About the Contributors

**Anastasius Mountzoglou** is an Executive Board Member of the European Society for Quality in HealthCare (ESQH), and President of the Hellenic Society for Quality & Safety in HealthCare (HSQSH). He holds B.A in Economics (National & Kapodistrian University of Athens), MA in Health Services Management (National School of Public Health), MA in Macroeconomics (The University of Liverpool), and Ph.D. in Economics (National & Kapodistrian University of Athens), He works for ‘P. & A. Kyriakou’ Children’s Hospital and teaches the module of quality at the graduate and postgraduate level. He has written three books, which are the only ones in the Greek references. He has also served as a scientific coordinator and researcher in Greek and European research programs. In 2004, he was declared “Person of Quality in Healthcare”, with respect to Greece. His research interests include healthcare management, quality, knowledge management, pensions, and the dualism of the labor market.

**Anastasia N. Kastania** received her B.Sc. in Mathematics and her Ph.D degree in Medical Informatics from the National & Kapodistrian University of Athens, Greece. She works in the Athens University of Economics and Business, Greece since 1987. Research productivity is summarized in various articles (monographs or in collaboration with other researchers) in international journals, international conference proceedings, international book series and international books chapters. She has more than twenty years teaching experience in University programs and she is the writer of many didactic books. She also has ten years experience as Researcher in National and European Research Projects. Research interests are telemedicine and e-health, e-learning, bioinformatics, tele-epidemiology, mathematical modeling and statistics, web engineering, quality engineering and reliability engineering.

* * *

**Aleš Bourek** (born 1957, Brno, Czech Republic) comes from a family of musicians. He is a medical doctor active since 1980 in the area of assisted reproduction. From 1990 he is also involved in activities relating to healthcare systems and health informatics and lectures these subjects at the Masaryk University and abroad. He works on national and international projects, is on the board of several medical journals and organizations, collaborates with ESQH, EFQM, WHO, World Bank and DG SANCO and favors non-prescriptive methods of management. He is married to a hematologist, has two children, enjoys outdoor activities in extreme environments, the company of many exceptional friends, linguistics and systems thinking. His general view is that he is not a complete idiot (he is aware that some parts are still missing).
Aliki Stathopoulou received her bachelor degree from the Department of Biology, University of Crete, in 1994 and her PhD from the Medical School, University of Crete, in 2002. From 2002-2006 she worked as a Postdoctoral Researcher in the Laboratory of Clinical Chemistry, University of Athens. From 2003 to 2004 and from 2005 to 2007 she was employed as an Assistant Researcher in the Laboratory of Clinical Biochemistry and Molecular Biology, University General Hospital “ATTIKON”, University of Athens. From 2006 she has been a Case officer of the Hellenic Accreditation System S.A. (ESYD S.A.), in the department of accreditation of clinical, chemical, biological and related testing laboratories. Since 2006, she has been appointed as the ESYD’s delegate for the European co-operation for Accreditation Healthcare Working Group. She is a member of the Greek Society of Clinical Chemistry-Clinical Biochemistry and the Greek Society of Biologists. She has 15 papers of original scientific work published in Scientific Journals and 50 abstracts published in proceedings of conferences.

Amar Gupta is Tom Brown Endowed chair of management and technology; professor of entrepreneurship, management information systems, management of organizations, and computer science at the University of Arizona since 2004. Earlier, he was with the MIT Sloan School of Management (1979-2004); for half of this 25-year period, he served as the founding co-director of the Productivity from Information Technology (PROFIT) initiative. He has published over 100 papers, and serves as associate editor of ACM Transactions on Internet Technology and the Information Resources Management Journal. At the University of Arizona, Professor Gupta is the chief architect of new multi-degree graduate programs that involve concurrent study of management, entrepreneurship, and one specific technical or scientific domain. He has nurtured the development of several key technologies that are in widespread use today, and is currently focusing on the area of the 24-Hour Knowledge Factory.

Anne E. Burdick, MD, MPH, Associate Dean for Telemedicine and Clinical Outreach and Professor of Dermatology at the University of Miami, is expanding the Miller School of Medicine’s clinical and educational telehealth services in the US and internationally. A graduate of New York University School of Medicine and Columbia University School of Public Health, she has over 15 years of telehealth experience. As a charter member of the American Telemedicine Association, she founded the ATA’s Special Interest Group on Teledermatology and now serves as the Standards and Guidelines Committee Vice-Chair. Dr. Burdick is on the Editorial Board of the Telemedicine Journal and e-Health. She chaired the American Academy of Dermatology Telemedicine Task Force and received its 2007 Program in Innovative Continuing Medical Innovation Award for monthly interactive lectures by dermatologists to academic centers, hospitals, and remote medical sites in Latin America, Alaska, and Hawaii using videoconferencing.

Åsa Smedberg is a lecturer and researcher at the Department of Computer and Systems Sciences (DSV), Stockholm University, Sweden. She has a PhD degree in Computer and Systems Sciences. Her field of research is e-health communities for continuous learning, and her studies focus on communication patterns in e-health communities for people interested in changing their lifestyle. This involves discourse analyses of online conversations as well as analyses of contents of postings. The studies also include comparisons with Ask the Expert systems in which medical professionals answer questions from people. Åsa Smedberg is the author of a series of international publications. She is a program committee member of the IARIA conferences ICDS and e-Telemedicine. She is a member of the Editorial Board of the “International Journal on Advances in Internet Technology”, IARIA journals, and a member of
the IARIA fellowship program. She is also a committee member of the IADIS International conference on e-Health.

Christopher L. Pate is currently serving as the Dean of Health Sciences at St. Philip’s College, San Antonio, Texas. Dr. Pate has nearly 25 years of military healthcare experience and nearly a decade of faculty experience at the graduate level. He has taught at the U.S. Army-Baylor Graduate Program in Health and Business Administration, Webster University, the University of Phoenix, and Trinity University. He is a 1994 graduate of Syracuse University (MPA) and a 2001 graduate of Penn State University (Ph.D). His areas of interest include decision making, use of quantitative methods in healthcare settings, and health disparities research.

Sisira Edirippulige is the coordinator of undergraduate and postgraduate e-Healthcare programs at the University of Queensland Centre for Online Health, Brisbane, Australia. He is also responsible for coordinating professional development courses at the Centre. Dr Edirippulige’s research interests include the development, promotion ad integration of telehealth education and telemedicine applications into healthcare sector. Before joining the University of Queensland Dr Edirippulige help teaching positions at Kobe Gakuin University in Japan and the University of Auckland, New Zealand. He has extensive experience in higher education and development studies working in number of countries including Russia, Sri Lanka, South Africa, Japan and New Zealand.

Anthony Smith is the Senior Research Fellow and the Deputy Director of the Centre for Online Health at the University of Queensland. He completed a doctoral degree in the field of medicine in 2004 examining the feasibility and cost-effectiveness of a novel telepaediatric service in Queensland. His Principal role in the Centre for Online Health includes the management, coordination and evaluation of telepaediatric services. Dr Smith has made a substantial contribution to the literature on telepaediatrics publishing articles in peer-reviewed journal and book chapters on the subject. Dr Smith assists with the supervision of a broad range of telemedicine projects and teaching programs in the Centre for Online Health and also provides consultancy services to other university departments and external organizations.

Asen Atanasov is a founder and first president of MARC Institute – Bulgaria. MARC is an abbreviation of Medical Audit and Resource Control and the Institute is an associate member of the European Society for Quality in Healthcare (ESQH). Dr. Atanasov holds MD degree (Medical University Plovdiv), specializations in internal medicine (Medical University Sofia), rheumatology (MU Sofia BG and Instituto de Doencas Reumaticas de Sao Paulo Brasil) and PhD degree in immunology and cardiology (MU Sofia). Currently he is an Assistant Professor and Senior Lecturer in Medical University, Plovdiv, Department of Internal Medicine and Clinic of Rheumatology and Head of the Department of Internal Medicine and Rheumatology of the private Trimontium Hospital in Plovdiv. He has written 8 medical educational books and had publications in EULAR, Noninvasive Cardiology and in domestic scientific issues. His research interests include quality and healthcare management, medical audit and quality in rheumatology and cardiology.

Elizabeth Krupinski is a Professor at the University of Arizona in Radiology (Vice Chair of Research) and Psychology where she has been since 1992. She received her BA from Cornell University and PhD from Temple University, both in Experimental Psychology. Her main interests are medical image
About the Contributors

perception, observer performance, and human factors issues. She is Associate Director of Evaluation for the Arizona Telemedicine Program. She has published extensively in Radiology and Telemedicine, and has presented at conferences both nationally and internationally. She is President of the Medical Image Perception Society and serves on Editorial Boards of numerous journals in both radiology and telemedicine. She serves regularly on review panels for the NIH, DoD, FDA and TATRC. She is a Past-President of the American Telemedicine Association and Chair of the Society for Imaging Informatics in Medicine. In 2008, Dr. Krupinski was elected to the first American Telemedicine Association College of Fellows.

**Emilio FCO. Ignacio Garcia** is Graduate of Nursing from the University of Cadiz, with Master in Sciences of Nursing and Public Health from the University of Puerto Rico, Licentiate of Social Anthropology and Culture, a Diploma of Advanced Studies and a Doctorate in Public Health. He has participated in research projects quality management in sanitary in health care and education funded by national and international research agencies.

**Rui Loureiro** is a Pharmacist with a specialization in Industrial Pharmacy and postgraduate studies in Quality Management and Industrial Engineering, being a funding member of the Portuguese Society for Quality & Safety in HealthCare (APQS). He works for the National Authority of Medicines and Health Products (INFARMED, I.P.) and lectures the topic of Healthcare Quality Management, Faculty of Pharmacy, University of Lisbon at the graduate and postgraduate level. He has written one book, on medical devices regulatory, classification and quality. He has published more than 20 works on quality in healthcare, and he is an ISO 9001 auditor.

**Susana Lorenzo** is a medical doctor from the Complutense University in Madrid, with Diploma on Quality Assurance from Barcelona University, a Master degree in Public Health Policy Administration from the University of Michigan, and a Doctorate in Medicine. Dr. Lorenzo is a senior quality assurance expert with more than 12 years of experience as senior manager for a health care system in Spain, and as an international consultant in health quality of care. She has extensive experience in consulting on quality of care and has transferred the knowledge on using tools to improve the quality of care in Spain and around Europe. During the last 15 years Dr. Lorenzo has been teaching professionals on health management at numerous Universities, Schools of public health, local and state government Departments of Health, and Hospitals. Dr. Lorenzo is Editor of the Spanish Journal for Quality in Healthcare and past President of the Spanish Society for Quality in Health Care.

**Suzana Parente** is a Medical Doctor, anesthesiologist and intensivist and an Executive Board Member of the European Society for Quality in HealthCare (ESQH), and President of the Portuguese Society for Quality & Safety in HealthCare (APQS). She is also a member of the quality assurance and quality improvement committee of the European Society of Anesthesia as well as a member of the quality group of the Portuguese society of anesthesia. Previous founder and President of the Quality Council of the Portuguese Medical Association. She works at the S. Francisco Xavier Hospital in Lisbon (central hospital with university facilities) and teaches modules of quality and risk management at the graduate and postgraduate level. She is also director of the Quality Department of western Lisbon hospital trust. She has published more than 20 works on quality in healthcare, and she is an ISO 9001 auditor.
About the Contributors

Vasileios G. Stamatopoulos after receiving a degree in Electrical and Computer Engineering from National Technical University of Athens, he was awarded an M.Sc. and a Ph.D. in Bioengineering from University of Strathclyde in Glasgow, where he also worked as a Research Assistant in the area of Experimental Neurophysiology and Neuroprosthetic control. From 2003 to 2006 he was a Project Manager and Research Fellow at the Royal Brompton & Harefield NHS Trust in London. From 2006 to 2008 he worked at the Biomedical Research Foundation of the Academy of Athens, as a Research Fellow in the Bioinformatics and Medical Informatics Team. From 2007-2009 he worked as an Adjunct Lecturer at the University of Central Greece, Department of Biomedical Informatics, and also at the Technological Educational Institutions of Chalkida and Lamia. He is currently employed with the Foundation for Research and Technology Hellas and the Hellenic Bio Cluster as a Technology Transfer Consultant.

Gilberto Llinás Santacreu is a medical doctor, with a Master in Primary Care Medicine, and a Doctorate in Medicine. Honorary collaborating professor of the Department of Clinical Medicine of the Miguel Hernández University of Elche (from 2001). Research fellow of the Miguel Hernández University. Educational contribution as professor in diverse courses, master and seminars. Co-author of 14 publications in books and national and international scientific journals, related fundamentally with styles of professional practice of the doctor of primary care, quality of hospital care and medical web pages. Collaborating investigator in 5 projects of competitive investigation financed by national agencies or covenants of I+D.

Nina Antoniotti has been Marshfield Clinic’s TeleHealth Director since 1997. She has pioneered efforts in TeleHealth development, developed guidelines for TeleHealth standards, and presented at TeleHealth conferences on integration, business plan development, clinical services, evaluation, HIPAA, and needs assessments. She has a Diploma in Nursing (1976), a Bachelor in Management and Labor Relations (1988), an MBA (1992), and PhD in Organizational Systems (2002). She is Chair of the American Telemedicine Association Standards and Guidelines Committee, is past-chair of the ATA Policy Committee and current member, is a past ATA Board Member, and is past Vice-President of the Board of the Center for Telemedicine Law. In 2007, she received the ATA President’s Award for Individual Achievement in the advancement of Telemedicine. In 2008, she was elected to the first ATA College of Fellows for her distinguished and unfailing contributions to the betterment of telemedicine to ATA and also worldwide.

George S. Athanasiou was born in Athens, Greece. He received a 5 years degree from Technical University of Crete on Electronic and Computer engineering in 2008, with grade of 8.51 out of 10 (Excellent) and honors by the Rector’s Council for his proficiency. Since 2008 he has been working towards a PhD degree at the VLSI Design Laboratory of the Department of Electrical and Computer Engineering, University of Patras. He has earned three scholarships for his academic proficiency, two from the Technical University of Crete and one from the State Scholarships Foundation of Greece. His area of research includes VLSI Design for FPGA and ASIC, Cryptography (Algorithms and Architectures), High Level Synthesis, Hardware-Software Co-design, Compilation Techniques for embedded systems and Collective Intelligence with focus on VLCs. He has 3 Journal Publications (2 published – 1 submitted), 2 Conference Publications and 2 Book Chapters.

Igor Crk is a doctoral student at the department of computer science, University of Arizona. He has
a BA in computer science and mathematics from Carthage College and a MS in computer science from
the University of Arizona. His current research interests are in operating systems, networks, machine
learning and energy management.

**Ing. Karel Zvára** has been actively researching in fields of the electronic health record, clinical
guidelines and information exchange in healthcare for the last ten years. He is director of SME EuroMISE
s.r.o. focused on research and complex services in the field of information technologies, especially in
healthcare. He received the MSc. degree (Ing.) at the University of Finance and Administration, Prague,
Czech Republic in 2008. Currently he is studying in doctoral programme of biomedical informatics at
Charles University in Prague, Czech Republic. The topic of his Ph.D. thesis is the information extraction
from medical texts.

**Ioannis Apostolakis** was born in Chania of Crete and studied Mathematics in the University of
Athens. He has a MSc in Informatics, Operational Research and Education issues and also a PhD in
Health Informatics. He had Post Doctoral studies in Medical Informatics issues. He had been for several
years scientific researcher in the Department of clinical therapeutics in the University of Athens. He
has research and educational activities in issues of Health Informatics and Education. He is working as
Visiting Professor at National School of Public Health. More information is available at http://www.iapostolakis.gr

**Ioannis Sitaras** received his bachelor degree from the from the Faculty of Chemistry-National and
Kapodistrian University of Athens in 1995, his Master of Science Diploma in Environmental Science
on 1998 and his PhD thesis for Environmental Chemistry in 2005. He has a working experience on
research projects, environmental studies and he was also employed as a Customer Engineer for analytical
instrumentation (1998-2005). Since 2005 he has been a Case officer of the Hellenic Accreditation System
S.A. (ESYD S.A.), in the department of accreditation of chemical, biological and clinical related testing
laboratories. Since 2005, he has been appointed as the ESYD’s delegate for the European co-operation
for Accreditation Laboratory Committee (EA/LC). He is Chairman of the Scientific Committee for
the Environmental Chemistry and member of the Scientific Committee of Analytical Chemistry of the
Association of Greek Chemists. He is also member of the Scientific Committee of the Hellaslab (Greek
Association of Labs). He has participated with oral presentations in 14 congresses and seminars and
he has authored 6 articles in scientific journals for analytical chemistry, environmental chemistry and
metrology.

**Iraklis Varlamis** is a lecturer at the Department of Informatics and Telematics of Harokopio University
of Athens. He received his Ph.D. in Computer Science from Athens University of Economics
and Business, Greece. From 1999–2004, he was member of the DB-NET (http://www.db-net.aueb.gr/)
research group (Head: Asst. Prof. Vazirgiannis) and since 2005 he is collaborating with the WIM (http://
wim.aueb.gr) research group (Head: Asst. Prof. Vassalos). His research interests focus in the area of
data-mining and especially in the use of semantics in web mining. He has published several articles in
international journals and conferences, concerning web document clustering, the use of semantics in
web link analysis and web usage mining, the design and implementation aspects of virtual communities
etc. More information is available at http://www.dit.hua.gr/~varlamis/
Jan Mainz is a MD, Ph.D. and Professor of Quality Improvement at University of Southern Denmark, the medical director in the Center for Quality Improvement and Accreditation in Psychiatry in the Northern Jutland Region, Denmark. He is the chairman of the Steering Group of the Nordic Minister Council Working Group of Quality Measurement, and chairman of the Indicator Group, Nordic Minister Council Working Group of Quality Measurement and he is also the Danish Representative at OECD Health Care Quality Indicators Project. Jan Mainz is a co-worker and a steering group member of the Office for Quality indicators, European Society for Quality in Health Care. Jan Mainz is a former executive director of the Danish National Indicator Project, the former Head of department for quality improvement at the Danish Institute for Quality and Accreditation in Healthcare. He is also a former President of The Danish Society for Quality in Health Care and former President of the European Society for Quality in Health Care. He is author and co-author of numerous publications on quality in health care and patient safety.

Jose J. Mira Solves holds a PhD in Psychology; Specialist in Clinical Psychology. At the time being he is Professor of the University Miguel Hernández –where is also a Principal Delegate for the Quality Program-, and clinical psychologist (conducting clinical assistance at Agencia Valenciana de Salud. Departament 17). Member of the Technical Commission of Accreditation of Research Institutes of Instituto de Salud Carlos III, Spanish Ministry of Health and Consumer Affairs. Previously: Residents’ tutor in clinical Psychology. Coordinator of Communitary Psychiatry and Psychology in Alcoi and Mental Health in Alicante. Researcher of the Research Unit of the Hospital General Universitario (Alicante). Associate Professor at the University of Alicante and at the Miguel Hernández University. Director of the Quality Management and Control Service in the University Miguel Hernández.

Joyce E. Turner-Ferrier is the Simulation Coordinator for the St. Philip’s College Health Sciences Division in San Antonio, Texas. She has over 25 years in nursing practice serving as Assistant Hospital Administrator, Director of Clinical Services, and Director of Nurses for seven healthcare institutions in California, Louisiana, New Mexico, and Texas in military and civilian settings. Her nursing expertise encompasses healthcare administration, long term care, psychiatric, maternal-child and women’s health, medical-surgical, and clinical skills training simulation. She has taught in both vocational and registered nursing programs in the private and public sectors. She is also a commissioned officer in the United States Army Nurse Corps (Reserve). Mrs. Turner-Ferrier graduated from the Louisiana State University Medical Center School of Nursing (1983, ASN), the University of Texas at El Paso (1993, BSN), and Webster University at Fort Sam Houston, Texas (1997, MAHSM) and is currently pursuing her doctorate in education (EDD).

George E. Karagiannis is currently working as European Research Manager in the R&D Department of the Royal Brompton & Harefield NHS Foundation Trust, London, UK. His duties also include managing the registration and R&D approval procedures of the non-commercially funded projects ensuring that all research activities comply with the national research governance and ethics frameworks. He has significant experience in project management and research in a multinational and multidisciplinary environment. Since 2002 he has managed and conducted research in number of projects both within the UK and internationally, including the EU funded PROactive, EVINCI, eurIPFnet, Clinicip, iWebCare, Pharmacov, pEHR, Panacea-iTV, eOpenDay and Iremma projects. He has published in eHealth related peer reviewed journals and has been an invited speaker at main scientific conferences. He is a full Member of the UK’s Chartered Management Institute.
Periklis Valsamos works for the Greek Ministry of Health and Social Solidarity. He has graduated from the department of Computer Science and Telecommunications of university of Athens. He also holds a MSc. in Advanced Information Systems from the same department. Mr. Valsamos has graduated also from the Greek National School of Public Administration with a specialization in healthcare organizations management. He also holds a MBA from National Technical University of Athens. His main scientific interests are located in the areas of e-health and e-government.

Nikolaos Maris holds a 5 years degree from Technical University of Crete on Electronic and Computer Engineering with grade of 8.42 out of 10. He has earned 2 scholarships for his academic proficiency, one from the Technical University of Crete and one from the State Scholarships Foundation of Greece. His area of research includes Knowledge Representation(KR) and Collective Intelligence(CI). His 2 publications on the KR field deal with temporal reasoning on the web 3.0, whereas his 3 publications on the CI field focus on how the healthcare domain can benefit from the establishment of virtual learning communities.

O. Ferrer-Roca Born in Barcelona, studied Medicine in the Central University of Barcelona from 1966-1972 with Honors. Got the PhD with “Cariotyping and tissue culture of tumors” in 1974 with Honors. Specialized in Pathology in 1974 being trained in Paris, Milwaukee-USA and London. Working as pathologist in the Clinic Hospital of Barcelona since 1972 got the Assistance Professorship in Pathology in 1974 and the Chair of Pathology of the University of La Laguna in 1982. Commercialized a pathology image analysis system TEXCAN ® TM specialized in visual textural analysis of the cell chromatin and DNA and immunohistochemical quantification. Founded the CATAI association in 1993, being the president since then. Got the UNESCO Chair of Telemedicine in 1999 for the University of La Laguna. Since 1996 train on Telemedicine the students of medicine and Computer Science, creating the European Master of Telemedicine and Bioengineering applied to Telemedicine in 2004, at distance. Editor of 12 books and 317 Publications is the author of the first textbook of Telemedicine Handbook of Telemedicine. Amsterdam: IOS-Press, 1998, containing the Ontology of Telemedicine”.

Paola Di Giacomo was born in Italy, on March 7th, 1974. On July 16th, 1998, she received with top marks the Italian Doctor Degree in ‘Computer Engineering’ at the University of Rome ‘La Sapienza’. In 2004 it was conferred to her the PhD degree in ‘Bioengineering’ at the University of Bologna. In 2005 she received with top marks the Italian Doctor Degree in ‘Economics’ at the University of Bologna. The same year (2005) she received the Master of ‘Head of Quality, Health and Environment’ at the ‘Bocconi’ School of Business Administration (SDA) of the ‘Bocconi’ University in Milan. At the end of 2000 she joined Ericsson Company (Rome) where she is responsible for ‘Quality, Health and Environment’ for the Market Unit of South East Europe. Since 2004, Paola Di Giacomo is Assistant Professor at the Department of Informatics, Faculty of Medicine, of the University of Udine.

Paul D. Bartels is a MD, and a specialist in chemical pathology. He is Director of The Danish National Indicator Project and head of Department of Clinical Quality and Patient Safety, Central Denmark Region, also he is the head of the ESQH-Office for Quality Indicators, Aarhus and a board member of the ESQH. Paul D. Bartels is a representative of Denmark in the Patient Safety Sub group of the OECD Health Care Quality Indicators Project. Paul D. Bartels is a former Medical Director of Randers Central Hospital and a former senior lecturer in chemical pathology, University of Aarhus and former chairman.
of the Danish Committee for Quality Assurance in Chemical Pathology. He is a lecturer and author and co-author of numerous publications on quality and patient safety in health care.

**Jana Zvárová** graduated at Charles University in 1965. She has published internationally since 1969 on biomedical informatics and biomedical statistics issues. She received Ph.D. degree from Charles University in 1978 and DrSc. degree from Academy of Sciences CR in 1999. She passed habilitation (Associated Professor) in 1991 and was nominated as Prof. (Full Professor) at Charles University in 1999. She is the principal researcher at the Institute of Computer Science AS CR, head of the Department of Medical Informatics and the director of the Center of Biomedical Informatics. She has been the representative of the Czech Republic in the International Medical Informatics Association and European Federation for Medical Informatics. She has been a member of the national and international editorial boards and served as the expert for EC and Czech governmental institutions. She published more then 200 of papers and was awarded several prizes for outstanding results of research.

**Bryan R. M. Manning** is currently a Visiting Professor in Compunetics within the School of Informatics at the University of Westminster, London, where he leads the development of this new interdisciplinary subject, originating from the creation of the International Council for Medical and Care Compunetics some seven years ago. This topic focuses on the problems of technology-enabled change and brings together the psychology of change management from business psychology; process optimisation, risk assessment, and benefits realisation methods from management science; data acquisition, analysis, indexing and communication techniques from knowledge management science; and finally the appropriate use of enabling information technologies to support health and social care service provision.

**Raymond Woosley** is the founding president and chairman of the Board of The Critical Path Institute (C-Path). Dr. Woosley is also the director of the Arizona Center for Education and Research on Therapeutics that is funded by a grant to C-Path from the Agency for Healthcare Research and Quality. Prior to founding C-Path, Dr. Woosley was vice president for The University of Arizona (UA) Health Sciences Center and dean of the UA College of Medicine. He was associate dean for clinical research and chair of the Department of Pharmacology at Georgetown University School of Medicine. Dr. Woosley was a professor at Vanderbilt University Medical School and was one of the first scientists at Meyer Laboratories, now GlaxoSmithKline. Dr. Woosley earned his PhD in pharmacology from the University of Louisville, his MD from the University of Miami and completed post-doctoral training in pharmacology, internal medicine and clinical pharmacology. His research has been published in over 265 peer-reviewed publications and 50 book chapters.

**Shiu-chung “Shoey” Au**, holds an MD from SUNY Upstate Medical University in Syracuse, NY, and a Masters and Bachelors of Computer Science from MIT. She is a lecturer, author, and co-author of publications on patient safety and quality in health care. His Master’s thesis work, performed under Dr. Amar Gupta, is entitled *Technical and Strategic Issues in Implementing Internet2 in Brazil*. His corporate experiences include working for the Children’s Hospital Boston’s Informatics Program, where he helped develop the AEGIS automated epidemiological surveillance program. For Xpogen Inc., he developed the core Relevance Networks DNA microarray analysis tool. He has also developing prototype imaging devices and production .NET web applications for financial service and product companies. His professional interests include medical and bioinformatics software and consulting, and medical device development.
Solvejg Kristensen is a Master of Health Science from the University of Aarhus in Denmark. She is a chief consultant and the office manager of the Office for Quality Indicators of ESQH. Solvejg Kristensen is a researcher and task leader participating in EU co-funded project like: SimPatIE, EUNetPaS and DUQuE. She is a representative of Denmark in the Patient Safety Sub group of the OECD Health Care Quality Indicators Project. Solvejg Kristensen has a background as quality manager and regional risk manager of the Central Jutland Region. She is a lecturer, author, and co-author of publications on patient safety and quality in health care.

Sophia Kossida received her BSc in Biology from the University of Crete in Greece in 1995. She spent a year in Trinity College of Dublin, in Ireland within the Genetics Department, where she worked on the genome of Saccharomyces cerevisiae. She was awarded her DPhil in 1998 from Oxford University, UK. She worked on sequence analysis of viral genomes and deciphered their evolutionary history. She carried out a post-doc at Harvard University, USA at the Molecular & Cellular Biology Department. She was employed as Senior Scientist within the Target Discovery Group of Lion Bioscience Research Inc. in Cambridge, MA, USA where she worked on the human genome mining project. She was appointed Director of Bioinformatics of Endocube, a company focusing on endothelial cells in Toulouse, France. She joined Novartis in Switzerland as Lab head within the Functional Genomics Group. She joined BRF in July 2004 as tenure track research Bioinformatician.

Stavros Archondakis (MD, PhD) is certified pathologist, director of Cytopathology Department of 401 Athens Army Hospital. He has graduated from Thessaloniki Medical School and National Military Medical School in 1996. Since 2007, he is appointed member of the greek national technical committee of the Hellenic Accreditation System (ESYD) for the accreditation of medical laboratories according to ISO 15189:2007. He speaks English and French. He is member of Hellenic Society of Clinical Cytopathology, Society of Medical Studies and Society for Quality Management in the Health Sector. He is the author of 29 medical books, some of them awarded by the Greek Anticancer Society. He has participated with posters and oral presentations in more than 200 congresses and seminars, he has authored more than 25 articles in greek and foreign medical journals. He possesses more than 800 hours of teaching experience in medical and paramedical schools.

Surendra Sarnikar is an Assistant Professor in Information Systems at the College of Business and Information Systems, Dakota State University. He holds a Bachelors degree in Engineering from Osmania University, India, and a PhD in Management Information Systems from the University of Arizona. He teaches design research and knowledge management at the Dakota State University and has published several conference and Journal publications in the area of knowledge management systems, information retrieval and healthcare information systems.
