Andrew Targowski is a professor of business information systems at Western Michigan University, USA. He published 20 books on information technology, history, and political science in English and Polish. He is a pioneer of business computing and inventor of INFOSTRADA (Poland 1972), which triggered the Information Superhighway wave in the U.S. He published first books on enterprise information systems (1990) and electronic enterprise (2003). In his recent inter-disciplinary research and publications he investigates the role of info-communication in organizations and civilization. He is a member of the Executive Council of the International Society for the Comparative Study of Civilizations and former chairman of the Advisory Council of Information Resource Management Association (1995-2003).

J. Michael Tarn is an associate professor of business information systems at Western Michigan University, USA. He holds a PhD and an MS in Information Systems from Virginia Commonwealth University. Dr. Tarn specializes in multidisciplinary research, involving
info-communication systems, e-commerce, strategic management, and modern organizational theory. He has published numerous research papers in academic refereed journals, book chapters, and refereed conference proceedings. His recent research has contributed to information security management and ERP/SCM integration. His areas of expertise are network security, data communication management, Internet research, integrative systems design, international MIS, business forecasting, and critical systems management. Dr. Tarn currently serves as managing editor of the *International Journal of Management Theory and Practices (IJMTP)* and was editor-in-chief of *Communications of the ICISA*. He is co-founder of the Telecommunications & Information Management (TIM) Program at Western Michigan University, the first interdisciplinary and inter-collegial TIM program in Michigan. Professor Tarn is former president of the International Chinese Information Systems Association.

***

**Kuanchin Chen** is an assistant professor of computer information systems at the Haworth College of Business, Western Michigan University, USA. He received his DBA in information systems from Cleveland State University and his MS in information systems from University of Colorado. His research interests include electronic commerce, applied artificial intelligence, data mining techniques, and WWW security. He has been promoting online interactivity, privacy, and security through research studies and grants. Dr. Chen’s research appeared in such journals as *Information & Management, IEEE Transactions on Systems, Man, and Cybernetics, Communications of the AIS, Journal of Computer Information Systems*, and many others. He also serves on the editorial board of Journal of Website Promotion.

**Tony Coulson** has worked as an information system professional for the past 15 years as an executive, consultant, and academician. Most recently he was the director of information services for a major heavy equipment company with over $60 million in revenues. Dr. Coulson has led several major system implementations worked with large-scale business software systems and has a depth of experience with architecture planning and ERP training.

**James Danenberg** is an instructor of business information systems at Western Michigan University, USA. He is currently a doctoral candidate focusing on information and communications technology (ICT) in science education. In addition, James is a certified project management professional and has extensive experience at various companies as a mechanical and electrical product design engineer and project engineer.

**Janelle Daugherty** is the Microsoft Dynamics Academic Alliance (MDAA) program manager for North America. She has been involved with the MBSAA since its inception in 2002 and prior to that she was a program manager for the Great Plains Software Education Alliance Network (EAN). She has over 15 years of experience assisting higher education in the areas of professional development and the use of technology in various classroom settings. Her challenges as MBSAA program manager involve expansion of the program into the global market, maintaining and developing relationships with textbook publishers, assisting members of the MBSAA with integration of MBS products across business and
technology-based curricula, determining processes for licensing and fulfilling MBSAA software and services, and promoting MBS products to all types of higher education institutions. She holds a bachelor’s degree in university studies from North Dakota State University with an emphasis in communications and marketing.

Satish P. Deshpande is a professor of management at Western Michigan University, USA. His research includes applied psychology in human resource issues, unionization, and managerial decision-making. He has had over 50 refereed articles published in various journals including the *Academy of Management Journal, Compensation and Benefits Review, Human Relations, Journal of Small Business Management, Organizational Behavior and Human Decision Processes, Journal of Business Ethics, Journal of Labor Research, and Journal of Psychology*. He is also the faculty advisor of the Society for Excellence in Human Resources, a student chapter of SHRM.

Bernard Han is professor and chair of the Department of Business Information Systems. He earned his BS degree from National Chiao-Tung University, Taiwan, R.O.C. in 1977, his MBA degree from Arizona State University, Tempe, Arizona in 1981, and his PhD in Information Systems from University of Washington, Seattle, Washington in 1989. Dr. Han has served on the editorial board for the *Journal of Information Technology and Management*. His research has been published in journals such as *IEEE Transactions on Robotics and Automation, European Journal of Operational Research, Annals of Operations Research, Telecommunication Systems, Communication of the ACM, and European Journal of Information Systems*.

Paul Hawking is senior lecturer in information systems at Victoria University, Melbourne, Australia. He has contributed to the *Journal of ERP Implementation and Management, Management Research News* and contributed many conference papers on IS theory and practice. He is responsible for managing the university’s strategic alliance with SAP and is coordinator of the university’s ERP Research Group. In 2002, 2004, and 2005, Paul was a committee member of the SAP Australian User Group and in 2002 served as chairperson.

Stefan Koch is assistant professor of information business at the Vienna University of Economics and Business Administration, Austria. He received a MBA in Management Information Systems from Vienna University and Vienna Technical University, and a PhD from Vienna University of Economics and Business Administration. Currently he is involved in the undergraduate and graduate teaching programme, especially in ERP packages and software project management. His research interests include ERP systems, cost estimation for software projects, the open source development model and the evaluation of benefits from information systems.

R. Lawrence LaForge is alumni distinguished professor of management at Clemson University, USA. He received his BS degree in Industrial Management from Clemson, and his MBA and PhD degrees from the University of Georgia. Dr. LaForge has received numerous awards for innovative teaching of operations management with enterprise software, including recognition as South Carolina Professor of the Year. He is a certified fellow in production and inventory management by APICS — The Society for Operations Manage-
Frank Lin is a professor in the Department of Information and Decision Sciences at California State University, San Bernardino, USA. He received his PhD in Management Information Systems and MBA in Management Information Systems from SUNY-Buffalo. He has published articles and monographs in books and journals such as *MIS Quarterly* and *Journal of International Information Management* as well as international, national, and regional conferences. He has worked as an information systems professional for the last 20 years as an executive, consultant, and academician. He has received a number of grants and/or gifts from National Science Foundation, Department of Defense, Oracle Corp., GTE and Microsoft Corp., among others. His current research interests are in information systems and technology planning, organizational modeling, enterprise architecture, systems analysis and design, innovation and technological implementation, theory development, and research methodology in information systems.

Leo Liu graduated from the Graduate School of Business, University of International Business and Economics (UIBE), Beijing, China in 2004 with a master’s degree in international business management. During 2001-2004, Leo participated in the research project of the Theory and Application of the Innovation in Chinese Enterprise, sponsored by the China National Natural Science Fund; Theoretical & Empirical Research of the Internationalization of Chinese Enterprise, sponsored by the National Social Science Fund and a Fulbright research project-The Capital Structure of Chinese Enterprises. Mr. Liu serves in Oracle China, and currently his work focuses on the e-business solution for the Chinese enterprises.

Amelia A. Maurizio joined SAP America as an associate manager of the University Alliance Program in 1998. In July 2001, she was given responsibility for the entire global SAP University Education Alliance program. Today, there are over 500 members of the University Alliance Program in over 39 countries. Prior to joining SAP, Dr. Maurizio spent several years in higher education where she held many positions including assistant vice president for Academic Administration and adjunct professor of Finance. Dr. Maurizio serves on the Board of Directors of AACSB and on other on numerous boards and advisory committees. In addition, Amelia is an adjunct professor at Stetson University in Florida where she teaches strategic management in the EMBA Program.

Brendan McCarthy is a lecturer in the School of Information Systems in the Faculty of Business and Law at Victoria University, Melbourne, Australia. He has contributed to the *Journal of Issues in Information Science and Information Technology*, Information Systems Education, Pan-Pacific Business Conference, PACIS Conference, and contributed many conference papers on IS theory and practice. His research interests include enterprise resource planning systems programming skills, development of E-learning technologies and end-user documentation. He is a member of the University’s ERP Research Group and is co-ordinator of the Masters in ERP.

Kenneth E. Murphy holds a PhD in Operations Research from Carnegie Mellon University and is currently an associate professor of information systems at the Atkinson Graduate School of Management, Willamette University in Salem, Oregon. Recently, Dr.
Murphy has been investigating the implementation of integrated systems, specifically, ERP systems, in large enterprises. Dr. Murphy’s work on integrated systems has followed several threads including the financial justification of large-scale systems using both tangible and intangible factors, and investigating the tools and methods for successful system implementation. He has published in *Operations Research*, *Communications of the ACM*, the *Information Systems Journal* and in other IS journals.

**T. M. Rajkumar** is an associate professor of MIS at Miami University, USA, where he teaches Enterprise Systems, Advanced Database Management Systems and other MIS courses. His teaching and research interests include offshore development of software, troubled projects, and enterprise systems.

**Muhammad Razi** teaches database, system analysis and design and programming courses at the Haworth College of Business at the Western Michigan University, USA. Dr. Razi received his BSc in Mechanical Engineering from the Bangladesh University of Engineering & Technology, MBA and PhD in Decision Sciences from Virginia Commonwealth University, Richmond, Virginia. He has worked as IT professional in manufacturing and service sectors in the U.S. His work has appeared in *Expert Systems with Applications*, *Logistics Information Management*, *Information Management & Computer Security*, *Journal of Small Business Strategy*, among other journals.

**Sandra B. Richtermeyer**, PhD, CPA, CMA is an associate professor of accountancy at Xavier University in Cincinnati, Ohio. She has over ten years of experience implementing technology into college courses. Her primary teaching experience is in accounting information systems, e-business, and systems analysis and design in addition to non-profit and managerial accounting. Her research focuses on enterprise systems, technology integration and professional issues for accountants. She holds a PhD, MBA, and MS from the University of Colorado and a BS from the University of Wyoming.

**Thomas Rienzo** is an instructor of computer information systems at Western Michigan University, USA, with more than 25 years of business experience in sales, technical service, and research. His research focuses on student learning through software and he has created several enterprise software exercises. He is currently pursuing a Doctor of Philosophy degree in Science Education.

**Michael Rosemann** is a professor at the School of Information Systems and the Co-Leader of the Business Process Management Research Group, Queensland University of Technology, Brisbane, Australia. His main areas of interest are enterprise systems, business process management, conceptual modeling and ontologies. He published more than 120 refereed papers in journals and conferences. Dr. Rosemann is teaching SAP solutions at universities since 1992 and published widely on his educational approaches. He is also the chief investigator of a number of SAP-funded research projects.

**Mahesh Sarma** is currently working as an instructor in the Department of Decision Sciences and Management Information Systems at Miami University, Ohio, USA, from 2004. He received his MBA in Management Information Systems from Miami University, Ohio. Prior to receiving his MBA, he worked as senior engineer designing real-time software
simulation systems for the chemical industry. He is active in research, specifically the study of enterprise resource planning and supply chain management systems and the applications of these systems in academia and business.

Andrew Stein is a lecturer in the School of Information Systems in the Faculty of Business and Law at Victoria University, Melbourne, Australia. He has contributed to the International Journal of Management, Journal of Information Management, ERP Implementation and Management, Management Research News, Virtual Education, ERP & Data Warehousing in Organisations and contributed many conference papers on IS theory and practice. His research interests include enterprise systems, e-procurement and e-marketplace applications, reverse auction systems models and innovative use of emerging IS technologies like RFID. He is a member of the University’s ERP Research Group, the Australian SAP user group and is co-ordinator of the undergraduate Information Systems degree.

Bret J. Wagner received a bachelor’s degree in mechanical engineering from Michigan State University, USA, in 1983. While working for Newport News Shipbuilding on the Seawolf submarine design team, he earned a master’s degree in engineering administration from George Washington University. He left Newport News Shipbuilding to return to Michigan State University, earning a doctorate in Operations Management. Dr. Wagner was assistant professor at the University of Delaware from 1994 to 2001, and is currently an associate professor at Western Michigan University, where he is director of the Integrated Supply Management program. Dr. Wagner’s research is primarily in the area of production planning and scheduling, and his research has appeared in top academic journals, including Decision Sciences and the European Journal of Operational Research. Since 1998, he has been involved with SAP’s University Alliance program, and has worked to integrate SAP’s enterprise resource planning software into university curriculum. He has taught courses in production planning and scheduling, quality management, business process management and enterprise systems. He is the co-author of the textbook Concepts in Enterprise Resource Planning (with Ellen Monk) and is working on a textbook on integrated materials planning.

David C. Yen is a Raymond E. Glos professor in the Richard T. Farmer School of Business and a distinguished scholar of the Graduate Faculty at Miami University, USA. He was a professor of MIS and a chair of the Department of Decision Sciences and Management Information Systems at Miami University from 1995-2005. He received a PhD in MIS and Master of Sciences in Computer Science from the University of Nebraska. Professor Yen is active in research, he has published three books and many articles which have appeared in Communications of the ACM, Decision Support Systems, Information & Management, International Journal of Information Management, Information Sciences, Expert Systems with Applications, Electronic Commerce Research and Applications, Journal of Computer Information Systems, Interfaces, Telematics and Informatics, Computer Standards and Interfaces, Information Society, Omega, International Journal of Organizational Computing and Electronic Commerce, Communications of AIS, and Internet Research among others. He was also one of the co-recipients for a number of grants such as Cleveland Foundation (1987-1988), GE Foundation (1989), and Microsoft Foundation (1996-1997).
