About the Authors

Merrill Warkentin is professor of MIS at Mississippi State University, USA. He has published over 125 research manuscripts, primarily in e-commerce, computer security management, and virtual teams, in books, proceedings, and journals such as *MIS Quarterly, Decision Sciences, Decision Support Systems, Communications of the ACM, Communications of the AIS, Information Systems Journal, Journal of End User Computing, Journal of Global Information Management*, and others. Professor Warkentin is the co-author or editor of four books and is currently an associate editor of *Information Resources Management Journal* and the *Journal of Information Systems Security*. Dr. Warkentin has served as a consultant to numerous organizations and has served as national distinguished lecturer for the Association for Computing Machinery (ACM). Previously, Dr. Warkentin held the Reisman Research Professorship at Northeastern University in Boston, where he was also the director of MIS and e-commerce programs. Professor Warkentin holds BA, MA, and PhD degrees from the University of Nebraska-Lincoln. He can be reached at mwarkentin@acm.org and www.MISProfessor.com.

Rayford B. Vaughn received his PhD from Kansas State University in 1988. He is a professor of computer science and teaches and conducts research in the areas of software engineering and information security. Prior to joining the university, he completed a 26-year career in the Army, where he commanded the Army’s largest software development organization and created the Pentagon agency that today centrally manages all Pentagon IT support. While on active duty with the Army, he served a three-year assignment with the National Security Agency’s National Computer Security Center, where he authored national-level computer security guidance and conducted computer security research. After retiring as a full colonel in June 1995, he accepted a
position as vice president of DISA Integration Services, EDS Government Systems, where he was responsible for a wide variety of technical service contracts. Dr. Vaughn has over 70 publications to his credit and is an active contributor to software engineering and information security conferences and journals. In 2004, Dr. Vaughn was named a Mississippi State University, USA, eminent scholar. He holds the Billy J. Ball Endowed Professorship of Computer Science and Engineering.

* * *

Sheikh I. Ahamed is an assistant professor in the Department of Mathematics, Statistics, and Computer Science at Marquette University in Milwaukee, Wisconsin, USA. He is a member of the IEEE, ACM, and the IEEE Computer Society. Dr. Ahamed received a BSc in computer science and engineering from the Bangladesh University of Engineering and Technology, Bangladesh in 1995. He completed his PhD in computer science from Arizona State University in Tempe, Arizona in 2003. His research interests are security in ad hoc networks, middleware for ubiquitous/pervasive computing, sensor networks, and component-based software development. He serves regularly on program committees of international conferences in software engineering and pervasive computing, such as COMPSAC 04, COMPSAC 05, and ITCC 05. Dr. Ahamed can be contacted at iq@mscs.mu.edu; http://www.mscs.mu.edu/~iq.

Richard Baskerville is professor and chairman of the CIS Department in Georgia State University, USA. His research and authored works regard security of information systems, methods of information systems design and development, and the interaction of information systems and organizations. Baskerville is the author of Designing Information Systems Security (J. Wiley) and more than 100 articles in scholarly journals, practitioner magazines, and edited books. He is a chartered engineer, holds a BS summa cum laude from The University of Maryland, and MS and PhD degrees from The London School of Economics.

Ernst Bekkering is an assistant professor in management information systems at Northeastern State University in Tahlequah, OK, USA. Dr. Bekkering received both his MS and PhD degrees at Mississippi State University. In his dissertation, he demonstrated how trust in video communication can be negatively influenced by an artificial effect of gaze avoidance created by camera positioning. His current research interests include adoption of new technologies, security, and telecommunications. He has published in Communications of the ACM, Journal of Organizational and End User Computing, the Journal for the Advancement of Marketing Education, and several conference proceedings.

A. Chris Bogen earned his BS and MS in computer science from Mississippi State University (MSU) where, at the time of this publication, he is a PhD candidate. His current research evaluates the utility of domain modeling in planning computer forensics
examinations. From 1999-2004, Mr. Bogen assisted and taught software engineering courses at MSU. He also served three-month internships at the Mississippi Attorney General’s Cyber Crime Unit and the National Defense University in Washington, D.C. Mr. Bogen is currently a software engineer for the U.S. Army Corps of Engineers, Engineering Research and Development Center, Information Technology Lab, Vicksburg, MS.

Mark W. S. Chun is an assistant professor of information systems at the Graziadio School of Business and Management at Pepperdine University, USA. He earned a PhD in information systems from the University of Colorado at Boulder and received an MBA from the University of California, Irvine, in the area of international business and strategy. He holds a Bachelor of business administration degree with an emphasis in management information systems from the University of Hawaii. Dr. Chun’s research focuses on the use of information technology to create value and to transform organizations. His research interests also include the integration of information systems and the management of knowledge in corporate merger environments. He can be contacted at mark.chun@pepperdine.edu.

David A. Dampier is assistant professor and undergraduate coordinator in the Department of Computer Science and Engineering at Mississippi State University (MSU), USA. He received his BS in mathematics from the University of Texas at El Paso in 1984, and MS and PhD in computer science from the Naval Postgraduate School in 1990 and 1994, respectively. Dave Dampier is a retired U.S. Army officer with 23 years of military service. He currently leads the computer forensics effort for the Center for Computer Security Research and teaches computer forensics and software engineering classes in the Department of Computer Science and Engineering at MSU. His research interests include computer forensics and software evolution. He has had papers published in the Annals of Software Engineering, Journal of Systems Integration, and Transactions of the Society for Design and Process Science. He is a member of the ACM, IEEE, SDPS, and IFIP WG 11.9 on Digital Forensics.

Lieutenant Colonel Ronald C. Dodge, Jr., PhD is an assistant professor and director of the Information Technology and Operations Center at the United States Military
Academy. He has served for over 17 years as an aviation officer and is a member of the Army Acquisition Corps in the U.S. Army. Ron received his PhD in computer science from George Mason University, Fairfax, Virginia. He has published over 20 research manuscripts, addressing a variety of information security and information technology topics, and is a frequent guest speaker. His publications have appeared in books, journals, and proceedings. Additionally, he serves on the boards and chairs several national and international organizations. His current research focuses are information warfare, network deception, security protocols, Internet technologies, and performance planning and capacity management. Lieutenant Colonel Dodge can be reached at ronald.dodge@usma.edu; www.itoc.usma.edu/dodge.

Martin Dortschy is studying electronic business at the University of Arts, Berlin, and is in his final semester. He holds a bachelor’s degree in computer science and business studies and participated the Master of Electronic Business program as a study-abroad student at Edith Cowan University in Western Australia. While studying, he worked for three years in the Project Quality Assurance Department at IBM Germany and in the IT Consulting Department of Siemens Business Services.

Jun Du is associate professor of information systems at the School of Management, Tianjin University, China. He received his bachelor’s, master’s and PhD degrees, all from Tianjin University. His research interests include management information systems, industrial management, engineering economics, and operations management.

Lauren Eder is associate professor and chair of the Department of Computer Information Systems at Rider University, Princeton, New Jersey, USA. She received her PhD and MBA in management information systems from Drexel University and a BS in business education from Boston University. Prior to her career in academia, Dr. Eder worked as a marketing representative for both IBM and for Digital Equipment Corporation (not at the same time). Her current research interests include the adoption, diffusion, and infusion of Internet technology, and the deployment of enterprise resource planning systems. Her work has been published in *Omega*, *Communications of the ACM*, *Computer Personnel*, the *Journal of Information Systems Education*, and the *Information Resources Management Journal*, among others. She is editor of *Managing Healthcare Information Systems with Web-Enabled Technologies*, Idea Group Publishing, Hershey, PA (2000). Most recently Dr. Eder completed the Advanced Wine Certificate program at the Wine School of Philadelphia and her research interests have expanded to include the history and development of New World wines.

Eduardo Fernández-Medina has a PhD and an MSc in computer science from the University of Sevilla. He is assistant professor at the Escuela Superior de Informática of the Universidad de Castilla–La Mancha at Ciudad Real (Spain). His research activity is on security in databases, data warehouses, Web services and information systems, and also security metrics. He is co-editor of several books and chapters of books on these subjects, and has had several dozens of papers presented at national and international conferences (DEXA, CAISE, UML, ER, etc.). He is author of several manuscripts on
national and international journals (including *Information Software Technology*, *Computers and Security*, *Information Systems Security*, and others). He participates in the ALARCOS research group of the Department of Computer Science at the University of Castilla-La Mancha, in Ciudad Real, Spain. He belongs to various professional and research associations (ATI, AEC, ISO, IFIP WG11.3, and others). His e-mail is eduardo.fdezmedina@uclm.es

**Dieter Fink** is an associate professor in the School of Management Information Systems at Edith Cowan University in Western Australia. Prior to joining academe, he worked as a systems engineer for IBM and as manager, information systems consulting for Arthur Young (now Ernst & Young). He has been a visiting academic at various universities, including the Australian National University, Canterbury University and Free University of Berlin. His interests, published in a wide range of international journals, cover information technology value and benefit realization and minimizing the risk of e-commerce and e-business applications.

**Steven Furnell** is the head of the Network Research Group at the University of Plymouth in the United Kingdom, and an associate professor with Edith Cowan University in Western Australia. He specializes in computer security and has been actively researching in the area for 13 years. Dr. Furnell is a fellow and branch chair of the British Computer Society (BCS), a senior member of the Institute of Electrical and Electronics Engineers (IEEE), and a UK representative in the International Federation for Information Processing (IFIP) working groups relating to information security management, network security and information security education. He is the author of over 140 papers in refereed international journals and conference proceedings, as well as the books *Cybercrime: Vandalizing the Information Society* (2001) and *Computer Insecurity: Risking the System* (2005).

**Arif Ghafoor** is currently a professor in the School of Electrical and Computer Engineering, at Purdue University, West Lafayette, Indiana, USA, and is the director of the Distributed Multimedia Systems Laboratory and the Information Infrastructure Security Research Laboratory. He has been actively engaged in research areas related to database security, parallel and distributed computing, and multimedia information systems. He has served on the editorial boards of various IEEE and ACM journals. He has co-edited a book entitled *Multimedia Document Systems in Perspectives* and has co-authored a book entitled *Semantic Models for Multimedia Database Searching and Browsing* (Kluwer Academic Publishers, 2000). He is a fellow of the IEEE. He has received the IEEE Computer Society 2000 Technical Achievement Award for his research contributions in the area of multimedia systems. He can be contacted at ghafoor@ecn.purdue.edu.

**Erik Graham**, CISSP, is the chief information security officer for General Dynamics C4 Systems, USA, where he is responsible for protecting the confidentiality, integrity, and availability of General Dynamics’ digital assets from a wide range of threats. Erik earned a BS from the University of Phoenix and holds multiple industry certifications, including:
Microsoft certified systems engineer, master certified Novell engineer, and certified information systems security professional. Erik is an active member in a number of professional organizations and has taught continuing education classes about wireless security issues to the Phoenix Chapter of the Information Systems Audit and Control Association (ISACA). Erik has also been a guest speaker addressing issues about wireless security to classes at Arizona State University.

Kaj J. Grahn, Dr Tech, is presently senior lecturer in telecommunications at the Department of Business Administration, Media, and Technology at Arcada Polytechnic, Helsinki, Finland.

Charla Griffy-Brown, PhD, is an associate professor of information systems at Pepperdine University’s, USA, Graziadio School of Business and Management and has served as an associate professor at Tokyo Institute of Technology. In 2004, she received a research award from the International Association for the Management of Technology in which she was recognized as one of the most prolific researchers in the technology management and innovation field. Dr. Griffy-Brown’s research examining information systems in Japan and China is currently funded by an SAP University Alliance Grant. She also holds research funding from the Pepperdine Voyager/Lilly Foundation and the Rothschild Research Endowment for international projects exploring information systems security and ethics. Dr. Griffy-Brown graduated from Harvard University, is a former Fulbright scholar, and holds a PhD in technology management from Griffith University in Queensland, Australia. Her e-mail address is charla.griffy-brown@pepperdine.edu

Ronda R. Henning, CISSP-ISSAP, ISSMP, CISM, is a senior scientist at Harris Corporation (USA), a Melbourne, Florida-based international communications company. Ms. Henning is the network security manager for the FAA Telecommunication Infrastructure (FTI) Program. Prior to this assignment, she led the Harris Information Assurance Center of Excellence. Prior to her employment at Harris, Ms. Henning worked in information security research and development at the National Security Agency. Ms. Henning holds an MBA from the Florida Institute of Technology, an MS in computer science from Johns Hopkins University, and a BA from the University of Pittsburgh.

David M. Hollis (LTC, MI, USAR) is currently on extended active duty as the senior operations planner for the U.S. Army Computer Emergency Response Team (ACERT), 1st Information Operations Command. He was previously the ACERT S-2/intelligence branch chief, where he created the branch and led a team of Internet intelligence analysts, and developed innovative methods of visualization graphics for Internet attack/defense analysis. He was also an information operations vulnerability assessment team chief (Red Team), leading a team of military/contractor network penetration attack specialists. Prior to his mobilization, he was senior vice president at Cryptek Secure Communications, and director of federal operations/sales at Secure Computing Corporation. He has a BS in interdisciplinary studies (engineering management) from Old Dominion University and an MBA from Strayer University. He is a graduate of the National Defense
University’s information-based warfare course and the Army’s Command and General Staff College.

**Katherine M. Hollis** has over 20 years of experience in the government, military, and private enterprise. She has made significant contributions toward introducing security and identity management information systems into U.S. Government agencies and private industry on a global basis. She is an experienced director, program manager, operations manager, and senior information assurance professional. Currently, she is the Electronic Data Systems (EDS), USA, director for security and privacy professional services security architecture and is the recognized global lead in secure identity management. In these roles, she supports government and industry clients on a worldwide basis. Ms. Hollis is a noted speaker and has supported conferences and seminars in government and industry venues, to include speaking engagements in Hong Kong, Singapore, and London. She is a member of the AFCEA Technical Board, a member of the Federation for Identity and Cross-Credentialing Systems Board, and is a prominent member of the Electronic Authentication Partnership (EAP), Industry Advisory Board (IAB) and FiXs Federation. She has also been active in the International Collaborative Identity Management Forum. Ms. Hollis provides senior leadership to multiple leads and program managers for information assurance (IA) support to multiple government agencies, industry, and European Union member countries. Ms. Hollis also has extensive government PM experience as PM for DoD Electronic Commerce and the Installation Support Module (ISM) programs.

**Tobias Huegle** is studying electronic business at the University of Arts, Berlin, while currently writing his final thesis in collaboration with Siemens Business Services. He was on a study-abroad program at Edith Cowan University in Western Australia, where he participated in lectures in the Master of Electronic Business program. Before working with Siemens, he worked on a number of consulting and research projects for major German companies and government agencies at the Institute of Electronic Business in Berlin. His academic and professional interests concentrate on information and knowledge management and IT governance.

**Jianxin (Roger) Jiao** is associate professor of systems and engineering management, School of Mechanical and Aerospace Engineering, Nanyang Technological University, Singapore. He received his PhD in industrial engineering from Hong Kong University of Science & Technology. He holds a BS in mechanical engineering from Tianjin University of Science & Technology in China, and an MS in mechanical engineering from Tianjin University, China. His research interests include mass customization, design theory and methodology, reconfigurable manufacturing systems, engineering logistics, and intelligent systems. His publications have appeared in *IIE transactions*, *Computer-Aided Design*, *CIRP Annals*, *Journal of Intelligent Manufacturing*, *Concurrent Engineering: Research and Application*, *AIEDAM*, *International Journal of Advanced Manufacturing Technology*, and *International Journal of Production Research*. He is a member of IEEE, ASME, and IIE.
Yuan-Yuan Jiao is associate professor of business management at the School of International Business, Nankai University, China. She received her bachelor’s degree in textile engineering from Wuhan Textile Engineering Institute, a master’s degree in industrial engineering from Tianjin University, and a PhD in systems engineering from Tianjin University, China. Her research interests include industrial management, project management, and international business.

Allen C. Johnston is an assistant professor and the entergy endowed professor of CIS at the University of Louisiana-Monroe, USA, and a doctoral candidate in business information systems at Mississippi State University. He holds a BS from Louisiana State University in electrical engineering, as well as an MSIS from Mississippi State University. He has works published in the Proceedings of the National Decision Sciences Institute, Proceedings of the Americas Conference on Information Systems, Proceedings of the Information Resources Management Association, Proceedings of the Security Conference, and in the Proceedings of the ISOneWorld International Conference. His current research interests include risk analysis and behavioral aspects of computer security management.

Jonny Karlsson, BSc (Eng), is presently working as a research assistant in the field of network security at the Department of Business Administration, Media, and Technology at Arcada Polytechnic, Helsinki, Finland.

Markus Klemen holds an MA in international business administration and currently is working on his dissertation in the field of SME-specific IT security. He is reading various lectures on IT security at the Vienna University of Technology, Australia, and is employed at the Institute of Software Technology and Interactive Systems, where he is responsible for the IT management of the institute, as well as for various scientific projects concerning IT security. He was self-employed for more than 10 years, specializing in IT security management and administration.

K. Pramod Krishna has several years of work experience as an IT consultant. His experience includes working in the capacity of a program manager with Wipro Ltd, one of India’s largest software companies. He has worked on several projects related to the design and development of IT infrastructure including system integration and network design. He holds a Bachelor’s of technology degree in electronics and communication engineering. Pramod is a Cisco-certified network administrator, as well as a Sun certified system administrator.

Ammar Masood received a BS degree in aeronautical engineering from the College of Aeronautical Engineering, NED Engineering University, Pakistan, in 1991, and an MS in electrical and computer engineering from Purdue University, West Lafayette, Indiana, in 2003. He is currently working toward a PhD degree at the School of Electrical and Computer Engineering at Purdue University. His research interests include software...
security testing and information infrastructure security. His e-mail address is ammar@ecn.purdue.edu.

Sushma Mishra is a doctoral student at Virginia Commonwealth University, Richmond, USA. She has a MBA degree from New Delhi, India. Her research interests lies in the areas of corporate governance practices and its implications on information technology, knowledge management and information security.

Jack J. Murphy is president and CEO of Dexisive Inc., an information technology system integrator focusing on information assurance, network solutions, and enterprise infrastructure applications. Before founding Dexisive Inc., Jack was the CTO for EDS U.S. Government Solutions Group, USA. Jack is an EDS fellow emeritus and remains actively involved with EDS thought leaders. Jack received his PhD in computer science from the University of Maryland in 1986. Dr. Murphy retired as a lieutenant colonel from the Air Force where he spent much of his career on the faculty of the Air Force Academy teaching math, operations research, and computer science.

Mario Piattini has an MSc and a PhD in computer science from the Politecnical University of Madrid; is a certified information system auditor by ISACA (Information System Audit and Control Association); an associate professor at the Escuela Superior de Informática of the Castilla-La Mancha University (Spain); and the author of several books and papers on databases, software engineering, and information systems. He leads the ALARCOS research group of the Department of Computer Science at the Universidad de Castilla-La Mancha, in Ciudad Real, Spain. His research interests are: advanced database design, database quality, software metrics, object-oriented metrics, and software maintenance. His e-mail address is Mario.piattini@uclm.es.

Göran Pulkkis, Dr Tech, is presently senior lecturer in computer science and engineering at the Department of Business Administration, Media, and Technology at Arcada Polytechnic, Helsinki, Finland.

Colonel Daniel Ragsdale, PhD is associate professor and director of the information technology program in the Department of Electrical Engineering and Computer Science at the U.S. Military Academy. An Army officer with over 24 years of active service, he has published over 50 research manuscripts, addressing a variety of information security and information technology topics. His publications have appeared in books, journals, and proceedings such as *IEEE Security and Privacy*, *IEEE Computer*, the *Journal of Information Security*, and the *Journal of Information Warfare*. Colonel Ragsdale serves on the board of several national and international organizations. He holds a BA from the U.S. Military Academy, an MS from the Naval Postgraduate School, and a PhD from Texas A&M University. Colonel Ragsdale can be reached at daniel.ragsdale@usma.edu and www.itoc.usma.edu/ragsdale.
H. Raghov Rao is a professor in the School of Management at State University of New York at Buffalo, USA. His interests are in the areas of management information systems, decision-support systems, and expert systems and information assurance. He has chaired sessions at international conferences and presented numerous papers. He has authored or co-authored more than 100 technical papers, of which more than 60 are published in archival journals. His work has received best paper and best paper runner-up awards at AMCIS and ICIS. Dr. Rao has received funding for his research from the National Science Foundation, the Department of Defense, and the Canadian Embassy, and he has received the University’s prestigious teaching fellowship. He has also received the Fulbright fellowship in 2004. He is a co-editor of a special issue of The Annals of Operations Research, the Communications of the ACM, and the associate editor of Decision Support Systems, Information Systems Research, and IEEE Transactions in Systems, Man and Cybernetics, and co-editor in chief of Information Systems Frontiers.

Sahra Sedigh-Ali received a BS from Sharif University of Technology and MS and PhD degrees from Purdue University, all in electrical engineering, in 1995, 1998, and 2003, respectively. She is currently an assistant professor with the Departments of Electrical and Computer Engineering and Information Science and Technology at the University of Missouri-Rolla, USA. She worked for Cisco Systems from May 1997 to May 2000. Dr. Sedigh-Ali held a Purdue Research Foundation fellowship from 1996 to 2000, and is a member of Eta Kappa Nu, IEEE, ACM, and ASEE. Her research interests include software quality, intelligent infrastructures, and safety-critical software. She can be contacted at sedighs@umr.edu.

Raj Sharman is an assistant professor in the School of Management at State University of New York at Buffalo, USA. His research interests are primarily in the field of information assurance, medical informatics, conceptual modeling and ontology, and data mining. His current projects in the area of information systems security include developing biologically inspired computer security models, as well as developing architectures for critical incident management systems. He is a recipient of several grants, both internal and external. These include grants in the areas of information security from NSF and AFSOR. His publications appear in peer-reviewed journals and international conferences in both the information systems and the computer science disciplines. He also serves as an associate editor for Journal of Information Systems Security. His past work experience
includes developing and managing hospital information systems. Raj Sharman has served on several PhD and Master’s thesis committees. He is currently guiding several projects in the area of information assurance. Raj Sharman received his Bachelor of technology in engineering and Master of Technology in industrial management from the Indian Institute of Technology Bombay, India. He received his MSc in industrial engineering and his PhD in computer science from Louisiana State University, Baton Rouge.

Ambareen Siraj is a PhD candidate in the Computer Science and Engineering Department at the Mississippi State University, USA. She is working under the direction of Dr. Rayford B. Vaughn. Her research is in the area of information assurance.

Andrew P. Snow received his BS and MS degrees in engineering (electrical) from Old Dominion University, and his PhD in information science from the University of Pittsburgh. His publications appear in IEEE Transactions on Reliability, IEEE Transactions on Engineering Management, Journal of Networks and Systems Management, Telecommunications Policy, ACM/Baltzer Journal on Mobile Networks and Applications, and IEEE Computer. Prior to returning to university for an academic career, he held positions as electronics engineer, member of the technical staff, manager, director, vice president, general manager, and chairman in telecommunications carrier, systems integration, and consulting firms.

Detmar Straub is the J. Mack Robinson distinguished professor of information systems at Georgia State University, USA. Detmar has conducted research in the areas of Net-enhanced organizations (e-commerce), computer security, technological innovation, and international IT studies. He holds a DBA (Doctor of Business Administration) in MIS from Indiana, and a PhD in English from the Pennsylvania State University. He has published over 120 papers in journals such as Management Science, Information Systems Research, MIS Quarterly, Organization Science, Communications of the ACM, Journal of MIS, Journal of AIS, Information & Management, Communications of the AIS, IEEE Transactions on Engineering Management, OMEGA, Academy of Management Executive, and Sloan Management Review.

Paul John Steinbart is a professor in the Department of Information Systems at Arizona State University, Tempe. He has developed and taught graduate courses on computer and information security and also teaches an undergraduate course on accounting information systems. Professor Steinbart’s research has been published in leading academic journals including MIS Quarterly, Decision Sciences, and The Accounting Review. He is also co-author of the textbook Accounting Information Systems published by Prentice-Hall. Professor Steinbart also serves as associate editor for the Journal of Information Systems (published by the American Accounting Association) and is a member of the editorial board for the International Journal of Accounting Information Systems.
Carl Stucke is a member of the Computer Information Systems faculty within the Robinson College of Business at Georgia State University, USA, and serves as coordinator of the Security SIG. Carl’s interests include security, privacy, business continuity, object-oriented systems analysis, and advanced technology-based business solutions. Before GSU, Stucke held senior technical and management positions at Equifax including chief scientist (VP R&D). Topics he addressed ranged from PKI, consumer identity verification, consumer products, and Equifax’s first Internet presence, to machine learning, expert systems, and supercomputing as applied to Equifax’s processes. Carl holds a PhD degree in mathematics from Emory University and initially taught mathematics and computer science.

Art Taylor has over 17 years’ experience as a practitioner in information systems and has published numerous books and articles on a variety of technical topics. As a practitioner, he was the technical lead on a number of projects where data security was a major concern. He is currently a lecturer at Rider University, Princeton, New Jersey, USA, where he teaches computer programming, network security, and other courses in the Computer Information Systems Department.

Juan Trujillo is a professor at the Computer Science School at the Universidad de Alicante, Spain. Trujillo received a PhD in computer science from the University of Alicante in 2001. His research interests include database modeling, conceptual design of data warehouses, multidimensional databases, OLAP, and object-oriented analysis and design with UML. He has published papers in international conferences and journals, such as ER, UML, ADBIS, CAiSE, WAIM, Journal of Database Management (JDM), and IEEE Computer. He served as a member of the Program Committees of several workshops and conferences, such as ER, DOLAP, DSS, and SCI. He also served as a reviewer of several journals such as JDM, KAIS, ISOFT, and JODS. He can be contacted at jtrujillo@dlsi.ua.es.

Shambhu Upadhyaya is an associate professor of computer science and engineering at the State University of New York at Buffalo, USA. He is currently PI on a DARPA Seedling grant on intrusion detection and, more recently, he received a DARPA contract (jointly with Telcordia and Carnegie Mellon University) in the area of insider threat mitigation using high-dimensional search and modeling. He is also PI on an ARDA effort in the area of insider-threat mitigation in electronic documents. His research interests are information assurance, security in distributed systems, fault diagnosis and fault-tolerant computing. He has authored or co-authored more than 130 refereed articles in these areas. He was an NRC Summer research fellow in 2001 and 2002. He has held visiting research faculty positions at University of Illinois, Urbana-Champaign, Intel Corporation, AFRL, and NRL. He was guest editor of a special issue on reliable distributed systems in IEEE Transactions on Computers, for which he also serves as an associate editor. He has served as the program co-chair of IEEE Symposium on Reliable Distributed Systems, 2000. He was a principal organizer of the 1st New York State Cyber Security Symposium in 2003, and the Secure Knowledge Management Workshop in 2004. He is currently on
the program committee of three security-related IEEE workshops and conferences. He is a senior member of IEEE and is a member of IEEE Computer Society.

Rodolfo Villarroel has an MSc in computer science from the Universidad Técnica Federico Santa María (Chile), and is a PhD student at the Escuela Superior de Informática of the Universidad de Castilla-La Mancha at Ciudad Real (Spain). He is an assistant professor at the Computer Science Department of the Universidad Católica del Maule (Chile). His research activity focus is security in data warehouses and information systems, and software process improvement. He is the author of several papers on data warehouses security and improvement of software configuration management process, and is a member of the Chilean Computer Science Society (SCCC) and the Software Process Improvement Network (SPIN-Chile). His e-mail address is rvillarr@spock.ucm.cl.

Edgar R. Weippl was project manager of large industry projects for two years. Customers included Deutsche Bank in Frankfurt and BlueCross/BlueShield insurance in New York. He has considerable experience with applied IT security. Weippl has taught many tutorials, including “Security in E-Learning,” at ED-MEDIA 2003, 2004, and 2005. Currently, Weippl is assistant professor at the Vienna University of Technology, Austria. He holds an MSc and a PhD in computer science, and an MA in business administration. He taught courses on computer security at the University of Linz, Austria, the Polytechnic University, Hagenberg, Austria, and Beloit College, WI, USA. Previously, he worked for three years in a non-profit research organization focusing on security.

Mohammad Zulkernine is a faculty member of the School of Computing of Queen’s University, Canada, where he is leading the Queen’s Reliable Software Technology (QRST) research group. He received his BSc in computer science and engineering from Bangladesh University of Engineering and Technology in 1993; an M Eng in computer science and systems engineering from Muroran Institute of Technology, Japan in 1998; and his PhD from the Department of Electrical and Computer Engineering of the University of Waterloo, Canada in 2003, where he belonged to the university’s Bell Canada Software Reliability Laboratory. Dr. Zulkernine’s research focuses on software engineering (software reliability and security), specification-based automatic intrusion detection, and software behavior monitoring. His research work has been funded by a number of provincial and federal research organizations of Canada, and he has an industry research partnership with Bell Canada. He is a member of the IEEE, ACM, and the IEEE Computer Society. Dr. Zulkernine is also cross-appointed in the Department of Electrical and Computer Engineering of Queen’s University, and a licensed professional engineer of the province of Ontario, Canada. He can be reached at mzulker@cs.queensu.ca; http://www.cs.queensu.ca/~mzulker/.
