Alexander Anisimov is completing his PhD in mathematics and computing at the Ural State Technical University, Russia. He received an MSc in economics and finance from the Ural State Technical University. His chapter is based on his dissertation, which is focused on different managerial and organizational aspects of data warehousing and development of decision support systems. His research is based, to a significant extent, on his work at the Uralmashplant JSC heavy-machinery company, where he worked as a manager and analyst responsible for planning and analytical work in different spheres.
Kallol Bagchi is an assistant professor of information and decision sciences at the University of Texas at El Paso (USA). He received his PhD in information systems from the Florida Atlantic University. Prior to pursuing his IS doctorate, he earned a PhD in computer science from India. He has worked in both industry and academia and has published in both areas. His current research interests include IT adoption and diffusion, global IT, and electronic commerce. To contact: kbagchi@utep.edu

Parthasarathi Banerjee, currently with the National Institute of Science, Technology & Development Studies (NISTADS) in New Delhi, India, has been with several other universities/research organizations abroad and is currently a visiting professor to a few well-known management institutes. His research interest is in the areas of strategy, technological change, IT based changes, and related aspects of IT/IS. Dr. Banerjee has written several papers, eight books, and several research reports, and has organized several conferences and seminars. His forthcoming book is titled Indian Software Strategy (2004, London: Palgrave-Macmillan).

Dipl. Vanessa Caisan is an MBA student at Purdue University/German International School of Management and Administration (USA). Prior to joining this MBA, Dipl. Caisan studied business administration and pursued a career in banking and finance for about seven years.

Sokkien Leane Chhai is currently a master honours student at the School of Computing and Information Technology at the University of Western Sydney, Australia. Chhai’s key research area is investigating dynamic decision making in a global organisation through the multi-agent systems approach. Leeane is currently working as an IT administrator. She holds a bachelor’s and master’s degree in computing from the same university. Chhai published a paper in the Global Information Technology Management Association World Conference in June 2004.

Thomas Hegel Gunther was born and raised in Sao Paulo, Brazil, and he earned his diploma as a mechanical engineer at the Technical University of Munich in Germany. After working for four years in the automotive industry, he received his MBA from Purdue University’s Krannert School of Management/GISMA Business School in West Lafayette, Indiana (USA), and Hannover, Germany. He currently lives in Braunschweig, Germany, with his wife.

Lisa Bari Herwick was born and raised in Northern California. She earned her bachelor’s degree at the University of California, Berkeley, in cognitive science. After graduating she worked at a high-tech public relations firm before moving
to Germany to teach English. In 2004 she received her MBA from Purdue University’s Krannert School of Management/Gisma Business School in West Lafayette, Indiana (USA), and Hannover, Germany. She lives in Bavaria with her husband.

Sherif Kamel is an associate professor of management information systems and the director of the Institute of Management Development at the School of Business, Economics and Communication of The American University in Cairo, Egypt. From 1992 to 2001 he was the director of the Regional IT Institute, and from 1987 to 1992 he worked at the Cabinet of Egypt Information and Decision Support Centre. He designs and delivers professional development programs in information technology management and applications for public and private sector organizations and has formulated many training alliances and partnerships between organizations in Africa, Asia, the Middle East, and Europe. In 1996 he was one of the co-founding members of the Internet Society of Egypt. He has published many articles in IT transfer to developing countries, electronic commerce, and human resources development and decision support applications. He is the editor-in-chief of the International Journal of Mobile Computing and Commerce and associate editor of the Annals of Cases on Information Technology Applications and Management in Organizations as well as serving on the editorial and review boards of a number of information systems and management journals. He is the director of communications of the Information Resources Management Association. Kamel is a graduate of the London School of Economics and Political Science and The American University in Cairo.

Tomaž Kern was born 1964 in Ljubljana, the capital of the Republic of Slovenia. He is married and is the father of two teenage children. He graduated from the University of Ljubljana, faculty of mechanical engineering, and continued studies at the University of Maribor, Faculty of Organizational Sciences. He has a master’s degree in information sciences and a doctorate in organizational sciences. He is a professor at the University of Maribor and researcher with the Institute for Organization and Management. His specific research field is business processes. His bibliography contains more than 140 items. He leads a team of experts within the laboratory for process and project management and was involved in more than 20 projects for Slovene and European companies and institutions.

Magdy K. Serour is a research fellow at the Centre for Object Technology Applications and Research (COTAR) at the University of Technology, Sydney (UTS) (Australia). He is the co-founder of SB the Software Group Pty Ltd. (1982) and has 25 years’ experience in information technology, being significantly involved in object technology adoption, requirement engineering, modeling, implementation, and IT consulting. Serour’s current interests are in organizational transition, e-transformation, agile methodologies, software process reengineering, and software process improvement and capability determination for object oriented/component based software development (OOSPI CE). Serour is also a member of the University of Western Sydney (UWS) Research Group. Magdy has a Bachelor’s of Accounting (Cairo University), G. Dip in computing (ICL, Lon), Dip in computing (Control Data, Sydney), Master’s of Computing (UWS, Sydney), and PhD (UTS, Sydney) in the area of migration to object oriented technology.

Andrew S. Targowski is a professor of computer information systems at Western Michigan University (USA) and chairman of the advisory council of the Information Resource Management Association. He published one of the first books on enterprise systems architecture, The Architecture and Planning of Enterprise-wide IM Systems, in 1990, along with one on information infrastructures, Global Information Infrastructure, in 1996, Enterprise Information Infrastructure in 1999, and Electronic Enterprise in 2003. He is a pioneer of the information superhighway concept (INFOSTRADA, Poland 1972), and he developed an award-winning digital city Web site (www.telecity.org) for Kalamazoo in 1997.

Jenny Teoh works as an analyst in the area of emerging technologies and innovation in a large Australian bank. Jenny has a BSc (business information technology) from the University of New South Wales and was a UNSW co-op scholar (1999 to 2002). She is a member of the Association of Professional Engineers, Scientists and Managers, Australia.

Bhuvan Unhelkar (PhD, FACS) is an internationally known expert in the field of software modeling and processes with four books and numerous papers to his
credit. He brings a unique blend of industrial consulting and robust research together. His interests are mobile technologies, Web services, and socio-cultural perspectives in ICT. For further details, please visit www.unhelkar.com.

**Khimji Vaghjiani** is a senior manager at a large Australian bank. Vaghjiani manages the emerging technologies and innovations function, and he is also an industry director of the Collaborative Research Centre for Smart Internet Technology (CRC-SIT). Vaghjiani managed a venture accelerator group post tech-wreck for two years and is the founder and president of the Indus Entrepreneurs, Sydney chapter, a Silicon Valley networking organisation. Kimji holds a BEng (Honours) and MBA, and a Master’s of Science and Technology Commercialisation, and is currently studying for his PhD in innovation.

**An Wang** is an MBA student at Gisma Business School (Germany)/Krannert Graduate School of Management, Purdue University (USA) with the scholarship of honour. From 1998 to 2002, she studied at Tianjin Polytechnic University and was on dean’s list for all four years. After receiving a bachelor’s degree of management in management information systems, she worked in Tsinghua Tongfang (THTF) Co., Ltd. (Beijing, China), one of the most famous high-tech companies in China, before she went abroad for further education.

**Ahmed Zyada** is an information technology officer at the Regional IT Institute, one of Egypt’s leading professional development organizations focusing on executive degree and non-degree programs. In 2002 he was awarded a master’s degree in business information technology from Middlesex University. Zyada has participated in many research projects in information technology and knowledge science. He is a graduate of Middlesex University (UK) and Cairo University (Egypt).
