About the Contributors

**Yogesh K. Dwivedi** is a lecturer in the School of Business and Economics at Swansea University in the UK. He was awarded his MSc and PhD by Brunel University in the UK, receiving a *Highly Commended* award for his doctoral work by the European Foundation for Management and Development. His research focuses on the adoption and diffusion of ICT in organisations and in addition to authoring a book and numerous conference papers, has co-authored papers accepted for publication by journals such as *Communications of the ACM*, the *Information Systems Journal*, the *European Journal of Information Systems*, and the *Journal of the Operational Research Society*. He is senior editor of *DATABASE for Advances in Information Systems*, assistant editor of *Transforming Government: People, Process and Policy* and a member of the editorial board/review board of a number of other journals, and is a member of the Association of Information Systems, IFIP WG8.6 and the Global Institute of Flexible Systems Management, New Delhi. He can be reached at ykdwivedi@gmail.com.

**Banita Lal** is a lecturer in the Nottingham Business School, Nottingham Trent University, UK. She obtained her PhD and MSc in information systems from the School of Information Systems, Computing and Mathematics, Brunel University. Her research interests involve examining the individual and organizational adoption and usage of ICTs and technology-enabled alternative forms of working. She has published several research papers in internationally refereed journals such as *Industrial Management and Data Systems*, *Information Systems Frontiers*, *Electronic Government*, *International Journal of Mobile Communications*, and *Transforming Government: People, Process and Policy*, and has presented several papers at several international conferences. She can be reached at banita.la@ntu.ac.uk.

**Michael D. Williams** is a professor in the School of Business and Economics at Swansea University in the UK. He holds a BSc from the CNAA, an MEd from the University of Cambridge, and a PhD from the University of Sheffield. He is a member of the British Computer Society and is registered as a Chartered Engineer. Prior to entering academia Professor Williams spent twelve years developing and implementing ICT systems in both public and private sectors in a variety of domains including finance, telecommunications, manufacturing, and local government, and since entering academia, has acted as consultant for both public and private organizations. He is the author of numerous fully refereed and invited papers within the ICT domain, has editorial board membership of a number of academic journals, and has obtained external research funding from sources including the European Union, the Nuffield Foundation, and the Welsh Assembly Government. He can be reached at m.d.williams@swansea.ac.uk.

Scott L. Schneberger is a professor and the dean of academics at Principia College, Elsah, IL., most recently at the Walker College of Business at Appalachian State University where he was an associate professor and co-executive director of the Center for Applied Research in Emerging Technologies. Schneberger has also taught business information systems courses at the Richard Ivey School of Business at the University of Western Ontario, and the Robinson School of Business at Georgia State University. He has taught undergraduate and graduate students, MBAs, and executive MBAs, PhDs, and delivered executive education information systems courses to corporations. Schneberger has published in numerous academic research journals, presented at leading conferences, published business teaching cases, and authored information systems books. Before entering academia, Schneberger served twenty years in the U.S. Navy as an intelligence officer, retiring at the rank of Commander. He is a combat veteran, and served in ships, submarines, and aircraft. His last naval position was Head of Plans and Policy, Information Systems, for the Director of Naval Intelligence in The Pentagon. He can be reached at Scott.Schneberger@prin.edu

Michael R. Wade is an associate professor of Management Information Systems at the Schulich School of Business, York University, Toronto, where he also holds the position of associate director of the International MBA Program. He received a PhD from the Ivey Business School at the University of Western Ontario. Professor Wade has worked extensively with public and private sector organizations to further an understanding of the strategic use of information systems for sustainable competitive advantage. He has lived and worked in seven countries across four continents and consulted for top international organizations including Cisco Systems, and IBM. His research has appeared in journals such as MIS Quarterly, Strategic Management Journal, and the Communications of the ACM. Professor Wade is co-author of the textbook Information Systems Today: Canadian Edition, and has co-authored two e-commerce casebooks. He can be reached at MWade@schulich.yorku.ca

* * *

Hossam Ali-Hassan is a PhD candidate at the Schulich School of Business, York University, in Toronto, Canada. He is expected to get his degree in the summer of 2009. Before starting his PhD he worked for many years as a practitioner and consultant in the areas of computer networking and IS project management and also as a part-time instructor. His research interest is in social computing (popularly known as Web 2.0) and mobile computing in an organizational context. He is currently studying the newly emerging class of tools known as social computing, and its use by organizations. He is interested in identifying the impact of social computing on social capital among teams and the subsequent benefit to individuals, teams and organizations in the form of collaboration, knowledge sharing and knowledge creation in organizations.

Anne Beaudry is an associate professor at the John Molson School of Business, Concordia University. She earned her PhD at HEC-Montreal. Her research interests include IT-related behaviors, user acceptance, and impacts of IT use. Her work has been presented at international conferences and published in Communications of the AIS, International Journal of Information and Operation Management Education, International Journal of Knowledge Management, and MIS Quarterly.
**Joseph Bradley** is an assistant professor of accounting at the University of Idaho. He received his BA from Claremont McKenna College and his EMBA and PhD from Claremont Graduate University. His teaching interests include accounting information systems, cost accounting, managerial accounting, strategy and management. Dr. Bradley's research focuses on ERP implementation issues. His research has been published in the *International Journal of Enterprise Information Systems, Issues in Information Systems* and the *International Journal of Accounting Information Systems*. His book chapters have appeared in the *Encyclopedia of Information Science and Technology*, the *Handbook of Research for Enterprise Systems and Global Implications in Modern Enterprise Information Systems*. He has presented his research at the Information Resource Management Association International Conference, Americas’ Conference on Information Systems and the International Research Symposium on Accounting Information Systems. Prior to his academic career Dr. Bradley spent 30 years in industry in various executive positions in accounting and general management.

**Tom Butler** is a senior lecturer in business information systems, University College Cork, Ireland. Before joining academia, Tom had an extensive career as an IT practitioner in the telecommunications industry. From 2003-2006 he focused conducted two major action research and applied R&D projects on knowledge management systems (KMS). Building on this body of research, he has since 2005 been working with a small-to-medium software enterprise on the design and implementation of Environmental Compliance Knowledge Management Systems. Currently he is applying institutional theory to help understand the implications for the IS field of environmental compliance and Green IT. Tom has published his research the *Information Systems Journal*, the *Journal of Strategic Information Systems*, the *Journal of Organizational and End User Computing*, the *Journal of Information Technology* and in the *Proceedings of ICIS, ECIS, IFIP 8.2 and 8.6*.

**Peter Caputi** is an associate professor in the School of Psychology at the University of Wollongong, Australia. He is internationally known for his work in personal construct theory and method. He has published extensively in repertory grid methodology and theory, and measurement issues in personal construct theory. Dr. Caputi also has a research interest in psychological determinants of IS usage. He has published in *Behaviour & Information Technology, Computers in Human Behaviour, British Journal of Educational Technology* as well as other journals and refereed conference proceedings.

**Daniel Carbone** is a lecture/research coordinator for the Rural Health Academic Network (RHAN), University of Melbourne; where he facilitates research capacity in health care settings across north-western state of Victoria, Australia. He is also a health information systems consultant at Central Highlands General Practice Network where he facilitates general practices to adopt relevant information system to improve patient care outcomes. Carbone is also completing a PhD in information systems at Victoria University which focuses on systematic approaches to chronic conditions care models and has been training nurses and doctors in computer and information literacy for over ten years.

**Sven Carlsson** is professor of informatics at School of Economics and Management, Lund University. Research interests include: IS-supported management processes, knowledge management, enterprise systems, e-business processes in high-velocity environments, and the use of critical realism in IS-research. He has held visiting positions at universities in Europe, Australia, USA, and Singapore. He is a regional editor for *Knowledge Management Research and Practice*. He has published more than
100 peer-reviewed journal articles, book chapters, and conference papers and his work has appeared in journals like *JMIS, Decision Sciences, Information & Management, Knowledge Management Research & Practice, and Information Systems and e-Business Management.*

**Rodrigo Castelo** is a product manager at OutSystems and has been with the company since 2004. Castelo’s main focus is managing the strategy, market, customer and user requirements into the OutSystems Agile Platform product. Castelo holds a five-year degree in information systems and computer engineering, with a major in programming and information systems, from Instituto Superior Técnico (IST), Lisbon, Portugal. He also joined an MsC program in the same university, where he conducted practical and theoretical research in the fields of real options, value-based pricing, product segmentation, organizational engineering, and knowledge management, among others.

**Catherine E. Connelly,** PhD, is an assistant professor of organizational behavior and human resources management in the DeGroote School of Business at McMaster University, Hamilton, Canada. Her main areas of research focus on workers with “non-standard” employment contracts, knowledge sharing, and knowledge hiding in organizations. Her work has appeared in several edited volumes including the *Handbook of Organizational Behavior and Research in Personnel and Human Resource Management*. Her articles have appeared in several journals including the *Journal of Management Information Systems*, the *Journal of Applied Psychology, Human Resources Management Journal, the Journal of Management, IEEE Transactions in Engineering Management*, and the *Journal of Vocational Behavior*.

**Antonio Cordella** is lecturer in information systems at the London School of Economics and Political Science. His research interests and publications cover the areas of e-government, economic theories of information systems, and the social studies of information systems.

**Francisco C. Cua** is a PhD candidate in the Department of Marketing at the University of Otago, New Zealand. He has more than thirty years of experience in accountancy, enterprise systems, consultancy, and teaching. During the writing of this chapter, he was a senior lecturer at the School of Applied Business, Otago Polytechnic, New Zealand. He has worked internationally in Hong Kong, Shanghai, and Beijing as a consultant of Asian Development Bank’s project and taken part in various projects as a business analyst, functional analyst, systems manager, and Oracle systems administrator in New Zealand. Diffusion of information systems, business models, supply chain, innovation, and entrepreneurship are his research areas of interest.

**Miguel Mira da Silva** is professor of information systems at Instituto Superior Técnico (IST) in Lisbon, Portugal. Miguel is also senior researcher at INESC-ID, an academic research institute, and director at INOV, a technical innovation institute that works closely with companies. Both INESC-ID and INOV are private non-profit organizations of the INESC holding, partly owned by IST. Miguel also collaborates directly with several companies, not only as consultant in the area of IT management but also supervising applied PhD and master thesis.

**Eduardo Diniz,** Fundação Getulio Vargas, Brazil, electronic engineer, MSc and PhD in business administration, focus in information systems management, visiting scholar in at University of California, Berkeley from 1996 to 1998, and at HEC Montreal in 2007. Professor at FGV-EAESP, Sao Paulo,
About the Contributors

Brasil since 1999, is member of the GVcia, Center for Studies in Applied Information Systems at FGV and coordinator of the Technology and Automation Group of CEB (Center for Excellence in Banking) also at FGV. Has researched on banking technology since 1991 and published several papers and articles on the same subject.

Adam W. Drost, is president of eCareerFit.Com (eCF). As a co-founder of eCareerFit.com (eCF), his leadership energized a start up from dust with one assessment in one language to 9 assessments in nine languages versions, which have been distributed in over 30 countries. All eCF growth was organic, needing no debt or venture capital. Prior to eCareerFit.com, Drost developed his leadership skills as president of the Internet Enterprise Group at DBM, a global human resource consulting organization; director of Global/National Accounts at Norrell Corporation, a human resource outsourcing and staffing company; and marketing representative at IBM. Drost is a graduate of the University of Illinois, Champaign/Urbana, with a BS in mathematics and minor in psychology. He participates in numerous community organizations including Habitat for Humanity, The Knights of Columbus and the Peter F. Drucker Foundation.

Amany R. Elbanna is a lecturer in information systems at the Business School of Loughborough University. She holds PhD in information systems from London School of Economics and Political Science. She also holds MBA and MSc in analysis, design, and management of information systems. Elbanna has applied ANT in several studies of ERP implementation and presented her work in several conferences including ECIS, IFIP 8.6, and Bled conferences. Her research interest include IS-based organisational innovation, IS implementation and project management, and Agile software development. Elbanna could be reached by e-mail at: a.elbanna@lboro.ac.uk

Dianne P. Ford, PhD, is an assistant professor of organizational behavior and management information systems in the Faculty of Business Administration at Memorial University of Newfoundland, St.John’s, Canada. Her research interests focus at areas that utilize her double major in MIS/OB and include: knowledge management, perceived value of knowledge, trust, and cross-cultural implications for MIS and KM. Ford has published articles in IEEE: Transactions in Engineering Management, Journal of Knowledge Management Research & Practice, International Journal of Knowledge Management, Handbook on Knowledge Management: 1 Knowledge Matters, and has presented papers at various conferences.

Brent Furneaux is a doctoral candidate in information systems at York University’s Schulich School of Business. His current research interests include the processes surrounding individual and organizational decision making, the strategic management of organizational knowledge, and questions related to the end of the information system life. He is currently pursuing dissertation research that seeks to better understand the factors that drive and constrain organizational decisions to discontinue their use of information systems. Furneaux has published in the areas of knowledge management and requirements engineering as well as on a number of theoretical issues in the field. He is a graduate of the University of Western Ontario and the University of Toronto’s Rotman School of Management.

Tony Garrett is a member Korea University Business School in Seoul. Prior to this he was senior lecturer in marketing at the University of Otago (New Zealand). His PhD examined national culture
and group dynamics in new product development, with a specific focus on Singapore and New Zealand. Research interests include innovation, qualitative research methodologies and service development, with a focus on the encouragement of entrepreneurial and innovative behavior within established organizations. He has published a number of chapters and refereed articles. Prior to his academic career he had business experience in the development of international brands in the New Zealand market.

Susan Gasson is associate professor in the iSchool at Drexel University. She obtained an MBA and PhD at Warwick Business School in the UK. Her research interests focus on IS design processes and wicked problem-solving, in groups that span knowledge-domain boundaries. The majority of her research studies employ a grounded theory approach. She teaches a doctoral seminar in qualitative research methods and publishes regularly on the topic of interpretive and Grounded Theory approaches to research. Dr. Gasson has extensive experience in IS Group management, process improvement, systems architecture design, and systems analysis. Dr. Gasson is the recipient of a five-year Career Award from the US National Science Foundation and was awarded an Emerald Literati Network Outstanding Paper Award in 2008.

Lucy W. Gibson, PhD, is executive vice president of Resource Associates, Inc. Dr. Gibson is a licensed industrial/organizational psychologist who has over twenty years of experience in the areas of test development, test validation, and implementation of selection testing programs. In addition to helping publish many research articles on Resource Associates’ products, she has taught research methods, statistics, program evaluation and human resource management at both the University of Tennessee and Tusculum College. Dr. Gibson’s work is focused on selection test development, validation of selection testing programs, and working with client companies to develop tailored employee selection testing.

Judith Gregory, PhD, is on the research faculty of The Institute of Design, Illinois Institute of Technology (IIT) and co-coordinator of the Doctor of Philosophy in Design Program. She holds a PhD in Communication from the University of California-San Diego. Dr. Gregory is active in international discussions concerning activity theory, design of information systems, participatory design and science and technology studies. She is a specialist in qualitative human-centered approaches to technology design. Previously, Dr. Gregory served as Co-PI in the Electronic Health Record iterative prototyping project of Kaiser Permanente (1993-98) and as associate professor in informatics, University of Oslo (2001-05). While at University of Oslo, she was a core faculty member in the dual International MSc-Informatics and Master in Public Health programs that are ongoing capacity-building collaborations between the medical and computer science faculties of Norway and leading universities in Tanzania, Mozambique, Tanzania, Ethiopia and India among additional developing countries.

Varun Grover is the William S. Lee (Duke Energy) distinguished professor of information systems at Clemson University. He has published extensively in the information systems field, with over 180 publications in refereed journals. Six recent articles have ranked him in the top four in research productivity in the top six Information Systems journals in the past decade. Dr. Grover is currently senior editor for *MIS Quarterly*, the *Journal of the AIS* and *Database*. He is currently working in the areas of IT value, system politics, and process transformation.
Ahsan Akhter Hasin is a professor of industrial and production engineering of Bangladesh University of Engineering & Technology, Dhaka, Bangladesh. He received his Master’s and PhD degree from the Asian Institute of Technology (AIT), Bangkok, Thailand. Dr. Hasin is a well known expert sought in the field of production engineering and quality management. He has published over 50 papers in refereed journals and proceedings. He has also published 5 reputed books on quality management issues. He is a certified and internationally recognized quality consultant. He was the recipient of more than 15 academic awards including a Best Research Paper Award in the UK.

Clyde Holsapple holds the University of Kentucky’s Rosenthal Endowed Chair in MIS. His research focuses on supporting knowledge work, particularly in decision-making contexts. Publication credits include 200 research articles and many books, such as the basic reference works Handbook on Knowledge Management and Handbook on Decision Support Systems. He is editor-in-chief of the Journal of Organizational Computing and Electronic Commerce.

Duncan Holt is a business manager who has worked in many roles ranging from his own technology business to local government and multi-national commercial entities. Most of his roles have involved using technology to improve business operations and information management. With an original core discipline in electronics and computer system hardware he then moved to business analysis and software design before further studies allowed him to move into general management roles in the corporate services field. A highlight of the highly successful programme of business change at the City of Charles Sturt, where he was the IT Manager, was the much reported fully integrated and well used Electronic Document and Records Management System. This system has since been used as a benchmark for many government department and councils.

M. Gordon Hunter is a professor of information systems in the Faculty of Management at The University of Lethbridge, Alberta, Canada. Hunter has previously held academic positions at universities in Canada, Singapore, and Hong Kong. He has held visiting positions at universities in Australia, Monaco, Germany, New Zealand, and USA. Hunter has published articles in MIS Quarterly, Information Systems Research, The Journal of Strategic Information Systems, The Journal of Global Information Management, Information Systems Journal, and Information, Technology and People. He has conducted seminar presentations in Canada, USA, Europe, Hong Kong, Singapore, Taiwan, New Zealand, and Australia. Hunter’s research approach takes a qualitative perspective employing personal construct theory and narrative inquiry to conduct in depth interviews. He applies qualitative techniques in interdisciplinary research such as multi-generation small business, recruitment and retention of physicians, and cross-cultural investigations. His current research interests in the information systems (IS) area include the effective development and implementation of IS with emphasis on the personnel component; the role of Chief Information Officers; and the use of IS by small business.

Deirdre Hynes is a senior lecturer in the Department of Information and Communications in Manchester Metropolitan University, UK. She joined MMU in 2004 from Dublin City University, Ireland, where she conducted her doctoral studies. Her research focuses on how media and computing technologies become part of everyday life and what factors influence this process. She has published in the field of IS, computing, communication studies, educational technologies and the narratives and discourses of ICTs.
About the Contributors

**Faraja Igira** is a faculty member of the Computing and Information Technology Department at the Institute of Finance Management, Dar es Salaam, Tanzania. Her areas of expertise include software engineering and systems analysis and design. Faraja has been actively involved in studying and implementing health information systems in Tanzania (since 2002 to current) and Mozambique (2002 to 2003). During these studies and implementation activities, she participated in general discussions on the design and implementation of health information systems that are ongoing within a network of developing countries including South Africa, Mozambique, Tanzania, Malawi, India, and Vietnam. Faraja is currently undertaking a PhD in information systems at the University of Oslo, Norway. Her interest is on researching organizational and cultural issues in the design and implementation of information systems in which she has been using cultural historical activity theory (CHAT) as a theoretical lens.

**Martin Jayo** holds a degree in economics and an MSc in media and communications, and is currently a PhD student at Fundação Getulio Vargas, Brazil. His research interests are in ICT for socio-economic development, particularly focusing on banking technology applied to microfinance.

**James Jiang** is professor of management information systems at the University of Central Florida and the Honorary Sun Yat-Sen Management professor at National Sun Yat-Sen University, Taiwan. He obtained his PhD in information systems at the University of Cincinnati. His research interests include IS project management and IS service quality management. He has published over one hundred and forty academic articles in these areas in journals such as *Decision Sciences, Journal of Management Information Systems, Communications of ACM, IEEE Transactions on Systems Men & Cybernetics, IEEE Transactions on Engineering Management, Journal of AIS, Decision Support Systems, Information & Management, European Journal of Information Systems,* and the *MIS Quarterly*. Currently, he serves as associate editor at *MIS Quarterly*.

**Gary Klein** is the Couger professor of Information Systems at the University of Colorado in Colorado Springs. He obtained his PhD in management science from Purdue University. Before that time, he served with the company now known as Accenture in Kansas City and was director of the Information Systems Department for a regional financial institution. His research interests include project management, technology transfer, and mathematical modeling, with over 140 academic publications in these disciplines. He is director of education for the American Society for the Advancement of Project Management and vice president of Member Services for the AIS SIG on Information Technology Project Management. He is a fellow of the Decision Sciences Institute and serves that organization as a vice-president at large. He was a founding co-editor and current co-editor-in-chief of *Comparative Technology Transfer and Society*.

**Vinod Kumar** is a professor of Technology and Operations Management of the Sprott School of Business (Director of School, 1995–2005), Carleton University. He received his graduate education from the University of California, Berkeley and the University of Manitoba. Vinod is a well known expert sought in the field of technology and operations management. He has published over 150 papers in refereed journals and proceedings. He has won several Best Paper Awards in prestigious conferences, Scholarly Achievement Award of Carleton University for the academic years 1985–1986 and 1987–1988, and Research Achievement Award for the year 1993 and 2001.
**Uma Kumar** is a full professor of management science and technology management and director of the Research Centre for Technology Management at Carleton University. She has published over 120 papers in journals and refereed proceedings. Ten papers have won best paper awards at prestigious conferences. She has won Carleton's prestigious Research Achievement Award and, twice, the Scholarly Achievement Award. Recently, she won the teaching excellence award at the Carleton University.

**Juan Ling** is an assistant professor of management at Georgia College & State University. She earned her PhD degree in management at the University of Kentucky, USA. Her research interests include social networks, leadership, and team dynamics. Her coauthored paper, *Aesthetic properties and message customization: Navigating the dark side of Web recruitment*, was published in the *Journal of Applied Psychology*. She has also presented her research projects in many conferences, including the Intro-Organization Networks Conference, Southern Management Association Conference, and Mid-west Management Association Conference. Her teaching interests include principles of management, human resource management, organizational behavior, and compensation and benefits.

**John W. Lounsbury, PhD** is professor of psychology, University of Tennessee, Knoxville, vice president, eCareerfit.com, and president of Resource Associates, Inc. He is a fellow in the American Psychological Association and a licensed industrial-organizational psychologist. Dr. Lounsbury teaches courses on testing, personality assessment, research methods, psychometrics, and human resources management. He has chaired over 60 doctoral dissertations and has written numerous articles on personality traits, career development, scale validation, life and career satisfaction, and work-nonwork relationships. He has consulted with more than 100 national and international companies in the areas of test development, personality assessment, pre-employment, selection testing, program validation, and career planning.

**Tsz-Wai Lui** is a PhD candidate at the School of Hotel Administration at Cornell University. Her research interest is in IT-enabled customer service systems. She has participated as a chapter author in the Global Text Project, which is to create electronic textbooks that will be freely available from a Website; and has also recently published in *The DATABASE for Advances in Information Systems*.

**Ahmed Y. Mahfouz, PhD**, is an assistant professor of management information systems (MIS) in the Department of Accounting, Finance, and MIS at Prairie View A&M University, Prairie View, Texas. He has a PhD in information and operations management (MIS track) from Texas A&M University, College Station, Texas, USA. He has an MBA and a Bachelor of Science in management science from Virginia Polytechnic Institute and State University (Virginia Tech), Blacksburg, Virginia. His research interests include electronic commerce, online consumer behavior, flow theory, IS strategy, research methodology, and interdisciplinary IS research and education. Dr. Mahfouz’ research appears in peer-reviewed journals, books, and conference proceedings, such as *Computers in Human Behavior* and *Journal of Internet Commerce*; IGI Global books, such as, *Inquiring Organizations: Moving from Knowledge Management to Wisdom*, and *Internet Management Issues: A Global Perspective*.

**John McAvoy** is a lecturer in business information systems at the University College Cork, Ireland. Prior to lecturing, McAvoy had a variety of roles in the Information Systems field, ranging from systems administration to managing software development teams. His research interests are in the areas of software development methodologies, primarily the role played by small teams of software developers.
Darren B. Meister, PhD, is an associate professor of Information Systems in the Richard Ivey School of Business at the University of Western Ontario, London, Canada. His interests focus on the role of technology in enhancing organizational effectiveness, specifically as it concerns innovation processes. He investigates this question primarily within three settings: technology adoption, knowledge management and interorganizational systems. His work has appeared in Management Science, MIS Quarterly and other leading journals and conferences.

Ram B. Misra is a full professor of management and information systems at Montclair State University, Montclair, NJ, USA. Dr. Misra has published in IEEE Transactions, the International Journal of Management Research, the International Journal of Production Research, the Naval Logistics Review, the Decision Sciences Journal of Innovative Education, the Journal of IT Cases and Applications, the Journal of Information Technology and Applications, the International Journal of Pharmaceutical and Healthcare Marketing, the i-Manager’s Journal of Management, the Information Technology Journal, the Journal of Issues in Informing Science and Information Technology and the Journal of Information Technology Research.

Lapo Mola is lecturer in organization science at the University of Verona, where he holds courses in organization science, and information systems. His research interests cover the area of organizational impacts of ICT.

Ciaran Murphy is Bank of Ireland professor of BIS at University College Cork and is director of the university’s Financial Services Innovation Centre at. He has over 20 years of research and commercial experience, and has acted as a consultant to a wide variety of organizations in Ireland and internationally. Murphy was organizing and programme committee chair of the 1997 European Conference on Information Systems. Coauthor of A Manager’s Guide to Current Issues in Information Systems, he has published widely, including articles in the Information Systems Journal, the Journal of Strategic Information Systems, Decision Support Systems, the Journal of Decision Systems, the Journal of Information Technology, and in the proceedings of ICIS and ECIS conferences.

Nandish Patel has constructed the theory of deferred action as an ‘action and design theory’ to inform the design and development of organisations and IT systems. This is a theory to inform the practice of organisation design, IT systems design, and integrated organisation and IT systems design in emergent organisation. As well as informing practice, the theory also explains these phenomena of organisation design, IT systems design, and information management in emergent business organisation. It draws on complexity theory to explain emergence and self-organisation. The theory is used by other researchers and has been applied by practitioners. Present research is focused on developing multi-agent models based on the theory.

Doncho Petkov is a full professor and coordinator of the BIS program at Eastern Connecticut State University, USA. He is a deputy editor (USA) for systems research and behavioral science and senior area editor (Software Engineering) of IJITSA. His publications have appeared in the Journal of Systems and Software, Decision Support Systems, Telecommunications Policy, IRMJ, International Journal on Technology Management, IJITSA, JITTA, JISE, JITCA, South African Computing Journal and elsewhere.
Olga Petkova is a full professor in MIS at Central Connecticut State University, USA. Previously she has taught at several universities in South Africa and Zimbabwe and worked at the Bulgarian Academy of Sciences in Sofia. Her publications are in software development productivity, systems thinking and information systems education. They have appeared in Decision Support Systems, Journal of Information Technology Theory and Applications (JITTA), Journal of Informatics Education Research, JISE, JITCA and elsewhere.

Gabriele Piccoli is associate professor of information systems at the University of Sassari (Italy). His research, teaching and consulting expertise is in strategic information systems and the use of network technology to support customer service. He is an associate editor of the MIS Quarterly and his research has appeared in MIS Quarterly, Decision Sciences Journal, MIS Quarterly Executive, Communications of the ACM, Harvard Business Review, The DATABASE for Advances in Information Systems, The Cornell Hospitality Quarterly, as well as other academic and applied journals. He has recently authored the book Information Systems for Managers: Text and Cases, published by John Wiley & Sons and serves on the editorial board of the Cornell Hospitality Administration Quarterly.

Marlei Pozzebon (PhD in management, McGill University) is associate professor and director of GRESI (research group of information systems) at HEC Montréal. Her research interests are the social, political and cultural aspects of ICT implementation and use, and the use of practice-based theoretical frames and qualitative methods in IS research. Some keywords of her research are structuration theory, critical discourse analysis, local and sustainable development and global-local negotiation. Professionally, she specializes in training and consultancy in the business intelligence area. Pozzebon has published her articles at Organization Studies, Journal of Management Studies, Information Technology and People, Journal of Information Technology, Journal of Strategic Information Systems, among others.

Helen Richardson is a senior lecturer in information systems (IS) and joined the University of Salford, UK in 1998 after a varied career including working in the field of social care and running a Research and Training Unit promoting Positive Action for Women at Work. She works in the Research Centre for People, Work and Organization and is engaged in Critical Research in IS including issues of gender and the ICT labour market, the domestication of ICTs and the global location of service work.

Nicholas Roberts is a PhD candidate at the College of Business & Behavioral Science, Clemson University. He worked for several years as an IT project manager prior to re-entering academe. His current research focuses on how firms can use information technology to enhance their agility, competitive activity, and overall performance.

Cecilia Rossignoli is associate professor in organization science at the University of Verona, where she holds courses in organization science, organization science and information systems and strategic role of IS in financial institutions. She is author of several books and papers. She participated at several European projects. Her research interests cover the area of IS and organizational change, the role of IS in inter-organizational information systems, electronic markets and the impact of Business Intelligence Systems within the organizations. Her latest works were published in the Journal of Electronic Commerce Research and in the Journal of Information Systems and e-business Management.
About the Contributors

Mahmud A. Shareef is currently a PhD candidate in management of the Sprott School of Business, Carleton University, Ottawa, Canada. He received his graduate degree from the Institute of Business Administration, Dhaka, Bangladesh in business administration and Carleton University, Ottawa, Canada in civil engineering. His research interest is focused on quality management of e-commerce and e-government. He has published more than 30 papers addressing adoption and quality issues of e-commerce and e-government in different refereed conference proceedings and international journals. He has also published 2 reputed books on quality management issues. He was the recipient of more than 10 academic awards including 2 Best Research Paper Awards in the UK and Canada.

Robert P. Steel, PhD, is a professor of human resource management at the University of Michigan-Dearborn. He received his PhD in industrial-organizational psychology from the University of Tennessee. Professor Steel has published widely in the academic literature. He currently serves on the editorial board of the Journal of Management and as associate editor of Human Resource Management Review. His research interests include personnel turnover, employee absenteeism, career choice, and work attitudes.

R. Scott Studham is the chief information officer for Oak Ridge National Laboratory (ORNL) and is responsible for planning and executing a coordinated information technology strategy from the desktop to high-performance computing. Studham has broad national laboratory, federal, and corporate experience in managing and delivering information technology services, including recent appointments as chief technology officer for the Center for Computational Sciences at ORNL, associate director for Advanced Computing at PNNL, and Information Technology Project Manager for IBM at the National Weather Service. He has been the program manager or architect for one of the world's top ten supercomputers six times in his career. Studham earned a Bachelor’s degree in chemistry from Washington State University and holds a Master’s degree in computer science and an MBA from the University of Tennessee. He has published widely on high-end computing, storage, and Linux systems.

Paula Swatman is chair of information systems at the University of South Australia and has researched and taught in ICT and e-business for 25 years. She recently completed a fixed-term appointment as State Records of SA/Fuji Xerox/State Library of SA Chair of Business Information Management, where she led a multidisciplinary, cross-institutional team of experts in designing a suite of leading-edge graduate teaching programs – and will now be spearheading research and academic leadership into the Digital Economy. From 2001-2003 she held the chair of eBusiness at the University of Koblenz-Landau in Germany, where she was foundation director of the Institute for Management and initiated the multidisciplinary, multi-lingual Bachelor/Master of Science in Information Management and where she remains an Emeritus professor. Before moving to Germany, she was Foundation Innovation professor in e-Commerce at RMIT University in Melbourne and Director of RMIT’s Interactive Information Institute. She has published widely, producing more than 170 refereed journal articles and conference papers.

Felix B Tan is professor of information systems, director of research management and head of the University Research Office at AUT University, New Zealand. He serves as the editor-in-chief of the Journal of Global Information Management and is also the editor of the EndNote Resources page on AISWorld Net. He served on the Council of the Association for Information Systems from 2003-2005 and is a fellow of the Information Resources Management Association and the New Zealand Computer
Dr. Tan is internationally known for his work in the global IT field. Dr. Tan’s current research interests are in electronic commerce, global information management, business-IT alignment, and the management of IT. He actively uses cognitive mapping and narrative inquiry methods in his research. Dr. Tan has published in *MIS Quarterly, Information & Management, Journal of Information Technology, IEEE Transactions on Engineering Management, Information Systems Journal* as well as other journals and refereed conference proceedings.

**Karthikeyan Umapathy** is currently working as assistant professor of Information Systems at the School of Computing, University of North Florida. He received his PhD in information sciences and Technology from the Pennsylvania State University. His research interests are interoperability among information systems, service-oriented computing, web services, systems integration, and IT standardization. His research works are published in various conferences such as Americas Conference on Information Systems (AMCIS), Conceptual Modeling (ER), Hawaii International Conference on System Sciences (HICSS), International Conference on Web Services (ICWS), Service Computing Conference (SCC), and Workshop on Information Technologies and Systems (WITS); and journals such as *European Journal of Information Systems, Information Systems Frontier* (ISF), and *Journal of Computing and Information Science in Engineering* (JCISE).

**Michael R. Wade** is an associate professor of management information systems at the Schulich School of Business, York University, Toronto. He received a PhD from the Ivey Business School at the University of Western Ontario. Professor Wade has worked with many top international organizations including Cisco Systems, Microsoft and IBM. His research has appeared in journals such as *MIS Quarterly, Strategic Management Journal, the Journal of Management Information Systems*, and the *Communications of the ACM*. Professor Wade is co-author of the textbook *Information Systems Today: Canadian Edition*, and has co-authored two e-commerce casebooks. His current research focuses on the strategic use of information systems for sustainable competitive advantage.

**Linda Wilkins** is educational designer in the School of Business Information Technology, RMIT University. Her background includes experience as an educator, course designer and project manager in engineering, technology and business settings. She was project manager of the Telstra Home Team at RMIT’s Interactive Information Institute (1999-2001) awarded the national BHERT award for successful collaboration between researchers and industry. She was subsequently commissioned as researcher and author for the Australian Federal Government funded Creator-2-Consumer Project (2001-2002). She has been an invited lecturer at a number of international institutions including the Asian Institute of Technology, Bangkok and a UNESCO sponsored course leader at the International School of Engineering Lodz, Poland and the Australian Centre for Education, Budapest in 1995. Her research publications focus on issues affecting the uptake of innovative e-technology.

**Jiming Wu** is an assistant professor in the Department of Management at California State University East Bay. He received his PhD from the University of Kentucky. His research interests include knowledge management, Internet-based business applications and IT acceptance, and computer and network security. His research has been accepted for publication in such journals as *The DATA BASE for Advances in Information Systems, Knowledge Management Research & Practice, Journal of Electronic Commerce Research, and Journal of International Technology and Information Management*. 
Qin Wu is an assistant professor of finance at the University of Arkansas-Little Rock. He obtained his PhD in finance from the University of Kentucky, USA. His research interests are mainly in corporate finance and investments, including the application of social network theory to finance studies. He has publications in both Chinese and English. One of his coauthored research papers, “Analysts Get SAD Too: The Effect of Seasonal Affective Disorder on Stock Analysts’ Earnings Estimates,” is forthcoming in the Journal of Behavioral Finance. He has extensive experience in teaching different levels of corporate finance, international finance, international business, and business management.
