About the Authors

Ashis K. Pani is the chairman of information systems area, XLRI Jamshedpur, and the coordinator of the Center for e-Business. His research and teaching focus on how businesses can effectively use information technology (IT) in general and the Internet in particular. His current areas of interest are e-business, e-SCM, e-procurement, e-CRM, e-security, IT outsourcing, and application of AI techniques. Presently, he is a member of the Indian Association of Research in Computing Sciences (IARCS), and the Computer Society of India (CSI).

Amit Agrahari is associated with Infosys Technologies Ltd, Bangalore, India. He is currently working with the Software Engineering and Technology Labs, where he is involved in research on experience co-creation and business transformation. He is a fellow of XLRI – Jamshedpur and holds a Bachelor’s degree in mathematics and statistics. His area of interest includes social network, e-procurement, and application of game theory. His research appeared in several international journal and conferences.

Gautam Gupta is a B.Tech (Hons) in industrial engineering from IIT Kharagpur and is pursuing his M.Tech in industrial engineering and management from the same institute. His research interests are in the areas of e-business and supply chain management.
**Faruk Karaman** holds BS in electrical and electronics engineering from the Bosphorus University, Istanbul-Turkey (1993) and MBA from the Marmara University, Istanbul-Turkey (1997). In 2001, he was awarded a PhD in management at the Marmara University, Istanbul-Turkey. Currently he is giving graduate and undergraduate level lectures of e-commerce and financial management at Okan University, Turkey, and consults SMEs in the Istanbul area. His research interests include e-commerce, Internet security, intellectual property laws, content protection, technological trends, and futurism.

**Kiran Maringanti** is a research fellow at the University of Bolton specializing in the applicability of Web services for SMEs in the supply chain management domain. His current research interests include Web services, SMEs, e-procurement, and service-oriented architecture (SOA). His PhD research area was investigating the adoption of e-procurement systems by small and medium enterprises. Kiran holds a master’s degree in computer science and a bachelor’s degree in finance.

**Maurizio Martinelli** graduated in Computer Science at the University of Pisa in 1992. He is technologist at the Institute for Informatics and Telematics, Italian National Research Council - Pisa. He is the head of the “Technological Services” department of the Institute, the technical manager of the .it Registry and the Italian technical contact for the .eu Registry.

**Pratap K. J. Mohapatra** is a professor with the Department of Industrial Engineering and Management. He has published many papers in journals like International Journal of Electronic Commerce, International Journal of Operations and Production Management, Quarterly Journal of Electronic Commerce, IEEE Intelligent Systems, International Journal of Systems Science and OMEGA. His current research interests are in the area of system dynamics, software project management, and e-business.

**Joe Nandhakumar** is a professor of information systems in Warwick Business School at University of Warwick, UK. He has wide-ranging experience in industry and gained his PhD from the Department of Engineering, University of Cambridge, UK. Dr. Nandhakumar’s research focuses on the human and organizational aspects of information systems development,
organizational consequences of information technology use and theoretical and methodological issues in information systems research. He has widely published in these areas.

**Stanley Oliver** is the academic leader of the Department of Business Logistics and Information Systems at the University of Bolton. His current areas of research include SMEs, e-business, e-procurement, Web services, supply chain management, ERP systems, and knowledge management. He is also the president of the Society of Automotive Engineers (SAE) in the UK. Professor Oliver holds a PhD, MSc and is also a certified chartered engineer.

**Manas Ranjan Patra** is a senior faculty member in the Department of Computer Science, Berhampur University, India. He holds a PhD degree in computer science from University of Hyderabad. For some time, he has worked in the International Institute of Software Technology, Macau, South China, as a visiting United Nations fellow. He has been actively engaged in teaching and research in computer science. Some of his research interests include service-oriented computing, multi-agent systems, and electronic business. He has published about 40 research articles in different referred journals and conference proceedings. He is a visiting faculty to different universities and institutes.

**Mateja Podlogar** is the assistant professor of the Business Information Systems, Business Process Reengineering, E-Commerce, and MIS course at the Faculty of Organizational Sciences, University of Maribor, Slovenia. She completed her PhD at the University of Maribor in November, 2002, with the dissertation titled: “A model of electronic commerce critical success factors in procurement process.” She is a head of the E-Procurement Laboratory. Since 1994, she has been involved in E-Center and its several research and e-commerce activities as, for example, the Annual International Bled E-Conference. She was also a conference chair assistant of ECIS 2001. She participates in the Slovenia’s E-Commerce Project involving 20 business and government organizations. She also serves as an ISACA Academic Advocate from September, 2004. Her current research includes: electronic commerce and new business models in supply chain, RFID technologies, business process reengineering, ERP systems and ACL usage in the auditing process.
Irma Serrecchia graduated in computer science at the University of Pisa in 1993. She is a technologist at the Institute for Informatics and Telematics, Italian National Research Council - Pisa. She is part of the technical staff of the .it Registry. She is currently working for the “Statistical Project” of the .it Registry as information technologist.

Michela Serrecchia graduated in Economic Science at the University of Pisa in 2003. She is a researcher associate at the Institute for Informatics and Telematics, Italian National Research Council - Pisa. She is currently working for the “Statistical Project” of the .it Registry as statistician.

Aayush Shrivastava is a B.Tech (Hons) student in industrial engineering at IIT Kharagpur. His current research interests are in the area of e-business with reference to e-procurement functions.

Ramanathan Somasundaram (RS) is employed as project manager of e-procurement at the National Institute for Smart Government, India. RS holds a PhD in information systems from the Department of Computer Science, Aalborg University, Denmark. He studied the diffusion of electronic public procurement in Denmark for his PhD work. He has previously held offices at the Erasmus University Research Institute for Decision Information System (EURIDIS), The Netherlands; Florida International University, USA and Copenhagen Business School, Denmark. Currently, he is looking into the implementation of e-procurement in Indian government organizations.

Kishor Vaidya is a PhD student at the University of New England, NSW, Australia. He completed his master’s degree in information systems from the Central Queensland University, Australia, in 2001. His research interests include adoption, implementation and performance measurement issues in the areas of e-procurement, e-government, and public procurement. Kishor’s articles have been published in a number of international conference proceedings and journals including *The Journal of Public Procurement*.

Susanna Xin Xu is a post-doctoral researcher at the Centre for Innovation and Structural Change, J. E. Cairnes Graduate School of Business and Public Policy, National University of Ireland, Galway. Dr. Xu gained her doctorate...
in School of Management, University of Bath, UK (Centre for Information Management and Centre for Research into Strategic Purchasing and Supply). Her doctoral work investigated the dynamics of formation and transformation of e-relationships of a new breed of Chinese enterprises with the rest of the world. It focused on social, cultural and organisational aspects of the development and use of information systems in such organisations. Previously she worked in the marketing department of IBM China for several years to develop relationships with business partners.

**Gonca Telli Yamamoto** is an associate professor in the School of Business Administration at Okan University. She was formerly founder and director of Social Sciences Institute of Okan University, Turkey. She currently teaches, consults, and conducts research on mobile and integrated marketing, customer relations, and new learning technologies in business. She has been studying integrated marketing, technological developments, and customer value about 10 years in the academic field. She is also interested in the broader business, social, and policy implications associated with the emerging information society. She also has some books related in sales and integrated marketing. She has several articles in the national and international journals.
