Dr. Stephen K. Aikins is a faculty member in the Department of Government and International Affairs. He holds graduate degrees in Public Administration, Information Systems Management and Business Administration. He is a Certified Public Accountant, a Certified Information Systems Auditor and a Certified Business Manager. He has published in the areas of information security and e-government. His research interests include risk management policy, government auditing and public economics.

Jason Allen is a Finance Officer serving in the Army currently stationed in Germany. He has served one tour in Afghanistan as a financial advisor to the Afghan National Police. He has a Bachelor of Science degree in Management Information Systems from Southern Illinois University - Edwardsville and a Master’s of Business Administration from Arizona State University. At some point in the future he would like to attain a Doctorate, Juris Doctorate, or Master of Laws and teach at a college or university or practice law. His hobbies include staying active by playing soccer and golf, and outdoor activities such as camping, hiking, and traveling.

Dr Leonidas Anthopoulos studied computer science at Aristotle University of Thessaloniki, Greece. At his previous job positions, as an Expert Counselor at the Hellenic Ministry of Foreign Affairs in e-Government and e-Diplomacy areas, as an IT researcher and manager at the Research Committee of the Aristotle University of Thessaloniki (Greece), Municipality of Trikala (Greece), Administration of Secondary Education of Trikala (Greece) and Information Society S.A. (Greece), he designed and supervised multiple major IT projects. Currently, Dr Leonidas Anthopoulos is an Assistant Professor at the Project Management Department of the Technological Education Institute of Larissa, School of Business and Economics, Project Management Department (Greece). He is the author of several articles published on prestigious scientific journals, books and international conferences. His research interests concern, among others, e-Government, Enterprise Architecture, Social Networks, etc. He is also a member of evaluator committees for the Greek General Secretariat of R&D and for the Greek Information Society.
**About the Contributors**

**Diego Barria** is a PhD Researcher at the Department of Latin American Studies of Leiden University, where he is writing a dissertation on public sector change in Chile, between 1880 and 1931. He previously has published on topics such as e-government in Chile, Union participation in policy-making processes in Latin America, and administrative reforms in historical perspective. E-Mail: barriatraverso@vtr.net

**Dr. Jody C Baumgartner** is an assistant professor of political science at East Carolina University. He received his Ph.D. in political science from Miami University in 1998, specializing in the study of campaigns and elections. He has several books to his credit, including *Modern Presidential Electioneering: An Organizational and Comparative Approach* (Praeger, 2000); *Checking Executive Power* (Praeger, 2003), co-edited with Naoko Kada; *The American Vice Presidency Reconsidered* (Praeger, 2006); *Conventional Wisdom and American Elections: Exploding Myths, Exploring Misconceptions* (Rowman & Littlefield, 2007), written with Peter Francia; and, *Laughing Matters: Humor and American Politics in the Media Age* (Routeledge, 2007), co-edited with Jonathan Morris. He has also written or collaborated on two dozen articles and book chapters on political humor, the vice presidency, and other subjects.

**Prof. Dr. V.J.J.M. Bekkers** (1963) is professor of public administration at Erasmus University Rotterdam. He holds the chair on the empirical study of public policy and public policy processes. He is also academic director of the Center of Public Innovation. Furthermore he is research director of the department of public administration. He studied political science and public administration at Nijmegen University where he has got his degree with honors (1987). He obtained his Ph.D. from Tilburg University. His research interests are related to the introduction and use of new information and communication technologies in the policy processes within public administration and the innovation challenges which emerge in its slipstream.

**Douglas B. Bock** is a Professor in the Computer Management and Information Systems department at Southern Illinois University Edwardsville. He received his B.S. in Management, MBA, and Ph.D. in the Management of Information Systems from Indiana University. His teaching responsibilities include database administration and .NET programming. His primary research emphasis is in the area of data modeling, software metrics, and system implementation issues. His most recent textbooks, Oracle SQL and SQL for SQL Server are both published by Pearson Education/Prentice-Hall. He has published and presented over 60 articles in various information systems journals and conferences. He is a Microsoft Certified Solution Developer for .NET technology.

**Salah Brahimi**, Grey Matter International Ltd, will be a keynote speaker at the upcoming Gulf Petroleum Association annual conference. In addition, he is often invited to speak in the area of Emergency Management and Preparedness, particularly with regard to the economic impact of incidents and business continuity. Mr. Brahimi has also just received a mandate from SABIC (Saudi Arabia's Government backed petrochemicals giant) to advise on restructuring its massive private equity acquisitions special situations portfolios and to advise on foreign currency transactional policies. In January he served as the advisor to the Saudi G-20 preparatory Committee on the global financial crisis and has been involve in these issues from his time at the World Bank.
Axel Bruns is a Chief Investigator in the ARC Centre of Excellence for Creative Industries and Innovation (CCI) and an Associate Professor in the Creative Industries Faculty at Queensland University of Technology in Brisbane, Australia. He is the author of Blogs, Wikipedia, Second Life and Beyond: From Production to Produsage (2008) and Gatewatching: Collaborative Online News Production (2005), and the editor of Uses of Blogs with Joanne Jacobs (2006; all released by Peter Lang, New York). He blogs about user-led content creation at produsage.org, contributes to the gatewatching.org group blog on citizen journalism and e-democracy with Jason Wilson and Barry Saunders, and more information on his research can be found on his Website at snurb.info. Bruns is General Editor of M/C – Media and Culture (www.media-culture.org.au).

Jason G. Caudill holds a bachelor’s degree in Business, an MBA, and a PhD in Instructional Technology from the University of Tennessee. Jason currently serves as an Assistant Professor of Business Administration at Carson-Newman College, where he teaches in the areas of Management Information Systems and Management. Jason’s primary research interests are in the application of technology for online learning, the management of technology, and open source software. Jason holds memberships in multiple honor societies, including The Honor Society of Phi Kappa Phi and Sigma Xi, the Scientific Research Society. Outside of work Jason enjoys the outdoors, woodworking, and college football and basketball.

Hee Jung Cho is a research fellow at the Social Science Research, Sogang University. She received Ph. D. in political science from Sogang University and worked as an e-voting policy making team member of the National Election Commission of Korea. She conducts research in the areas of political use of technology and network democracy such as e-voting and e-campaign. She is a member of the Korean Political Science Association. She has published information technology and politics related articles in several venues including Korean Political Science Review.

Ms. Isabel A. Cole, M.I.S., is a librarian and document specialist who has worked at the Internet Public Library and the Indiana State Library, as well as the Software Patent Institute. Her Master’s degree concentration was Library Science, which included study of referencing and cataloging. Her Master of Information Science degree is from the University of Michigan.

Dr. Roland J. Cole, J. D., Ph.D, is a lawyer and policy analyst who has worked for several think tanks and several law firms and taught in Schools of Public Policy, Business, and Law at three major universities – the University of Washington, the University of Michigan, and Indiana University. He was the co-founder and first president of the international Association of Personal Computer User Groups and was for many years the Executive Director of the Software Patent Institute. He also serves as Director of Technology Policy for the Sagamore Institute for Policy Research and a subcontractor to Thomas P. Miller & Associates. His degrees are from Harvard University.

Mark Deakin is Director of the Centre for Learning Communities, Reader and Teaching Fellow in the School of Engineering & the Built Environment, Edinburgh Napier University. His research is inter-disciplinary, cutting across academic, scientific and technical boundaries, working thematically to uncover what ICT-related actions contribute to sustainable urban development. This work has involved him developing ICT-related policies mapping out the social needs and informational requirements of urban sustainability and eGovernance challenges the digitisation of communication technologies pose.
About the Contributors

**Dennis de Kool** has studied public administration at the Erasmus University Rotterdam in the Netherlands. He finished his PhD thesis in 2007. His thesis was focused on the impacts of monitors on intergovernmental relationships. Currently he is working as a researcher at the Center for Public Innovation. One of his recent research activities is a study about the impacts of GIS-based monitors on learning processes within public organizations.

**Thomas Doellman** was a student at Southern Illinois University Edwardsville at the time of this research. He completed his B.S., major in Computer Management Information Systems from the School of Business. He is currently completing graduate studies at the University of Florida in Gainesville, Florida.

**Stephen Fariñas** is a student at Florida International University studying for his Ph.D. in Public Management. His dissertation research will focus on creating a hybrid housing model by combining components from ecovillages and community land trusts (CLTs). The idea is to combine the environmental and social sustainability of ecovillages with the affordability and social sustainability of CLTs to create truly sustainable and affordable housing. Further research will be conducted in two areas. The first area will focus on which governance structure(s) will function best in this new hybrid housing model. The second area will focus on the impact of community residents on local housing and land policy.

**José Rodrigues Filho** is an associate professor of Management Information Systems at the Universidade Federal da Paraíba, Brazil. He was Takemi Fellow at Harvard University and completed his postdoctoral studies at the Johns Hopkins University (School of Public Health). He completed his doctoral studies at the University of Manchester, England. He was visiting professor at Acadia University and Dalhousie University (Canada), and associate professor at the Universidade Federal de Pernambuco, Brazil. His areas of interests include management information systems, specially, health information, nursing information and hospital information systems, in addition to e-government and e-voting.

**Prof. Panos Fitsilis** studied computer engineering at Patras University, Greece. He received his PhD (1995) in Software Engineering. He worked, as software engineer and as business unit manager at large software development companies, and he was responsible for the development, deployment and operation of a number of prestigious IT systems for European Commission. Since 2003 he has been Professor at Technological Education Institute of Larissa, School of Business and Economics, Project Management Department. Currently, Prof. Panos Fitsilis is Head of Project Management Department and Deputy Director at Technological Research Center of Thessalia, Greece. He is the author of three books and author of many articles published on scientific journals and magazines. Further, he was member of the development team of Hellenic Standard on managerial capability of public organization, ELOT -1429. His research interests include: Project Management, Software Engineering, e-Government Systems, Business Process Reengineering, etc.

**J. Ramon Gil-Garcia** is an Assistant Professor in the Department of Public Administration and the Director of the Data Center for Applied Research in Social Sciences at Centro de Investigación y Docencia Económicas (CIDE) in Mexico City. Currently, he is a Research Fellow at the Center for Technology in Government, University at Albany, State University of New York (SUNY) and a Faculty Affiliate at the National Center for Digital Government, University of Massachusetts Amherst. Dr. Gil-
Garcia is the author or co-author of articles in prestigious academic journals such as *The International Public Management Journal*, *Government Information Quarterly*, *Journal of the American Society for Information Science and Technology*, and *European Journal of Information Systems*, among others. His research interests include collaborative electronic government, inter-organizational information integration, adoption and implementation of emergent technologies, digital divide policies, new public management, public policy evaluation, and multi-method research approaches.

**Girish J. “Jeff” Gulati** is an Assistant Professor of Political Science at Bentley University who earned his Ph.D. from the University of Virginia. Dr. Gulati’s research areas are telecommunications policy, e-government, political communication & the news media, campaigns & elections, and representation in theory and practice. Additionally he has designed studies assessing higher education programs and policies, election polls, and surveys for non-profits, interest groups and local governments. His recent work on new media and e-government has appeared in *Harvard International Journal of Press/Politics, Social Science Computer Review, Politicking Online, The Year of Obama* and other various academic journals, edited volumes, and conference proceedings. Dr. Gulati also serves on the editorial boards of the *Journal of Information Technology & Politics* and *Journal of Political Marketing*.

**Marvine Hamner** is an Assistant Professor at George Washington University in Washington, DC, USA. Dr. Hamner is also a co-founder of a women-owned small business, LeaTech LLC. Dr. Hamner has over 20 years experience working and managing a variety of projects from research grants to multi-million dollar commercial programs and holds patents in the U.S. as well as several other countries. Dr. Hamner is an Associate Editor for the *Journal of Homeland Security and Emergency Management*. In addition, she reviews manuscripts for the Institute of Physics, *Measurement Science and Technology Journal, Computers and Industrial Engineering*, as well as *Personality and Individual Differences*. Dr. Hamner is currently an Associate Fellow with the American Institute of Aeronautics and Astronautics and a member of the International Association of Emergency Managers. She is a member of the MIT Club of Washington, the Women’s Business Center in Washington, D.C., and the Philosophical Society of D.C.

**Pekka Huovila** is a Chief Research Scientist at VTT Technical Research Centre of Finland. His research interests focus on performance and sustainability of the built environment and decision support tools for the sustainable knowledge society. Pekka has contributed to number of international research projects to public and private clients, such as Perfection, SURE, CREDIT, ManuBuild, Stand-Inn, IW-LORB, Value4Network, Asia Pro Eco, Intelcity, Mosaic, Tissue, PeBBu, Intelcity, Neskey, Roadcon, CRISP and Bequest. He acts also as a Visiting Professor at the University of Salford, UK.

**Sungsoo Hwang** is an assistant professor at the Department of Public Administration, Yeungnam University in Daegu, Korea. He formerly taught at the Grand Valley State University, MI, USA. He received his Ph.D. in public affairs from the University of Pittsburgh and worked as a project team member for the Pittsburgh Neighborhood and Community Information System. He conducts research in the areas of collaborative governance with an emphasis on utilizing information technology such as Geographical Information Systems. He is a member of International Working Group on Online Consultation and Public Policy Making, funded by National Science Foundation. He has published information technology related articles in several venues including *Government Information Quarterly*. 
Jennifer Kurtz, MBA, a technology and economic development consultant currently focused on information security and privacy, led Indiana’s statewide broadband infrastructure initiative as Indiana’s eCommerce Director. The Indiana Interconnect report and conference highlighted opportunities for improving Indiana’s technology-based economic development capacity, showcased community success stories, and influenced improved broadband deployment in Indiana. She also wrote the Governor’s Technology Roundtable report and served on the 2003/2004 eGov Task Force that helped Indiana achieve a #4 ranking for eGov services. In addition, she built and managed the telecommunications infrastructure for Delco Remy International and has held appointments at Purdue and Ball State Universities.

Brian Lake is a PhD researcher in the department of Computer Science and Information Systems at the University of Limerick, Ireland. A political science graduate of Memorial University of Newfoundland, Canada, Brian also holds a Masters by Research in Politics from Acadia University, Nova Scotia, Canada, specialising in democratisation and e-government. He currently serves as a learning technologist for universities in the United Kingdom, investigating the social impact of learning technologies. His research interests include the politics of free software in European Union decision-making – operationalised via “open source” software communities as political institutions. As a method of applying this interest practically, Brian undertakes qualitative text-analysis within a framework of critical discourse theory.

Mark Liptrott is a University Lecturer in Information Systems within the Business School at Edge Hill University and his research has focussed on the public policy process and the diffusion of e-voting in the UK. Mark has been a regular contributor to the Electronic Journal of E-Government and presented for the last three years at the European Conference of E Government. His research has been published in various journals including the UK Government Computing News Magazine. He is an associate editor for the Journal of Information Technology and Citizenship and reviews for a number of other journals. In 2009 he was an invited speaker at the International Conference on e-Government and e-Governance, in Ankara, Turkey.

Patrizia Lombardi is a leading expert in the use of environmental assessment methods and an established figure in the field of evaluating sustainable development for over 20 years. She has coordinated or served as lead partner in several Pan-European Projects on urban sustainability and Information Technologies, including EU BEQUEST, INTELCITY Roadmap, IP INTELCITIES, S.U.R.Pr.I.S.E. Interreg III C, ISAAC and PERFECTION. She has published widely in the field and was co-author of the book ‘Evaluating Sustainable Development in the Built Environment’ which is being issued to the Universities of the G8 countries at their Summit in Turin in May 2009.

Fernando Gonzalez Miranda is an Adviser to the Secretary of Administration at Universidad Autónoma del Estado de México (UAEM) in the city of Toluca, State of México. He is also working for the Organization and Administrative Development Direction in the same institution. He has a Masters degree on Public Administration and Policy from Centro de Investigación y Docencia Económicas (CIDE). His research interests include democratic electronic government, digital divide policies, governance, and policy networks.
Rebecca Moody has studied political science at the University of Leiden in the Netherlands. Currently she is working at the Erasmus University in Rotterdam on her PhD thesis on the influence of Geographical Information Systems on agenda-setting and policy design. Additionally she has participated in a project dealing with micro mobilization by traditional and new media.

Eduardo Araya Moreno is Professor at the Faculty of Economics and Management Sciences of the University of Valparaíso, Chile. He is currently writing a PhD dissertation on ICT using by political parties in Chile, Costa Rica and Uruguay. He has published papers on State features in the Informational Society, features of personnel training programs in topics related to e-government, and e-government in Chile. E-Mail: edarmo@yahoo.com

Bekir Parlak is a professor in the Department of Public Administration at the University of Uludag in Turkey. He received his Ph. D. degree in Province Administration and Local Governments from the University of Cumhuriyet. His research interests are e-government, local e-government, theory of democracy, administrative history. He teaches courses on Public Administration, Local Governments, Governance and E-Government, Comparative Government Systems, Personnel Management, Modern Management Techniques, Administrative Reforms in Turkey and Turkish Administrative History.

Anne Powell is an Associate Professor in the Computer Management and Information Systems department at Southern Illinois University Edwardsville. She received both her MBA and Ph.D. in the Management of Information Systems from Indiana University. She has ten years corporate experience that includes work as a Systems Engineer for EDS Corporation and as programmer, systems analyst and business analyst for American United Life Insurance Company in Indianapolis. Her primary teaching responsibilities are the Systems Analysis and Design course series. Her research specializations include virtual teams and the impact of new technology on individuals, teams, and organizations. Her work has been presented at numerous conferences and has been published in numerous Information Systems academic journals.

Michael Romano is currently a doctoral student in the Department of Political Science at Western Michigan University. His current research interests focus on the expanding role of the media in politics, focusing specifically on how changes in information technology affected campaigns and elections. He also is interested how we learn political values from and how our political values are reflected in popular culture. Tentatively his dissertation will focus on the online/offline dichotomy of political participation during campaigns and how these two types of participation overlap.

Peter Salhofer is holding a professorship in computer science at FH JOANNEUM, University of Applied Sciences, Graz, Austria. Before he joined FH JOANNEUM he was working for the municipality of the City of Graz where he was responsible for the introduction of New Public Management methods as well as for other modernization projects. His main research interests currently lie in the adaption and integration of semantic technologies into system engineering practices with a strong connection to e-Government. He is the author of several publications in this field and also managed several software development projects aiming at improved Government-to-Citizen interaction.
About the Contributors

**Zahid Sobaci** received his Ph.D. in public administration at Uludag University. He is currently a research assistant at Department of Public Administration, Uludag University. Zahid Sobaci has published several articles. His research topics include administrative reform, e-government, new public management.

**Hyunjin Seo** is a Ph.D. candidate and adjunct professor at the S.I. Newhouse School of Public Communications, Syracuse University. Seo holds an M.A. in journalism from the University of Missouri-Columbia. Her research interests include international communications, public diplomacy, public relations, and new media. Her research and writing has generated top paper awards at international conferences and has been published in international journals such as *Asian Journal of Communication*, *International Journal of Public Opinion Research*, and *Public Relations Review*. Her dissertation that aims to establish and test a theory explaining how national image is formed in the era of information technology and social networking. Seo has worked as both a journalist and a public relations consultant in the U.S. and South Korea. She was a diplomatic correspondent for a leading English-language newspaper in South Korea and has assisted U.S. and Korea-based nongovernmental organizations with their public relations campaigns.

**Bernd Stadlhofer** is a research assistant for software engineering, databases and information systems at FH JOANNEUM, University of Applied Sciences, Graz, Austria. His main research interests currently lie in the adaption and integration of semantic technologies into system engineering practices with a strong connection to e-Government. He participated in several publications in this field.

**Dr Minna Sunikka-Blank** is a registered architect and a Lecturer at the Department of Architecture in the University of Cambridge and Fellow in Architecture at Churchill College in Cambridge. Her research focuses on improving policies for energy efficiency in the European housing stock. She has worked on Environmental Impact Assessment, the management of environmental properties in real estate management, sustainable energy supply in urban renewal projects and comparative policy analysis in Finland, the UK and in the Netherlands and published several books and research articles on the subject.

**Dr. Doaa Taha** is an independent consultant in Washington, DC in the areas of Business Management and Emergency Management. Dr. Taha earned her doctorate through George Washington University’s Institute for Crisis, Disaster and Risk Management. Her research in Emergency Management is highly regarded. She has several articles on Emergency Management in the area of Business Continuity and Continuity of Operations.

**Anas Tawileh** is a researcher and consultant for Information and Communication Technology for Development (ICT4D). Anas worked on many projects to bring technology to developing countries and has designed, developed and delivered several training and capacity building programs and workshops. He is currently working as consultant for the International Development Research Centre’s ICT4D project in the Middle East. His experience also includes more than seven years of working with international organizations including the European Commission, the Open Society Institute and the Association for Progressive Communications.
Stuart Thorson is professor of international relations and political science and is the Donald P. and Margaret Curry Gregg Professor at the Maxwell School of Syracuse University. Thorson has co-edited two books on conflict resolution and published over 40 articles and book chapters about foreign policy, decision-making, computer modeling, and democratic theory. His current research interests are the uses of information technology in support of governance and the role of science in diplomacy. Thorson directs the Maxwell School’s integrated information technology research collaboration with Kim Chaek University of Technology (Democratic People’s Republic of Korea) and is co-director of Syracuse University’s Regional Scholars and Leaders Seminar initiative. He is a founding member of the National Committee on North Korea (U.S.), a co-founder of the U.S.-DPRK Scientific Engagement Consortium, and a board member of the Korea Society.

Gerald Tretter is a research assistant for software engineering, databases and information systems at FH JOANNEUM, University of Applied Sciences, Graz, Austria. His main research interests currently lie in the adaption and integration of semantic technologies into system engineering practices with a strong connection to e-Government. He participated in several publications in this field.

Christine B. Williams, a Professor of Government in the Global Studies Department at Bentley University, received her M.A. and Ph.D. degrees from Indiana University. Dr. Williams currently serves as the managing editor, North America for the Journal of Political Marketing, as Associate Editor and on the senior Editorial Board of the Journal of Information Technology and Politics and on the International Advisory Board of the International Journal of E-Politics. Her research area is political communication, with emphasis on new and emerging technologies. Dr. Williams is a member of a National Science Foundation funded project team studying design issues for public safety response management systems. Her work has appeared in academic journals, trade and professional association publications, as well as news media outlets worldwide.

Jason Wilson is a Lecturer in Digital Communications in the School of Social Sciences, Media and Communication at the University of Wollongong, Australia. His research interests include digital game cultures, citizen journalism and the online public sphere, mobile media and new media history. He has previously held academic appointments at the University of Bedfordshire (UK) and in the Creative Industries Faculty at Queensland University of Technology. Along with his record as a researcher, Jason has experience as a new media practitioner. He was the project manager and chief editor of YouDecide2007, a citizen journalism service run during the 2007 Federal Election. He was also E-Democracy Director at online campaigning organisation GetUp!, where he project-managed the Project Democracy service.

David Yates is an Assistant Professor of Computer Information Systems at Bentley University. David’s research areas include computer networking, data communications, sensor networks, embedded systems, operating systems, and computer architecture. Before joining Bentley, David held research and academic positions at the University of Massachusetts and Boston University. His work has been published and presented at international symposiums and conferences, and appeared in refereed journals. In the corporate arena, he was a co-founder and vice president of software development at InfoLibria – a startup that grew to become a leading provider of hardware and software for building content distribution and delivery networks before it was acquired. With various colleagues, he holds several U.S.
About the Contributors

patents for processes and systems related to computer networking, content management, and mobile computing. He holds a PhD and MSc from the University of Massachusetts. He also holds a BSc from Tufts University.
