About the Contributors

Mehdi Khosrow-Pour (DBA) received his Doctorate in Business Administration from the Nova Southeastern University (FL, USA). Dr. Khosrow-Pour taught undergraduate and graduate information system courses at the Pennsylvania State University – Harrisburg for 20 years where he was the chair of the Information Systems Department for 14 years. He is currently president and publisher of IGI Global, an international academic publishing house with headquarters in Hershey, PA and an editorial office in New York City (www.igi-global.com). He also serves as executive director of the Information Resources Management Association (IRMA) (www.irma-international.org), and executive director of the World Forgotten Children’s Foundation (www.world-forgotten-children.org). He is the author/editor of over twenty books in information technology management. He is also the editor-in-chief of the Information Resources Management Journal, the Journal of Cases on Information Technology, the Journal of Electronic Commerce in Organizations, and the Journal of Information Technology Research, and has authored more than 50 articles published in various conference proceedings and journals.

* * *

Haya Ajjan is a PhD student in IT in the Belk College of Business at the University of North Carolina at Charlotte. She earned a bachelor degree in management information systems and industrial operation and an MBA from the University of North Carolina at Charlotte. She spent two years in the IT industry prior to joining the PhD program. Her research interests include business value of IT, information technology portfolio management, IT project management, and issues related to the use of emerging communication technologies such as instant messaging. She is a member of the Decision Sciences Institute.

Said S. Al-Gahtani is an associate professor of computer information systems in the Department of Administrative Sciences at King Khalid University, Abha, Saudi Arabia. He has a BSc in systems engineering from King Fahad University of Petroleum & Minerals, MSc in computer sciences from Atlanta University, Atlanta, Georgia, and a PhD in computer-based information systems from Loughborough University, Loughborough, UK. His research interests include the user acceptance of information technologies, the modeling of IT acceptance, end-user computing, and organizational cross-cultural research. He has published journal research articles in Information & Management, Information Technology & People, Journal of Global Information Technology Management, Information Technology for Development, Information Resources Management Journal, and the Behaviour & Information Technology.
Deborah J. Armstrong is an assistant professor of management information systems in The College of Business at Florida State University. She holds a PhD in information systems from the University of Kansas. Her research is focused on issues at the intersection of IS personnel and mental models involving the human aspects of technology, change, learning and cognition. Dr. Armstrong has published numerous articles in such journals as MIS Quarterly, Journal of Management Information Systems, and Communications of the ACM.

Ellis Blanton is Professor of Management Information Systems in the Department of Information Systems and Decision Sciences of the College of Business at the University of South Florida. His educational background includes: BS (Physics) from Georgia Institute of Technology, MBA (MIS) from The University of Georgia, and PhD (MIS) from The University of Georgia. Dr. Blanton’s major research interests include social and organizational impacts of information technology (IT) and issues concerning IT professionals, such as professional development and competency. He has over fifty articles and papers concerning these topics in publications including Management Information Systems Quarterly, Journal of Management Information Systems, and Communications of the ACM.

Mueun Bae is a professor of Business Administration at the Inha University in Korea. He received his PhD from Saint Louis University. Now, he is serving as a member of the editorial board in Korean Customer Satisfaction Academic Association.

John “Skip” Benamati is an associate professor of MIS in the Richard T. Farmer School of Business Administration at Miami University, Oxford, OH, USA. His major research interests are changing IT, IT management, and IT strategy. His work has appeared in the Journal of MIS, Communications of the ACM, Information and Management, Journal of Information Technology and Management, Information Strategy: The Executive’s Journal, and elsewhere.

Jan Guynes Clark is professor of information systems and technology management at The University of Texas at San Antonio. She received her PhD from the University of North Texas. Her research interests include the impact of information technologies on productivity and performance, information security, and IS strategies. Her publications have appeared in leading journals such as Communications of the AIS, Communications of the ACM, IEEE Transactions on Engineering Management, and Information & Management.

Tran Khanh Dang received his BEng degree from the faculty of Computer Science & Engineering in HCMC University of Technology-HCMUT (Vietnam) in 1998. He achieved the medal awarded for the best graduation student. From 1998-2000, he had been working as a lecturer and researcher in the same faculty. Then, he got a PhD scholarship of the Austrian Exchange Service (OeAD) from 2000-2003, and finished his PhD degree (Dr.techn.) in May 2003 at FAW Institute, Johannes Kepler University of Linz (Austria). Afterwards, he had been working as a lecturer and researcher at the School of Computing Science, Middlesex University in London (UK) since August 2003. In October 2005, he returned home and has continued working for the Faculty of Computer Science & Engineering in HCMUT. Dr. Dang’s research interests include database & information security, similarity search & flexible query answering systems, modern information systems & applications, and Grid data management. He has
published more than 35 scientific papers in international journals & conferences. Dr. Dang has also participated in and managed many research as well as commercial projects.

**Ronald Dattero** is Professor of Computer Information Systems at Missouri State University. He holds a Ph.D. from Purdue University and holds the Professional Competence Certificate in ITSM (Information Technology Service Management) according to ISO/IEC 20000. His research interests include knowledge management, IT professional and personnel issues, and ITSM. His work appears in such journals as Journal of Management Information Systems, Knowledge Management Research & Practice, Journal of Knowledge Management, Knowledge and Process Management, Information and Management, Information Systems, Information Resources Management Journal, Decision Support Systems, Communications of the AIS, and Communications of the ACM.

**Nathan T. Denny** received his Master’s of Science in computer science from Southern Illinois University in 1998 and his Bachelor’s of Science in computer science and mathematics from Southern Illinois University in 1997. He has published in diverse fields such as design for testability of very large scale integrated circuits, information re-use in case-based reasoning, Internet spam control, automation in agricultural irrigation, peer-to-peer networking and knowledge management in global software development. His current research interests include artificial intelligence, human-machine interfaces, knowledge management, and various aspects of the 24-Hour Knowledge Factory. Denny is pursuing a PhD on a part-time basis in Computer Engineering from the University of Arizona. Denny is a member of the research team at 21st Century Systems, Inc. and assists with research and development at the Omaha, NE office.

**Xiang Fang** is an associate professor at the Department of Decision Sciences and Management Information Systems, Farmer School of Business, Miami University, Oxford, Ohio. He received his PhD in MIS from the University of Kentucky. His research interests include Web site design, e-commerce, and MIS education.

**Stuart D. Galup** is Associate Professor of Information Technology at Florida Atlantic University. He holds a D.B.A. from Nova Southeastern University and is a Certified Computing Professional Certified ITIL® Expert, Certified in the Governance of Enterprise IT, and ConsultantManager Competence Certificate in ITSM according to ISO/IEC 20000. His professional work in the transformation of information technology organizations was featured in Computerworld and Datamation. His research appears in such academic journals as Communications of the AIS, Communications of the ACM, Information Resources Management Journal, Communications Research, ACM Computer Personnel, and Journal of Computer Information Systems. He is co-author of "Building the New Enterprise: People, Processes, and Technology" and "The IT Organization: Building a World-Class Infrastructure" both published by Prentice Hall.

**David A. Gantz** is Samuel M. Fegtly professor of law and director of the international trade and business law program at the University of Arizona, James E. Rogers College of Law in Tucson, Arizona, and serves as associate director of the National Law Center for Inter-American Free Trade. He is a graduate of Harvard College and Stanford Law School. Professor Gantz served with the U.S. Agency for International Development law reform project in Costa Rica and as a law clerk with the U.S. Court
of Appeals for the 9th Circuit. At the Office of the Legal Adviser, U.S. Department of State, from 1970-1977, he was the chief lawyer responsible for Inter-American affairs. From 1977-1993, he practiced international trade and corporate law in Washington, D.C. He joined the law faculty at Arizona in 1993. He has served as a bi-national panelist under the dispute resolution provisions of the CFTA and NAFTA and has written extensively on NAFTA, NAFTA and WTO dispute resolution, regional trade agreements, foreign bribery and other international trade, investment and environmental law issues.

Raj K. Goyal is Mallinckrodt professor of medicine, Harvard Medical School and staff physician at the VA Boston Healthcare System (VABHS). He earned his MBBS from Amritsar Medical College, Panjab University, and his MD from Maulana Azad Medical College, University of Delhi, in India. Following postdoctoral training at Yale University, he joined Baylor College of Medicine in 1971 and the University of Texas Southwestern Medical School in 1973. In 1978, he became chair of the Division of Gastroenterology at the University of Texas in San Antonio. In 1981, he joined Harvard Medical School and became chair of the Division of Gastroenterology at Beth Israel Hospital in Boston. He was later recruited to the VABHS and served as associate chief of staff for Research and Development at the VABHS from 1995 to 2005. Dr. Goyal is an eminent gastroenterologist and an investigator whose research has provided some of the important advances in our understanding of esophageal and gastric physiology and diseases including Barrett’s esophagus, enteric neurotransmission and the physiology and pathophysiology of esophageal and gastric motility. He provided the first evidence for the existence of muscarinic receptor subtypes. His work forms the basis of many current concepts regarding the regulation of esophageal sphincters, esophageal peristalsis, esophageal nociceptors, gastroparesis and Barrett’s esophagus. Dr Goyal has served on numerous editorial boards and was editor-in-chief of Gastroenterology from 1986 to 1991. He was the founder president of the American Motility Society and is the recipient of its Distinguished Achievement Award.

Xiaojia Guo is currently a Ph.D. candidate in the Department of Information Systems, School of Computing, National University of Singapore. Her primary research interests include negotiation support systems and their impact on the process and outcomes of inter-team negotiations and multiparty negotiations. Her papers have appeared in the proceedings of IRMA International Conference, Pacific Asia Conference on Information Systems, Hawaii International Conference on System Sciences, HCI International Conference, and Group Decision and Negotiation Conference. She has published in the Information Resources Management Journal, the Decision Support Systems journal, and the Information and Software Technology journal. She also has paper appearing in the Encyclopedia of Networked and Virtual Organizations.

Amar Gupta is the Tom Brown Endowed chair of management and technology; professor of entrepreneurship, management information systems, management of organizations, and computer science at the University of Arizona. Earlier, he was with the MIT Sloan School of Management (1979-2004); for half of this 25-year period, he served as the founding Co-Director of the Productivity from Information Technology (PROFIT) initiative. He has published over 100 papers, and serves as associate editor of ACM Transactions on Internet Technology. At the University of Arizona, Professor Gupta is the chief architect of new multi-degree graduate programs that involve concurrent study of management, entrepreneurship, and one specific technical or scientific domain. He has nurtured the development of
several key technologies that are in widespread use today, and is currently focusing on the area of the 24-Hour Knowledge Factory.

**Rajen Gupta** is a professor of organizational behavior. He holds a first degree in electrical engineering from IIT Kanpur and he is a fellow of IIM Ahmedabad. He has worked in the State Bank of India and Jyoti Ltd before moving to IIM Lucknow and then to Management Development Institute as a faculty member. He is a member of the international editorial board of the International Journal of Cross-Cultural Management (Sage) and of the Journal of Research Practice. He is the founding member of the National HRD Network and professional member of ISABS. His main passion is to create and apply ideas which are suited to Indian culture and context. He would like to see Indian organizations achieve world class effectiveness, and see MNCs to adapt well to the Indian context.

**Keith A. Joiner**, MD, MPH, is the vice provost for medical affairs and Dean of the College of Medicine at the University of Arizona. He has been in that position since March 1, 2004. Prior to that, he was the Waldemar von Zedtwitz Professor of Medicine, Cell Biology and Epidemiology at the Yale University School of Medicine and Chief of the Section of Infectious Diseases in the Department of Medicine. Dr. Joiner received his undergraduate degree from the University of Chicago and his MD degree from the University of Colorado. His residency training was at McGill University and his Infectious Diseases fellowship training was at Tufts-New England Medical Center. He was senior investigator and Chief of the Unit of Microbial Pathogenesis at the National Institutes of Health in Bethesda, MD for 9 years before moving to Yale University in 1989. His laboratory at Yale investigated the mechanism by which two obligate intracellular pathogens – *Plasmodium falciparum* and *Toxoplasma gondii* - obtain required nutrients from the host cells in which they reside. He developed and directed the Investigative Medicine program at Yale. This is a school-wide PhD program exclusively for physicians with 2 years of residency training. At the University of Arizona, Dr. Joiner is leading a dramatic expansion of the College of Medicine, the only allopathic medical school in the state of Arizona. In Tucson, faculty and program growth are underway at multiple new facilities and sites, including University Physicians Hospital-Kino, University Medical Center North and the newly completed Medical Research Building. In Phoenix, by far the largest city in the United States without a four year allopathic program, the University of Arizona College of Medicine Phoenix Program, in collaboration with Arizona State University, began in the summer of 2007. The Phoenix program of the College of Medicine also has important interactions with other research institutes and health care entities, including the Translational Genomics Research Institute, Banner Good Samaritan, Catholic Health Case West, the Maricopa Integrated Health System, Scottsdale Health Care, Sun Health Research Institute, and the Carl T. Hayden Veterans Administration Health Care System.

**About the Contributors**

**Emad M. Kamhawi** (e.kamhawi@gmail.com) is an associate professor in the Efficient Productivity Institute, Department of Business Administration at Zagazig University. He received his PhD in management information systems from The University of North London. His previous research articles have been published in international journals such as: Information Resources Management Journal; Business Process Management Journal; International Journal of Enterprise Information Systems; Journal of Enterprise Information Management; and International Journal of Business Information Systems, in subjects concerning: Business process reengineering; ERP systems, the adoption of e-commerce systems in the Arab countries, IS requisite skills, and risk factors for IT projects in the Gulf region. His current research interests are in Knowledge Management and IT Infrastructure Management.

**Gyeung-Min Kim** is currently an associate professor at Ewha Womans University in Seoul, Korea. She received her MS and PhD degrees from Texas Tech University. She earned her BS degree from Ewha Womans University in Korea. Her research interests include process innovation design, and business process simulation. Her publications have appeared in the Journal of Organizational Computing and Electronic Commerce, Journal of Systems and Software, Journal of Computer Information Systems, Journal of End User Computing, and Cycle Time Research among others.

**Saem-Yi Kim** is a student at graduate school of business in Ewha Womans University. She received her undergraduate degree from Ewha Womans University.

**William R. King** holds the title of university professor in the Katz Graduate School of Business of the University of Pittsburgh. He is a leading researcher in the areas of MIS, strategic planning and management science. He has served as the editor-in-chief of a key IS journal and as president of two professional societies. In 2004, he received the Leo Exceptional Lifetime Achievement Award from the Association for Information Systems.

**Daijin Ko** is professor of management science and statistics at The University of Texas at San Antonio. He received his PhD from University of Washington. His research interests include machine learning, bioinformatics and biostatistics. His work has been published in refereed journals such as Journal of American Statistical Association, Annals of Statistics, Journals of Multivariate Analysis, Biometrics, Statistical Science, and Journal of Computational Biology and Chemistry.

**Myung S. Ko** is assistant professor of information systems and technology management at The University of Texas at San Antonio. She received her PhD from Virginia Commonwealth University. Her research interests include impact of IT on organizations, data mining, computer security, and economics of security breach. Her work has been published in refereed journals such as Information & Management, Information Systems Journal, Information and Software Technology, and Journal of Information Technology Management.

**Jeremy A. Kreyling** graduated from Arizona State University with a BS in geographical information systems, in 2000. He worked with Sunnyside Unified School District from 2001 to 2007 as a program evaluator. He received an MBA from the Eller College of Management at the University of Arizona in 2007, and currently works as a SAP consultant at Bytesys Technologies, Inc.
**Ram L. Kumar** is Professor in Belk College of Business Administration, UNC-Charlotte. He received his PhD in information systems from the University of Maryland. He worked for major multinational corporations such as FUJITSU before entering academics. His research has been funded by organizations such as the U.S. Department of Commerce, and organizations in the financial services and energy industries. His current research interests include techniques evaluating and managing portfolios of IT investments, Electronic Commerce, and Knowledge Management Systems. His research has been published in Communications of the ACM, Computers and Operations Research, Decision Sciences, Information Resource Management Journal, International Journal of Electronic Commerce, International Journal of Production Research, Journal of MIS, and others.

**Hollis T. Landrum** retired as an Information Systems Management Specialist with the US Army Corps of Engineers at the Engineer Research and Development Center. He received a Ph.D. in Information Science from the University of North Texas in 1999. He has published numerous articles in information and library science. In addition, he has published numerous articles in national music journals and has had several plays produced. He has won a number of awards for his work with the Army Corps of Engineers, including the Commander’s Award for Civilian Service, one of the highest civilian awards in the Army.

**Kyootai Lee** is a Ph.D candidate in information systems at University of Missouri- St.Louis. He served as a reviewer 2006, 2007, 2008, 2009 SIGMIS, 2007, 2008 AMCIS, and 2009 ECIS. His papers are currently published in Journal of Information Technology Management, and Information Resource Management Journal, several conference proceedings (e.g. SIGMIS and AMCIS) and under review in a couple of international journals such as Decision Science, The Data Base, Journal of Organizational Computing and Electronic Commerce, etc. His current research interests include software firms’ strategic alliance, users’ innovativeness, and management of software firms.

**Sooun Lee** is a professor at the Department of Decision Sciences and Management Information Systems, Farmer School of Business, Miami University, Oxford, Ohio. He received an MBA from the University of Colorado, Boulder and a PhD in MIS from the University of Nebraska, Lincoln. His research interests are IS education, corporate database, Web site design, software piracy, and East Asia business.

**John Lim** is Associate Professor in the School of Computing at the National University of Singapore. He graduated with First Class Honors in Electrical Engineering and a M.Sc. in MIS from the National University of Singapore, and a Ph.D. from the University of British Columbia. His current research interests include e-commerce, collaborative technology, negotiation support, IT and education, and IS implementation. He has published in MIS and related journals including Journal of Management Information Systems, Journal of Global Information Management, Information Resources Management Journal, Decision Support Systems, International Journal of Human Computer Studies, Organizational Behavior and Human Decision Processes, Behaviour and Information Technology, International Journal of Web-based Learning and Teaching Technologies, Journal of Database Management, and Small Group Research.
**About the Contributors**

**Robert C. Mahaney** is a visiting associate professor of information systems in the College of Business and Technology at Eastern Kentucky University. He earned his PhD in information systems at the University of Kentucky. He has an MA degree in mathematics from the University of Kentucky. His has research interests in IT project management and outsourcing. His work has appeared in Journal of Systems and Software, International Journal of Electronic Commerce, Information Systems Management, Journal of Database Management, Project Management Journal and Journal of International Technology and Information Management.

**Partha S. Mohapatra** (partha.mohapat@morgan.edu) is Assistant Professor at Morgan State University in Department of Information Science and Systems. He completed his Ph.D. from University of Kentucky in 2005. Prior to joining his Ph.D. program, he worked for PriceWaterhouse Coopers and General Electric in their India offices. He has research interests in Offshoring, and Accounting Information Systems. His papers have been presented in both Information Systems as well as Accounting conferences.

**Ravi Sheshu Nadella** earned his BE in computer science and engineering from Osmania University, India in 2005. He is currently pursuing his master’s in computer science at the University of Arizona. He joined the Nexus of Entrepreneurship and Technology and the 24-Hour Knowledge Factory project in 2006. His ongoing research interests include collaborative technologies, peer-to-peer systems and software development methods.

**Jim Nelson** is an assistant professor of information systems at Southern Illinois University, Carbondale. He received his BS in computer science from California Polytechnic State University, San Luis Obispo, and his MS and PhD in information systems from the University of Colorado, Boulder. His research interests include developing theoretically grounded models of information systems quality, investigating how people make IT paradigm shifts, and determining the business value of information technology. Dr. Nelson generally teaches the more technical courses in information systems including object oriented technology, systems analysis and design, database theory and practice, and business data communications.

**Kay M. Nelson** is a professor of information systems at Southern Illinois University, Carbondale. She holds a PhD from the University of Texas at Austin in management science and information systems. She works extensively in the areas of organizational and information technology flexibility, strategy, business value, and IT measurement. Dr. Nelson has published numerous articles in MIS Quarterly,
Sandra Newton is Assistant Professor in the School of Business and Economics at Sonoma State University. Her educational background includes: BS (business and management) from University of Maryland University College, MA (business administration and HRD) from Webster University, and PhD (MIS) from the University of South Florida in 2006. Her research interests include organizational impacts and behaviors of information technology (IT) professionals and information technology, and e-commerce. She has published research articles in Information Resource Management Journal, Journal of Electronic Commerce Research, Journal of Computer Information Systems, and Journal of Internet Commerce.

Yuan Niu is a PhD student in IT in the Belk College of Business at the University of North Carolina at Charlotte. She obtained her BS from Tianjin University of Finance and Economics in China. She is a member of AIS and DSI. Her research as appeared in the proceedings of International Conference on Information Systems. Her research interests include organizational impact of information technology, knowledge management, and electronic commerce.

Linda Nowak is Professor of Marketing in the School of Business and Economics at Sonoma State University. Her educational background includes: BS from California Polytechnic State University, MBA from Mercer University, and PhD (Marketing) from Saint Louis University. Dr. Nowak’s research has appeared in Journal of Services Marketing, Journal of Internet Commerce, Journal of Industrial Marketing, and Journal of Product and Brand Management.

Irene Pollach obtained a doctorate and a habilitation from the Vienna University of Economics and Business Administration in Austria. She is now an assistant professor of corporate communication at the University of Aarhus, Aarhus School of Business. Her current work focuses on Web-mediated corporate stakeholder relations, online consumer communities, and ethical aspects of the Internet.

About the Contributors

**Jing Quan** is an Assistant Professor in the Department of Information and Decision Sciences in Perdue School of Business at Salisbury University. He holds a Ph.D. from the University of Florida. His research interests include organizational impact of information technology (IT), IS security, and IT professional and personnel issues. His work has appeared in such journals as *Journal of Management Information Systems, Communications of ACM, Communications of AIS, Information Resources Management Journal, International Journal of Information Management, Journal of Global Information Management*, and *Journal of Computer Information Systems*. He presented papers at national and international conferences on information systems and technology.

**Vijay V. Raghavan** is an associate professor of Business Informatics in the College of Informatics at the Northern Kentucky University. He has a PhD in business administration from the Kent State University. His research interests are in areas of IT project management and IS development outsourcing. He has presented his research in many national and international conferences and his research has appeared in *Journal of Systems Management, Journal of Information Technology Cases and Applications Research, Journal of Information Technology Management*, and *Managing Systems Development*.

**T.M. Rajkumar** is an associate professor of MIS in the Richard T. Farmer School of Business Administration at Miami University. His research interests include outsourcing, troubled project management and impression formation.

**Sanjay Saini** is a professor of radiology at Harvard Medical School and serves as the vice chair for finance in the Department of Radiology at the Massachusetts General Hospital. He is a specialist in gastrointestinal radiology. He has degrees from Duke (AB), Tufts (MD) and MIT (MSc) and did his post graduate training in Radiology at the Massachusetts General Hospital in Boston.

**Toru Sakaguchi** is an associate professor of business informatics in the College of Informatics at Northern Kentucky University. He completed his PhD in management information systems at the University of Memphis. His research interests are in electronic commerce and global information technology management.

**Jamie Samdal** is an master’s student in electrical & computer engineering, computer science, and business administration at the University of Arizona. She has undergraduate degrees in computer engineering and computer science and has interned with both IBM and Google. Her research interests include global software development processes, software engineering practices, and collaborative software tools.

**Devin Sreecharana** is a dual degree candidate at the University of Arizona and is expected to graduate with honors in May of 2008. He will begin law school in the fall of 2008 and intends to pursue a JD in International Law and MA in Foreign Policy.

**Shirish C. Srivastava** (srivastava@hec.fr) is an Assistant Professor at HEC School of Management, Paris. He obtained his PhD from the School of Business, National University of Singapore. His research has been published in several international refereed journals such as *MISQ Executive, Journal of Management Information Systems, Journal of Information Technology, Communications of the AIS,*
About the Contributors

Journal of Global Information Management, Information Resources Management Journal, and Electronic Government: An International Journal, among others. He has also authored several book chapters and has presented his research in key international refereed conferences like International Conference on Information Systems (ICIS), Academy of Management (AOM), Academy of International Business (AIB), Institute for Operations Research and the Management Sciences (INFORMS), and Americas Conference on Information Systems (AMCIS). He has been thrice nominated for the prestigious Carolyn Dexter Award at the Academy of Management (AOM) Meetings 2005, 2007 and 2008 and was a finalist for the award at AOM 2007. Recently, he has been nominated for the academy wide William H. Newman award at the AOM 2009, Chicago and is the winner of the Gerardine DeSanctis Dissertation Award for the best doctoral dissertation paper in organizational communication and information systems. He has also been a winner at the Society for Information Management (SIM) Paper Award Competition, 2007. His research interests include IT-enabled offshore sourcing, e-government, IS strategy and e-business strategy.

David Strutton is Professor of Marketing and Director, the New Product Development (NPD) Scholars Program at the University of North Texas. Between 2001 and 2006, Strutton served as Chair of the Department of Marketing & Logistics at UNT, at which time he resigned to assume the role as Director of the aforementioned NPD Program. Prior to joining UNT, Strutton was served for ten years at University of Louisiana-Lafayette (ULL) as Acadia Distinguished Professor of Marketing and the J.W. Steen Regents Professor of Business Administration. At the time at which Strutton left ULL, he was also serving as Associate Dean, College of Business, and Director, MBA Program.

Manish Swaminathan earned his bachelor’s degree in computer science from National Institute of Technology, Trichy, India in 2005. He then worked for a year as a development/support specialist at the India Software Labs, IBM Bangalore, India. He joined the University of Arizona in Fall 2006 and is currently pursuing his master’s in computer science. He joined the Nexus of Entrepreneurship and Technology and the 24-Hour Knowledge Factory project in January 2007. His areas of interests include systems & networking and high performance computing.

Thompson S.H. Teo (bizteosh@nus.edu.sg) is Information Systems Area Coordinator and Associate Professor in the Department of Decision Sciences at the NUS Business School, National University of Singapore. His research interests include strategic use of IT, e-commerce, adoption and diffusion of IT, and strategic IT management and planning. He has published more than 80 papers in international refereed journals such as Communications of the ACM, Database, Decision Sciences, Decision Support Systems, Information and Management, International Journal of Electronic Commerce, Journal of Management Information Systems, and MIS Quarterly Executive. He has also edited four books on IT and e-commerce, and is on the editorial board of several international refereed journals.

Padmal Vitharana is an associate professor of information systems in the Whitman School of Management at Syracuse University. He received his Bachelor of Science, Master of Business Administration and Doctor of Philosophy degrees from the University of Wisconsin system. His research interests lie in software development in general and component and service-based development in particular. His research has been published in journals such as the Communications of the ACM, IEEE Transactions on Software Engineering, IEEE Transactions on Systems, Man, and Cybernetics, Marketing Science,
About the Contributors

Fei Wang is currently working as an application consultant. He has received Bachelor of Computing (Honors) in July 2006 from National University of Singapore.

Vanita Yadav is a PhD candidate in the area of information systems at Management Development Institute, India. She is a post graduate in Management (MBA) and Information Technology (MSc). Her case study on global sourcing has been published at Harvard Business School and Asia Case Research Center. She has also published book chapters and has presented research papers in various international conferences. She has worked in the Indian IT industry with the Knowledge Solutions Business Group of NIIT Ltd. Where she was involved in creation of web-based training and computer-based training programs on the latest information technology areas. She has worked as an instructional designer, computer science faculty, school principal and social worker. Her research interests are in management of globally distributed software projects, agile software development and eservices.

Xiaoni Zhang is an Associate Professor of Business Informatics. Her teaching specialties are in research methods in healthcare, systems development, ecommerce and statistics. Her research interests include technology adoption in healthcare, digital government, business intelligence, Web usability, e-commerce systems, enterprise systems and mobile technology. Her publications appear in Communications of the ACM, International Conference on Information Systems, IEEE Transactions on Engineering Management, Information & Management, and other journals. In 2004, she won Outstanding Scholarship Award in the College of Business at NKU.
