About the Contributors

Varuna Godara is the CEO of Sydney College of Management, Australia and SAP Australia certified consultant. Dr. Godara is the chair of International Congress on Pervasive Computing and Management. Previously, she worked as Director of Marketing at SCBIT and was a permanent faculty in Department of Business Systems, School of Management in University of Western Sydney, Australia from July 2003 to September 2008. Dr. Godara received her Bachelor degree in Computer Science in 1997, MBA in 1999, Maters in Computer Applications, and PhD in 2003. Her research interests are mainly in ERP, Pervasive business, E-business management, e-governance and innovation in business. She has authored a book in 2008, has contributed chapters in refereed books, papers in many refereed journals and presented research work in reputed conferences. She has also published popular articles and poems in various books and magazines. She was awarded with Roll of Honour two times by Kurukshetra University, India and was awarded once by National Library of Poetry, US.

* * *

Ramesh Kumar Agrawal received M. Tech. degree in computer application from Indian Institute of Technology, Delhi. He has done his Ph.D. in computational physics from Delhi University. Presently, he is working as an Associate professor in School of Computer and Systems Sciences, Jawaharlal Nehru University, New Delhi. His current areas of research are classification, feature extraction and selection for pattern recognition problems in domains of image processing, security and bioinformatics.

Rodney Arambewela is a full-time staff member in the Faculty of Business and Law. Before working at Deakin University, he was employed as an International Business Development Manager at Telstra and as Trade Commissioner for Sri Lanka. He has over 20 years of international marketing experience and has worked in the UK, Europe, the Middle East and Asia and the Pacific. His research interests include International Education, Teaching and Learning, Customer Satisfaction, International Marketing, Services Marketing and Brand Management.

Manju Bala is a student of Ph.D. in School of Computer and Systems Sciences, Jawaharlal Nehru University, New Delhi. She received B.E. in Computer Science and Engineering from Maharishi Dayanand University and M. Tech. degree in Computer Science from IASE Deemed University, Rajasthan. Her current area of research is pattern recognition.

Vladimír Bureš, Ph.D., (*1977) is an assistant professor at the Faculty of Informatics and Management at the University of Hradec Kralove, Czech Republic. He cooperates with both the Department
of Economics and Management and the Department of Information Technologies. He is the author of several books and papers published in conference proceedings and journals. He has been involved in several development and research projects. In his research activities he is focused on knowledge economy and knowledge management, theory of systems, e-learning and t-learning.

**Pavel Čech**, Ph.D., (*1976) is an assistant professor at the Department of Information Technologies, Faculty of Informatics and Management, University of Hradec Kralove, Czech Republic. In his research activities he deals with object modelling, programming, information and knowledge technologies, e-learning and t-learning. He has been working on more than 10 different projects (e.g. Hypergeo project funded by the 5th EU Framework IST Programme, ELU – Enhanced Learning Unlimited project funded by the 6th EU Framework IST Programme, VitalMind project funded by the 7th EU Framework IST Programme, or realization of information servers for tourism, ecology, security and quality).

**Ankur Choubey**, is presently studying Bachelor of Engineering 3rd year in Computer Sciences and Engineering from Institute of Technology and Management, Gurgaon, one of the topmost private colleges in Delhi-NCR, India. He did his schooling from Bhartiya Vidya Bhavan, New Delhi, India with a good academic record. Apart from his usual curriculum he has also received a one-month training on web development technology ASP.NET. Other technical skills include those of Java and C/C++. He has been actively trying to write some articles and papers to be submitted in international as well as national journals and magazines, including the college magazines within a few months. In addition to that he has received a BEC VANATAGE certification.

**Joydip Dhar**, is currently an assistant professor at IIITM, Gwalior, India. He holds a MSc. in Mathematics and a Ph. D in “Mathematical Modeling” from Indian Institute of Technology, Kanpur, India. Dr. Dhar has over 11 years of teaching experience, during which he has authored and co-authored more than 35 papers in various reputed International conferences and Journals. He is a former member of American Mathematical Society and a life time member of Indian Mathematical Society and Indian Society of Technical Education. He has guided and mentored several M Tech. and Ph. D. thesis in various research disciplines. In his free time, he seeks to spend most of his time with his family and holds a passion for Indian classical Music, Driving and Cricket.

**Jitesh Dundas** is currently working as a Research Associate at Edencore Technologies (www.edencore.net). He currently stays in Mumbai, India. Mr. Jitesh Dundas did his Masters in Computer Applications (M.C.A.) from Pune University in July 2007. He has worked as a Software Engineer with Kotak Mahindra Bank, KPIT Cummins. He has over 2 years of work experience in software development and research. He has written 3 research papers which are published in international conferences and journals. His areas of research areas include Computer Science, Cell and Molecular Biology and Bioinformatics. He is a member of societies like CSI, ACM and AICSIT. Mr. Dundas can be reached at jbdundas@gmail.com (Phone No: +91-9860925706).

**S. Durga** received the B.Tech degree in Information Technology from Madurai Kamraj University, Tamilnadu, the ME degree in Network s and Internet Engineering from Karunya University. She is currently a Assistant professor in the Department of Information Technology, Karunya University, Tamilnadu, India. Her current research interests include mobile computing, internetworking and security, and pervasive computing.
About the Contributors

Manyata Goyal is currently a student of M Tech. at IIITM, Gwalior, India. Miss Manyata did her schooling from the town of Bina, in Madhya Pradesh. A bright student throughout her schooling, Miss Manyata has won several school level competitions. After coming to IIITM, Miss Manyata has heavily contributed in organization and management of various events and activities held at college and intra-college level. She is also a student member of ACM, CSI and IETE. She has active interests in programming and is a co-member of team, representing Indian in ACM world finals 2009, Sweden. Miss Manyata is passionate about learning new technologies and taking novel and difficult challenges. Her primary area of interest is Soft Computing techniques. In her spare time, she loves to read and play guitar.

Ratneshwer Gupta is a lecturer in Department of Computer Science (MMV), Banaras Hindu University, Varanasi (India). He is pursuing his PhD (verge to submission) from Department of Computer Engineering, Institute of Technology, Banaras Hindu University (India) under supervision of Dr. Anil K. Tripathi. His research area is Component Based Software Engineering. He is working on software processes, interdependence and composability issues of Component Based Software Engineering. He has four years of teaching experience and has 3 papers in international journals and 7 papers in international/national conference proceedings. He was awarded National Doctoral Fellowship by All India Council for Technical Education, New Delhi (India) and Junior Research Fellowship by University Grant Commission, India.

Shilp Gupta is currently a student of M Tech. at IIITM, Gwalior, India. Mr. Gupta did his schooling from Dehradoon, a town established at the foothills of Himalayas in upper northern regions of India. From a fairly young age, Mr. Gupta showed active interests in programming, and continued to win several school level programming contests. After coming to IIITM, Mr. Gupta continued his passion for programming and participated and got selected in several reputed programming contests organized by Google and ACM. His biggest achievement was to win the ACM Asia Regional this year, to head his team to ACM world finals 2009 at Sweden. He also has research interests primarily in the field of Artificial Neural Networks and Soft Computing Techniques. In his spare time, Mr. Gupta loves to watch Movies and listening to rock music.

Pawan Jain is working as an instructional designer at Fort Hays State University and received his PhD from University of Wyoming.

Smita Jain is working at Fort Hays State University and helping with the India expansion project. She received her MS degree in Instructional Technology.

Ashutosh Kasera is working as an Associate Professor at Rai Business School, New Delhi, India. His areas of interests are varied, including Computer Architecture, Computer Networks, Distributed DBMS, Data Structure, Design and Analysis of Algorithms, Software Engineering to name a few. Some of his major areas of research are Sustainable Development of ICT, ICT in rural segment and various aspects of e-learning. He has presented a number of research papers in various National and International conferences of repute along with a few of his publications in books. He is also working as a consultant in the field of applications of ICT and has been visiting, delivering lectures in his areas of expertise to a number of Institutes of repute.
Lutfi Mohammed Omer Khanbary Received the B.E.E. degree in 1995 from Aden University, Aden, Yemen, and the M.Tech. degree in 2006 from Jawaharlal Nehru University (JNU), New Delhi, India, where he is currently working toward the Ph.D. degree in computer science with the School of Computer and Systems Sciences, JNU, on study leave from the Department of Computer Science and Engineering, Aden University. His research interests include mobile computing, network management, and genetic algorithms.

K.V. Bhanu Murthy is Professor Department of Commerce, South Campus and Delhi School of Economics, Delhi University. He is a Ph.D. in Economics from Department of Economics, Delhi School of Economics, in the area of Industrialization Strategy. His recent contributions are in the areas of econometrics, environmental economics, agricultural market efficiency, international business social responsibility and business ethics. He has received several awards including best paper awards and best economics expert award. He has more than 30 papers in international journals and conferences. He has done two international and one national project.

Ravi Prakash Pandey has completed his graduation in Science from Saket College Faizabad, India. He achieved the post graduate degree in Management from Dr. R. M.L. Avadh University, Faizabad, India and in Computer Application from IGNOU, India. He started his teaching career in engineering education from Dr. RML Avadh University, Faizabad, India. He is working as a Senior Lecturer in the Institute of Engineering and Technology, Dr. R. M.L. Avadh University, Faizabad, India. He has more than 10 years of experience to teach the undergraduate and postgraduate classes. He has published more than 20 research papers in national and international journal/conference in the area of management, wireless sensor network, mobile ad hoc network, and image processing. He has delivered numerous invited and plenary conference presentations and seminars in International and national conferences in India. He has delivered many invited talks in India. His research area includes International Business Management, wireless sensor network, mobile ad hoc network, and image processing. He has guided more than 100 students for their projects on Java, C, C++.

Sunita Prasad is currently working as a Sr. Lecturer in Centre for Development of Advanced Computing (CDAC), NOIDA, India under M/O Information Technology, Govt. of India. She received her M.Tech (IT) from Guru Gobind Singh Indrapratha University in 2006. Her research interest lie in the field of wireless networking especially ad hoc networks routing optimization and security. She is a life member of Institution of Electronics and Telecommunication Engineering (IETE) and published many papers in National and International conferences.

Piyush Ranjan is working as an Associate Professor in the area of Information Technology at Rai Business School, New Delhi. He is a man of high caliber and expertise in Web- based programming and Database management. His interest of teaching includes MIS, Web Programming, Database Management System and Network Administration. He is also an IT consultant and has been a visiting faculty member in a number of Management Institutes of repute. His current research area includes Environmental Impact of Microprocessor technology, Sustainable Development of Computer Technology, ICT for remote Indian villages & e- learning. He has presented a number of research papers at various National & International Conferences.
Sanjeev Sharma is a Reader and Head of the School of Information Technology, Rajiv Gandhi Prodyogiki Vishwavidyalaya, Bhopal, M.P. (Bhopal), India. He started his teaching career in engineering education from Vidisha District, India. He has more than 12 years of experience to teach the undergraduate and postgraduate classes. He has published more than 39 research papers in national and international journal/conference in the area of wireless sensor network, mobile Computing and Data Mining. He has delivered numerous invited and plenary conference presentations and seminars in International and national conferences in India. He has delivered many invited talks in India. His research area includes wireless sensor network, mobile Computing and Data Mining. He has guided more than 53 students for their M. Tech. dissertations. He has no. of projects funded by U.G.C. or A.I.C.T.E., India. He is member of various committees in India.

Raj Shree has completed her graduation in Science from Bareilly College, Bareilly, India. She achieved the post graduate degree in Computer Technology & Application from Rajiv Gandhi Prodyogiki Vishwavidyalaya, Bhopal, India. She started her teaching career in engineering education from Sahu Ram Swaroop Mahila Mahavidya, Bareilly, India. She also served M.J.P Rohilkhand University, Bareilly. She has more than 5.8 years of experience to teach the undergraduate and postgraduate classes. Ms. Raj Shree is a Lecturer in the Department of Information Technology, SIST, Baba Saheb Bhimrao Ambedkar University, Lucknow. Her field of research includes various fields of Wireless Ad Hoc Networks, Sensor Networks, Mobile Computing, Routing Security. She has published around 15 papers in various national and international journals/conferences including IEEE explorer also. She topped in her post graduation from RGTU, Bhopal. She has delivered numerous conference presentations and seminars in the International and national conferences in India.

Vivek Shukla has completed his graduation in Science from Bareilly College Bareilly, India. He achieved the post graduate degree in Physics from Bareilly College, Bareilly, India, Computer Application from Dr. R. M.L. Avadh University, Faizabad . He started his teaching career in Science education from Bareilly College, Bareilly, India. He also served Sanjivi College of Engineering and Technology, Baharaich as a Lecturer. Now He is pursuing his M. Tech. degree in Computer Technology & Application from Rajiv Gandhi Prodyogiki Vishwavidyalaya, Bhopal, India. He has more than 7 years of experience to teach the undergraduate and postgraduate classes. He has published more than 15 research papers in national and international journal/conference in the area of wireless sensor network, mobile ad hoc network. He has delivered no. of conference presentations and seminars in International and national conferences in India. His research area includes wireless sensor network, mobile ad hoc network.

Ramesh Singh is working as a Senior Scientist at National Informatics Centre, New Delhi, India. He is heading “Systems Software Division”, at NIC, New Delhi. Prior to joining NIC, He worked as a Scientist in DRDO. He has worked extensively in the O.S, Database Management Systems and other System Software’s. He also heads National Digital Preservation Initiative at National Informatics Centre. He has studied at IIT, Kharagpur and at IIT Delhi. He holds a M.Tech degree in Computer Applications from IIT Delhi. He actively participates in academia in and around New Delhi. He is a visiting faculty at IIT New Delhi, and teaches Computer Graphics at Undergraduate Level. He is also a visiting faculty at Delhi College of Engineering, New Delhi and teaches Human Computer Interface (HCI) and Distributed Computing at the M.Tech Level in the institute. His Present research interests are in the field of Mobile...
Computing, Ubiquitous and Pervasive Computing and Human Computer Interface respectively. He has to his credit more than twenty five International research papers and five book chapters.

**Abhishek Vaid** is currently a student of M Tech. at IIITM, Gwalior, India. Mr. Vaid did his schooling from Delhi, and too admission at IIITM, through an all Indian Examination – AIEEE in 2004. During his Higher Education, Mr. Vaid has worked on several projects both in technical and Managerial domain. His current research interests are primarily in Software Engineering, Data Mining, Personality Assessment Techniques, Multi-Objective Optimizations Techniques and Soft Computing Techniques. Mr. Vaid holds author to more than 4 papers during his B. Tech and M. Tech. and seeks to pursue a Ph. D. in future. In his spare time, he loves listening to Music and browsing lucrative buying deals online.

**Deo Prakash Vidyarthi** Received the Master degree in computer applications from M. M. M. Engineering College, Gorakhpur, India, in 1991 and the Ph.D. in computer science from Jabalpur University, Jabalpur, India (work done at Banaras Hindu University, Varanasi, India) in 2002. He taught undergraduate and postgraduate students at the Department of Computer Science, Banaras Hindu University, for over 12 years. He is currently an Associate Professor with the School of Computer and Systems Sciences, Jawaharlal Nehru University, New Delhi, India. His research interests include parallel and distributed system, grid computing, and mobile computing.
