About the Contributors

Rodrigo José Firmino is lecturer at the Postgraduate Program of Urban Management at the Pontifical Catholic University (PUCPR) in Curitiba, Brazil. He worked as Postdoctoral Fellow at University of São Paulo, Brazil, researching the co-development of urban and technological strategies for cities in developing countries. He obtained his PhD on Urban Planning from the School of Architecture, Planning and Landscape at the University of Newcastle upon Tyne, UK. He also holds an MPhil in Architecture and Urbanism from the University of São Paulo, and trained as architect and planner at State University of São Paulo.

Fábio Duarte is Professor at the Postgraduate Program in Urban Management at the Catholic University of Paraná (PUCPR) in Curitiba, Brazil. He is researcher of the National Council of Technological and Scientific Development (CNPq/Brazil). Duarte is urban planner, holds a PhD in Communications from the University of São Paulo, and a MPhil in Multimedia from the State University of Campinas. He has been guest researcher and lecturer at the Université Paris 1, Université Laval (Canadá) and Universidad Politécnica de Catalunya.

Clovis Ultramari is an architect and lecturer at the Postgraduate Program in Urban Management at the Catholic University of Paraná (PUCPR) in Curitiba, Brazil. He obtained his Ph.D. on Environment and Urban Development from the Federal University of Paraná, Brazil. He has a professional experience in state and non-governmental agencies in Latin America and Africa.

* * *

Luiz Adolfo Andrade is a researcher and game designer working on alternate reality games. Being a PhD Student at Federal University of Bahia, he is currently working on his thesis about games and the idea of production of space. He is member of both the collective of researchers ‘Realidade Sintética’ and the Urban Cultures, Leisure and Technology Laboratory.

Nelson Arteaga Botello is a professor and researcher in the Faculty of Political and Social Sciences at the Universidad Autónoma del Estado de México. He received his doctorate at the University of Alicante, Spain. He is a member of the National System of Investigators (SNI) in Mexico. His main research interests are public security and surveillance. Among many books and articles in Spanish, English and Portuguese, his publications include Pobres y Delincuentes: Estudio de sociología y genealogía (2006), and Sociedad de la vigilancia en el Sur-Global: Mirando América Latina (2009).
Andrew Boulton is a graduate student in the Department of Geography, University of Kentucky. His research is focused on locative annotative media and neogeographies (crowd-sourced cartographies). His work deals with (i) the nature of contributor communities and the democratizing potential of Web 2.0 cartographic platforms, and (ii) the ways in which locative annotations reconfigure experiences of urban place.

Paolo Bruni is a PhD student at the Contemporary Communication and Culture Postgraduate Program of the Federal University of Bahia, connected to the Film Analysis Laboratory. He is also currently a member of the collective of researchers ‘Realidade Sintética’, and develops research on analytic methodologies that deal with videogames.

Stanley D. Brunn is Professor of Geography at the University of Kentucky. He has published on a wide variety of political, social, urban, economic, information/communication, and environmental topics. He has served as editor of the Annals of the Association of American Geographers and The Professional Geographer and guest-edited issues of other journals. His teaching experiences include the University of Florida and Michigan State University and a dozen of short-term assignments in European and Central Asian universities. Brunn’s current research includes: a forthcoming (Springer) international edited volume on the impacts of megaengineering projects; innovative cyberspace cartographies; atlases of the US 2008 election and Greater Eurasia; geographies of contemporary religion; visual geographies (especially stamps).

Fernanda Bruno is Associate professor at the Federal University of Rio de Janeiro (UFRJ) - Postgraduate Program in Communication and Culture. She has a PhD in Communication from the Federal University of Rio de Janeiro. Bruno is researcher of the National Council of Technological and Scientific Development (CNPq/Brazil) and Founder Member of the Latin America Surveillance Studies Network.

Mario Viola de Azevedo Cunha is MD in Private Law and Specialist in Consumer Law (Universidade do Estado do Rio de Janeiro), Specialist in Private Law (Universidade Federal Fluminense), Master of Research and currently a PhD Candidate in law (European University Institute, Italy). He is also an attorney (on leave) of the Municipality of Saquarema, in the State of Rio de Janeiro.

Ben Derudder is Lecturer in Human Geography at the Geography Department of Ghent University, and Associate Director of the Globalization and World Cities research group and network (GaWC). His research focuses on (i) the conceptualization and empirical analysis of transnational urban networks, (ii) the (persisting) importance of business travel in the space economy, and (iii) spatial modelling techniques.

Lomme Devriendt has a doctoral degree in Geography at Ghent University. He is research assistant at the Geography Department of Ghent University and a research fellow of the Globalization and World Cities group and network (GaWC). His research is funded by the Flemish Fund for Scientific Research (FWO), and deals with the conceptualization and empirical assessment of the digital and physical accessibility of cities in the global economy.

Danilo Doneda is PhD in Civil Law (UERJ), lawyer and Law Professor. He also has a degree in Law (UFPR) and a Master in Law (UERJ). He taught at PUC-Rio, UERJ and UCAM. He was visiting
researcher at Università degli Studi di Camerino (Italy) and at Max Planck Institute for Comparative and International Private Law (Germany). He is currently a member of the E-Commerce Commission and Consumer Protection of Brazilian Ministry of Justice and a counselor for the Brazilian Ministry of Science and Technology and UNESCO. He specializes in Data Protections and has several articles and books on this issue.

**Susan J. Drucker**, is a Professor in the Department of Journalism/ Media Studies, School of Communication, Hofstra University. She is the treasurer of the Urban Communication Foundation and a partner in Communication Landscapers, a consulting firm. She is an attorney, and Series editor of the Communication and Law series for Peter Lang Publishing Group. She is the author and co-editor of 9 books and over including The Urban Communication Reader I and II, Voices in the Street: Gender, Media and Public Space and two editions of Real Law @ Virtual Space: The Regulation of Cyberspace (1999, 2005) with Gary Gumpert. Her work examines the relationship between media technology and human factors, particularly as viewed from a legal perspective.

**Thiago Falcão** is a PhD Student at the Contemporary Communication and Culture Postgraduate Program of the Federal University of Bahia. He currently develops a research concerning human interaction through virtual worlds, besides being the chief-editor of the game research website ‘Realidade Sintética’ (www.realidadesintetica.com), which gathers different portuguese-language aligned researchers in the attempt of formally putting together the game studies area in Brazil.

**Emmanoel Ferreira** is a PhD student at the Communication and Culture Program of Universidade Federal do Rio de Janeiro (Brazil) and an Assistant Professor at the Media and Cultural Studies Department of Universidade Federal Fluminense (Brazil). He is a member of the ‘Realidade Sintética’ video game research group.

**Klaus Frey** is Professor at the Postgraduate Program in Urban Management and the bachelor courses in environmental engineering and sociology at the Catholic University of Paraná (PUCPR) in Curitiba, Brazil. He is researcher of the Brazilian National Council of Technological and Scientific Development (CNPq). He received a PhD in social sciences from the University of Konstanz, Germany (1997) and in 2007 he carried out his post-doctoral studies at the Institute of Urban and Regional Planning at the Technological University of Berlin. He has published on urban governance, local sustainable development, public policies, and socio-technical networks.

**Maria Giaoutzi** is Professor of Economic Geography and Regional Planning at the Department of Geography and Regional Planning, School of Rural and Surveying Engineering, National Technical University of Athens. Fellow of the Netherlands Institute of Advanced Studies (NIAS), the Royal Dutch Academy; Member of various International Research Networks; Elected Chancellor at the Steering Committee of the International Regional Science Association (1990-94); Elected Member of the Executive Committee of I.G.U-C18 (Telecommunications)/ CNFG, (1992-95); President of the Board of Directors of the Hellenic Tourism Organization Land Development Company (1998-2000); Consultant in International Organizations, such as OECD, EEC, ERT, ESF. She has experience on urban and regional planning and development, foresight methodologies, technology assessment, etc.
Gary Gumpert is Emeritus Professor of Communication at Queens College of the City University of New York and President of the Urban Communication Foundation. He is co-founder of Communication Landscapers, a consulting firm. Professor Gumpert’s publications include: Talking Tombstones and Tales of the Media Age; three edited volumes of Inter/Media: Interpersonal Communication in a Media Age published by Oxford University Press. He is series editor of the Urban Communication book series of Peter Lang Publishing Group. His primary research focuses on the nexus of communication technology and social relationships, particularly looking at urban and suburban development, the alteration of public space, and the changing nature of community.

Jung Hoon Han’s research interest focuses on the spatial and temporal changes in housing and urban system; in particular the dynamic changes occurring in response to constrains and opportunities in a socio-spatial context. While completing his PhD in the area of urban and regional planning at the University of Queenslands, Australia he worked for the Australian Housing and Urban Research Institute (AHURI), one of the leading national research institutes in Australia. His researches were awarded in international and Australian research organisation, including the best written journal paper of the year (2004) by the Journal of Housing Studies Review and the best conference paper (2008) by Australia and New Zealand Regional Science International (ANZRSI). Dr Han is currently an editorial board member of the journal of ‘City, Culture and Society’ from Elsevier.

André Lemos has PhD in Sociology, Université Paris V, Sorbonne. He is Associate Professor at Faculty of Communication at Federal University of Bahia (UFBA), Brazil. He is former President of Brazilian Association of Communications PhD Programs (COMPÓS), and former director of PhD Program in Communication and Culture (PPGCCC/Facom/UFBA). He is Senior Researcher at the National Council of Technological and Scientific Development (CNPq/ Brazil). André Lemos has published 13 books and many articles in peer-reviewed scientific journals worldwide, and is member of editorial boards in scientific journals in Brazil and worldwide (Canadian Journal of Communication, Revue Society, Wi. Journal of Mobile Media, Herbert Dordick Award of Dissertations, among others). Visiting scholar at University of Alberta and McGill University, Canada, 2007-2008, he is now working on mobile communication and locative media studies.

Greg Lloyd AcSS, BA, MSc, FRSA, FIED, FHEA, McRSA is Professor of Urban Planning and Head of the School of the Built Environment at the University of Ulster. Prior to this he held Professorial positions at the Universities of Dundee and Liverpool. His research includes land economy, public policy implementation and land use planning, institutional innovation in spatial planning practices, and the efficiency and effectiveness of new planning and regulatory arrangements. He is currently involved in the International Centre for Local and Regional Development in the island of Ireland. He was Ministerial Adviser to the Northern Ireland Assembly Government on its reform of land use planning. He is a member of the Scottish Government’s National Planning Framework Advisory Group, and a member of the Best Commission which is examining the future of housing in Northern Ireland.

David Lyon FRSC, is Director of the Surveillance Studies Centre, Queen’s Research Chair in Surveillance Studies and Professor of Sociology at Queen’s University, Kingston, Canada. Author of many books and articles on surveillance, including most recently Identifying Citizens: ID Cards as Surveillance (Polity, 2009) and Surveillance Studies: An Overview (Polity 2007). He is a member of the international
‘Surveillance Studies Network’ and a co-editor of Surveillance and Society. His particular research interest at present is identification systems as surveillance, in both the global North and the global South.

**Luisa Paraguai**, researcher and artist, studied Civil Engineering and Computing at University of São Paulo, Brazil. She has a master and doctoral degree at the Department of Multimedia, Institute of Arts, State University of Campinas, Brazil. Paraguai has been teaching at the Master Design Program, Anhembi Morumbi University. Her current researches deal with the potential of mobile technologies as a mediator for body and space perception and experimentation.

**Georgios Patris** is an experienced transport engineer, having the degree of Civil Engineering from the National Technical University of Athens (NTUA), a Master in Business Administration (MBA) and a post-graduate degree in Project Management. Patris has participated in numerous traffic studies in Greece including traffic modelling, parking management, traffic management, road safety and public transport and he has prepared economic evaluations for a number of transport infrastructure projects in various European countries. He is a PhD candidate in the NTUA and his research field focuses on decision support systems in transport and in the applications of intelligent transport systems.

**Deborah Peel** BA, MATP, DipHE, MAHE, MRTPI, FHEA is Senior Lecturer in Planning Policy in the School of the Built Environment at the University of Ulster. Prior to this she held positions at the Universities of Westminster, Dundee and Liverpool. She has wide public sector experience in land use planning practice. She is Editor of the Journal of Education in the Built Environment. Her research interests include land use planning policy and practice; marine spatial planning; reform of planning policy and practice, decision-making and participation strategies; planning and pedagogy. She has undertaken research into mobile telephony for the Scottish and Welsh devolved governments.

**Débora de Carvalho Pereira** is a PhD researcher at the Federal University of Minas Gerais, Brazil, at the Centre of Media Studies and Social Uses of Knowledge and Information in Digital Environments. She is developing a research project entitled “Environmental Social networks on the Internet and the management of nature”, to be completed in 2012. She earned her Master’s in Rural Extension from the University Federal of Viçosa (UFV) with the dissertation “Amazon Cooperation: the environmental networks on the Internet and the standardization of nature “. Her areas of interest include: Social Networks, Environmentalism, Cyberculture and Semiotics.

**Mario Procopiuck** is judiciary analyst/administrator of the Federal High Court in Paraná State. He received a graduate degree in Administration at the Federal University of Paraná (1998) and a Master’s degree in urban management at the Catholic University of Paraná (PUCPR) in Curitiba, Brazil (2007). Currently he is studying for a Doctorate degree in administration at PUCPR. He is evaluator of academic papers of the Brazilian Association of Post-graduation in Administration and for the Iberoamerican Academy of Management. His professional and academic experiences are in the field of administration and public organizations, with emphasis in the fields of bidding and contracts, human resources, public policies, socio-technical networks, the Internet, and urban governance.

**Altair Rosa** received a graduate degree in environmental engineering and a master’s degree in urban management by the Catholic University of Paraná (PUCPR), and completed a professional specialization
course in occupational health and safety at the Federal Technological University of Paraná (UTFPR), in Curitiba, Brazil. Currently, he works as technical assistant in environmental issues at ECOPARANÁ, an environmental non-governmental organization, and as associate professor at the bachelor course in environmental engineering at PUCPR.

Lucia Santaella is full professor at the Catholic University of São Paulo (PUCSP), PhD in Literary Theory (PUCSP) and professor in Communication Sciences (São Paulo University). Head of the Postgraduate Program in Technologies of Intelligence and Digital Design, Director of CIMID, Research Center in Digital Media, and also Director of the Center for Peirce Studies (PUCSP). Honorary President of the Latin American Federation of Semiotics. President of the Charles S. Peirce Society, USA, 2007. Guest professor at the Free University (Berlin, 1987), Valencia University (2004, Spain), Kassel University (Kassel, 2009). Jabuti Prizes (2002 and 2009) and Sergio Motta Prize (2005). She has published more than 30 books and scientific articles in peer reviewed journals.

Rob Shields' work spans architecture and cultural studies. He works on the identities of Places on the Margin (Outstanding Book of the Year 1991), on consumption and Lifestyle Shopping (ed. 1993), urban and architectural issues such as What is a City? Rethinking the Urban After Katrina (ed. 2008), and Building Tomorrow: Innovation in Construction (ed. 2005), theorists such as Lefebvre (1999), and the relevance of The Virtual (2003) and Cultures of Internet (ed. 1996) to Space and Culture, a refereed journal.

Zixue Tai is assistant professor in the School of Journalism and Telecommunications at the University of Kentucky. He holds a PhD in mass communication from the University of Minnesota as well as a MSS (Master of Software Systems) from the University of St. Thomas (Minnesota) and a MA from Shanghai International Studies University. His research interests focus on global communication with a special emphasis on the transformation of Chinese media in the new millennium as well as the individual/social impact of new media technologies. He is the author of The Internet in China: Cyberspace and Civil Society (Routledge, 2006). Additionally, his research has appeared in scientific journals worldwide.

Peter J. Taylor is Professor of Geography at Loughborough University (UK) where he is Director of the Globalization and World Cities (GaWC) Research Network. He researches city networks and their relation to territorial states as constructions of social space and social time. His recent books include World City Network (Routledge, 2004), Cities in Globalization (Routledge 2006, edited with B Derudder, P Saey and F Witlox) and Global Urban Analysis (Earthscan 2010, edited with P Ni, B Derudder, M Hoyler, F Witlox and J Huang). He is a Fellow of the British Academy and an Academician of the Academy of Social Sciences (UK).

Vassilios Vescoukis holds a Diploma in Electrical Engineering from National Technical University of Athens and a PhD in ‘Software Engineering’ from National Technical University of Athens. At present he is Assistant Professor at the School of Rural and Surveying Engineering of NTUA. He has participated in a number of EU and National projects on the strategic planning of information systems, applications and services, of e-commerce applications and frameworks, the use of new technology in education, as well as the design, management and certification of large information systems. He has published extensively in books and journals of his field of expertise. His research interests include knowledge
bases for software evolution, distributed and multi-tier software architectures, network-based support for education and training, as well as social implications of globalization and new technologies in the continuing process of transformation of society.

Bilge Yesil has a PhD in Culture and Communication at the New York University with a research grant from the National Science Foundation. She is the author of Video Surveillance: Power and Privacy in Everyday Life (LFB Scholarly Publishing, 2009), and has published articles in Cultural Studies, Media History, Journal of Popular Culture and in online journals. Before joining CUNY-College of Staten Island, she taught media and communication at New York University, New School University, and Sabanci University (Istanbul, Turkey).

Frank Witlox is professor of economic geography at the Geography Department of Ghent University and Associate Director of the Globalization and World Cities group and network (GaWC). He is also a visiting professor at the Institute of Transport and Maritime Management Antwerp (UA-ITMMA).

Tan Yigitcanlar has a multi-disciplinary background and over two decades of work experience in private consulting, government and academia. Currently holding a senior academic position at the School of Urban Development, Queensland University of Technology, Brisbane, Australia, the main foci of his research are advocating and promoting knowledge-based urban development and sustainable urban, infrastructure and transport development in city-regions. Yigitcanlar researchers in the field of ‘knowledge-based and sustainable urban development’, and he has been responsible for research, teaching, training and capacity building programmes on urban and regional planning, transport modelling, environmental science, policy analysis and information and communication technologies in Turkish, Japanese and Australian universities.
