About the Contributors

**Eshaa M. Alkhalifa** has obtained her BSc in Computer Science of the University of Bahrain, her MS in Artificial Intelligence from the University of George Washington, and her PhD in Cognitive Science from the University of Edinburgh in Scotland. She has published a number of books, and a large number of journal and conference papers. She is currently the Academic Vice President of the Royal University for Women. Her research interests including the utilization of Cognitive Science findings in increasing the efficiency of learning in general or elearning in particular.

***

**Mansoor Al-A'ali** finished his B.Sc. in Computer Studies from the University of Teesside, UK in 1982. He received his M.Sc. in Computer Science from the University of Aston in Birmingham, UK in 1984. He received his Ph.D. from the University of Aston in Birmingham, UK in 1989. Mansoor is currently working in the department of computer science at the University of Bahrain. Since 1989 he has been working as a consultant for a number of leading Bahraini organizations leading the design and quality assurance issues of major industrial computer systems. His research interests include: AI, computer ethics, COTS software, algorithms, software engineering and computers in education. He has over eighty refereed publications in these areas. Mansoor was the chairman of the department of computer science at the University of Bahrain from 1992 to 1995 and as the director of continuing education from 1996 to 2000.

**Seema Al-Mahmood** graduated with a bachelor’s degree in office management from the University of Bahrain in 1998 and obtained her master’s degree in computing in 2004 from the same university. She worked for nine years for the Bahrain Telecommunications Company as the information systems quality assurance and process improvement specialist. Her areas of interest are software engineering – COTS (Commercial of the Shelf) user requirements management and COTS software acquisition methodologies. She has published five research papers on this field.

**Sabah Abdullah Al-Somali** is a doctoral student in Operations and Information Systems at Aston University Business School. She received her MSc degree in e-business from Aston University in 2007 and an MBA from the Arab Academy for Science & Technology and Maritime Transport (AASTMT) in Alexandria, Egypt in 2004. She has practical experience as an IT specialist. Her research interests include ICT adoption and diffusion, technology acceptance and electronic commerce.
About the Contributors

Rafi Ashrafi has over 20 years of teaching, research and consulting experience in academia and business in Canada and Middle East. He worked as a project manager with EDS and Alcatel and a consultant in IT Project Management in Canada. Rafi was also a Researcher and an Adjunct Professor at the University of Calgary, where he conducted research and taught graduate courses in the Haskyn School of Business and Schulich School of Engineering. Rafi has published over 40 research papers in international journal and conference proceedings. Currently he is Head of the Information Systems Department at the College of Commerce and Economics at Sultan Qaboos University in Oman.

Dimitris Askounis is Assistant Professor in the School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA). He has been involved in numerous EU funded IT research projects since 1988 (ESPRIT, BRITE-EURAM, FP5, FP6) in the areas of computer integrated manufacturing, enterprise resource planning, decision support, knowledge management, quality management, business and data modelling, e-business, etc. He has also participated in several other EU-funded projects within the EUROPAID framework in CEEC, NIS and MEDA countries concerning management training, monitoring and evaluation of large projects, energy policy and planning.

Elarbi Badidi is currently an Assistant Professor of computer science at the College of Information Technology (CIT) of United Arab Emirates University. Before joining the CIT, he held the position of bioinformatics group leader at the Biochemistry Department of Université de Montréal from 2001 to July 2004. He received a Ph.D. in computer science in 2000 from Université de Montréal, Québec (Canada). Dr. Badidi has been conducting research in the areas of object-based distributed systems, bioinformatics, and Web services. He is a member of the IEEE, IEEE Computer Society, and ACM. He served on the technical program committees of many international conferences. His research interests include Web services and Service Oriented Computing, Middleware, and Bioinformatics data and tools integration.

N. Meltem Cakici is a Lecturer in Marketing at Gediz University, Izmir. She received her B.A. degree in Management from Bogazici University and Ph.D. in Marketing from Yeditepe University, Istanbul. She worked as a post doctoral fellow on a Tubitak project at Sabanci University, Istanbul. Her areas of interest are consumer behavior, marketing research, international marketing and retailing. She is paying particular attention on consumers’ decision making process, cross-cultural studies on purchase and consumption patterns, ethical consumption and corporate social responsibility issues. Emerging themes and concepts in marketing, marketing’s role in strategy development and marketing’s relationship with other disciplines are also part of her research agenda.

Ben Clegg (PhD (De Montfort), BSc(Hons) and DIS Loughborough, CEng, DipM (Institute of Marketing), PGCHE (UCE), FHEA, MIET) graduated from Loughborough University with a degree in management science and a diploma in industrial studies. Simultaneously he completed a diploma in strategic marketing from the Chartered Institute of Marketing and a sponsored business student apprenticeship with GEC. He worked as a project manager for several years in the capital goods sector for GEC. He has conducted research at Portsmouth University and De Montfort University completing a PhD in systems engineering. He spent a year as a visiting scholar at Stanford University’s Centre for Integrated Facilities Engineering (USA) continuing research into business improvement as well as working for a university spin-out company. He Joined Aston Business School in 2003; he consults, researches and teaches in the field of technology, strategy and operations. He is a reviewer for the many
international journals and has held multimillion pound research projects from the UK government. He is a chartered engineer.

Jérôme Darmont received his Ph.D. in computer science from the University of Clermont-Ferrand II, France in 1999. He joined the University of Lyon 2, France in 1999 as an associate professor, and became full professor in 2008. He was head of the Decision Support Databases research group within the ERIC laboratory from 2000 to 2008, and has been director of the Computer Science and Statistics Department of the School of Economics and Management since 2003. His current research interests mainly relate to performance in database management systems and data warehouses (performance optimization, auto-administration, benchmarking...), but also include XML and complex data warehousing and mining, and medical or health-related applications.

Ronan de Kervenoael is a Lecturer in Marketing at Sabanci University and network Lecturer at Aston University. He received his Ph.D. from Sheffield University, UK. He has held position at Lancaster University, ITSM de Monterrey, and Manchester Universities. Ronan has a particular interest in choice and anti-choice investigating both consumers and within the supply chain actors through their everyday practice. His wider research interests lie under the umbrella of consumer behavior and retailing; the principal theme being the socio-spatial context of consumption. He is currently particularly interested in the Information Communication Technology change situation of emerging markets and associated strategies.

Pooya Khosraviyan Dehkordi is a faculty member of the technology and engineering department in Shahrekord Islamic Azad University of Iran. He got his B.S. in Computer Engineering (Software) from Najafabad Islamic Azad University, Iran. He has published several articles on optimization based on Fuzzy Logic, Cellular automata, Genetic Programming. His field of interest is Cellular Automata, Natural Language Processing, Software Engineering and Genetic Programming.

Larbi Esmahi is an Associate Professor of the School of Computing and Information Systems at Athabasca University. He was the graduate program coordinator at the same school during 2002-2005. He holds a PhD in electrical engineering from Ecole Polytechnique, University of Montreal. His current research interests are in e-services, e-commerce, multi-agent systems, and intelligent systems. He is an associate editor for the Journal of Computer Science, and the Tamkang Journal of Science and Engineering. He is also member of the editorial advisory board of the Advances in Web-Based Learning Book Series, IGI Global, and member of the international editorial review board the International Journal of Web-Based Learning and Teaching Technologies.

Daniela Feldkamp studied Computer Science at the University of Oldenburg, Germany, where she received the Diploma in 2006. Since then, she is working in the Information and Knowledge Management group of Prof. Dr. Knut Hinkelmann at the University of Applied Science Northwestern Switzerland. Because of her apprenticeship as a management assistant in wholesale and foreign trade, she is interested in doing application-oriented research and development in the area of agile enterprises. Additionally, she is interested in Knowledge Management, Business Rules and Workflow Management.
About the Contributors

**Bardo Fraunholz** is a Senior Lecturer at Deakin University. He holds Professional Business Degree in Information Systems and Accounting (University of Trier, Germany) and GradDip in Legal studies specialising in IT, Media & Corporate Law from London (UK). He has lectured in the University of Koblenz, Germany, in enterprise modelling, project management, small business and knowledge management. He spent several years in the ICT sector managing/consulting with a number of projects involving mobile applications, SMEs, and e-learning. He has expertise in RFID based process integration in hospitals and has an interest in Web 2.0 based approaches that promote citizen engagement in democracies and environment sustainability.

**Christos K. Georgiadis** is an Assistant Professor at the Department of Applied Informatics, University of Macedonia – Thessaloniki – Greece. He received his Ph.D. in Information Systems Security - Access Control for Web Data Bases from the Aristotle University of Thessaloniki. His research interests include the areas of e-commerce and m-commerce technologies, e-security, and web services supporting technologies. Research productivity is summarized in various articles in cooperation with other researchers, in international journals and international conferences proceedings. He has participated in several Research Projects in Greece and in European Union related to information systems security and e-health. He is a reviewer of several international journals related to e-commerce (such as IJEB, JEIM, and JTAER). He is also a tutor of the Hellenic Open University. He is a professional member of ACM, and the SIGEcom.

**Ken H. Guo** is a sessional lecturer and a PhD candidate in information systems at DeGroote School of Business, McMaster University. He received his M.Sc. in Business from the University of British Columbia and B.A. in Economics from Zhejiang University. He is a Certified Management Accountant (Canada) and a certified SAP consultant. His research interests include information security, identity theft, IT auditing, accounting information systems, and accounting. He teaches accounting information systems course at both MBA and undergraduate levels.

**Ching-Cha Hsieh** is currently an Associate Professor at the Department of Information Management, National Taiwan University. Her areas of research include Information Technology and Organizations, Business Transformation, Information Systems Planning and Design, Philosophy and Information System. In her 30-year professor career, Dr. Hsieh writes several books, including Information management. Currently, her focuses on eastern philosophy and Information system research.

**Chunyang Hu** is currently a PhD candidate in the School of Computer Science and Engineering at Beihang University. His research interests include Geospatial web service, web collaboration, service computing and semantic web. He received his MS degree in computer science from the University of Northwestern Polytechnic and is currently preparing his dissertation.
Cheng-Chieh Huang is currently a Ph.D. Candidate at the Graduate Institute of Information Management, National Taiwan University. His areas of research include Information Technology and Organization Change, Information systems outsourcing, Knowledge Management. Mr. Huang was a sr. consultant of Hewlett-Packard Taiwan, who consult and implement various outsourced projects. Currently, Mr. Huang work for an industry marketing and consulting company, as an ICT industry analyst, focuses on Information systems outsourcing and offshoring trends and strategies.

Farshad Kiyoumarsi is a professor of computer sciences at Shahrekord Islamic Azad University of Iran. He is the head of the technology and engineering department in this University. He got his Ph.D. computer science from Shahid Bahonar University of Kerman, Iran. He has published several articles on optimization based on Fuzzy Logic. His field of interest is artificial intelligence, Natural language Processing and Fuzzy Logic.

George Kourlimpinis after finishing his Electrical & Computer Engineer Diploma, has acquired two masters’ degrees, one MBA in “Telecommunication Enterprises’ Management” and one in “Fundamental & Applied Cognitive Science”. Since 2005, he is a Ph.D. candidate and his research concerns knowledge-based systems and management methodological approaches to support the implementation of reengineering projects throughout their lifecycle. Apart from his academic interests he contributes to the specification, the design, the development and the deployment of numerous medium and large scale management information systems as well as to the implementation of research and consulting projects.

Dianfu Ma is Full Professor and dean of Computer Science and Engineering School at Beihang University, secretary-general of Computer Science and Technology Education Steering Committee of the Ministry of Education, vice president (chairman) of China Engineering Graphics Society, and currently serves on the editorial boards for Springer Transactions on Frontiers of Computer Science. He has served as an expert of whole team of Standards for Government Information Resource Catalog System and Exchange System. His principal area of research include network computing, distributed systems, E-government, and scientific computing visualization. Professor Ma undertook more than 10 scientific research projects including two National 863 high-tech programs, two sub subjects of the 973 programs, and programs funded by the Ministry of Science and Technology Foundation, the General Armament Department Research Foundation and the National Natural Science Foundation. Until now Ma has published more than 30 papers on the international conferences and domestic core journals.

Hadj Mahboubi was born on 17 March 1981 in Tlemcen Algeria. Since December 2008, he holds a PhD in computer science from the University of Lyon 2, France. He received his master degree from INSA Lyon in 2005 and his engineering degree in computer science in 2003 from the University of Tlemcen, Algeria. He was a research assistant in the University of Lyon 2, France. His is a post-doctoral researcher at Cemagref Clermont-Ferrand. His research interests lie in the field of XML data warehouse design and performance optimization.

Owen Molloy is a Senior Lecturer in Information Technology at the National University of Ireland, Galway, and a member of the Medical Informatics Research Group. Dr. Molloy is a specialist in the area of process management and extended value chain integration. His research is focused on the development of methodologies and systems to support the design and implementation of cross-functional
business processes. This includes the design of value-stream modelling, optimisation and legacy system integration components to deliver real-time performance information to process-wide business intelligence dashboards. In his consulting work, he has provided expert facilitation and coaching in Lean Six Sigma to internal process improvement teams in a number of Irish and European organizations.

Spyridon Mouzakitis is an electrical and computer engineer and is currently finalizing his PhD. He has nine years of industry experience in conception, analysis and implementation of information technology systems. He has working experience as an IT Expert in public administrations and banking area. His current research is focused on decision analysis in the field of e-Business, enterprise interoperability and e-Government.

Muhammad Murtaza is a Sultan Qaboos University (Oman) graduate specializing in Information Systems. He has also earned a Diploma in Software Programming from Higher College of Technology (Oman). He has been honored twice for academic distinction, once by H.M. Sultan Qaboos bin Said in 2007 and earlier by H.E. the Minister of Manpower in 2004. Also, he has co-authored a research on “Use and Impact of ICT on SMEs in Oman”; it was presented in The International Conference on Information Resources Management (Conf-IRM 2008) and published in the British Electronic Journal of Information Systems Evaluation (EJISE). Muhammad has served as the president of Information Systems Group in Oman for a year and currently, he works as the ICT Solutions Manager in one of the leading IT services companies in Middle East, overlooking software project implementations and architecting solutions. To contact Muhammad Murtaza, email him on muhd.murtaza@gmail.com.

Asem Omari has been working as an assistant professor in the department of Computer Science, Jerash Private University, Jordan since October 2008. Besides teaching different core computer science courses, Dr. Omari has been working as the director of Computer Center at the university. Dr. Omari obtained his PhD degree from the Institute of Computer Science at Heinrich-Heine University Düsseldorf, Germany in 2008. He obtained the Graduate Certificate in Computer and Information Sciences from the University of Michigan, Dearborn, USA in 2002. He completed his Bachelor degree in Applied Mathematics with programming and system analysis orientation from Jordan University of Science and Technology, Jordan, 1999. Since 2005 he has been researching in data mining and its applications in web design, marketing, medicine, traffic, and Arabic text mining.

María Laura Ponisio is Research Scientist at University of Twente (The Netherlands). Her research interests include inter-organizational networks, global software development and large object-oriented systems engineering. She received her Ph.D. in the area of software reverse engineering from the University of Bern (Switzerland), her Master in object-oriented software engineering from both Ecole des Mines de Nantes (France) and Vrije Universiteit Brussel (Belgium), and her Licentiate degree in Computer Science from UNLP, the National University of La Plata (Argentina). Dr Ponisio has work experience in industry and academia, including software systems development and database administration. Currently, she performs action research on inter-organizational networks and project management in international collaboration with private and public institutions.

Eugen Pop graduated the Faculty of Electronics and Telecommunications of the “Politehnica” University in Bucharest, Romania, in 1986. Since 1999 he is PhD in Telecommunications, in the Code
Division Multiple Access systems. In 1990 he joined the wireless communication department of the Electronic Research Institute in Bucharest, Romania, where afterwards he became the Head of Advanced Communications Laboratory. Now he is senior researcher in the IT&C department of the Automation Engineering Institute in Bucharest, Romania. The main direction of his R&D activity is the electronic services development and providing, through mobile communication networks. He collaborates with the European Technological Platform for Mobile and Wireless Communication, e-Mobility and with the World Wireless Research Forum. Dr Eugen POP also has various didactical activities at the Faculty of Electronics from the „Politehnica“ University in Bucharest, Romania. He is author of books, many scientific articles and papers at telecommunications international conferences.

**John Psarras** is Professor in the Department of Electrical and Computer Engineering of NTUA and the Head of NTUA-EPU, holding a Ph.D. degree on Multi-objective Mathematical Programming applied to energy and environmental systems (NTUA, 1989). He has been manager or senior researcher in numerous EC and national projects for over 25 years in the areas of energy policy (including climate change policy), national and regional energy planning, energy and environmental modelling, promotion of energy and environmentally friendly technologies, energy management, decision support and monitoring systems. In addition, he has a long professional record in capacity building, technology transfer and training in the fields of energy policy and planning, decision support systems analysis, sustainable energy technologies etc.

**Lourens Riemens** finished his study Software Engineering at the HIO Enschede in 1991. He started his working career at a small software company. In 1996 he joined the IT center of the Netherlands Tax and Customs Authority. Lourens performed several software engineering and architecture functions. Currently, he is a senior IT architect responsible for Customs IT systems. His main focus areas are customs enterprise architecture, architecture governance and architecture methods and techniques. In the area of Customs, Lourens performed several projects on national and international cooperation with other governmental agencies and trade, including a benchmarking study on e-Customs, and innovative projects on end-to-end supply chain security.

**Peter Rittgen** received a Master of Science in Computer Science and Computational Linguistics from University Koblenz-Landau, Germany, and a PhD in Economics and Business Administration from Frankfurt University, Germany. He is currently a Professor at the School of Business and Informatics of the University of Borås, Sweden. He has been doing research on business processes and information systems since 1997, especially in the areas Business and IT Co-design & Collaborative Modeling, Business Network Governance and Business Process Simulation & Improvement. Dr. Rittgen is the Vice-Chair of the AIS Special Interest Group on Modeling and Simulation (www.ModellingAndSimulation.org) and an Associate Editor of the Informing Science Journal and the ECIS. He is also a member of the editorial board of several international journals and serves on review committees for international journals and conferences. He published over 90 works including 2 edited books, 2 journal issues and 13 journal articles. For further details refer to http://wwwadm.hb.se/~PRI/.

**Claire Sheridan**’s research focuses primarily on the areas of process management and the development of technology models and frameworks for Business Process Management and Business Activity Monitoring. She has published a number of conference and journal papers in the areas of business process.
management. Since joining Accenture (UK) in 2007, she has been part of the Accenture Information Management Services (AIMS) division where she is aligned to the Business Intelligence group. She is an Information Management Consultant with Accenture Information Management Services (UK) and a specialist in the Business Intelligence domain, delivering projects across a number of domains from government to high-tech industry.

**Nishant Singh** is a Bachelor of Technology from Indian Institute of Technology, Kanpur. Born on 6th October, 1985 at Varanasi, he was always a keen student. With his profound interest in mathematical modeling and C/C++ during his intermediate, he chose to pursue his bachelors in Computer Science. During graduation he developed an interest in computer architecture and software engineering and Image Processing. To explore his interest in software engineering he did an internship at University of Applied Sciences and explored the areas of web services. Very satisfied, he still indulges in academic readings and contributions in the same. He did his undergraduate project in image processing in the field of Human Computer Interaction. Currently working in the computer architecture giant Intel he is pursuing his interest in computer architecture.

**Ramanjit Singh** has recently completed his PhD at Manchester Business School, University of Manchester. In addition to the PhD research, he has published a paper in the scientific inquiry journal, a report at the University of Trento, Italy, and five conference papers. He can be reached by email at raman.si@gmail.com.

**Eva Söderström** is an associate professor at the University of Skövde, Sweden. She earned her PhD in Computer and System Science from Stockholm University/Royal Institute of Technology in 2004, on the subject of B2B standards implementation. Her current research is focused on trust and standards for inter-organisational collaboration, through for example e-services and e-government services. She has led and participated in several national and international projects, and has published over 70 internationally reviewed publications.

**Aikaterini-Maria Sourouni** holds a Diploma in Electrical and Computer Engineer at National Technical University of Athens and is currently finalizing her PhD in the field of e-Government Knowledge Management and in particular in the area of Services Modeling methodologies to support governmental transformation projects with the use of semantic knowledge-based technologies. Her research interests comprise modeling and transformation of processes and services, business and government process reengineering, ontologies and semantic engineering as well as IT project management and monitoring. Apart from her academic activity, during the last four years, she has been involved in various projects related to e-Government and e-Business, process modelling, planning, management and implementation of IT projects.

**Tryfon L. Theodorou** is Director of Studies at the Pythagoras Institute of Vocational Studies – Thessaloniki – Greece. He is a Ph.D. candidate in the area of Information Systems Security – Development of Information Security Techniques Using Cryptographic Methods for Wireless Devices, at the Department of Applied Informatics, University of Macedonia – Thessaloniki – Greece. He received his MSc. in Artificial Intelligence – Knowledge Based Systems from the University of Edinburgh – Scotland and he also received his second MSc. in Applied Informatics from the University of Macedonia – Greece. His
reproducible. Research productivity so far, is summarized in various articles in cooperation with other researchers, in international journals and international conferences proceedings.

Chandana Unnithan is an Associate Lecturer with Deakin University. She holds a degree in Arts/Commerce/Computer Sciences (Bangalore/Mumbai, India), an MBA as well as a Research Master’s in Business Computing (RMIT University, Australia). She has held varied positions in the ICT industry, ranging from Business Analyst, Project Manager and Knowledge Manager with MNCs such as IBM and TATA. She has published widely in e-commerce, project management, mobile business applications, information systems and e-governance. Her doctoral research focuses on RFID integration in hospitals. She has expertise in health informatics and technology integration in hospitals. She has research interests in public health approaches to technology integration, inclusive approaches in democracies leveraging Web 2.0, and harnessing indigenous knowledge to build systems for environmental sustainability.

Pascal van Eck received his diploma in Computer Science (MSc degree) from the Free University of Amsterdam in April, 1995. From May, 1995 until January 2000, he worked as a research assistant at the Artificial Intelligence Department of the Free University on a PhD thesis on a formal, compositional semantic structure for the dynamics of multi-agent systems. Starting February, 2000, he works at the Information Systems Group of the Faculty of Computer Science, University of Twente, as an assistant professor. His research interests include IT governance and alignment of business and IT architectures at the enterprise level, with a focus on case studies in the Dutch financial services industry and large-scale transaction processing.

George Violettas is a Ph.D. candidate at the Department of Applied Informatics, University of Macedonia – Thessaloniki – Greece. He received his M.Sc. in Applied Informatics from that same University at 2008 and his B.Sc. in informatics from the Greek Open University at 2006. He is occupied as a general Manager in an IT company in Thessaloniki – Greece. His duties include presales, handling of corporate accounts, government contracts, and design of complex wireless networks & backhauls. His research interests include the areas of wireless security and positioning, applied cryptography and information security where his Ph.D. research is focused. Research productivity so far, is summarized in various articles in cooperation with other researchers, in international conferences proceedings.

Trevor Wood-Harper is a professor of Information Systems at Manchester Business School, University of Manchester. He has authored, coauthored, or coedited 20 books and proceedings, and has published over 200 research articles. He has supervised or co-supervised more than 30 Ph.D. students. He can be reached by email at atwh@mbs.ac.uk.

Yongwang Zhao is an assistant professor in the School of Computer Science and Engineering at Beihang University. He received his PhD degree in computer science from Beihang University and a bachelor degree in information management systems from the University of Beijing Information Science and Technology. His current research interests include service computing, model checking and science computing visualization.
