Management (ERM), the world’s largest environmental consultancy, and heads a global program which aims at promoting cross-boundary collaboration and knowledge sharing both internally and with clients. Prior to joining ERM, she headed up a knowledge management consultancy unit promoting knowledge sharing across the 32 Scottish local authorities and their partners. She was with the British Council (2002 to 2005) and with Arthur Andersen business consulting (1999 to 2002) where she helped clients to establish and implement knowledge strategy in Asia Pacific region and in the United States. Bonnie received her Ph.D. 1999 and since then has been applying Dervin’s Sense-Making Methodology and Snowden’s complexity theory to help companies design and implement user-oriented knowledge management projects and systems. Her KM projects have won awards such as Top 10 Best Intranet Awards 2009 for ERM; Information Management Award IM2004 and IM2005 for British Council. Bonnie is recognized internationally for promoting information literacy in the workplace context. She can be contacted at bonnie.cheuk@gmail.com.
Michael A. Chilton is an associate professor of management information systems at Kansas State University. He received his Ph.D. from the University of Arkansas. His research interests include knowledge management, IT performance metrics, and IT pedagogy. He has published in a variety of journals including the Journal of Management Information Systems, the Database for Advances in Information Systems and the Journal of Information Systems Education.

Andrew P. Ciganek is an assistant professor of computer information systems at Jacksonville State University. He earned his PhD from the University of Wisconsin – Milwaukee in 2006. His research interests include examining the managerial and strategic issues associated with the decision-making process of innovative technologies. He has had several refereed conference publications and has also published book chapters examining topics related to mobile computing devices and enterprise application integration.

Brenda Dervin is Full Professor of Communication and Joan N. Huber Fellow in Social and Behavioral Sciences, Ohio State University. She has worked on the development of Sense-Making Methodology for 33 years. She and colleagues have applied the approach in multiple contexts focusing in particular on user and audience studies intended to implement the design of communication/information systems and the improvement of system interfaces with users. She got her PhD in communication from Michigan State University and holds an honorary doctorate in the social sciences from the University of Helsinki. A prolific author, she has received top researcher awards from both the American Society for Information Science and Technology and the International Communication Association. She is former president and a fellow in the latter organization and for more than a decade served as an elected member of the council of the International Association of Media and Communication Research. She can be contacted at dervin.1@osu.edu.

Jean-Pierre Booto Ekionea is a PhD candidate in information systems, an independent senior consultant in IS/IT/KM, and a lecturer in the Management and Technology Department at the University of Quebec in Montreal (UQAM), Canada since 2001. He received his master’s degree in computer science from UQAM and bachelor’s degree in computer science from ISIPA-Computer Institute in Kinshasa (DR Congo). His research interests are business performance and the sustainability of competitive advantage as defined by IT/IS and KM strategies. Additional areas of study for Booto include the acquisition, development, deployment and use policies. He is currently focusing on the relationship of KM with software management and on the maturity model for KM capabilities. Booto has professional and academic experiences in IS analysis and design, user needs analysis and modeling, software management, IT/IS project management, knowledge management engineering, strategic aspects of IT/IS/KM. He is currently working for Celtel DR Congo as an independent consultant.

Mohamed El Louadi is an associate professor of management information systems at the University of Tunis, Higher Institute of Management (ISG). He has published in several IS and management journals and participated in numerous international conferences covering topics related to the adoption of information and communication technologies (ICT) and MIS. He is also the author of three books on ICT and MIS. He has held research and teaching positions at the University of Pittsburgh (U.S.), the Université du Québec à Trois-Rivières (Canada), Concordia University (Canada), the Higher Colleges of Technology (Dubai), and the American University of Beirut (Lebanon).
**About the Contributors**

**Ellen England** is currently an industrial hygiene and safety consultant for ISN Software Corporation and adjunct professor with Kaplan University. She worked for 21 years in the environmental engineering, occupational health, and academic fields as an officer in the US Air Force. She holds a PhD in environmental engineering (University of Missouri-Rolla), MS environmental health (University of Minnesota), MS general administration (Central Michigan) and BS Industrial Engineering (University of Iowa).

**Dianne P. Ford**, Ph.D., is an Assistant Professor in the Faculty of Business Administration at Memorial University of Newfoundland, St. John’s, Canada. Her research interests focus at areas that utilize her double major in MIS/OB and include: knowledge management, perceived value of knowledge, cross-cultural implications for MIS and knowledge flows, trust, and disengagement. Dianne has published articles in IEEE: Transactions in Engineering Management, and various knowledge management journals and has presented papers at Academy of Management Annual Meeting, Hawaii International Conference for Systems Sciences, and Administrative Sciences Association of Canada.

**Ronald Freeze** is an assistant professor of information systems in the accounting and information systems department at Emporia State University in Kansas. He received his PhD from Arizona State University. His current research interests include knowledge management, capability assessment and SEM modeling. Ron’s emphasis in his research is the measurement and validated contribution of knowledge to organizational performance. Freeze teaches object oriented programming, micro-computing applications, software analysis & design and business computing at the undergraduate level. His publications have appeared in the Journal of Management Information Systems and Journal of Knowledge Management. Freeze has also presented and had proceedings published from the ACIS, ECIS, AMCIS, ICIS and HICSS international conferences.

**David Gadish** is a faculty member at the Information Systems Department at the College of Business and Economics, California State University Los Angeles. His research interests include GIS, spatial data, information technology for real estate and financial sector organizations. Prof. Gadish has worked and consulted for government and industry since 1991 in GIS, information technology, and business process management.

**Jeanette Galloway** is communications and software development manager of the North Mersey Health Informatics Service in Liverpool, England. The North Mersey HIS provides information technology and management services to the National Health Service in the city. It is a shared service meeting the needs of hospitals, primary care, and community services. Jeanette graduated from the University of Central Lancashire’s MSc programme in health informatics with distinction in 2007. The case study at the heart of this paper informed the development of a knowledge management strategy for the North Mersey HIS.

**Jens Gammelgaard** is associate professor of international business at the Department of International Economics and Management at the Copenhagen Business School. He joined the Copenhagen Business School in April 1998. His main research interest is knowledge management practices of multinational corporations, international mergers and acquisitions, and subsidiary development. His work has been widely published in journals like Management International Review, Journal of International Management, Journal of Knowledge Management, International Journal of Knowledge Management and edited...
About the Contributors

Jens Gammelgaard has taught various courses on bachelor, MSc, and MBA, and is currently Program Director of the Bachelor of International Business program at Copenhagen Business School.

Alan Gillies has been professor of information management at UCLAN in Preston, England since 1994. He graduated from The Queen's College, Oxford in 1984 in chemistry. His PhD, probably the first to be awarded by UCLAN in 1992, was in problem solving methodology using KBS. He has also held a part time position in medical education at the University of Oxford, and in 2001 was awarded Doctor Honoris Causa by the University of Medicine and Pharmacy in Cluj Napoca, Romania. He is a member of the European Association of Health Information and Librarianship, a Chartered IT professional, and a Fellow of the British Computing Society. He has written over 100 publications including over 30 peer reviewed articles, and 18 books.

Lakshmi Goel is an Assistant Professor in Management at the Coggin College of Business, University of North Florida. She received her Ph.D. from the C.T. Bauer College of Business, University of Houston. Her research interests include knowledge sharing, organizational learning, and strategic management using social technologies such as weblogs, wikis, and three-dimensional virtual worlds. Lakshmi can be reached at: l.goel@unf.edu.

Amar Gupta is Thomas R. Brown Endowed Professor of Management and Technology; Professor of Entrepreneurship, Management and Organizations, and MIS; Senior Director for Research and Business Development; Eller College of Management (as well as Professor of Computer Science, College of Science), at the University of Arizona, USA. Earlier, he was at MIT from 1979 to 2004 and served as the founding Co-Director of the Productivity from Information Technology (PROFIT) Initiative. His current areas of interests include: Knowledge Acquisition; Knowledge Discovery and Data Mining; Knowledge Management; and Knowledge Dissemination. He is an Associate Editor of ACM Transactions of Information Technology (TOIT) He is one of the co-inventors of a new approach for reading handwritten numbers, and has advocated the use of electronic techniques for nationwide paper-less check processing. He serves as an advisor to a number of corporations and international organizations. He introduced a new course on outsourcing of professional activities at MIT in 2004 and is currently leading several initiatives that involve the use of geographically distributed teams of workers in diverse professions.

Meliha Handzic is an associate professor at Sarajevo School of Science and Technology, a partner of the University of Buckingham, UK. She earned her PhD in information systems from the University of New South Wales, Australia. Handzic’s research interests include knowledge management, decision support systems, e-learning and more recently e-government. She has published on these topics widely in books, journals, and conference proceedings. Her latest monograph, Socio-Technical Knowledge Management: Studies and Initiatives, provides a valuable insight into the potential and limitations of various social and technical approaches to managing knowledge.

Shyamanta M. Hazarika is an Associate Professor of Computer Science & Engineering at School of Engineering, Tezpur University, India. He received his PhD from University of Leeds, England. Prior to that, he had completed M.Tech from Indian Institute of Technology, Kanpur, India and Bachelor’s in
Richard Herschel is Chair of the Decision & System Sciences Department in the Haub School of Business at Saint Joseph’s University in Philadelphia. His research has appeared in the International Journal of Knowledge Management, Knowledge Management Review, the Journal of Knowledge Management, Decision Support Systems, the International Journal of Information Knowledge, Culture, and Change, Information Strategy: the Executive’s Journal, Small Group Research, the Journal of End User Computing, the Journal of Data Warehousing, the Journal of Information and Management Sciences, Technology Studies, and Sex Roles: A Journal of Research. Richard has taught courses in knowledge management both in the United States and China, and he teaches courses on the subject to both MBA and Executive MBA students. Dr. Herschel received his Ph.D. from Indiana University in Management Information Systems. Prior to academia, he worked as a systems analyst at Johnson & Johnson, Columbia Pictures, Schering-Plough Corporation, and Maryland National Bank.

Xiaohua (Tony) Hu is currently an associate professor and the founding director of the data mining and bioinformatics lab at the College of Information Science and Technology, Drexel University. He is also serving as the IEEE Computer Society Bioinformatics and Biomedicine Steering Committee Chair and the IEEE Computational Intelligence Society Granular Computing Technical Committee Chair (2007-2009). Tony’s current research interests are in biomedical literature data mining, bioinformatics, text mining, semantic web mining and reasoning, rough set theory and application, information extraction and information retrieval. He has published more than 160 peer-reviewed research papers in various journals, conferences and books such as various IEEE/ACM Transactions (IEEE/ACM TCBB, IEEE TFS, IEEE TDKE, IEEE TITB, IEEE Computer), JIS, KAIS, CI, DKE, IJBRA, SIG KDD, IEEE ICDM, IEEE ICDE, SIGIR, ACM CIKM, IEEE BIBE, IEEE CICBC etc, co-edited 9 books/proceedings. He has received a few prestigious awards including the 2005 National Science Foundation (NSF) Career award, the most prestigious award from NSF to young faculty in USA, the best paper award at the 2007 International Conference on Artificial Intelligence, the best paper award at the 2004 IEEE Symposium on Computational Intelligence in Bioinformatics and Computational Biology, the 2007 IEEE Bioinformatics and Bioengineering Outstanding Contribution Award, the 2006 IEEE Granular Computing Outstanding Service Award, and the 2001 IEEE Data Mining Outstanding Service Award. He has also served as a program co-chair/conference co-chair of 14 international conferences/workshops and a program committee member in more than 50 international conferences in the above areas. He is the founding editor-in-chief of the International Journal of Data Mining and Bioinformatics, an associate editor/editorial board member of four international journals (KAIS, IJDWM, IJSOI and JCIB). His research projects are funded by the National Science Foundation (NSF), US Dept. of Education, and the PA Dept. of Health and he has obtained more than US$3.8 millions research grants in the past 4 years as PI or Co-PI.

Ming Hua is a PhD student in the department of computer science at the Iowa State University.

Xia Huosong is a professor at the Department of Information Management and Information Systems of the Wuhan University of Science and Engineering. He was the visiting scholar in MIS, at Eller College of Management, at the University of Arizona. He received a Ph.D. degree in management science and
About the Contributors

engineering, and an M.S. degree in MIS from Management School at Huazhong University of Science and Technology. He received a B.S. degree in mathematics from Huazhong Normal University. His main research interests are: data mining and knowledge management, MIS, DSS, e-Commerce, and Logistics Information Systems.

Kimberly Killmer-Hollister, Ph.D. is an Associate Professor in the Department of Management & Information Systems at Montclair State University, Upper Montclair, New Jersey. Dr. Hollister’s research falls into two main categories: Applied Operations Management and Educational Program Assessment of Management Information Systems and Operations Management curriculums. Dr. Hollister’s research has been published in many peer-reviewed journals including: European Journal of Operational Research, Journal of Informatics and Education Research, Journal of Accountancy, Journal of Business & Economic Studies. Dr. Hollister is actively engaged in sharing her work with the greater academic community at regional, national, and international conferences.

Uday Kulkarni is an associate professor of information systems at the W. P. Carey School of Business at Arizona State University. He got his PhD from the University of Wisconsin-Milwaukee. Kulkarni teaches graduate courses in business intelligence and business IT strategy and has received several teaching awards. His research interests lie in the area of knowledge management—metrics development and assessment, decision-making support using data and knowledge based systems, and application of knowledge based/AI techniques to business processes. His research has appeared in journals such as IEEE Transactions on Knowledge and Data Engineering, IEEE Transactions on Software Engineering, Decision Support Systems, Decision Sciences, European Journal of Operations Research, and Journal of Management Information Systems.

Amila Lagumdzija is a lecturer at Sarajevo School of Science and Technology. She completed her bachelor of information systems at DePaul University, USA and MBA at Schiller International University, Germany. Amila teaches a wide range of subjects in Information Systems. Her research work is primarily focused on the social and organisational aspects of knowledge management. She has published and presented internationally in the field.

En Mao is an assistant professor of information systems and Agnes Candies Endowed professor at Nicholls State University. She joined Nicholls State University’s College of Business Administration in 2006. She earned her PhD from the University of Memphis. Her current research interests include information technology diffusion and acceptance, end-user behavior, knowledge management, global IT, and cross-cultural issues. She has published in the Journal of Global Information Technology Management, Information & Management, Data Base, and Communications of the AIS. Her research has also appeared as book chapters in Knowledge Mapping and Management and Global Information Technology Management. Currently, she is serving as an associate editor on the editorial board of the Journal of Information Privacy and Security. She is also a member of the editorial review board of the Journal of Global Information Technology Management.

Justin Meza is an undergraduate student at the University of California at Los Angeles, majoring in Computer Science, as well as a researcher in the Exascale Computing Lab at Hewlett-Packard Laboratories. As a freelance web developer, he focuses on compliance with web standards without compromising
the delivery of engaging, dynamic, and scalable content to a variety of audiences and actively seeks out ways in his research to leverage new and upcoming technologies to help distribute information to those seeking it more efficiently and effectively. His research in the area of information management at the enterprise business level continues to aid those in search of answers through its manifestation in several pervasive business applications. He can be contacted via email: justin.meza@hp.com.

**Leslie Miller** received a BA (1967) and an MA (1974) in mathematics at University of South Dakota, and a PhD (1980) in computer science from Southern Methodist University. At Iowa State University, he was an assistant professor (1984-1987), an associate professor (1987-1991), and a professor (1991-ongoing) in computer science. He served as department chairman of computer science from 1998-2001. His major research interests are in: object oriented databases, organizational decision support systems, data warehouses, database semantics, organizational memory, parallel searching methods, multi-agent systems, database design, data-mining and computational biology. Dr. Miller is currently looking at the developing infrastructure for providing geospatial data to field survey and exploration applications. Other work on geospatial data focuses on developing accuracy models. Current activity in the organizational decision support systems area centers around the use of object based database systems to support the decision process. Work on organizational memory is focused on the capture of organizational semantics and the integration of corporate documents into the meeting process.

**Elham Mousavidin** is a Ph.D. candidate in the Decision and Information Sciences department at the C.T. Bauer College of Business, University of Houston. She received her MBA from C. T. Bauer College of Business. Her research interest lies in the area of information systems development (ISD). Currently she is studying Social Construction of Technology (SCOT) in the process of ISD. She has also been involved in research on web-enabled communities (e.g. weblogs) and three-dimensional virtual worlds, and their potential applications in organizations. Elham can be reached at: emousavi@mail.uh.edu.

**Sree Nilakanta** is an associate professor of management information systems at Iowa State University. He received his MBA and PhD in information systems from University of Houston. Dr. Nilakanta also holds a BS in mechanical engineering from Madras University. His research straddles both behavioral and technical domains of information systems with emphasis on technology innovation, database management, and organizational memory. His research has appeared in Management Science, Journal of Management Information Systems, Decision Support Systems, Information & Management, Journal of Software and Information Technology, Journal of Strategic Information Systems, Omega, and others.

**Seokwoo Song**, PhD, is an associate professor of information systems & technology at Weber State University. He holds a MBA from Syracuse University and a PhD in information systems from the University of Wisconsin at Milwaukee. His current research interests are in the areas of knowledge management, social network, information retrieval and filtering, and IT implementation. His research publications have appeared in several journals including Communications of the ACM and DATA BASE for Advances in Information Systems.

**Yunan Song** graduated with an MS in computer science from Iowa State University in 2006. She currently works for SAP America.
Mark Srite is an associate professor of MIS at the University of Wisconsin – Milwaukee. He received his PhD from Florida State University in 2000. His research interests include the acceptance, adoption, and use of information technologies, cross-cultural IT issues, and group decision-making. His work has been published, or been accepted for publication, in Management Information Systems Quarterly, the Journal of MIS, Decision Support Systems, Information & Management, the Journal of Global Information Management, the Journal of Global Information Technology Management, the Journal of Computer Information Systems, and elsewhere. He is on the editorial review board of the Journal of Global Information Technology Management.

Sandy Staples, Ph.D., is a Professor and Distinguished Faculty Research Fellow of Management Information Systems in the School of Business at Queen’s University, Kingston, Canada. His research interests include: knowledge management, distributed working practices at both the team and individual levels, and assessing the effectiveness of information systems and IS practices. Sandy has published articles in various journals, books and magazines including Organization Science, Information Systems Research, Small Group Research, Knowledge Management Research & Practice, Information & Management, Journal of Strategic Information Systems, Journal of Management Information Systems, International Journal of Management Reviews, Information Systems Journal, Research in Personnel and Human Resources Management and KM Review. He has served as an Associate Editor for MIS Quarterly and on the editorial boards of other journals.

Deborah E. Swain, PhD, is an assistant professor in the School of Library and Information Sciences at NC Central University in Durham, NC. She has over 20 years experience for corporations such as IBM, AT&T, and Lucent Technologies/Bell Labs. In 1999, she completed her doctorate in Information Science at the University of North Carolina at Chapel Hill. She also has an MA from UNC-CH in English and a BA from Duke University. Dr. Swain has taught at UNC-Chapel Hill, NC State University, and Campbell University. As a project manager and systems engineer, she applied research in knowledge management to the writing of requirements and specifications. Her areas of research are collaboration, knowledge management, health informatics, and digital libraries. She is currently involved in studies to define knowledge management for healthcare facilities and nursing education organizations. She has presented papers and workshops for the ICKM, ASIST, STC, and IEEE.

Imen Tounsi teaches at the University of Sousse, Institute of Higher Business Studies (IHEC) in Tunisia. She is finishing her dissertation at the University of Tunis, Higher Institute of Management (ISG). Her research interests include the study of collective memory at the group, team, organization, and community levels. She is presently working on transactive memory, its characteristics and the implication of group composition.

Jason Turner is presently serving as director of the Air Force Institute of Technology’s Information Resource Management Program and assistant professor of Information Resource Management. He has worked for 15 years as an officer in the US Air Force in a variety of leadership, management, and policy-making capacities focused on providing in-garrison and deployed information, computer, and communication systems and services at various levels of command both stateside and overseas. He holds a PhD in information science (University of Texas at Austin), a MS in information resource management (Air Force Institute of Technology), and a BS in psychology (University of Wisconsin at
About the Contributors

Madison). His research interests include social and organizational uses of information and information technology and their impacts on organizational and interpersonal behavior, cognition, decision-making, and work processes.

Sara Värlander. PhD, is an assistant professor at the Stockholm University School of Business, Sweden. Her research interests include the interplay between the physical and the virtual and the emergent practices from the use of information technology in organizations. Another area of interest is the role of the situated interaction in knowledge creation.

John Wang is a full professor at Montclair State University. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. He has published over 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of Int. J. of Data Mining, Modelling and Management, Int. J. of Operations Research and Information Systems, Int. J. of Information Systems and Supply Chain Management, and Int. J. of Information Systems in the Service Sector. He has served as a guest editor and referee for many other highly prestigious journals. He has served as track chair and/or session chairman numerous times on the most prestigious international and national conferences. His long-term research goal is on the synergy of data mining, operations research and cybernetics.

Ira Yermish is an Assistant Professor of Decision and System Sciences in the Haub School of Business. He has been at Saint Joseph’s University since 1984. His teaching and research areas include systems analysis and design, data base management, data communications, information resource management, and business intelligence and has been active in executive education. Dr. Yermish was awarded a certificate for Excellence in Teaching in 1988. In addition to his current academic activities, he is an active management and information systems consultant. Dr. Yermish earned degrees from Case Western Reserve University, Stanford University the University of Pennsylvania. His early professional experience included positions with Univac, Control Data, RCA Corporation, the Institute for Scientific Information, and was founder of MagnaSystems, Inc. Dr. Yermish is an accomplished singer and photographer, avid cyclist, runner, and triathlete, having completed marathons and Ironman events all over the world.

Dan Zhu is an associate professor of Information Systems and Computer Science at the Iowa State University. She received her Ph.D. in Information Systems from Carnegie Mellon University. She also has M.S. and B.E. degrees in Computer Science. Prior to joining Iowa State, she was an assistant professor of Management Sciences in the College of Business at the University of Iowa in Iowa City, IA. Her general research centers on developing and applying intelligent and learning technologies to business and management. Dr. Zhu’s research has appeared in the Proceedings of National Academy of Sciences, Information System Research, Decision Sciences, Naval Research Logistics, Annals of Statistics, Annals of Operations Research, Journal of Database, Journal of Electronic Commerce Research, Journal of Information System and Security, Journal of Scheduling, International Journal on Business Intelligence and Data Mining, Journal of Information and Software Technology, Journal of Knowledge Management, Omega, etc.

Lei Zhu graduated with an MBA and MS in information systems from Iowa State University in 2006. She is a business system analyst at Capital One.
Qin Zhu is the information developer and systems analyst at HP Labs Research Library. She holds the degree, Master of Library and Information Science. Prior to HP Labs Research Library, she was an information consultant at Ajilon Consulting. At HP Labs Research Library, she works in the digital library areas, such as integrating digital resources, maintaining and establishing resource reference and linking in digital environment. She focuses on emerging technologies in digital library and information management and organization areas. She also keeps pace with developments on information standards from national and international standard organizations. She has multiple papers published in leading publications for information professionals and academic peer review journals. Her research areas include information organization; information management; information retrieval; search engine and search engine optimization; data analysis, data mapping, and data modeling. She can be contacted via email: qin.zhu@hp.com.

Suzanne Zyngier is currently a research fellow in the School of Business at La Trobe University, Melbourne. Her research centres on the governance of knowledge management strategies and the development of a framework for the effective, sustainable implementation of those strategies. The knowledge management governance framework structures and describes the roles and tasks involved at each point of governance: authorization, planning and development, and the implementation of such programs. Zyngier has worked at Monash and Swinburne Universities and has written journal articles, technical reports, book chapters. She regularly presents papers at international conferences and to industry. Zyngier has conducted her own business as a consultant to the professional, corporate and not-for profit as a knowledge management and information services analyst.
