About the Contributors

Yogesh K. Dwivedi is a senior lecturer at the School of Business and Economics at Swansea University in the UK. He was awarded his M.Sc. and Ph.D. by Brunel University in the UK, receiving a Highly Commended award for his doctoral work jointly by the European Foundation for Management and Development and Emerald Publishing Ltd. He is a qualified practitioner in Project Management Methodology PRINCE2. His research focuses on the adoption, diffusion and impact of ICT in organisation and society. He has authored a research monograph on consumer adoption and usage of broadband and has co-edited seven books and handbooks on various IS themes. Dr Dwivedi has written almost 100 refereed papers in international conferences (such as AMCIS, ECIS, PACIS and IFIP WG8.6) and leading journals including Communications of the ACM, the DATA BASE for Advances in Information Systems, the Information Systems Journal, Information Systems Frontiers, International Journal of Production Research, the European Journal of Information Systems, the Journal of the Operational Research Society, Journal of Computer Information Systems, Journal of Enterprise Information Management and Journal of Information Technology. He is the Senior Editor of the DATA BASE for Advances in Information Systems, Managing Editor of Journal of Electronic Commerce Research, Assistant Editor of Transforming Government: People, Process and Policy, member of the editorial board/review board of a number of other journals and as well as co-chairs of track and mini-tracks to international conferences. He has also co-edited special issues in leading journals that include: the DATA BASE for Advances in Information Systems, the Information Systems Journal, Information Systems Frontiers, Journal of Enterprise Information Management, Electronic Government, An International Journal and International Journal of Electronic Government Research. He is a member of the Association of Information Systems, IFIP WG8.6 and the Global Institute of Flexible Systems Management, New Delhi. He can be contacted at ykdwivedi@gmail.com.

Syeda Rownak Afza is a senior lecturer in BRAC Business school, BRAC University, Dhaka, Bangladesh. She has completed her MBA from University of Dhaka. Her research interests include Service Marketing, Women empowerment and ICT4D.

Md. Mahfuz Ashraf is a Lecturer in Department of Management Information Systems, University of Dhaka. His research interests include IT/IS adoption and implementation in rural-urban settings, impact study of ICT for development (ICT4D) and the digital divide.
Justin Beneke is a full-time marketing lecturer and programme convenor in the School of Management Studies at the University of Cape Town. His academic interests lie in the fields of electronic marketing, retailing management and higher education marketing.

Christos Bouras obtained his Diploma and PhD from the Department Of Computer Engineering and Informatics of Patras University (Greece). He is currently a Professor in the above department. Also he is a scientific advisor of Research Unit 6 in Research Academic Computer Technology Institute (CTI), Patras, Greece. His research interests include Analysis of Performance of Networking and Computer Systems, Computer Networks and Protocols, Telematics and New Services, QoS and Pricing for Networks and Services, e-Learning Networked Virtual Environments and WWW Issues. He has extended professional experience in Design and Analysis of Networks, Protocols, Telematics and New Services. He has published 300 papers in various well-known refereed conferences and journals. He is a co-author of 8 books in Greek. He has been a PC member and referee in various international journals and conferences. He has participated in R&D projects such as RACE, ESPRIT, TELEMATICS, EDUCATIONAL MULTIMEDIA, ISPO, EMPLOYMENT, ADAPT, STRIDE, EUROFORM, IST, GROWTH and others. Also he is member of experts in the Greek Research and Technology Network (GRNET), Advisory Committee Member to the World Wide Web Consortium (W3C), IEEE - CS Technical Committee on Learning Technologies, IEEE ComSoc Radio Communications Committee, IASTED Technical Committee on Education WG6.4 Internet Applications Engineering of IFIP, ACM, IEEE, EDEN, AACE, New York Academy of Sciences and Technical Chamber of Greece.

Nabyla Daidj is Associate Professor in Strategy at TELECOM Business School and Director of the Management, Marketing and Strategy department. Her teaching and research interests are corporate strategy, inter-organizational relationships (strategic alliances) and conglomerates’ performance and corporate governance in a context of coopetition. She has also developed an expertise in the Media and Electronic Games industry. She has published in 2008 a book about cooperation, games theory and strategic management. Currently, she is studying the sources of value creation in international firms.

Qiuyan Fan is a lecturer at University of Western Sydney, Australia. Dr Fan has a particular research interest in the issues surrounding egovernment, e-commerce/e-business and broadband diffusion. Over the last few years she has published a number of referred Journal articles, book chapter and refereed conference papers in the areas above. Her doctorate research looked at how Australian government policies influence Internet access. She has been supervising and co-supervising honours and PhD students.

Elizabeth Fife is the Associate Dir. for Industry Studies at the Institute for Communication Technology Management (CTM), Marshall School of Business, University of Southern California and has a teaching appointment in the Viterbi School of Engineering. She has over 9 years research experience studying international telecommunications markets with expertise in the wireless industry and media/content business, developmental economics, and ICT adoption and innovation. Teaching interests include technical and professional communications for engineers and industry professionals; evolution of telecom/entertainment/digital markets.

Hidenori Fuke is Professor at Faculty of Global Media Studies, Komazawa University in Tokyo, Japan since April 2007. He has previously experienced regulatory matters as a senior executive at Nip-
pon Telegraph and Telephone Corporation and done extensive research on regulatory policy as a board of director at InfoCom Research, Inc., He was a member of Faculty of Informatics, Kansai University in Osaka from 2000 to 2007. He received B.A. in Economics from Tokyo University, and M.Litt. from Glasgow University in Scotland. He received Ph.D. in International Public Policy from Osaka University.

**Apostolos Gkamas** obtained his Diploma, Master Degree and Ph.D from the Computer Engineering and Informatics Department of Patras University (Greece). He is currently Scientific cooperator at the Research Unit 6 of the Research Academic Computer Technology Institute, Patras, Greece, visiting lecturer in Hellenic Open University in the Informatics Curriculum and Visiting Assistant Professor in the Informatics Department of University of Ioannina. His research interests include Computer Networks, Telematics, Multimedia transmission and Cross Layer Design. More particular he is engaged in transmission of multimedia data over networks and multicast congestion control. He has published more than 60 papers in international Journals and well-known refereed conferences. He is also co-author of three books (one with subject Multimedia and Computer Networks one with subject Special Network Issues and one with subject IPv6). He has participated in various R&D project (in both EU and national) such as IST, FP6, FP7, Intereg eLearning, PENED, EPEAEK, Information Society.

**Helena Grunfeld** is a research scholar at the Centre of Strategic Economic Studies, Victoria University, Melbourne, Australia. Her research interests include evaluation of how ICT can contribute to development, focusing on its impacts on capabilities, empowerment, and sustainability.

**Janice A. Hauge**- Dr. Hauge is an associate professor of economics at the University of North Texas, and is also a senior research associate with the Public Utility Research Center at the University of Florida. Dr. Hauge’s current research topics include competition policy in telecommunications and broadband, network studies, and regulatory analyses of both telecommunications and energy sectors. Recent work includes analyses of broadband Internet adoption in Europe and the US, analyses of broadband demand policies and programs, and the empirical studies of the effects of government policies on broadband adoption. Currently Dr. Hauge teaches strategic behavior and applied microeconomic theory courses at the undergraduate and graduate levels.

**Bronwyn Howell** is General Manager of the New Zealand Institute for the Study of Competition and Regulation and a faculty member of Victoria Management School, Victoria University of Wellington. In 2007, she was Visiting Research Scientist at the Networking Laboratory, Helsinki University of Technology. Bronwyn has a background as both an academic researching telecommunications, ICT and health markets, and as a practitioner, holding managerial positions in the ICT and health sectors in both New Zealand and multinational firms. Her research interests relate to the ownership, governance and management of firms operating in regulated industries.
About the Contributors

Wen-yi Hsu is a part-time assistant professor of the Department of Radio and TV at National Chengchi University in Taiwan. She served as a senior reporter, anchorwoman and chief editor of the news department at the Broadcasting Corporation of China from June 1989 to December 2004. She was elected as an Honorary Member of the Phi Tau Phi Scholastic Honor Society of the Republic of China in 2009. Her research interests include radio theory and practice, digital broadcasting, radio news reporting and writing, radio in-depth reporting, radio programming & production, the ecology of electronic media, and new communications technology.

Vikas Jain holds a Ph.D. in Information Systems and Decision Systems from The George Washington University, Washington DC. He completed his masters in information systems from IIT, New Delhi, India and a Bachelor of Technology degree in Electronics Engineering from Delhi Institute of Technology, Delhi, India. He has worked for nearly 12 years in IT industry in India in different areas ranging from software development, IT market research and consulting, and e-learning. He has worked on projects for clients like IBM, Microsoft, HP, Prudential Insurance among many others. Currently, Dr. Jain is an assistant professor of information and technology management at the University of Tampa, Tampa, FL and conducts research in the areas of enterprise resource planning systems, electronic government, and IT business value. He has served as guest editor for number of journals including Electronic Government: An International Journal, Journal of Global Information Technology Management (JGITM), and International Journal of Organization and End User Computing. He also serves as an editorial review board member for International Journal of Electronic Government Research.

Mark A. Jamison - Dr. Mark Jamison is the director of the Public Utility Research Center at the University of Florida, which provides international training and research on business and government policy, focusing primarily on utilities and network industries. Dr. Jamison’s current research topics include leadership and institutional development in regulation, competition and subsidies in telecommunications, and regulation for next generation networks. He has conducted education programs in Asia, Africa, Europe, the Caribbean, and North, South, and Central America. He is also a research associate with the UF Center for Public Policy Research and with Cambridge Leadership Associates. Dr. Jamison has served as chairperson of the National Association of Regulatory Utility Commissioners (NARUC) Staff Subcommittee on Communications, chairperson of the State Staff for the Federal/State Joint Conference on Open Network Architecture, and member of the State Staff for the Federal/State Joint Board on Separations.

Marijn Janssen is an Associate Professor at the Information and Communication Technology section and Director of the interdisciplinary SEPAM Master program of the Faculty of Technology, Policy and Management at Delft University of Technology. He has conducted and managed several simulation and gaming projects, and published over 150 refereed publications and serves on several editorial boards and conferences in the area of e-government. For more information, visit www.tbm.tudelft.nl/marijnj.

Yu-li Liu is a professor of the Department of Radio and TV at National Chengchi University in Taiwan. She served as one of the Commissioners of the National Communications Commission (NCC) from February 2006 to February 2008. She has received grants from the U.S. Fulbright Foundation and Taiwan’s National Science Council for research projects in the areas of convergence, broadband networks, and digital TV in Taiwan. Her research interests include digital broadcasting, broadband com-
munications, convergence, telecommunications law and regulation, new communications technology, and media management. She has published numerous books such as Multi-channel TV and Audience, Cable TV Management and Programming Strategy, Cable TV Programming and Policy in China, Radio and TV, Telecommunications, etc.

**Bushra Tahseen Malik** is a research in Brainstorm Bangladesh. He is currently working in SIRCA jointly funded by IDRC and NTU, Singapore under an impact study of ICT for development in Bangladesh.

**Mircea I. Marcu** - Dr. Marcu is a Postdoctoral Research Associate at the University of Florida Institute for Child Health Policy. He received his Ph.D. from the University of Florida in 2009, and M.A.s from Central European University (2001) and Babeș-Bolyai University (1999). Dr. Marcu’s areas of expertise are Industrial Organization, Microeconomics, and Econometrics. His current research interests include the economics of two-sided markets, competition policy, regulation of public utilities, health care reform, and the estimation of health care costs and utilization. His research on telecommunications has been recognized at the 32nd and 35th Telecommunications Policy Research Conference, where he was awarded the second and first prize in the graduate student competition. He serves as a referee/reviewer for Utilities Policy.

**John B. Meisel** received a B.A. degree from St. Lawrence University in 1973 and a Ph.D. in economics from Boston College in 1977. He is a Professor of Economics and Finance at Southern Illinois University Edwardsville, where he has been employed since 1977. He served as staff member in the Office of Plans and Policy at the Federal Communications Commission while on sabbatical from the university. He has also worked as a consultant with the Illinois Commerce Commission and the St. Louis-based consulting firm, The Resource Group. His research interests are in the fields of industrial organization, antitrust and regulation. He has published over 20 articles in peer-reviewed economics journals, including The Review of Economics and Statistics. His current research interest involves the public policy implications of the Internet on market structure, specifically effects on the music, movies and television markets.

**Mitchell Morehart** is a senior agricultural economist at the Economic Research Service. He conducts research and develops current information and longer-term perspectives about the economic well-being of farm households, the financial structure and performance of farm businesses, and the economic contribution and performance of the farm sector of the U.S. economy. He has authored or co-authored of more than 80 ERS bulletins and journal articles that report research results in agricultural business, finance, and management.

**Navonil Mustafee** is a Lecturer in the School of Business and Economics at Swansea University. Prior to this, he was a Research Fellow in Brunel University and Warwick Business School. His research interests are in e-Infrastructures and Grid Computing, Information Systems, Operations Research and Healthcare Simulation. He completed his PhD in Information Systems and Computing from Brunel University in 2007. He is a member of the drafting group of the COTS Simulation Package Interoperability Product Development Group (CSPI-PDG) under the Simulation Interoperability Standards Organization. His email address is navonil.mustafee@gmail.com.
About the Contributors

Banani Nandi is a Principal Technical Staff Member with AT&T Shannon Laboratories (formerly AT&T Bell Laboratories). She received her Ph.D. degree from New York University and her Ph.D. dissertation was awarded the Otto Ehrlich Memorial Award. Before joining AT&T, she taught at Calcutta University in India, Columbia University, New York University, and Rutgers University in U.S.A. Dr. Nandi’s fields of specialization include International Trade and Econometrics. At present, her research focuses on the impact of telecommunications/information technologies on productivity and economic growth.

John C. Navin is a Professor of Economics and Finance at Southern Illinois University Edwardsville. He received his B.S. in Business Administration from Bowling Green State University in 1987. He received his Ph.D. from Michigan State University in 1992. Dr. Navin’s areas of specialization include public finance, labor and health economics. He has published articles in such journals as Health Economics, Economic Inquiry, Public Finance Review and Growth and Change. Dr. Navin is also a partner in the economic consulting firm RSN Economic Group, Inc.

Anastasia Papazafeiropoulou is a lecturer in the Information Systems and Computing department at Brunel University, UK. Her PhD was awarded by Brunel University and she also holds a first degree in Informatics and a M.Sc. in Information Systems both from the Athens University of Economics and Business, Greece. She has been involved in a number of European and UK funded research projects with emphasis on electronic commerce and small and medium size enterprises (SMEs). She teaches information systems management and business integration at the postgraduate level. She also supervises researchers in the field of technology adoption by organisations with special interest in developing countries. She has 10 years of research experience on the study of diffusion and adoption of electronic commerce, broadband Internet, Enterprise Recourse Planning Systems (ERPs), Customer Relationship Management systems (CRMs), IP-telephony and mobile TV.

Francis Pereira is Director of Industry Research at the Institute for Communications, Technology and Management (CTM) and Lecturer in the Information & Operations Department, Marshall School of Business, University of Southern California. He received his Ph.D. in Political Economy and Public Policy from the University of Southern California, and teaches courses in economics, statistics and electronic commerce. For the past fifteen years, his research has focused on key business issues in telecommunications field, particularly telehealth, and adoption rates of E-commerce applications especially in the small and medium size enterprises, and business models in the new multimedia environment and the effects of emerging technologies on these models. Francis has authored several book chapters and has published papers in journals that include the Journal of Communications Networks and the Journal of the Institution of British Telecommunication Engineers.

Peter L. Stenberg is a senior economist at the Economic Research Service. He received his PhD in economics from the University of Minnesota and has conducted research with respect to North American, African, and Eastern European economics covering topics in economic development policy and human and physical infrastructure. He has written over 100 articles on telecommunications, economic impact of universities, science and technology policy, defense restructuring, high tech industry, and other economic development and policy subjects.
Ganesh K Subramaniam is a statistician and principal member of technical staff at AT&T Laboratories, Florham Park NJ. He joined AT&T in 1992 and since has worked on many statistical problems related to consumer behavior, network data, speech recognition, and financial modeling. His current research interest includes time series analysis, functional data analysis and computational statistics related to large data. He received his PhD in Statistics from the University of Leeds, UK.

Timothy Sullivan is an Instructor of Economics and Finance at Southern Illinois University Edwardsville, where he has been employed since 1995. He received B.S. Degrees in Economics and Computer Science at the University of Missouri – St. Louis in 1988 and a Ph.D. in Economics at the University of Maryland in 1995. Dr. Sullivan's research interests include statistical analysis, economic impact analysis and the Internet’s effect on media industries. His research has been published in peer-reviewed journals, including Economic Development Quarterly, The Southern Journal of Business and Economics and info. He is a partner with the economic consulting firm RSN Economic Group, Inc.

Simon J. E. Taylor is the Founder and Chair of the COTS Simulation Package Interoperability Product Development Group (CSPI-PDG) under the Simulation Interoperability Standards Organization. He is the co-founding Editor-in-Chief of the UK Operational Research Society’s (ORS) Journal of Simulation and the Simulation Workshop series. He was Chair of ACM’s Special Interest Group on Simulation (SIGSIM) (2005-2008). He is a Reader in the School of Information Systems, Computing and Mathematics at Brunel and has published over 100 articles in modelling and simulation. His recent work has focused on the development of standards for distributed simulation in industry. His email address is simon.taylor@brunel.ac.uk.

Panayiota Tsatsou (BA, MA, MSc, PhD) is a lecturer in Media and Communication at Swansea University, United Kingdom. Her doctoral research at the London School of Economics and Political Science explored the role of everyday culture and decision-making in shaping digital divides and was supported by the Hellenic Republic State Scholarships Foundation. Previously her postgraduate work was supported by the N.A.T.O Science Fellowship Program and other fellowship programmes. She is involved in European research projects on Information and Communication Technologies (ICTs), with an emphasis on regulation and policy creation, as well as the role of ordinary people as users and actors in the Information Society. Her research aims to develop innovative and evidence-based solutions to issues arising in the Information Society through the submission of papers and reports to national and EU policy and regulation authorities. Along these lines, she publishes in the areas of digital divides, policy and regulation for the Information Society children and new media, cyberbullying, new media and gender.

Thrasyvoulos Tsiatsos obtained his diploma, his master’s degree and his PhD from the computer engineering and informatics department of Patras University (Greece). He is currently lecturer in the Department of Informatics of Aristotle University of Thessaloniki as well as research member at Research Unit 6 of Research Academic Computer Technology Institute. His research interests include computer networks, telematics, networked virtual environments, multimedia and hypermedia.
Pierre Vialle is Professor at TELECOM Business School and Director of the MSc in ICT Business Management program. His teaching and research interests are inter-organizational relationships and networks, innovation, and management of high-technology firms. He has developed an expertise in the Information Communications Technology Industry and has published several books, chapters and articles. Currently he is studying the impact of convergence on the strategies of firms, and innovation in successful catching-up companies.
