About the Contributors

Kyungmo Ahn is an assistant professor of the Graduate School of Tourism at Kyung Hee University in Seoul. He is the president of the Korean Convention Sciences Society and director of International Tourism Strategy Research Institute. Ahn has written 10 books including Festival and Special Event Management and has published a number of journal articles. He is a member of the Convention Improvement Committee of the Ministry of Culture & Tourism in Korea. He has received grants and awards, including the Best Researcher from the Korea Convention Council and the Best Teach Award from Kyung Hee University.

Seung Baek is an assistant professor with the College of Business Administration, Hanyang University, Seoul, Korea. He earned an MBA and a PhD from the College of Business Administration, The George Washington University. Before joining Hanyang University, he was an assistant professor at Georgia State University and Saint Joseph's University. His main research interests include business intelligence and e-service in the telecommunication industry.

Pieter Ballon is the program manager at IBBT-SMIT (Centre for Studies on Media, Information and Telecommunication) at the Vrije Universiteit Brussel in Belgium. He is also a senior consultant at TNO, the Netherlands Organisation for Applied Scientific Research. He specializes in innovations in broadband services, new business models, and the mobile telecommunications industry, on which topics he has published extensively. Clients of his consultancy work include the European Commission, the World Bank, the Netherlands Ministry of Economic Affairs, and several telecommunications firms. Ballon is currently coordinating the cross issue on future mobile business models for all European Sixth Framework Program projects of the Wireless World Initiative.

Maria Bina is a PhD candidate at the Department of Management Science and Technology at the Athens University of Economics and Business and a member of the ELTRUN Wireless Research Center. She holds a degree in electrical engineering and computer science from the National Technical University of Athens and an MSc in decision sciences (e-commerce specialization) from the Athens University of Economics and Business. Her research interests lie in the area of wireless and mobile networks, focusing on business and service models.
Olivier Braet is a researcher at IBBT-SMIT (Centre for Studies on Media, Information and Telecommunication) at the Vrije Universiteit Brussel. He focuses on the business aspects of information and communication technologies (ICT) and is involved with a wide variety of research projects. Before this function he was a research assistant at the Faculty of Economics and Business Administration of Ghent University (Belgium). Before that he worked as an ICT advisor at the Ministry of Interior Affairs, as IT’er at Electrabel, and as scientific collaborator in the Flemish administration.

Walter Brenner is a professor of IS at the University of St. Gallen and managing director of the Institute of Information Management. After earning his graduate, his doctorate degree, and his venia legendi from the University of St. Gallen, he worked for several years for the Alusuisse-Lonza AG based in Basel, Switzerland, among other positions as the head of application development. He was professor for business administration and information management at the TU Bergakademie Freiberg, Germany (1993 to 1999) and subsequently professor for information management and business administration at the University of Essen, Germany. His research focus is on integrated information management, customer relationship management, and innovative technologies.

Xubin Cao is the director of the Research & Education Center at Southwestern University of Finance and Economics in China. His research interests include knowledge management, e-learning, and e-business.

Rolando A. Carrasco (BSc, Hons., CEng, FIEE: University of Santiago of Chile, PhD, University of Newcastle-upon-Tyne, for work on implementing digital filters using several processors, followed by research into underwater data communications). He was awarded the IEE Heaviside Premium for his work in multi-processor systems (1982). He was employed by Alfred Peters Limited, Sheffield (now Meditech) and carried out research and development in signal processing associated with cochlear stimulation and response (1982 to 1984). He has been with Staffordshire University (since 1984) and is now professor of mobile communications at the University of Newcastle-upon-Tyne. His principle research interests are digital signal processing algorithm for data communication systems; mobile and network communication systems; and speech recognition and processing. Carrasco has over a hundred scientific publications, five chapters in telecommunications reference texts, and a patent to his name. He has previously supervised 37 successful PhDs (31 as the primary supervisor and a further six as a secondary supervisor) and is currently supervising a further eight. He has previously supervised several EPSRC projects, BT research project, and teaching company schemes. He has twice been the local chairman on international conference organizing committees. He is a member of several organizing committees, a member of the EPSRC College, as well as a member of the EPSRC assessment panel. He is an external examiner for the MSc in Mobile Communications at Lancaster, Cranfield and Sussex University. He also has international collaboration with Chilean and Spanish Universities.

Ali Chehab received his bachelor degree in electrical engineering (EE) from the American University of Beirut (AUB) (1987), a master’s degree in EE from Syracuse University, and a PhD degree in electrical and computer engineering (ECE) from the University of North Carolina at Charlotte, (2002). He was a lecturer in the ECE Department at AUB (1989 to 1998). He rejoined the ECE Department at AUB as an assistant professor (2002). His research interests are VLSI design and test, and information security.
Hong Chen is a PhD candidate (2004-Present) at Rotterdam School of Management. He received an MSc degree (*cum laude*) in computer science from the University of Twente, the Netherlands (2003). He studied telecommunications engineering at Beijing University of Posts and Telecommunications (1995 to 1999). He worked in Huawei Technologies as an engineer (1999-2001). Hong Chen’s PhD research is about individual tariffs and service personalization. His research framework and interim research results have been presented at IEEE Service Computing Conference, IEEE International Conference on E-business, International Conference on Mobile Business, and the Conference of the International Telecommunication Society.

Heasun Chun is a PhD student of the Department of Communication at the University at Buffalo, SUNY. She has an MA and a BA from Ewha Womans University in Seoul in Korea. She worked at the Media & Future Institute as a senior researcher and Korea Information Strategy Development Institute (KISDI) as a research associate. She was involved in research projects on media policy and regulations. Her research has appeared in the following conferences: International Sunbelt Social Network Conference (Sunbelt XXVI), Telecommunications Policy Research Conference (TPRC), and Korean Academic Society for Public Relations (KASPR). Her current research interests include media policy, digital convergence, transnational media, and international information flow.

Ioanna D. Constantiou is an assistant professor in the Department of Informatics, Copenhagen Business School, Denmark. Her research is focused on the economics of IS and in particular on consumer behavior in IT markets. She holds a PhD from the Department of Management and Technology at Athens University of Economics and Business.

M. Ehlers is an MIS major student doing research in m-commerce, MIS Department, College of Business, Ohio University, USA.

Jochen Friedemann graduated in business administration from the University of Osnabrueck (2006). He has been working as a student assistant for the chair of e-business and information systems, University of Osnabrueck (since August 2004). His main focuses of study and research are E-Logistics, executive IS, and Web engineering. He has participated in several academic and commercial projects concerning these topics. He has been employed at an international auditing firm (since January 2007).

Raymond D. Frost is professor and chair of the Management Information Systems Department, Ohio University, USA. He is also the director of studies for the College of Business students in the Honors Tutorial College (HTC). Frost joined the College of Business (in 1999). His primary research areas are instructional pedagogy, information design, and database design. He has received multiple teaching awards at both the college and university level. Frost earned a doctorate in business administration and an MS in computer science at the University of Miami (Florida), and received his BA in philosophy at Swarthmore College. He lives in Athens with his wife, Tere, and two boys, Raymond and Luke.

Parissa Haghirian is an assistant professor in international management at the Faculty of Liberal Arts at Sophia University in Tokyo, Japan. She obtained her masters in Japanese Studies from Vienna University and was awarded a masters degree and PhD in international management from Vienna University of Economics and Business Administration. She is currently holding visiting professorships at
Kristina Heinonen holds a PhD in marketing and is a Hanken Foundation assistant professor in marketing (tenure track) at HANKEN Swedish School of Economics and Business Administration in Helsinki, Finland. Heinonen is currently involved in research projects concerning service value, e-services, and mobile services; dynamics of customer relationships; and digital marketing communication. Her work has been published and/or is forthcoming in the *International Journal of Mobile Communications*, *International Journal of Service Industry Management, Managing Service Quality, Journal of Financial Services Marketing, Management Decision*, and *Communications & Strategies*.

Dieter Hertweck works as a full professor in the Business Faculty, Heilbronn University with a focus on electronic business. He holds a PhD degree in IS. IS has emerged as an academic discipline that integrates many different disciplines such as computer science, management, and social sciences. Dieter himself is the product of such multiple disciplines and he has been awarded degrees in social science, business/management, and IS. He has industrial work experience in software project management as well as long-term research experience in different universities and research centers. His current research interests are in electronic business, business process management, relationship management, knowledge management systems, and software project management.

Holger Hoffmann has been a researcher and lecturer at the Chair for Information Systems at Technische Universität München (Munich University of Technology [TUM]), Germany, (since September 2004). Prior to that he studied computer science with business sciences as his minor subject at TUM, gaining work experience in the banking sector. He currently works on publicly funded as well as industry-driven research projects. His teaching and research areas include mobile computing and automotive service engineering.

Wayne Wei Huang is a professor in the MIS Department at the College of Business, Ohio University, USA. He has worked as faculty in universities in Australia, Singapore, China, and Hong Kong and received research awards from universities in Australia and the USA. Huang has had more than 18 years of full-time teaching experience in universities as well as a few years of IT industrial working experience (as a system analyst/programmer). His research combines both quantitative and qualitative research methodologies. He published more than 10 books and/or book chapters on IS internationally. He has published more than 100 refereed research papers in international journals and conference proceedings, including some leading international MIS/IS journals such as *IEEE Transactions on Systems, Man, and Cybernetics; Journal of Management Information Systems (JMIS); Communications of ACM (CACM); IEEE Transactions on Professional Communication; Information & Management (I&M); Decision Support Systems (DSS); Communications of AIS (CAIS); and European Journal of Information Systems (EJIS)*. He has presented his research papers in most leading and prestigious international conferences on IS, such as ICIS (the top MIS/IS annual conference in the world, USA), HICSS (USA), DSI (USA), AMCIS (USA), IFIP (Europe), PACIS (Asia), and ECIS (Europe). Huang is currently a senior editor for the *International Journal of Data Base: Advanced in Information Systems*, an ACM publication, USA.
About the Contributors

and on the editorial boards of Information & Management (I & M), International Journal of Global Information Management (JGIM), and Journal of Database Management (JDM), USA. Huang is the founding chair of AIS SIG-ISAP (IS in Asia Pacific), which is an academic association for IS/MIS researchers/scholars in the world who are interested in IS issues in Asia Pacific, being officially approved by the Association for Information Systems (AIS).

Wassim Itani was born in Beirut, Lebanon (1978). He holds a masters degree in computer and communications engineering from the American University of Beirut (AUB). Since his graduation from AUB (June 2003), he worked as a part-time research assistant in the Department of Electrical and Computer Engineering. He currently fills a systems engineer position at KATech, a storage solution provider in the Gulf region. Wassim’s current research interests include policy-based networking, mobile computing, and cryptographic protocols performance.

Ayman Kayssi was born in Lebanon (1967). He received his BE with distinction from the American University of Beirut, Lebanon and an MSE and PhD from the University of Michigan, Ann Arbor, USA, all in electrical engineering (1987, 1989, and 1993, respectively). He is currently professor and chairman of electrical and computer engineering at the American University of Beirut, where he has been working since 1993. His research and teaching interests are in the areas of information security and trust, and digital system testing.

Bong Jun Kim is doctoral student with the College of Business Administration, Hanyang University, Seoul, Korea. He received a BA and an MA from Hanyang University, Seoul, Korea. Before joining Hanyang University, he worked as a researcher at Korea Telecom (KT) and Korea Information Strategy Development Institute (KISDI). His main research interests include telecommunication policy and market strategy.

Jin Ki Kim is a PhD candidate in the Department of Management Science and Systems at the University at Buffalo, SUNY. He has an MS and a BS from Hanyang University in Seoul in Korea. He worked at the Korea Information Strategy Development Institute (KISDI) as a research fellow. He was involved in research projects on telecom policy and management. His research has appeared in the following conferences: Telecommunications Policy Research Conference (TPRC), Hawaii International Conference on System Sciences (HICSS), Americas Conference on Information Systems (AMCIS), and International Telecommunications Society (ITS) conference. His current research interests include telecom policy and management, digital convergence, diffusion of new telecom services, and emergency management system.

Lutz M. Kolbe heads the Competence Center Customer Management (CC CM) and teaches at the University of St. Gallen, Switzerland. His research interests are customer relationship management and security management as well as advanced technologies. After having worked as financial consultant Lutz studied information management at Brunswick Technical University, Germany, where he received a masters degree. He went on working on his dissertation at Freiberg Technical University, Germany, and the University of Rhode Island, USA. He received his PhD (1997). After that he worked at Deutsche Bank in Frankfurt and New York where he became managing director (2001).
Helmut Krcmar holds the chair for IS, Faculty of Informatics at Technische Universität München (Munich University of Technology), Germany. He worked as a researcher and consultant at the Institute for Information Systems at Saarbrücken University (1978 until 1984). After that he worked as post doctoral fellow at the IBM Los Angeles Scientific Center, as assistant professor of information systems at the Leonard Stern School of Business, NYU, and at Baruch College, CUNY. He was Chair for Information Systems, Hohenheim University in Stuttgart, (1987 to 2002). He served as Dean, Faculty of Business, Economics and Social Sciences (2000-2002). His teaching and research interests include information and knowledge management, IT service management and computer supported cooperative work.

Sean Lancaster is a lecturer with the Department of Decision Sciences and Management Information Systems at Miami University. He teaches undergraduate courses on IS and business strategy, Web design, Visual Basic, .NET, database design, and e-commerce. Lancaster earned his MBA from Miami University (2002).

Hans Lehmann is an associate professor at the School of Information Management at Victoria University of Wellington, New Zealand. He has more than 25 years of business experience with management and IT. His present research involves the application of wireless and mobile technology in the field of business-to-business (B2B) applications.

Jan Marco Leimeister is a senior researcher and assistant professor at the Chair for Information Systems at Technische Universität München (Munich University of Technology), Germany. He runs research groups on e-health and ubiquitous/mobile computing and manages several publicly funded research projects. Leimeister received a PhD from Hohenheim University, Stuttgart, Germany and worked on different occasions for companies such as DaimlerChrysler, IBM, Debis Systemhaus, and Siemens Business Services. His teaching and research areas include e-health, online communities, IT innovation management, e-commerce, ubiquitous and mobile computing, computer supported cooperative work, and information management.

Yong (Eric) Lu is teaching in the Department of Computer & Information at Bloomsburg University of Pennsylvania. He received his PhD from Ohio University. His current research interests focus on wireless technology; computer security and forensics; and technology diffusion and adoption.

Hongyan Ma is an instructional designer at Salisbury University, Maryland. She received her PhD in instructional technology from Ohio University. Her research interests include instructional design; faculty training and development; and young people’s experience using the Internet.

Maria Madlberger is an assistant professor at the Institute for Management Information Systems at the Vienna University of Economics and Business Administration. She received her PhD from the Department of Retailing and Marketing at this university. In her PhD thesis, published in the book “Electronic Retailing,” she elaborated Internet-based marketing and market research instruments for e-commerce. Madlberger’s research interests refer to e-commerce and interorganizational IS and their application. She is focusing on antecedents of B2B information sharing, direct and indirect electronic data interchange (EDI) benefits in retailing, and radio frequency identification (RFID) application. Further research activities are dealing with IT-supported collaboration in supply chain management and multi-channel retailing.
About the Contributors

Sean T. McGann is an assistant professor of IS and the associate director of the Integrated MBA Program at Ohio University. His research interests include IS pedagogy and curriculum, IS user improvisation, inter-organizational systems, and supply chain systems. He teaches systems development; systems analysis and design; and database courses. He also serves as faculty advisor to Ohio University’s chapter of the Association for Information Technology Professionals and Phi Gamma Nu Business Fraternity. He has received teaching awards such as MIS Professor of the Year and the Senior Student Recognition Award. McGann earned a PhD in IS from Case Western Reserve University, an MBA from Ohio University, and a BS in electronics engineering from Bowling Green State University. He spent 5 years in Andersen’s Business Consulting Practice, 2 years as CEO of Pogonet Internet Solutions, Inc., and continues to operate an independent systems consulting company.

Istvan Molnar was educated at the Corvinus University, in Budapest, Hungary, where he received his MSc and PhD. He has completed his postdoctoral studies in Darmstadt, Germany and took part in different research projects in Germany as guest scientist in the 1980s and 1990s. He received his CSs degree from the Hungarian Academy of Sciences (1996). Currently, he is an associate professor at the Bloomsburg University of Pennsylvania. His main fields of interest are simulation and education. Molnar is a senior member of SCS International, member of the editorial board of SCS-European Publishing House and International Journal of Mobile Learning and Organization.

Ravi Mukkamala received a PhD from the University of Iowa (1987) and an MBA from Old Dominion University (1993). Since 1987, he has been with the Department of Computer Science at Old Dominion University, Norfolk, Virginia (USA), where he is currently a professor. His research interests include distributed systems, data security, performance analysis, and PKI. His research has been sponsored by NRL, DARPA, NASA, and CISC. For more information, visit the URL: www.cs.odu.edu/~mukka.

Astrid M. Oddershede obtained an industrial engineer degree from the University of Santiago of Chile, Chile. Diploma (Hons) in operations research, Woodsworth College, University of Toronto, Canada. Master of industrial engineering, University of Toronto, Toronto, Canada. Currently, Oddershede is an associate lecturer in the Department of Industrial Engineering of the University of Santiago, Chile. Her research activities and interests are on decision analysis modeling and operations research. She is a PhD student at the University of Newcastle-upon-Tyne. Her PhD research project involves investigating implications of ICT and quality of service (QoS) for health. Oddershede has scientific publications and participated on local and international conference organizing committees. She is a member of the Operations Research Chilean Institute and a member of the Society of Medical Decision Making (SMDM) Philadelphia, USA.

Erkki Patokorpi is currently working as a researcher at the Institute for Advanced Management Systems Research (IAMSR), at the Åbo Akademi University, Finland. His main research interests include human-computer interaction; the epistemology of advanced ICT; and mobile learning. He has also worked as a science studies researcher, focusing on the sociology and rhetoric of science. He received his PhD degree from the University of Oulu (1996), majoring in the history of science and ideas. Presently, he is completing his second doctoral dissertation on digital interaction for the Department of Information Technologies, the Faculty of Technology at the Åbo Akademi University, Finland.
L F Pau has been a professor of mobile business, Rotterdam School of Management (part-time, since 2001), besides being an adjunct professor at Copenhagen Business School (since 2004). He has been CTO in Ericsson’s new Infrastructure Division (since 1995). Previously he was the Technical Director Europe for Digital Equipment (now part of HP) (1990-1995). He has been on tenure faculty at the Danish Technical University (Lyngby), E.N.S. Télécommunications (Paris), MIT (Cambridge, Mass), and University of Tokyo. He is a Fellow of IEEE (USA), BCS (UK), and JSPS (Japan). He is on government or research advisory boards in Japan, Singapore, China, and Taiwan. He is or has been on several standardization boards, including IEEE Standards Board, OMG, RapidIO, and Java Consortium. He is associate editor of six academic journals and has published over 350 articles, nine books, and edited 12 volumes.

Mishul Prasad is currently working at Medialab Ltd. He has completed his BCA with honors in IS and recently a masters in IS at the School of Information Management at Victoria University of Wellington, New Zealand. Prasad has been the recipient of a Technology Industry Funding (TIF) scholarship from TechNZ.

Minna Pura holds a degree in business economics from HANKEN, the Swedish School of Economics and Business Administration, Helsinki, Finland and is a doctoral candidate at the Centre for Relationship Marketing and Service Management (CERS), Department of Marketing and Corporate Geography at HANKEN. Her research focuses on perceived value of and customer loyalty to mobile and Internet services. Her work has been published and/or is forthcoming in Managing Service Quality, Journal of Information Technology, Theory and Applications, Yearbook on Services Management 2002—E-Services, and Mobile Commerce: Technology, Theory, and Applications.

Jing “Jim” Quan is an assistant professor in the Department of Information and Decision Sciences at Perdue School of Business, Salisbury University. He holds a PhD from the University of Florida and is an MCT/MCSE and CNI/CNE. His research interests include IT and organizations, knowledge management, project management, and IT human resource management. His work has appeared in such journals as the Journal of Management Information Systems, the Communications of the ACM, the Communications of the AIS, Information Resources Management Journal, Journal of Global Information Management, International Journal of Information Management, Journal of Information Technology and Information Management, and Journal of Computer Information Systems. He presented papers at the national and international conferences on IS and technology.

Asarnusch Rashid studied computer science at the University of Karlsruhe with a focus on human-computer interaction and robotics. He currently works as a senior researcher at the Research Centre for Information Technology (FZI) Karlsruhe. His main research interests are on case studies about the applicability of modern IT in enterprises. At the moment, Rashid works on two different research projects with the name CollaBaWue and PerCoMed. CollaBaWue aims to improve collaborative software development processes by using Web 2.0 methods and social software. PerCoMed analyzes chances and risk of future pervasive computing applications for the German health care system.

Ragnar Schierholz works as a researcher at the Institute of Information Management of the University of St. Gallen, Switzerland. He is a member of the Competence Center Customer Management (CC CM), in which large European companies do joint research on customer relationship management
About the Contributors

( CRM) and knowledge management. His research focus is on the application of mobile business tech-
nology in the field of CRM. Prior to his work in St. Gallen he has worked as an IT consultant for IBM
Germany, Lotus Professional Services Germany, and as an IT service engineer for ONEstone GmbH
Germany. He earned an MS in computer science from the Western Michigan University, Kalamazoo,
USA and as Diplom.

Eusebio Scornavacca is a senior lecturer of e-commerce at the School of Information Management,
Victoria University of Wellington, New Zealand. Scornavacca has published and presented more than 50
papers in conferences and academic journals. He is the founder of M-lit—the mobile business literature
online database ( www.m-lit.org ). He recently received an award in the ICT category at the prestigious
MacDiarmid Young Scientist of the Year Awards. His research interests include mobile business, elec-
tronic business, electronic surveys, and IS teaching methods.

J. P. Shim is professor and doctoral program coordinator of Management Information Systems and the
director of International Business Strategy Program at Mississippi State University (MSU). He received
his PhD from the University of Nebraska-Lincoln and completed the Harvard Business School’s Execu-
tive Education Program. He was the winner of MSU’s prestigious Ralph E. Powe Research Excellence
Award (2006). He is a past winner of the university’s John Grisham Faculty Excellence Award, as well
as an eight-time recipient of the outstanding faculty award. Shim has written over 150 research papers.
He served as the principal investigator for more than $1.1M in funded grants from various sources (NSF,
Microsoft, Mississippi IHL, Booz-Allen & Hamilton, and private funding agencies). Shim serves as a
senior editor, associate editor, and a member of editorial boards of numerous journals. He has contributed
to the field as a fellow, fellow chair, program chair, and keynote speaker. He has lectured frequently in
the USA, UK, France, Korea, Kuwait, Hong Kong, Taiwan, Japan, Jamaica, and others. Shim served
as a chair for several university research and awards committees at MSU. He currently serves on Chair
for University Research Initiation Program Review Committee and serves on University Task Force
Committee on Research, Graduate Education, and International.

Julie M. Shim is a project manager for SoldierDesign in Cambridge, MA. She received her BA in
international relations and business from Boston University. She has extensive working experience in the
ICT field from Boston University Information Technology Help Desk, FedEx, Booz-Allen & Hamilton,
Salomon Smith Barney, and Bite Communications. She was the undergraduate representative at the
U.S.-Japan Joint Seminar in E-Business and M-Commerce sponsored by NSF. Her research publications
appeared in Industrial Management & Data Systems and Decision Line.

Franck Tétard is currently working as a researcher at the Institute for Advanced Management Sys-
tems Research ( IAMSR ), and as an assistant professor in the Department of Information Technologies,
Faculty of Technology at the Åbo Akademi University, Finland. His main research interests include
usability, user-centered design, and mobile ICT. He received his PhD degree from the Åbo Akademi
University (2002), majoring in IS.

Frank Teuteberg is junior professor of e-business and IS at the University of Osnabrueck. He was
awarded his Diplom in business administration/IS by the University of Goettingen and his PhD from
the European University Viadrina Frankfurt ( Oder ) ( 1996 and 2001, respectively ). His research interests
include mobile business and innovation networks. He is currently involved in a research project supported by the German Federal Ministry of Education and Research to identify and assess the opportunities presented by mobile applications to support business processes in supply chain management. He has published two books and more than 55 scientific papers, which have appeared in numerous international conference proceedings, books and scientific journals, including the *Journal of Electronic Markets* and the *Journal of Computer Systems Science & Engineering*.

**Valli Kumari Vatsavayi** is a professor of computer science and systems engineering of Andhra University College of Engineering in Visakhapatnam, India. She holds a BE in electronics and communications engineering, an M. Tech in computer science and technology, and a PhD in computer science and systems engineering all from Andhra University. Her research interests include security, mobile commerce, Web technologies, mobile agents, and software testing.

**David C. Yen** is a Raymond E. Glos Professor in Business and a professor of MIS in the Department of Decision Sciences and Management Information Systems at Miami University. He received a PhD in MIS and a MS in computer science from the University of Nebraska. Yen is active in research, he has published three books and many articles which have appeared in *Communications of the ACM, Decision Support Systems, Information & Management, International Journal of Information Management, Information Sciences, Journal of Computer Information Systems, Interfaces, Telematics and Informatics, Computer Standards and Interfaces, Information Society, Omega, International Journal of Organizational Computing and Electronic Commerce, Communications of AIS, and Internet Research* among others.

**Jinglong Zhang** is professor and dean of the Management School of Huazhong University of Science & Technology, China. His main research areas are in IS, strategic issues of IS, IT/IS outsourcing, and e-commerce. He has published numerous research papers in domestic and international journals and conference proceedings.
