About the Contributors

* * *

**Maryam Alavi**, PhD, is the John and Lucy Cook Chair of Information Strategy and the former Senior Associate Dean of Faculty and Research at the Goizueta Business School of Emory University. She also serves as the Director of Knowledge@Emory, a web-based publication of the Goizueta Business School. Dr. Alavi has authored numerous scholarly papers. Her research has been supported by funds and hardware grants from the AT&T Foundation, AT&T Corporation, IBM, and Lucent Technologies. She has served on the editorial boards of several scholarly journals including MIS Quarterly, Information Systems Research, Journal of MIS, and Journal of Strategic Information Systems. Dr. Alavi was awarded the distinguished Marvin Bower Faculty Fellowship at the Harvard Business School. She also was a recipient of the University of Maryland Distinguished Scholar-Teacher Award, and was elected as the recipient of the prestigious AIS (Association of Information Systems) Fellows Award.

**Anne Beaudry**, Ph.D., is an Associate-Professor of MIS at the John Molson School of Business, Concordia University. She obtained her Ph.D. from HEC-Montreal. Her work has been published in MIS Quarterly, Communications of the AIS, and the International Journal of Information and Operations Management Education as well as in national and international conference proceedings. Her research interests focus on IT-induced behaviors and on individual and organizational impacts of IT implementation and use.
Irma Becerra-Fernandez is Associate Professor at Florida International University College of Business Administration. Her research focuses on knowledge management (KM), KM systems, and enterprise systems. She founded the FIU KM Lab, and has obtained funding as principal investigator for over $1.7 million primarily from NASA to develop innovative KM systems. She has published extensively in leading journals including the Journal of MIS, Decision Sciences, Communications of the ACM, and European Journal of Operational Research, among others. She is an author of the book Knowledge Management: Challenges, Solutions, and Technologies. She has delivered many invited presentations at federal sites, universities around the world, and international conferences. She was selected the 2004 FIU Outstanding Faculty Torch Award, and serves as the faculty director for the Masters in MIS and on the editorial board of the International Journal of Knowledge and Learning. She earned her Ph.D. from FIU in Electrical Engineering, and her Masters and Bachelors in Electrical Engineering from University of Miami.

Randall J. Boyle is in the Department of Operations and Information Systems at the University of Utah. His research areas include deception detection in computer-mediated environments, the effects of IT on cognitive biases, the effects of IT on knowledge workers, and e-commerce. He has published in several academic journals such as Journal of Management Information Systems, International Journal of E-Collaboration and Journal of International Technology and Information Management. He has received the college teaching award at the University of Alabama in Huntsville and the Marvin J. Ashton Teaching Excellence Award at the University of Utah. He is the author of the forthcoming Pearson Prentice Hall book titled Applied Computer Security.

Tharrenos Bratitsis is a Lecturer at the University of Western Macedonia, Department of Early Childhood Education. He holds a degree in Electrical Engineering and Computer Science (University of Patras, 1994) and a PhD in Technology Based Education (University of the Aegean, 2007). His research interests include: (a) the design of technology-based learning environments (modeling systems, collaborative systems, discussion fora and computer based interaction analysis), (b) adult education via communities of learning, (c) ICTs in education, (d) design, implementation and evaluation of Educational Software, and (e) systems’ design. During the last years, he works intensively on collaborative learning environments as well as on computer based interaction analysis supporting learning activities participants’ selfregulation.

Jesus Camacho received an MSc degree from the computer science department at CICESE research center, a CONACYT research center in Ensenada, México. His research interests include CSCW, Personal Activity Management (PAM), Activity Based Computing and Mobility. Jesus is now involved in the private sector, working with mobile applications.

John M. Carroll is the Edward M. Frymoyer Chair Professor of information sciences and technology at Pennsylvania State University. His research interests include methods and theory in human–computer interaction, particularly as applied to networking tools for collaborative learning and problem solving, and design of interactive information systems. Carroll has a PhD in experimental psychology from Columbia University. He is a fellow of the ACM, the IEEE, and the Human Factors and Ergonomics Society.
**Luc Cassivi** is an associate professor in the Department of Management and Technology at the Université du Québec à Montréal, Canada. He received his Ph.D from École Polytechnique de Montréal, Canada and École Centrale de Paris, France. His research interests include information systems, innovation management and supply chain management.

**Anne-Marie Croteau**, Ph.D., is associate professor of MIS at the John Molson School of Business at Concordia University. Professor Croteau’s research mainly focuses on the strategic management of information technology and the impact of information technology on business performance. Her research has been published in various journals such as Journal of Strategic Information Systems, Journal of Information Technology, Industrial Management & Data Systems, and Canadian Journal of Administrative Sciences as well as in various national and international conference proceedings.

**Jano de Souza** holds a PhD from the University of East Anglia, UK (1986), and is an associate professor at the Graduate School of Engineering, at the Federal University of Rio de Janeiro, where he heads the database group. He has extensive experience in the fields of databases, knowledge management and computer supported cooperative work, and has supervised more than 50 students and written more than 200 papers in these areas. His activities include consulting for a number of Brazilian companies and governmental institutions. His current interests are in scientific knowledge management, ontologies and collaborative systems. He is a member of the steering committee of the yearly CSCWD conference and has participated in several program committees for other conferences.

**Martha del Alto** is currently serving as the Software Release Authority in the Technology Partnerships Division office at NASA Ames Research Center. In this position she is responsible for the release of software, as well as Open Source within the center. Additionally, she contributes to the development of partnerships between researchers in the industrial, academic and governmental sectors for the purpose of advancing the space exploration vision and creating terrestrial benefits. Prior to that she was in the Intelligent Systems Division office, where she co-founded, and helped establish successful research document management systems. The first one was the New Millennium Documentation Project, and the second was the Postdoc Project. Her professional interests include issues of software/open source, proprietary data, knowledge management and the commercialization of space. Her most recent interests lie in contributing to the national vision of space exploration and making it more affordable through partnerships.

**Angelique Dimitracopoulou** is Professor of the University of the Aegean, School of Humanities and Director of the Learning Technology and Educational Engineering Laboratory (LTEE). She holds a degree in Physics Sciences (Univ Patras, 1986), Master and PhD in Information and Communication Technologies in Education (University of Paris VII, 1995). She is the author of more than 130 scientific publications related to: (a) the design of technology-based learning environments (modelling systems, intelligent tutoring systems, collaborative systems, computer based interaction analysis), most of them concern the field of sciences education; (b) the implementation of ICTs in genuine educational contexts; in a large variety of levels of education (from pre-primary school to vocational education), (c) the Educational Policy concerning ICTs in Education, and (d) teachers education via communities of learning. During the last years, she works intensively on collaborative learning environments as well as on computer based interaction analysis supporting learning activities participants’ selfregulation.
Umer Farooq is a final year PhD student in information sciences and technology at Pennsylvania State University. His dissertation research focuses on supporting creativity in computer-supported collaborative systems. Farooq has a BS in computer science from the National University of Computer and Emerging Sciences, Pakistan, and an MS in computer science from Virginia Tech. He is a member of the ACM.

Jesus Favela is a professor of computer science at CICESE, where he leads the Collaborative Systems Laboratory and heads the Department of Computer Science. His research interests include CSCW, ubiquitous computing and medical informatics. He holds a BS from the National Autonomous University of Mexico (UNAM) and MSc and PhD from the Massachusetts Institute of Technology (MIT). He is a member of the ACM and the American Medical Informatics Association (AMIA), and former president of the Sociedad Mexicana de Ciencia de la Computacion (SMCC).

Jane Fedorowicz, the Rae D. Anderson Professor of Accounting and Information Systems, holds a joint appointment in the Accountancy and Information & Process Management departments at Bentley University. Dr. Fedorowicz earned MS and PhD degrees in Systems Sciences from Carnegie Mellon University. She is principal investigator of a National Science Foundation project team studying design issues for police and government agency collaboration using public safety networks. She also served as principal investigator for the Bentley Invision Project, an international research team housed at Bentley examining interorganizational information sharing and the coordination infrastructures supporting these relationships in supply chain, government, and health care. Dr. Fedorowicz has published over 100 articles in refereed journals and conference proceedings. The Association for Information Systems recognized her contributions to the Information Systems field by naming her an AIS Fellow in 2006.

Abbas Foroughi is professor of computer information systems at the University of Southern Indiana, where he also serves as coordinator for the eBusiness program and for the eCenter. He has received the USI School of Business Faculty Service and Research Awards and the Sadelle Berger USI Faculty Community Service Award. He holds a PhD in business administration from the Kelley School of Business, Indiana University. His research interests include negotiation support systems, decision support systems, Internet security, XBRL, e-business, electronic supply chain management, electronic procurement, and online distance education. He has published papers in Decision Support Systems, Group Decision and Negotiation, and other journals. Dr. Foroughi has served as board member and chair of the Education Committee of the Rotary Club of Evansville, Indiana, which named him a Paul Harris Fellow and Rotarian of the Decade.

Leonardo Galicia is a PhD student of computer science department at CICESE, a CONACYT research center in Ensenada, México. He is actually working in the Human Computer Interaction area under the advice of Dr. Victor M. Gonzalez and Dr. Jesus Favela. His research work aims to understand the processes and strategies involved in Personal Activity Management (PAM), focusing on planning, managing and organizing of multiples activities to provide appropriate supportive information technology. Leonardo also received a MSc degree in the networking area from the computer science department at CICESE research center.
About the Contributors

Craig H. Ganoe is an instructor in Information Sciences and Technology at Pennsylvania State University. His research interests include multiple-device interactions, computer supported cooperative work and learning, collaboration in community network contexts, and ubiquitous computing. Ganoe has a BS in Computer Science from The Pennsylvania State University, and an MS in Computer Science from Virginia Tech. He is a member of the ACM.

Joey F. George is Professor of Information Systems and the Thomas L. Williams Jr. Eminent Scholar in Information Systems in the MIS Department in the College of Business at Florida State University. His research interests focus on the use of information systems in the workplace, including deceptive computer-mediated communication, computer-based monitoring, and group support systems. He was the Editor-in-Chief of Communications of the Association for Information Systems from 2006-2009, and he currently serves as a Senior Editor for Information Systems Research. He served as Conference Co-Chair for the 2001 International Conference on Information Systems (ICIS) in New Orleans, LA, and he will also be the Conference Co-Chair for the 2012 ICIS to be held in Orlando, FL. In 2008, he was selected as a Fellow of the AIS.

Victor M. Gonzalez is a Lecturer in Human-Computer Interaction and member of the Interactive Systems Group at the University of Manchester, specialized on the study of people’s usage, adoption and adaptation of information and communication technologies. He is also a Senior Research Fellow of CRITO (Centre for Research on Information Technology and Organizations) at the University of California at Irvine, USA. He conducts investigations on technology usage in home, office and hospital settings and specializes on the application of ethnographic methods (e.g. interviews, participant observation) and participatory design techniques (e.g. scenario-based design). He received Ph.D. and Master degrees in Information and Computer Science from the University of California at Irvine and a Master degree in Telecommunications and Information Systems from the University of Essex, United Kingdom. He is a member of ACM SIGCHI and vice-president of the ACM SIGCHI Mexican Chapter.

Thomas Grasse is a research engineer at Jeppesen GmbH, Neu-Isenburg, Germany, which is providing aeronautical information services. He studied computer science at the University of Hagen with economics as subsidiary subject. From December 2004 until November 2005 he worked as student assistant at Fraunhofer IPSI (Integrated Publication and Information Systems Institute), Darmstadt, Germany. During this time, he wrote his diploma thesis which was about the design and implementation of a system architecture for the efficient collaboration of emergency units.

Axel Guicking is a research associate at Fraunhofer IPSI (Integrated Publication and Information Systems Institute) located in Darmstadt, Germany, working in the division Collaborative Environments and e-Learning. He joined IPSI in November 2001. He studied computer science at the University of Würzburg (Germany) with chemistry as additional subject and focusing on artificial intelligence. His diploma thesis was about adaptivity of web-based e-learning systems. He currently works on his Ph.D. in the area of electronic meeting systems in heterogeneous environments. His research interests include computer-supported cooperative work, electronic meeting support systems, human-computer interaction, adaptive software systems as well as software architectures, framework design, and reusability aspects of software systems.
Pierre Hadaya is a professor in the Department of Management and Technology at the École des Sciences de la Gestion de l’Université du Québec à Montréal. He holds a Ph.D. in Management of Technology from the École Polytechnique de Montréal. His main research interests lie at the intersection of information technology management, business strategy, and interorganizational design.

Steven Hornik is a faculty member of the Dixon School of Accounting at the University of Central Florida, College of Business Administration. His research interests include the social context of technology mediation in learning, training and other virtual environments, the effectiveness of technology mediated learning for training and higher education and the social implications of technology. He has been involved in the Research Initiative for Teaching Effectiveness, University of Central Florida, to examine the impact of distance learning outcomes and was selected as a 2005 UFC Fellow of the Academy for Teaching, Learning and Leadership. Dr. Hornik has published in several journals include the Journal of Global Information Management, IEEE Transactions on Professional Communication and the Journal for Information Systems.

Hitoshi Isahara received the B.E., M.E., and Ph.D. degrees in electrical engineering from Kyoto University, Kyoto, Japan, in 1978, 1980, and 1995, respectively. His research interests include natural language processing and lexical semantics. He is a Leader of the Computational Linguistics Group and a Director of the Thai Computational Linguistics Laboratory (TCL) at the National Institute of Information and Communications Technology (NICT), Japan. He is a Professor at Kobe University Graduate School of Engineering, Japan. He is a Vice-President of the International Association for Machine Translation (IAMT), a President of the Asia-Pacific Association for Machine Translation (AAMT), a board member of GSK (Gengo Shigen Kyokai, linguistic resource association) and a board member of the Association for Natural Language Processing, Japan. He is a member of the Institute of Electronics, Information and Communication Engineers, Japan, the Association for Natural Language Processing, Japan, the Japanese Society for Artificial Intelligence, and the Information Processing Society of Japan.

Len Jessup is dean of the College of Business and Economics, Washington State University, and the Philip L. Kays distinguished professor in management information systems. While at WSU, he has guided the school through AACSB reaccreditation, developed the Boeing Classroom of the Future, and managed the implementation of a Web-based, online version of the MIS curriculum. Dr. Jessup earned his BA and MBA at California State University, Chico, and his PhD in organization behavior and MIS from the University of Arizona. His research interests include groupware, wireless collaboration, electronic commerce, and technology supported learning and decision-making. He has authored and co-authored numerous scholarly articles, as well as the MIS textbooks Information Systems Foundation and Information Systems Today with his colleague Joe Valacich. With his wife, Joy Egbert, he won Zenith Data Systems’ Masters of Innovation Award for Education.

Richard Johnson is as Assistant Professor of Management Information Systems at the University of Central Florida. He received this Ph.D. from the University of Maryland, College Park. His research interests focus on psychological and sociological impacts of computing technology, computer self-efficacy, technology-mediated/distributed learning and training, and issues surrounding digital divide. Dr. Johnson has published in several journals including Information Systems Research and the International Journal of Human Computer Studies, as well as numerous international research conferences.
About the Contributors

Tim Kayworth, PhD is an Associate Professor and department chair of Management Information Systems in the Hankamer School of Business at Baylor University. He has prior industry experience in information systems consulting and has also held positions as MIS director and operations manager for private sector firms. Dr. Kayworth's research interests center on the management of IT in organizations. Recent research projects have included such topics as leadership in global virtual teams, the impact of organizational culture on knowledge management practice, and the role of culture in information systems research. His work has been published in the European Management Journal, the Journal of Management Information Systems, The DATABASE for Advances in Information Systems, the Information Resources Management Journal as well as in such international conferences as AMCIS, ICIS, and the Strategic Management Society.

Kevin Laframboise, Ph.D., is an assistant professor of MIS at the John Molson School of Business at Concordia University, from which he obtained his Ph.D. Professor Laframboise’s research centers quality management and on enterprise information systems and the impact of these on business performance. His research has been published in Journal of Supply Chain Management, International Journal of Enterprise Information Systems and Leadership Quarterly. As well, his papers appear in international conference proceedings such as ECIS, EUROMA and DEXA.

Isidro Laso-Ballesteros is a Scientific Officer at the Directorate General Information Society and Media of the European Commission where he is in charge of the long term research activities and strategy of the Networked Media unit, and is now dealing with the Future Media Internet initiative. In addition, he teaches as lecturer in several universities and currently keeps permanent teaching slots in several postgraduate courses of the Virtual School of the Universidad Politecnica de Madrid-CEPADE. He holds a degree on civil engineering and postgraduate studies on computational engineering and systems/networking engineering. Isidro has authored various books on the topic of Internet: “Internet y Comercio Electronico”, “Internet, Comercio Colaborativo y mComercio”. He has also published chapters in Japanese, English and Spanish in reviewed books edited by IOS press and Kluwer Academic publ. He has also authored three publications on Collaborative technologies, innovation, collaborative work environments and innovation published by the Official Publication Office of the European Communities (OPOCE). He is member of scientific boards of several IEEE and international conferences on ICT. He is regularly invited as keynote speaker on research institutions and conferences to talk about long term ICT research.
Elisabeth Lefebvre is professor in the Department of Mathematics and Industrial Engineering at École Polytechnique in Montréal. She received the Ph.D. degree in business administration from the University of Montréal. Her current research interests are in the area of technology management, supply chain management and interorganizational collaboration.

Louis A. Lefebvre is professor in the Department of Mathematics and Industrial Engineering at École Polytechnique in Montréal and invited professor at University of Wageningen (NL). He received the Ph.D. degree in business administration from the University of Montréal. His current research interests are in the area of technology and innovation management, supply chain management and RFID technologies.

Dorothy E. Leidner, PhD is the Randall W. and Sandra Ferguson Professor of Information Systems and Director of the Center for Knowledge Management at Baylor University. Prior to rejoining the Baylor faculty, she was associate professor at INSEAD and at Texas Christian University. She is a regular visiting professor at the University of Mannheim, Germany, and has been a visiting professor at the Instituto Tecnologico y des Estudios Superiores de Monterrey, Mexico, at the Institut d’Administration des Entreprises at the Université de Caen, France, and at Southern Methodist University. Dr. Leidner received her PhD in Information Systems from the University of Texas at Austin. Dr. Leidner’s research has been published in a variety of journals, such as MIS Quarterly, Information Systems Research, Journal of Management Information Systems, Decision Sciences, Decision Support Systems, and Organization Science. She has received several prestigious best paper awards, including one in 1993 from the Hawaii International Conference on System Sciences, one in 1995 from MIS Quarterly, and one in 1999 from the Academy of Management. She is currently serving as co-editor of the journal Data Base for Advances in Information Systems, senior editor for MIS Quarterly and associate editor for the Decision Sciences Journal and for the Decision Support Systems Journal. She serves on the editorial boards of MISQ Executive, the International Journal of Knowledge Management, and the International Journal of Information Technology Education.

Carolina López-Nicolás is an assistant professor in the Department of Management and Finance at the University of Murcia, Spain. She has been a visiting professor at Delft University of Technology in The Netherlands and Michigan State University in USA. Her current research relates to knowledge management, information systems, business strategy and mobile communications. She has published on these topics in such journals as the Information & Management, Journal of Knowledge Management, International Journal of Information Management, International Journal of Information Technology and Advertising, Journal of Enterprise Information Management, among others.

Mantas Manovas, M.Sc, is a native of Lithuania. After completing his M.Sc. degree from Concordia University, he went on to establish and manage an online marketing firm that successfully serves the U.S. and Canadian market.

Angel L. Meroño-Cerdan is Associate Professor of Management at the University of Murcia in Spain. He holds a Master in Business and Foreign Trade including a three months training at USA-Spanish Chamber of Commerce in New York and a PhD in Business Administration (University of Murcia, Spain). He has published in International Journal of Information Management, European Journal of Information...
About the Contributors

Athanasios Nikas holds a PhD degree in Information Systems Management from the Department of Management Science and Technology of the Athens University of Economics & Business (2007), an MSc degree in the Analysis, Design and Management of Information Systems obtained at the London School of Economics and Political Science (2001) and a BSc degree from the Department of Financial and Banking Management of the University of Piraeus (2000). His research interest is focusing on studying the social and organisational dynamics which underlie recent technological and work developments in networked organisations from both social and management perspective. Among others, he participated in many research projects in the field of Information Systems Management and R&D assessment, funded from EU, the Greek General Secretarial for Research & Technology and Greek Ministry of Development. Finally, his PhD research was cofunded from the Hellenic Republic Ministry of Education and the European Union under the HRAKLEITOS scholarships programme. His research work has been published in selected academic international journals, books and scientific conferences.

Antonio Padilla-Meléndez is Associate Professor of Management at the University of Malaga (Spain). He holds degrees in economics and business administration (BA, major in management) and business administration (PhD). He has attended postgraduate courses at Harvard University (USA) and the University of Oxford (UK), and has been Visiting Scholar in Texas A&M International University (Laredo, TX, USA). He is managing director of the research team “E-business: Electronic commerce and teleworking” of the University of Malaga. It is financed by the Andalusian government. He is Technical Manager of innostrategy!, a knowledge and technology based company started initially as spin-off from the University of Malaga and with Novasoft as industrial partner. And he has served as expert and evaluator for the European Commission (2005, 2006, 2007). Antonio has authored various books and published in different journals including Journal of Global Information Management, Computers & Education, International Journal of E-Collaboration, International Journal of Technology Management, International Journal of Information Management, Technovation, Journal of Global Information Technology Management and Internet Research. He has also published chapters in reviewed books edited by Kluwer Academic Publishers and Idea Group Inc., and papers in Spanish reviewed journals such as Economía Industrial, Revista Europea de Dirección y Economía de la Empresa, and Información Comercial Española. Revista de Economía. His research interests include e-Collaboration, technology adoption, and techno and academic entrepreneurship.

Robert Pellerin is Associate Professor in the Department of Mathematics and Industrial engineering at Ecole Polytechnique de Montreal. He holds degrees in engineering management (B.Eng.) and industrial engineering (Ph.D.). He has practiced for more than 12 years in reengineering projects and enterprise resource planning (ERP) systems implementation including 10 years as a project manager. His current research interests include enterprise system adoption, implementation, and integration. He is a member of the CIRRELT research group.

Bill Perkins is professor emeritus of information systems and decision sciences in the Kelley School of Business, Indiana University. He received his BSCE from Rose Polytechnic Institute and his MBA
and DBA from Indiana University. Dr. Perkins has received 11 major teaching awards from Indiana University, and he has published papers in Decision Sciences, the Journal of Political Economy, and other journals. He has co-authored seven books, including Managing Information Technology (Fifth Edition, 2005). At Indiana University he has served as chair of the undergraduate program of the School of Business, chair of the Operations and Systems Management Department, and director of the Institute for Research on the Management of Information Systems (IRMIS). He has received Distinguished Service Awards from Indiana University, the Kelley School of Business, and the Decision Sciences Institute.

Angeliki Poulymenakou is Assistant Professor in Information Systems Management. Prior to that she has served as lecturer in Information Systems in the Informatics Department of the Athens School of Economics and Business and in the Information Systems Department of the London School of Economics and Political Science. She holds a first degree in Mathematics (Athens), and MSc and PhD degrees in Information Systems (London School of Economics). More recently she has offered consultancy work to the European Commission, DG Information Society (on the socio-economic impact of electronic commerce, the emergence of new organisational forms, the evaluation of proposals and projects on related issues in FP5), as well as to the Greek Government (Ministries of Development and of Employment on e-Business and the impact of the Information Society respectively). Her several publications in international journals and conferences draw from the full range of activities outlined above. She has served as a member of the scientific committee of four international conferences in information systems (ICIS, ECIS, IFIP) and has acted as a referee in several international journals in the field. In 2003 she chaired the organisation of the IFIP joint WG8.2 and 9.4 Conference on Information Systems and Globalisation, in Athens.

Gad Saad is an Associate Professor of Marketing at Concordia University (Montreal, Canada). He has held Visiting Associate Professorships at Cornell University, Dartmouth College, and the University of California-Irvine. He was listed as one of the “hot” professors of Concordia University in both the 2001 and 2002 Maclean’s reports on Canadian universities. He received his Faculty's Distinguished Teaching Award in June 2000. His book titled The Evolutionary Bases of Consumption (Lawrence Erlbaum, 2007) is the first academic book to demonstrate the links between evolutionary theory and consumption. He has published close to 40 scientific papers many of which lie at the intersection of evolutionary psychology and a broad range of disciplines including medicine, behavioral game theory, marketing, advertising, and consumer behavior. He received a B.Sc. in Mathematics and Computer Science (1988) and an M.B.A. (1990) both from McGill University, and his M.S. (1993) and Ph.D. (1994) from Cornell University.

Vicki Sauter is Professor of Information Systems at University of Missouri - St. Louis. She has published extensively in the area of systems development and design. She has one book, Decision Support Systems: An Applied Managerial Approach, and many publications in scholarly journals, primarily focusing on DSS design. Her primary research interest is how decision makers make choices as it reflects upon the design of decision support systems. She has focused her research on the models and the model management features that would facilitate their use in a DSS, and examined these issues in both the public and private sectors, and in cross-cultural domains. Her current focus involves the design issues for internet-based decision support, especially with a focus on better design of decision-based intranets, and about trends of women in computing careers.
Pedro Soto-Acosta is a Professor of Management at the University of Murcia (Spain). He holds a PhD in Management Information Systems (MISs) and a Master’s degree in Technology Management from the University of Murcia. He received his BA in Accounting and Finance in Europe from the Manchester Metropolitan University (UK) and attended Postgraduate Courses in Management at Harvard University (USA). His work has been published in journals such as the European Journal of Information Systems, the International Journal of Information Management, the International Journal of Electronic Business, the Journal of Enterprise Information Management, and the Telematics and Informatics, among others.

Helen Stewart today is the NASA Ames Research Center IT Security Manager, primarily focused on the Federal Information Security Management Act (FISMA), information handling issues dealing with confidentiality, integrity, and availability with federal information and technology. She founded and managed the New Millennium Documentation Project and the Postdoc Project in the Computational Sciences Division of NASA Ames Research Center, where she has worked since 1987. Her research and development efforts are primarily focused on ensuring compliance with National and NASA Policies, IT Security, and Secure Collaborative Assistant Systems and Environments. She has worked in many projects involving secure advanced federated environments, where primary focus was on secure information sharing for risk management, for the Space Shuttle Program and Mission Control Center. Ms Stewart continues today to research, policy, procedures, and contractual influences on Knowledge Management (KM), IT Security, and Risk Management (RM) to determine impacts these may have on National space based assets.

Peter Tandler is a senior research associate at Fraunhofer IGD (Institute for Computer Graphics) located in Darmstadt, Germany. He joined IGD in January 2007. From August 1997 until December 2006, he was senior research associate at Fraunhofer IPSI (Integrated Publication and Information Systems Institute). He studied computer science at the Darmstadt University of Technology (Germany) with education and psychology as additional subjects. His diploma thesis was about the design of object-oriented modeling languages for technical systems. In 2004, he received a Ph.D. in computer science from the Darmstadt University of Technology for his work on application models and software infrastructure for roomware environments. He serves as program committee member and reviewer for international conferences, workshops, and journals in the areas of software architectures for ubiquitous computing environments, collaboration in ubiquitous computing environments, and human-computer interaction. His research interests include computer-supported cooperative work, integration of virtual and physical environments, new forms of human-computer and team-computer interaction for roomware components, electronic meeting support systems, but also software architectures and frameworks, object and component technology, and design of programming languages.

Adriana Vivacqua holds is a last-year PhD student at the Federal University of Rio de Janeiro. She has extensive consulting experience, both in the private sector and working with governmental environments. She is interested in computer support for cooperative work, specifically in system to facilitate work in distributed groups and in supporting self organization in groups; community formation, maintenance and motivation and in adaptation and personalization systems using applied artificial intelligence techniques, topics in which she has written several papers. She has been a member of the committee of the
ISMICK conference since 2005. She holds an MSc from MIT (2000), where she worked as a research assistant in the Software Agents Group at the Media Lab.

Yu “Andy” Wu is a Ph.D. candidate in the MIS Department at the University of Central Florida. He has an MS in MIS from UCF and an MS in Finance from Golden Gate University. Before his academic pursuit, Andy had various experiences in Accounting, management and IT. His experience in supporting organizational users and administering computer networks to a large extent engenders his research interests in computer training and information systems security. Andy has published papers for various Information Systems conferences and in CAIS.

Eiko Yamamoto received the B.E., M.E., and Ph.D. degrees in engineering (information and computer science) from Toyohashi University of Technology, Aichi, Japan in 1996, 1998, and 2002 respectively. Her Research interests include natural language processing, information extraction, and knowledge acquisition. She is working as an expert researcher for Computational Linguistics group at National Institute of Information and Communications Technology (NICT), Japan. She received Best Paper Award for Young Researcher of Information Processing Society in Japan (IPSJ) National Convention in 1999. She is a member of Information Processing Society in Japan, and the Association for Natural Language Processing, Japan.
