About the Contributors

**Angappa Gunasekaran** is a professor of Operations Management and the Chairperson of the Department of Decision and Information Sciences in the Charlton College of Business at the University of Massachusetts (North Dartmouth, USA). Previously, he has held academic positions in Canada, India, Finland, Australia and Great Britain. He has BE and ME from the University of Madras and a PhD from the Indian Institute of Technology. He teaches and conducts research in operations management and information systems. He serves on the editorial board of 20 journals and edits a journal. He has published about 200 articles in journals, 60 articles in conference proceedings and four edited books. In addition, he has organized several conferences in the emerging areas of operations management and information systems. He has extensive editorial experience that includes the guest editor of many high profile journals. He has received outstanding paper and excellence in teaching awards. His current areas of research include supply chain management, enterprise resource planning, e-commerce, and benchmarking. He is also the director of Business Innovation Research Center (BIRC).

* * *

**Emad M. Kamhawi** is an associate professor in the Efficient Productivity Institute Zagazig University. He received his PhD in management information systems from The University of North London. His previous research articles have been published in international journals such as: Information Resources Management Journal; Business Process Management Journal; International Journal of Enterprise Information Systems; and Journal of Enterprise Information Management, in subjects concerning: Business process reengineering; ERP systems, the adoption of e-commerce systems in the Arab countries IS requisite skills, and risk factors for IT projects in the Gulf area. His current research interests are in BPR, ERP systems, Knowledge management and IT infrastructures management.

Mohan Rao is an associate professor of Computer Information Systems at the University of Texas Pan American. He holds a PhD in business administration from the University of Alabama. He received a master’s degree in Management Sciences from the University of Waterloo, Canada. He is a certified fellow in production and inventory management. His research interests are in decision support systems, expert systems, IT evaluation and performance measurement. He has over 50 refereed journal publications and proceedings. Some of his articles have appeared in Management Science, Expert Systems with Applications, Management Accounting Quarterly, International Journal of Operations & Production Management, Industrial Management & Data Systems, Journal of International Technology and Information Management, and Total Quality Management & Business Excellence.

Henk Jonkers received an MSc degree in computer science from the University of Twente, The Netherlands, in 1990 and a PhD from Delft University of Technology in 1995. From 1995 until 2007, he was a member of Scientific Staff at Telematica Instituut, where he was involved in various research projects and advice trajectories in the areas of, among others, business process modelling and analysis, enterprise architecture, service-oriented architecture and model-driven development. Since October 2007 he has been employed as a senior research consultant at BiZZdesign, a company offering modelling and analysis tools, consultancy and training in the areas of business process management/engineering and enterprise architecture.

Maria-Eugenia Iacob is currently assistant professor at the University of Twente. Previously she worked as scientific researcher at Telematica Instituut (2000-2006). She holds a PhD degree in mathematical analysis from the University Babes-Bolyai of Cluj-Napoca, Romania, where she also worked (1990-2000), as an assistant professor at the Department of Computer Science. She has carried out research in the areas of business and e-business process (re)engineering, (enterprise) information systems architectures, service oriented architectures, model-driven development and e-government. She has also carried out consultancy work for Dutch financial and governmental institutions in the above-mentioned areas.

S. Parthasarathy is a lecturer in the Department of Computer Applications, Thiagarajar College of Engineering, Madurai, Tamil Nadu, India. He is a BSc, (Mathematics), MCA, (Master of Computer Applications), MPhil., (Computer Science), PGDBA., (Business Administration), PGDPM, (Planning and Project Management) professional. A habitual rank holder, he is now working for his PhD, in computer science in the Anna University, Chennai, India. He has been teaching at the post-graduate level.
from 2002. He has published 4 articles in peer reviewed international journals and 10 articles in the proceedings of national and international conferences. He has written a text book “Enterprise Resource Planning (ERP) – A Managerial and Technical Perspective” published by The New Age International Publishers (P), Ltd., New Delhi, India in the year 2007. His current research interests include enterprise information systems, enterprise resource planning and software engineering.

Manuel Kolp is a professor in Information Systems at the Université catholique de Louvain, Belgium where he is also head of the Information Systems Research Unit and Academic Secretary of Research for the Louvain School of Management. Dr. Kolp is also invited professor with the University of Brussels and the Universitary Faculties St. Louis of Brussels. His research work deals with agent-oriented and socio-technical architectures for e-business and ERP II systems. He was previously a post doctoral fellow and an adjunct professor at the University of Toronto. He has been involved in the organization committee of international conferences and has chaired different workshops. His publications include more than 60 international refereed journals or periodicals and proceedings papers as well as three books.

Yves Wautelet is an IT project manager and a postdoc fellow at the Université catholique de Louvain, Belgium. He completed a PhD thesis focusing on project and risk management issues in large enterprise software design. Dr. Wautelet also holds a bachelor and master in management sciences as well as a master in Information Systems. His research interests include aspects of software engineering such as requirements engineering, software project management, software development life cycles and CASE-Tools development as well as information systems strategy.

Stéphane Faulkner is an associate professor in Technologies and Information Systems at the University of Namur (FUNDP). Dr. Faulkner is also invited professor with the Universitary Faculties St. Louis of Brussels. His interests of research evolve around requirements engineering and the development of precise (formal) modeling notations, systematic methods and tool support for the development of multi-agent systems, database and information systems. His publications include more than 40 international refereed journals or periodicals and proceedings papers.

Piotr Soja is a senior lecturer in the Department of Computer Science at the Cracow University of Economics (Poland). He holds a PhD in economics from the Cracow University of Economics and an MBA from the School of Entrepreneurship and Management at the Cracow University of Economics in association with the University of Teeside (UK). He also holds an MSc in computer science and mathematics from Jagiellonian University of Cracow (Poland). Dr. Soja’s current research focuses on enterprise systems, their impact and implementation issues. He has over eight years of industry experience as an ERP consultant, system analyst and software developer. Dr. Soja has published articles in Business Process Management Journal, Information Technology for Development, International Journal of Enterprise Information Systems, and Journal of Enterprise Information Management.

Dariusz Put is a senior lecturer in the Department of Computer Science at the Cracow University of Economics (Poland). He graduated from the Cracow University of Economics in 1992 and received PhD in economics in 2001. He has been working for the Cracow University of Economics for 14 years supervising master students and doing research in statistics and computer science. He has published
more than thirty both academic and student papers and books. His research focuses mainly on statistics and computer science, especially data, information and knowledge management and integration of business processes.

**Shuchih Ernest Chang** is an associate professor at the Institute of Electronic Commerce, National Chung Hsing University (NCHU) in Taiwan. He received his MSCS and PhD degrees from the University of Texas at Austin. Before joining the faculty at NCHU, Dr. Chang worked at UBS Financial Services Inc. in U.S.A. as a Divisional Vice President for about 5 years. He has 15 years of working experience in major computer companies and financial service firms in U.S.A., including Unisys, IBM, Sun Microsystems, JP Morgan, Bear Stearns, and UBS. His research interests are in information management, electronic commerce, enterprise application architecture, technology management, information security management, and voice-enabled web systems. His publications have appeared in *IEEE Pervasive Computing, Information and Software Technology, Expert Systems with Applications, International Journal on Artificial Intelligence Tools, Industrial Management & Data Systems, International Journal of Enterprise Information Systems, International Journal of Information Technology and Management, International Journal of Technology Management, and International Journal of Production Research*.

**Dafid Agourram** holds a doctorate in business administration (DBA) from the Université de Sherbrooke. Before joining Bishop’s University in 2001, Dr. Agourram taught at McGill University, École des Hautes Études Commerciales de Montréal, and Université du Québec à Montréal. Dr. Agourram has also worked in the industry for nine years. He was the dean of a private business school, human resource director in an insurance company, and software engineer in a bank. Dr. Agourram is a regular member of the Groupe de recherche en Geobusiness de l’Université de Sherbrooke.

**John Krogstie** has a PhD (1995) and a MSc (1991) in information systems, both from the Norwegian University of Science and Technology (NTNU). He is professor in Information, Systems at IDI, NTNU, Trondheim, Norway. He is also a senior advisor at SINTEF. He was employed as a manager in Accenture 1991-2000. John Krogstie is the Norwegian representative for IFIP TC8 and vice-chair of IFIP WG 8.1 on information systems design and evaluation, where he is the initiator and leader of the task group for Mobile Information Systems. He has published around 80 refereed papers in journals, books and archival proceedings since 1991.

**Csaba Veres** completed his PhD in 1997, in Tucson Arizona. In the successive years he held appointments at the Australian Department of Defence, and at the University of Melbourne. He has in 2003-2006 at the Norwegian University of Science and Technology, Trondheim, working on foundational issues in Ontology design for Semantic Web applications. He currently works as researcher and systems analyst at DSTO, Melbourne, Australia

**Guttorm Sindre** got his PhD in information systems from the NTH, Trondheim, Norway in 1990. He has been an associate professor at NTNU, Trondheim, Norway since 1999, and a full professor since 2003. His research interests are IS modeling and requirements engineering, recently with a particular focus on interoperability, security, privacy, and trust. He has been involved in several national and
international research projects, currently participating in the EU Network of Excellence INTEROP. He has spent two sabbatical periods totaling 14 months at the Univ. Auckland, New Zealand.

**Øyvind Skytøen** is a master student at Norwegian University of Science and Technology (NTNU), Information Systems group.

**Vittaldas Prabhu** received his PhD in Mechanical Engineering from the University of Wisconsin-Madison. He is currently an associate professor in Industrial and Manufacturing Engineering at Penn State University. His research interests include distributed control systems, sensing and control of machines, and high performance computing for manufacturing systems. He teaches courses in robotics, controls, and manufacturing systems. He is the founder and co-director of the Center for Manufacturing Enterprise Integration at Penn State University.

**Docent Lea Kutvonen** acts as a professor at the Department of Computer Science at the University of Helsinki, Finland. She leads the Collaborative and Interoperable Computing Group (CINCO) with interest to federated management of B2B collaboration lifecycle and interoperability. The themes emerging from the area include architecture issues, e-contracting, non-functional aspects such as trust management, and coordination and composition of Web Services. The CINCO group is a part of the Distributed Systems and Data Communication research area.

**Toni Ruokolainen** holds an MSc in computer science and he is currently a PhD student in the CINCO group at the University of Helsinki. His research interests include service-oriented software engineering and metainformation management facilities in the context of interoperability middleware.

**Sini Ruohomaa** holds an MSc in computer science and she is currently a PhD student in the CINCO group at the University of Helsinki. Her research interests include trust and reputation management in open collaboration systems and inter-enterprise computing, with a focus on automated trust decisions.

**Janne Metso** holds an MSc in Computer Science and he is currently a PhD student in the CINCO group at the University of Helsinki. His research is focused on runtime negotiation facilities and expert system support for establishing and maintaining inter-enterprise collaborations.

**Joseph Bradley** is an assistant professor of Accounting at the University of Idaho. He received his BA from Claremont McKenna College and his EMBA and PhD from Claremont Graduate University. His research focuses on ERP implementation issues. His research has been published in the *International Journal of Enterprise Information Systems, Issues in Information Systems* and the *International Journal of Accounting Information Systems*. He has presented his research at the Information Resource Management Association International Conference and Americas’ Conference on Information Systems. His teaching interests include accounting information systems, management accounting, leadership, and strategy. Prior to his academic career, he spent 30 years in industry in various accounting and general management positions.
About the Contributors

C. Christopher Lee is an associate professor of Business Administration at Pacific Lutheran University. He received his PhD and MBA at Saint Louis University. His research interests include information systems and finance. His research has been published in Issues in Information Systems, E-Business Review, the International Journal of Enterprise Information Systems and the Journal of Economic Studies. His teaching interests include management information systems and finance.

Diego Milano earned his PhD in computer science at the Department of Computer and Systems Science of the University of Rome “La Sapienza”, under the supervision of Prof. Tiziana Catarci, and he is currently a postdoctoral researcher at the Department of Computer Science of the University of Basel. His main research interests are in the areas of Data Quality and Data Cleaning, with a specific focus on the problem of Object Identification for semi-structured and XML Data. In this context, he has developed solutions based on novel, efficiently computable distance measures for tree-structured data. He is also active in the areas of data curation, digital libraries, and service oriented architectures. He has been involved in various EU funded research initiatives, including the Networks of Excellence INTEROP and DELOS.

Monica Scannapieco is a researcher at ISTAT and a lecturer at Università di Roma “La Sapienza”, Dipartimento di Informatica e Sistemistica, where she earned a PhD in computer engineering with the thesis “DaQuinCIS: Exchanging and Improving Data Quality in Cooperative Information Systems”, in which theoretical and application oriented aspects of data quality in distributed and heterogeneous systems were investigated. She is author of more than 30 papers mainly on the data quality, privacy preservation and data integration architectures. She published, amongst others, in the ACM SIGMOD Conference, IEEE International Conference on Data Engineering (ICDE), the International Conference on Information Quality (ICIQ), International Conference on Cooperative Information Systems (CoopIS), Journal of Data Semantics, Information Systems. She has been involved in several Europeans and Italian projects on quality of data and data integration.

Tiziana Catarci received her PhD in computer science from the University of Rome, where she is currently a full professor. Tiziana Catarci’s main research interests are in theoretical and application oriented aspects of database design, cooperative information systems, data quality, visual formalisms for databases, user interfaces, usability, and Web access. On these topics she has published over 100 papers and 12 books. Tiziana Catarci has been often invited to give talks during important international conferences and is regularly in the program committees and editorial boards of the main conferences and journals in her areas of interest.

Vipul Jain is a researcher at INRIA (The French National Institute for Research in Computer Science and Control) since December 2006. He has received his PhD in Industrial Engineering from the Department of Mechanical Engineering at IIT-Delhi in 2006. At INRIA, in addition to the fundamental research, he is also involved in the European project I*PROMS (Innovative PROduction Machines and Systems). His primary research interests are supply chain management and mechanism design in supply chain settings. He is the editorial board member for seven international journals, including International Journal of Industrial Engineering, International Journal of Intelligent Enterprise, International Journal of Information Systems and Supply Chain Management, International Journal of Management Development, International Journal of Agile and Extreme Software Development, International Journal of
About the Contributors

**S. G. Deshmukh** is a professor of Industrial Engineering at the Mechanical Engineering Department of IIT, Delhi. His areas of research interest include supply chain management, quality management, information systems, and systems optimization. He has been actively involved in sponsored research and consultancy projects. He is dedicated to the goal of bringing synergy between academics, industry and research.

**Subhash Wadhawa** (Eur. Ing., C. Emg.) received his PhD from NUI, Ireland, while working on an ESPRIT project at CIM Research Unit, Galwai. He extensively contributed to the development of generalized simulators and expert systems for flexible systems. He is currently professor at Indian Institute of Technology, New Delhi (IITD). He has originated novel research themes: decision and information delays involving decision-information synchronization (DIS) applications in CIM, supply chain, e-business; DRIS architecture for agile manufacturing; SAMIN architecture in IMS context, etc. He is an active contributor to EC projects in the IT&C domain and has coordinated several EU workshops. He has been a consultant/contributor/national-expert to many International bodies EC, UNIDO, CW, APO (Tokyo), etc.
