About the Contributors

Shereen Albitar is a PhD Student at the LSIS UMR CNRS research laboratory, Marseilles, France. She studied Informatics Engineering at Tichrine University, Lattakia, Syria and graduated in 2007. She got her masters degree at the LSIS UMR CNRS research Laboratory on Information and System Sciences, option Knowledge and Information Systems in 2009). Her major research topics are multi-agent systems, semantic web and ontologies and information gathering.

Damien Allison currently works as a research engineer at Imagini and has previously worked at Google, BT and HP across a wide range of fields including system modelling, security and optimisation.

Jamal Bentahar is an associate professor in the Concordia Institute for Information Systems Engineering at Concordia University, Montreal, Canada. His research interests include service engineering, multi-agent systems and formal verification. He has a Ph.D. in computer science and software engineering from Laval University, Quebec City, Canada.

Jethro Borsje obtained a bachelor and a cum laude master degree in informatics and economics at the Erasmus University, Rotterdam, the Netherlands in 2006 and 2007, respectively, focusing on economics and ICT. During his bachelor and master programs, he published research related to the Semantic Web. His master degree research was related to rule-based ontology learning. From 2007 until early 2010 he worked as a software engineer for a research oriented firm, where he specialized in applying Semantic Web technologies to the financial domain. Other research interests include machine learning, natural
About the Contributors

language processing, and pattern recognition. Currently he holds a position as an enterprise software engineer at a government agency.

**Alan A. Brandyberry** is an Associate Professor of Information Systems at Kent State University. His research interests include the adoption, diffusion, and valuation of technologies; decision modeling utilizing artificial intelligence techniques; advanced database systems; and behavioral issues related to IT usage. He has previously published in a variety of journals including *Decision Sciences*, the *DATA-BASE for Advancement of Information Systems*, the *European Journal of Operational Research*, the *International Journal of Technology Management*, and the *Journal of Information Systems Education*. He holds a D.B.A. from Southern Illinois University, an M.S. in Decision and Information Systems from Arizona State University, an M.B.A. from Eastern Illinois University, and a B.S. in Engineering Mechanics from the University of Illinois.

**Pam Briggs** is Dean of the School of Psychology and Sports Sciences and Director of the PaCT (Psychology and Communication Technologies) Lab at Northumbria University, UK. Pam completed her undergraduate and postgraduate studies at Nottingham University and was awarded a PhD in 1983. She then worked in Japan, steadying aspects of bilingual reading comprehension, before moving into the field of human computer interaction, firstly at Sheffield University and subsequently as Chair in Applied Cognitive Psychology at Northumbria University. She is interested in how users’ perceptions of trust, privacy and security affect choice in the context of computer-mediated communication. She has successfully attracted ESRC awards, investigating patient choices in the e-health domain, trust and privacy issues for ambient intelligence and mobility and ageing.

**Biplab Datta**: He teaches Marketing Management, Industrial Marketing and Advertisement, Promotions Management. His research interests include Service Quality Management and Education Quality Management.

**S K De**: Prof. Sadhan K.De has been teaching Information Technology, Information Systems and Technology Management in VGSOM since 1999. He served the Tata Steel for about 14 years. Prof. De’s areas of interest in teaching and research, in recent times, have been E-Commerce and E-Business, Data Warehousing and Data Mining.

**Riyad Eid** is Senior Lecturer of Marketing in the School of Business at the University of Wolverhampton. Dr Eid received a BSc (Hons) in Business administration from Tanta university (Egypt), an MSc in Business Administration from Tanta University (Egypt), PGDip (2002), and a PhD in Marketing from Bradford University (UK). Dr Eid’s main area of marketing expertise and interest is in the domain of International Internet Marketing. He has acted as consultant to a number of organizations in Egypt, UAE and UK. In addition to *Journal of International Marketing*, he has published recently in *Journal of Euro-Marketing, Journal of marketing Intelligence and Planning, Journal of Industrial Management & Data Systems, Benchmarking International Journal, [Journal of] Internet Research, Journal of International Marketing and The Service Industries Journal*. He has also attended numerous numbers of International Refereed Conferences worldwide. He is a subject Matter Expert (Marketing) for the E-TQM collage in Dubai (UAE). Dr Eid was presented with Emerald Best Paper Award for one of his publications. He is also a member of the Editorial Review Board for a number of international journals.
**Tom R. Eikebrokk** is Associate Professor of Information Systems in the Department of Information Systems, University of Agder, Norway. Dr. Eikebrokk received his PhD in Information Systems from the Norwegian School of Economics and Business Administration. He has published in journals such as *Information & Management, Journal of Research and Practice in Information Technology, Computers in Human Behavior*, and at conferences like HICSS and ECIS. His main research interests are IT in SMEs, business process management, Evaluation of IT, IT and inter-organizational cooperation.

**Bernard Espinasse** is currently Full Professor in Computer Sciences at the Ecole Polytechnique Universitaire of Aix-Marseilles University, and team leader at the LSIS UMR CNRS research laboratory, Marseilles, France. He has been Associate Professor at the Laval University of Québec, Canada (1983-1987). He received an engineer diploma from the Ecole Nationale Supérieure d'Arts et Metiers (1977), and a PhD of the Aix-Marseilles University (1981). His main research topics are software agents, agents based simulation, ontologies and semantic Web, Decision Support and Information Systems. He is author or co-author of numerous books and publications in international journals and conferences on these topics, and member of several editorial boards, and of numerous international program committees.

**Sébastien Fournier** is at present Associate Professor at the Aix-Marseilles University and researcher at the LSIS UMR CNRS research laboratory, Marseilles, France. He holds a Master of Sciences at the Pierre and Marie Curie University in Paris (2001), and a PhD from the Naval Academy Research Institut, Brest (2005). His research interests focus on multiagent systems, ontologies and semantic Web, information retrieval and gathering, geographic information systems, qualitative spatial reasoning and simulation.

**Jaume Franquesa** is an Assistant Professor of Management at Kent State University. He obtained his Ph.D. in Strategic Management from Purdue University. His research interests are in the areas of entrepreneurship and small business management, as well as in corporate governance and the management of the diversified firm. Dr. Franquesa has published articles in *Frontiers of Entrepreneurship Research, and Advances in Entrepreneurship Research*, as well as in edited books and various national and international conference proceedings.

**Flavius Frasincar** obtained the master degree in computer science from “Politehnica” University Bucharest, Romania, in 1998. In 2000, he received the professional doctorate degree in software engineering from Eindhoven University of Technology, the Netherlands. He got the PhD degree in computer science from Eindhoven University of Technology, the Netherlands, in 2005. Since 2005, he is assistant professor in information systems at Erasmus University Rotterdam, the Netherlands. He has published in numerous conferences and journals in the areas of databases, Web information systems, personalization, and the Semantic Web. He is a member of the editorial board of the International Journal of Web Engineering and Technology.

**Fred Freitas** is Adjunct Professor at the Informatics Center of the Federal University of Pernambuco (CIn, UFPE), at Recife, Brazil. He received his PhD in Electrical Engineering from the Federal University of Santa Catarina (2002). He researched for almost a year at the Department of Informatics of the University of Karlsruhe, as a member of the Brazilian-German project “A semantic approach to
About the Contributors

data retrieval” and has co-chaired two workshop series, WONTO (Workshop on Ontologies and their applications) in Brazil, and BAOSW (Building Applications with Ontologies for the semantic Web) in Portugal. He also co-edited special issues on related themes. His interest areas comprise ontologies, semantic web, multi-agent systems, knowledge representation and text mining. He is author or co-author of some publications in journals and international conferences on these topics, and member of several international program committees.

Connie Marie Gaglio, Ph.D. is an Associate Professor of Management and Co-Director of the Ohrenschall Center for Entrepreneurship at San Francisco State University. She received her Ph.D. from the University of Chicago, her BA from SUNY-Brockport and has over 18 years of business experience in marketing and marketing research for startup companies, Fortune 500 companies and her own businesses. Her research in entrepreneurship includes entrepreneurial decision making, how new firms gain legitimacy, the role of the entrepreneur in economic theory, marketing strategies and tactics for new firms, and the impact of entrepreneurial education on a firm’s success.

Ranjit Goswami: His research and teaching areas include the broader digital economy and process management. He actively follows global economy and financial markets. He worked for fifteen years in corporate world, five of which were with dot-com players. An IIT-product (Graduation, MBA and now pursuing his PhD), Ranjit headed the Case Development Cell of ICFAI Research Center prior to joining IIFT.

Frederik Hogenboom obtained the cum laude master degree in economics and informatics from the Erasmus University Rotterdam, the Netherlands, in 2009, specializing in computational economics. During his bachelor and master programs, he published research mainly focused on the Semantic Web and learning agents. Currently, he is active within the multidisciplinary field of business intelligence and continues his research in a PhD track at the Erasmus University Rotterdam, the Netherlands. His PhD research focuses on ways to employ financial event discovery in emerging news for algorithmic trading, hereby combining techniques from various disciplines, amongst which Semantic Web, text mining, artificial intelligence, machine learning, linguistics, and finance. Other research interests are related to applications of computer science in economic environments, agent-based systems, and applications of the Semantic Web.

Val Hooper is currently the Head of the School of Information Management at Victoria University of Wellington (VUW). Val holds a PhD in Information Systems (VUW) and an MBA from Pretoria University, South Africa. She has a background in information systems, management and marketing – both as a practitioner and as an academic. She has published in journals such as The Database for Advances in Information Systems, the Journal of Knowledge Management and the Journal of E-Business Research in the areas of the strategic management of IS, alignment of IS and marketing, the use of IT/IS in developing countries, and online behaviour as evidenced in online auctions. Her current research focuses on strategic alignment of IS in the public sector, the IT productivity of SMEs, the promotion of potentially harmful products and behaviour via the Internet, and the development of social norms in the online environment.
Sid Huff is Professor of Information Systems at Victoria University of Wellington, New Zealand. His teaching and research address IS strategy, IT governance, senior management roles in information systems, and IS management. His work has appeared in numerous academic and practitioner journals, including MIS Quarterly, Information Systems Research, Journal of MIS, Journal of Strategic Information Systems, Communications of the ACM, CAIS and others. He currently serves on the editorial boards of numerous journals, and is a Senior Editor for Information Systems Management Journal and Journal of Information Technology. He has also written over 60 teaching cases for educational use, and was the originator of the IS World web site on Teaching IS with Cases. His most recent book is Managing IT Professionals in the Internet Age, co-authored with Dr. Pak Yoong. He holds degrees in Applied Mathematics, Electrical Engineering and Business Administration, from Queens University. He received his Ph.D. in Information Systems from the M.I.T. Sloan School of Management.

Mehruz Kamal is an Assistant Professor at the Department of Computer Science at The College at Brockport, State University of New York. She obtained her Ph.D. from the University of Nebraska at Omaha. She has been involved in numerous scholarly research streams but her main research stream is in the area of Information Technology for Development - which to briefly state, investigates how Information Technology can help bring about both social as well as economic development of a community. Her research work has been presented at various peer-reviewed conferences and workshops such as AMCIS, HICSS, and MWAIS. She holds a Masters and a Bachelors of Science degree in Computer Science from Illinois Institute of Technology.

Pradeep Korgaonkar is a Professor of Marketing at Florida Atlantic University. His research interests are in the areas of e-commerce, advertising, and retailing. His research has been published in numerous journals including Journal of Advertising Research, Journal of Business Research, Journal of Computer Mediated Communications, Journal of Current Issues and Research in Advertising, Journal of Internet Research, Journal of Retailing, and Journal of Marketing Research among others.

Kevin Korgaonkar is pursuing a graduate degree in Marketing at the William Simon School of Business at the University of Rochester. He holds a Bachelors of Science in Business from Indiana University, Kelly School of Business.

Zakaria Maamar is a full professor in the College of Information Technology at Zayed University, Dubai, United Arab Emirates. His research interests include Web services, social networks, and context-aware computing. He has a Ph.D. in computer science from Laval University, Quebec City, Canada.

Jun Li is an Assistant Professor of Strategic Management and Entrepreneurship in the Department of Management at the University of New Hampshire. His research interests include strategic leadership in entrepreneurial teams, high-technology IPO firms, SME strategies and international strategy in emerging markets. Dr. Li received his B.A. and M.A. degrees from Beijing University, P.R. China and his Ph.D. from Texas A&M University at College Station.

Rinaldo Lima is a Phd Student at the Informatics Center of the Federal University of Pernambuco (CIn, UFPE), Recife, Brazil. He received a B.Sc. (1998) and a M.Sc. (2009) in Computer Science from the same Informatics Center. He also worked as a business intelligence consultant for telecommunication companies for several years. In 2008, he developed an information extraction system at the LSIS UMR CNRS research laboratory, Marseilles, France. His research topics include Ontology Learning and Population, Machine Learning, Information Extraction, and Semantic Web.

Linda Little is a Senior Lecturer in psychology a member of the PaCT (Psychology and Communication Technologies) Lab at Northumbria University, UK. She completed her undergraduate and postgraduate studies at Northumbria and was awarded a PhD in 2004. Linda’s main research areas are privacy, trust, technology use in public places and the impact of age and disability on technology use. She has successfully attracted research council (ESRC) and Industry funding. Linda has been guest editor for the journal Interacting with Computers, Social Science Computer Review journal and the International Journal of Human Computer Studies. She teaches at both undergraduate and postgraduate levels including social psychology and work and the environment.

Kathleen (Bay) O’Leary joined the Nova Southeastern University Huizenga School of Business in Fort Lauderdale, Florida as an Associate Professor of Marketing in January, 2007. Prior to that she was teaching at Barry University in North Miami. Bay teaches in both the undergraduate and graduate programs. Dr. O’Leary has many professional publications. Her main area of research focuses on Internet marketing and sales education. Dr. O’Leary’s teaching experience includes managerial marketing, professional selling, international marketing and buyer behavior.

Dag H. Olsen is Associate Professor of Information Systems in the Department of Information Systems, University of Agder, Norway. Dr. Olsen received his PhD in Industrial economics from the Norwegian University of Science and Technology. He has published in journals such as Information & Management, European Journal of Information Systems, IEEE Transactions on Engineering management and Scandinavian Journal of Information Systems. His main research interests are e-business, IT and business development, business process management, IT and inter-organizational cooperation, enterprise systems and IT competency.

Savvas Papagiannidis is a Lecturer in Management in the Newcastle University Business School, UK. He is a graduate of Newcastle University’s Physics Department, where he studied for a BSc and PhD in Theoretical Physics. Savvas has also completed the PG Certificate in Academic Practice and is currently reading part-time for a Doctorate in Business Administration. Upon completion of his PhD he joined the ebusiness@newcastle research team, working on a number of Internet-related research projects. His work has been published in several academic journals and presented at international conferences. His research interests include management of Internet and emerging technologies, high-
technology entrepreneurship, e-marketing and e-learning. Savvas has started a number of electronic business ventures and also worked as a freelance Internet developer, winning entrepreneurial awards.

Siani Pearson is a senior researcher in the Systems Security Lab (HP Labs Bristol). She has an MA in Mathematics and Philosophy from Oxford and a PhD in Artificial Intelligence from Edinburgh. She was a Fellow at the Computer Lab in Cambridge University, and for the last 16 years has worked at HP Labs in a variety of research and development programs including collaborations with HP business units and EU PRIME (Privacy and Identity Management for Europe) project. Siani’s research focus is on privacy enhancing technologies. She is currently technical lead on an accountability modelling project with HP Privacy Office, and on the collaborative TSB-funded EnCoRe (Ensuring Consent and Revocation) project.

Sajda Qureshi is an Associate Professor at the Information Systems and Quantitative Analysis Department at the College of Information Science and Technology at the University of Nebraska at Omaha. She holds a Ph.D. in Information Systems from the London School of Economics. She has over 100 publications in journals such as Group Decision and Negotiation, Information Infrastructure and Policy and Communications of the ACM, books published by Prentice Hall, Springer-Verlag, Chapman and Hall and North-Holland and conferences such as the ICIS and HICSS. She is currently the Editor-in-Chief of the Journal of Information and Technology for Development.

Hari K. Rajagopalan, Ph.D. is an Assistant Professor of Management at Francis Marion University. He received his Ph.D. and MS from the University of North Carolina at Charlotte, his B.E. from Guindy, Anna University, Madras India, and his MBA from Delhi University, Delhi, India. Previously he worked in the IT industry in research and development of Web-enabled ERP products. Dr. Rajagopalan’s research interests include complex adaptive systems, meta-heuristic search methods, pricing of digital goods and location of emergency medical systems. He has published papers in European Journal of Operational Research, Computers and Operations Research, and Decision Support Systems.

Davide Rossi received the “laurea” degree in “scienze dell’informazione” and the “dottorato” (PhD) degree in computer science from the University of Bologna, Italy. He is an assistant professor in the Department of Computer Science at the University of Bologna, Italy. His research interests include coordination models and systems, software engineering, web engineering, workflow languages and systems, business process management, social software tools and platforms and distributed systems/middleware architectures.

Frank Schlemmer has currently finished his PhD at Queen’s University of Belfast, Northern Ireland. His research interest is the creation of competitive advantage at small companies. He has currently published some work in this area. He is also the managing director of two small retail-companies in Germany.

Coral R. Snodgrass is Professor of Management/Marketing at Canisius College. She has published numerous articles on the topic of strategy and international business and she has authored a number of strategy cases. She is involved with collaborative projects with colleagues in England, Ireland, France, Belgium, Germany, Sweden and Mexico. These projects include course and program development as well as student and faculty exchanges. She is currently serving as book editor for the Information Resources
About the Contributors

Management Journal. She is member of a number of academic societies as the Strategic Management Society and the Academy of International Business.

Silverblatt is an Associate Professor of Management and International Business, College of Business Administration, at Florida International University. She holds a Ph.D. in Business Administration from Georgia State University. Some of her prior works have been published in Industrial Relations, Journal of Labor Studies, Journal of Business and Psychology, Journal of Business Research, Journal of Applied Business Research, Journal of Internet Research among others. Her areas of interest include human resource management, Hispanics and e-commerce.

Sattanathan Subramanian (sat@uni.no) is a post-doctoral researcher at Uni BCCS, Bergen, Norway. His research interests include web services and distributed computing. Sattanathan has a PhD in computer engineering from the National Institute of Technology Karnataka (India) and its equivalence from the University of Namur (Belgium).

Theodoulos Theodoulou graduated from the ‘The American Academy’ of Larnaca in Cyprus before continuing with his studies at Tempe Arizona, USA. He received his BSc in Computer Information Systems from Arizona State University with a cum laude. In 2006 he opted to continue with further studies in Newcastle University Business School in the UK where he received his MSc in E-Business and Information Systems with merit. Theodoulos now works as a SAP consultant in Nicosia, Cyprus.

Philippe Thiran is an associate professor in the Faculty of Computer Science at the University of Namur, Belgium. He is also a member of the PRECISE Research center. His research interests include Web services, Adaptive information systems and Web engineering.

Elisa Turrini received the “laurea” (MS) and “dottorato” (PhD) degrees in computer science from the University of Bologna (Italy) where she is currently a research associate and teaching assistant at the Department of Computer Science. She is the author of several articles and scientific publications. She has been a program committee member and session chair of international conferences; she has also served as a reviewer for international conferences and journals. Her research interests include distributed systems, system performance evaluation, e-games development, e-learning, coordination languages, workflow systems, process modeling, business process improvement, business process simulation, social software for business.
Brian Webb is a Senior Lecturer at the School of Management and Economics, Queen’s University of Belfast, Northern Ireland. He has published widely in both IS and Management journals (e.g. EJIS and Sloan Management Review) and presented at conferences of both disciplines.

Susan J. Winter, Ph.D. is a Program Officer in Cyberinfrastructure at the National Science Foundation managing and coordinating programs in virtual organizations as sociotechnical systems, science and technology centers, research coordination networks, cyberenabled discovery and innovation, and cyberinfrastructure training, education, advancement and mentoring. She received her PhD in business administration from the University of Arizona, her MA in organizational research methods from the Claremont Graduate University, and her BA in organizational psychology from the University of California, Berkeley and has over 20 years of international managerial and consulting experience. Her research on the impact of ICT on the organization of work has resulted in over 25 publications, 7 grants, and 30 refereed conference presentations (including 3 Best Paper awards). Her work has appeared in Information Systems Research, Information & Management, Frontiers of Entrepreneurship Research and the Database for Advances in Information Systems, been presented at the International Conference on Information Systems and at the Academy of Management, and been included as chapters in scholarly books. She currently serves on the editorial boards of the Journal of Information Technology, Information and Organization, and Group and Organization Management.

Peter Wolcott obtained his Ph.D. in 1993 from the Department of Management Information Systems at the University of Arizona, where he pursued interests in the international dimensions of information technology. Dr. Wolcott has long-standing interests in the international dimensions of information technologies. His most active research at present focuses on the role of information technology for development (ITD). He teaches students to apply ITD concepts and practices to promote economic, social, and human development in micro-enterprises.

A.R. (Venky) Venkatachalam is Professor of Information Systems, Chairperson of the Decision Sciences department, and Director of Enterprise Integration Research Center in the Whittemore School of Business and Economics at the University of New Hampshire. He received his bachelors degree with honors in mechanical engineering from the University of Madras, India, MBA from the Indian Institute of Management Calcutta, and Ph.D. from the University of Alabama. Dr. Venkatachalam is an Associate Editor for the Journal of Information Technology Cases and Applications Research and serves on the editorial review boards of several research journals in the information systems area. He is also a consultant to the industry in the areas of Electronic Commerce and intelligent information systems. Dr. Venkatachalam has received several awards and honors including the 2006 University of New Hampshire’s Faculty Excellence in Research Award.

John Wang is a full professor at Montclair State University. He completed his PhD in operations research from Temple University. He has published more than 100 refereed papers and five books. He has also developed several computer software programs based on his research findings. He has served as a guest editor and referee for many other highly prestigious journals. His long-term research goal is on the synergy of operations research, data mining and cybernetics.
**About the Contributors**

**Heng Xu** is an assistant professor of Information Sciences and Technology at the Pennsylvania State University. She leads the Privacy Assurance Lab (PAL), an inter-disciplinary research group working on a diverse set of projects related to understanding and assuring information privacy. Her current research focus is on the interplay between social and technological issues associated with information privacy. She approaches privacy issues through a combination of empirical, theoretical and technical research efforts. Her interdisciplinary research has been sponsored by National Science Foundation and National Security Agency. Her papers have been published in the *DATA BASE for Advances in Information Systems*, *International Journal of Mobile Communications*, and the proceedings of several leading conferences in Information Systems. Her Ph.D. dissertation on *Privacy Considerations in the Location Based Services* was named as the runner up for 2006 ACM SIGMIS Doctoral Dissertation Award Competition.

**Ruiliang Yan** is an assistant professor of marketing at Indiana University Northwest. He received his PhD in marketing from the University of Wisconsin, Milwaukee. He has published one book and a number of articles in the different refereed journals. He also is serving as referee for many highly prestigious journals. He specializes in marketing modeling, retailing and supply chain management.
