About the Contributors

John Wang is a professor in the Department of Management and Information Systems at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his Ph.D. in operations research from Temple University. He has published over 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of Int. J. of Information Systems in the Service Sector, Int. J. of Information Systems and Supply Chain Management. Furthermore, he is the Editor of Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications (six-volume) and the Editor of the Encyclopedia of Data Warehousing and Mining, 2e (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

T. Arunkumar is currently working as an Associate professor in the school of computing sciences at the Vellore Institute of Technology - University, India. He has over 14 years of academic and 8 years of R&D experience in industries and research institutes. He has managed and initiated multiple national level projects including QoS for WiFi forum, project funded by DRDO. His area of research interest focuses on mobile computing, adhoc highperformance networking, ubiquitous computing, aspect based network management which includes mobile 3G networks, ambient technologies and vehicular based applications. He has published multiple papers in international conferences and journals.

Mahmoud Boufaïda is a full professor in the Computer Science department at the University of Constantine, Algeria. He heads the research group ‘Information Systems and Knowledge Bases’. He has published several papers in international conferences and journals. He has managed and initiated multiple national and international level projects including interoperability of information systems and integration of applications in organizations. He has been program committee member of several conferences. His research interests include cooperative information systems, web databases and software engineering.

Abdelaziz Bouras is currently Professor at the University of Lyon, where he is leading the Supply Chain Group of the LIESP laboratory since 2000 and heading the CERRAL R&D Center of the Technology Institute of the University. He is member of several European and international projects related to Supply Chain and Product Lifecycle Management (PLM). His work particularly deals with the SC/PLM integration, reference models and open standards. He is the editor-in-chief of the International Journal of PLM and co-founder of the International Conference on PLM.
**Mahmoud Brahimi** is a doctor in the computer science department at the University of Msila in Algeria. He is a member at the LIRE Laboratory in the University of Constantine. His current research interests include cooperative systems, E-business applications, multi-agent systems, ontology and web techniques.

**Sheu Chen**, Associate Professor, received her B.S., M.S. and Ph.D. all from National Cheng Kung University, Taiwan, R.O.C. Her major study interests are large-scale optimization problems and transportation network analysis. Her papers have appeared in Transportation Research part B, E, Networks and Spatial Economics, International Transactions in Operational Research and Fuzzy Sets and Systems.

**R. Dhanlakshmi** M. E., currently working as Senior System Engineer at IBM India Pvt. Ltd., Bangalore, India and pursuing her PhD in Computer Science from Mother Teresa women’s University, Kodaikanal, Tamilnadu. Her research interests are in the areas of intelligent tutoring system, networking, internet protocols, data mining and cryptography. She received her Bachelor's degree in Electrical and Electronics Engineering from Madras University, Master’s degree in Computer Science and Engineering from Madurai Kamaraj University. She has published two technical papers in the referred International journal and eight papers in national and international conferences.

**Omar El Beqqali** is currently a Professor at the University of Sidi Md Ben AbdEllah. He is holding a Master in Computer Sciences and a PhD respectively from INSA-Lyon and Claude Bernard University in France. He is leading the GRMS2I research group (Information Systems engineering and modeling) of Sidi Md Ben AbdEllah University. His main interests include Supply Chain field, distributed databases and Pervasive information Systems. He is an editorial board member of the International Journal of Product Lifecycle Management (IJPLM).

**Ian French**, PhD, is a Lecturer in Control Engineering at the University of Teesside. His research interests lie in the area of modelling and control of dynamic systems. This journey began more than 20 years ago with the study of the non-linear dynamics in fluid based actuators. The systems themselves then took a quantum leap in complexity, when AI techniques were used in the analysis of multi-loop process plant. Currently, and with yet another leap in complexity, his interests involve non-linear dynamics and chaos in socio-economic systems.

**K. Ganesh** is currently working as Assistant Consultant in Manufacturing Industry Practice at Tata Consultancy Services, Limited, Mumbai. He holds a Bachelor’s degree in Mechanical and Production Engineering, a Master’s degree in Industrial Engineering and a Doctorate from IIT Madras. He then joined the Supply Chain Management Department of Lakshmi Machine Works Limited, Coimbatore as Research Analyst and has served for two years. His research interests lie in the application of meta-heuristics and decision-making tools to logistics management. He has published several papers in leading research journals such as the European Journal of Operational Research and International Journal of Advanced Manufacturing Technology.

**Jairo Gutiérrez** is a Full Professor with the Systems Engineering Department, Universidad Tecnológica de Bolivar (UTB) and Director of Research and Innovation for UTB, Cartagena, Colombia.
He has recently been with the Information Systems Department at the University of Auckland. He was the Editor-in-Chief of the International Journal of Business Data Communications and Networking (2004-2008). He received his Systems and Engineering degree from Universidad de Los Andes, a Masters degree in Computer Science from Texas A&M University, and a Ph.D. in Information Systems from the University of Auckland. His current research topics are in network management systems, viable business models for mobile commerce, ubiquitous network services, and quality of service issues associated with Internet protocols.

Olli-Pekka Hilmola is an Acting Professor of Logistics at Lappeenranta University of Technology (LUT), in Kouvola, Finland. Concurrently he serves as a Visiting Prof. of Logistics at the Univ. of Skövde, Sweden, and as a Docent of Supply Chain Management at the Turku School of Econ. (Turku, Finland). His research interests include supply chain management, theory of constraints, system dynamics and total productivity management.

Kimberly Hollister, Ph.D. is a Professor in the Department of Management & Information Systems at Montclair State University, Upper Montclair, New Jersey. Dr. Hollister’s research falls into two main categories: Applied Operations Management and Educational Program Assessment of Management Information Systems and Operations Management curriculums. Dr. Hollister’s research has been published in many peer-reviewed journals including: European Journal of Operational Research, Journal of Informatics and Education Research, Journal of Accountancy, Journal of Business & Economic Studies. Dr. Hollister is actively engaged in sharing her work with the greater academic community at regional, national, and international conferences.

Jing Hou is presently a doctoral candidate at the Institute of Systems Engineering under School of Economics and Management at Southeast University in Nanjing, China. Her doctoral dissertation investigates backup contracts under supply disruption risks in supply chains. Jing earned her Bachelor’s Degree in Applied Mathematics in 2004 from Nanjing University of Technology in China and then joined the master-doctoral program in Systems Engineering at Southeast University in September 2005. She has completed several articles related to supply chain coordination mechanisms and has published in several leading academic journals such as Transportation Research Part E and Computers & Industrial Engineering. She has also participated in several industry sponsored projects, and case and book writing pertinent to global logistics management. She spent one year from September 2007 to August 2008 as a visiting doctoral student at Worcester Polytechnic Institute under the supervision of Professor Zeng. Her research interests include supply chain disruption risk management and supply chain contracts.

Wen-Chen Hu received a BE, an ME, an MS, and a PhD all in Computer Science from the Tamkang University, Taiwan, the National Central University, Taiwan, the University of Iowa, Iowa City, and the University of Florida, Gainesville in 1984, 1986, 1993, and 1998, respectively. Currently, he is an assistant professor in the Department of Computer Science of the University of North Dakota. Dr. Hu has published over 60 articles on refereed journals, conference proceedings, books, and encyclopedias, and edited one book titled Advances in Security and Payment Methods for Mobile Commerce. His current research interests include handheld computing, electronic and mobile commerce systems, web technologies, and databases. He is a member of IEEE Computer Society and ACM.
Jiao Jin is a MS candidate at School of Management Science and Engineering, Nanjing University, in China. Her research interest is logistics and supply chain management. She is one of the participants of NSFC under Grant 70671055 and 70731002. Her main work is taking on the model simulation and researching the adaptive negotiation mechanism for supply chain coordination.

Pekka Koskinen is a CEO of Confidea Business Consulting Ltd., company providing consultation services in logistics, supply chain management and e-business. Among his daily management work, he is completing doctoral dissertation for Turku School of Economics (Turku, Finland) concerning supply chain management in paper manufacturing. He has long working experience from the field, and has published some number of international conference articles.

Jia Luo received his MS in Management Science and Engineering at Nanjing University, in China. His research interests including supply chain disruption management and supply chain coordination management. He is one of the participants of NSFC under Grant 70671055. His work is developing mathematical model.

Gonzalo Mejia is an Associate Professor at the Department of Industrial Engineering of the Universidad de los Andes in Bogotá, Colombia. He obtained his BS and MS degrees from the Mechanical Engineering Department at the Universidad de los Andes and his PhD from the Industrial Engineering Department at Lehigh University in 2002. His research interests focus in areas of modeling and optimization of production systems and production planning and control. His papers have been published in international journals such as Annals of Operations Research, Robotics and Computer Integrated Manufacturing, Journal of Manufacturing Systems and the International Journal of Production Research. He is currently member of IIE and POMS.

Jairo R. Montoya-Torres is Associate Professor, Director of the Master in Operations Management at the School of Economics and Management Sciences, Universidad de La Sabana, Chía, Colombia. He was the first Director (2007-2009) of the undergraduate program in International Marketing and Logistics Management of the same university. He received a Ph.D. from École Nationale Supérieure des Mines de Saint-Étienne, France, a Master of Science in Industrial Engineering and Management from Institut National Polytechnique de Grenoble, France, and the Industrial Engineering degree (with highest honors) from Universidad del Norte, Barranquilla, Colombia. He has been Guest-Editor of the Annals of Operations Research, the Journal of Intelligent Manufacturing, and the International Journal of Information Systems and Supply Chain Management. His current research interests include operations scheduling, simulation of production and logistics systems, and design and management of supply chains in collaborative and sustainable environments.

Erik Mosekilde, is a Professor in Non-linear Dynamics in the Department of Physics at the Technical University of Denmark. He is currently a Chairman of MIDIT (Centre for Modelling and Non-linear Dynamics) and a co-ordinator of the EU Network of excellence in Biosimulation. Erik Mosekilde has been awarded numerous prizes for his work on chaotic phenomena and new types of instabilities in physical, technical, economic, and biological systems. He has published over 210 scientific papers. His recent books include: “Topics in Non-linear Dynamics” (1998), “Chaotic Synchronization” (2002), “Chaos in Piecewise-Smooth Systems” (2003)
**About the Contributors**

**El Habib Nfaoui** is a PhD student between University of Lyon (LIESP Laboratory) in France and University of Sidi Med Ben AbdEllah (GRMS2I group) in Morocco under a COTUTEILLE (co-advising) agreement. He received his Master in Computer Science from the University of Sidi Md Ben AbdEllah in 2004. His current research interests are Multi-Agent Systems and distributed simulation applied to supply chain context, decision-making and modeling.

**Mu Niu**, PhD, is a postdoctoral research associate in mathematical modelling group at Northumbria University. His research involves developing management microworlds using control theory and nonlinear dynamics and exploring different forecasting strategies. The current area of application is in the area of supply-chain management. Mu Niu is working in collaboration with Newcastle University UK and Technical University of Denmark, developing Bayesian statistical model and biological dynamic system.

**Yacine Ouzrout** is currently an associate Professor at the University of Lyon, he obtained his PhD in Computer Science from the National Institute of Technology (INSA) of Lyon in France. His research interests include simulation, Information Systems and Multi-Agent Systems for the Supply Chain, and Product Lifecycle Management. He is an editorial board member of the International Journal of Product Lifecycle Management (IJPLM). He also supervises several scientific activities (conferences...)

**H.P. Borgman (Hans)** currently professor of information management at Leiden University, The Netherlands. Previous appointments include the European Business School (Oestrich/Wiesbaden, Germany) the University of Michigan (Ann Arbor, USA) and RSM Erasmus University (Rotterdam, The Netherlands) where he obtained his Ph.D. in 1994. His research is aimed at providing a deeper understanding of the issues, challenges and opportunities in information management with a specific focus on IT Governance and on the adoption and use of new technologies such as data warehouses, e-commerce systems and knowledge management systems.

**Alejandra Padilla** is an associate professor at the Department of Industrial Engineering of the Center of Exact Sciences and Engineering (CUCEI) at University of Guadalajara. She graduated as industrial engineer in 1998 from the Technological Institute of Superior Studies of Occident (Mexico). She received a M.Sc. degree in Industrial Engineering in 2001 from the Department of Mathematics and Industrial Engineering at the Ecole Polytechnique de Montreal and obtained a Ph.D. in industrial engineering from the GILCO research laboratory at the Institut National Polytechnique de Grenoble in France (2005). Prior her graduate studies she worked as a product and process engineering for an international company leader on the electronic field. Her research interests are on modeling and optimizing flows in supply chains. She is member of the Association for Operations Management (APICS) and of the Institute of Industrial Engineers (IIE). She has lead research projects on optimization, logistic and supply chain management.

**P. Parthiban** belongs to the Faculty of Department of Production Engineering, National Institute of Technology (NIT), Tiruchirappalli, India. He holds a Bachelor’s degree in Mechanical Engineering, a Master’s degree in Industrial Engineering from NIT Tiruchirappalli. He is currently pursuing his doctoral research at JNT University, Hyderabad. His research interests include supply chain management, lean manufacturing, application of meta-heuristics and decision making tools to logistics management and artificial intelligence. He has published several papers in leading international journal such as Interna-
About the Contributors

Clay Posey received his D.B.A. in Computer Information Systems from Louisiana Tech University in 2010, and he is currently an assistant professor of Management Information Systems in the College of Business at University of Arkansas at Little Rock. His research interests focus on behavioral issues in information security, user behaviors in online environments, the ethical and social implications of the utilization of information technologies, and research methods. His research has been published in European Journal of Information Systems, Decision Sciences Journal of Innovative Education, and International Journal of Information Systems and Supply Chain Management. He has presented his research at various academic conferences including America’s Conference on Information Systems and Decision Sciences Institute’s Annual Conference. He and his wife have two beautiful children—Kennedy and Grayson.

Vittal Prabhu received his Ph.D. in Mechanical Engineering from the University of Wisconsin-Madison. He is currently a Professor in Industrial and Manufacturing Engineering at Penn State University. His research interests include distributed control systems, sensing and control of machines, and high performance computing for manufacturing systems. He teaches courses in robotics, controls, and manufacturing systems. He is the Founder and Co-Director of the Center for Manufacturing Enterprise Integration at Penn State University.

Nyoman Pujawan is a Professor of Supply Chain Engineering at the Department of Industrial Engineering, Sepuluh Nopember Institute of Technology (ITS), Surabaya, Indonesia. He received a first degree in Industrial Engineering from ITS, Indonesia, Master of Engineering in Industrial Engineering from Asian Institute of Technology (AIT) Bangkok, Thailand, and PhD in Management Science from Lancaster University, UK. His papers have been published in the International Journal of Production Economics, European Journal of Operational Research, Production Planning and Control, International Journal of Operations and Quantitative Management, International Journal of Integrated Supply Management, and International Journal of Logistics Systems and Management.

Wilfred Rachan, Domain of interest is in Supply Chain Synchronization i.e. getting the right item, in the right quantity, to the right place. Having worked in IT since 1984, Wilfred is keen to seek opportunities to harness ICT (Information & Communication Technology) to drive Supply Chain Synchronization. Wilfred has more than 5 years of experience in Container Handling Equipment sales in Asia-Pac and 18 years of experience in Software application consulting and sales in the South East Asia region. Wilfred has also taught part-time at German-Singapore institute (now part of Temasek Polytechnic) on MRP (Material requirement planning) and MPS (Master Production Scheduling) and SIPMM (Singapore Institute of Purchasing & Materials Management) on ERP (Enterprise Resources Planning). Wilfred is also listed in the Singapore “Who’s Who - Industry Professionals Directory”. Wilfred is currently registered as a PhD student at University of Leiden, Netherlands.

Gloria Rodríguez-Verjan graduated with highest honors as Industrial Engineer from Pontificia Universidad Javeriana, Bogotá, Colombia, and holds a Master of Science degree from Ecole Nationale Superieure des Mines de Saint-Etienne. She is currently working towards a doctoral degree in this last
university. Her work experience includes jobs as Logistics Analyst at P&A Renault, Bogotá, Colombia, and as part-time lecturer in Discrete-event Simulation at Pontificia Universidad Javeriana, Bogotá, Colombia. She has also performed some research work within the Research Group on Logistics and Marketing at Universidad de La Sabana, Colombia. Her work about coordination and collaboration within the supply chain has been published in various academic journals and presented in various international conferences.

**Lionel Seinturier** is a professor of computer science at the University of Lille, France. He obtained his PHD in 1997 from CNAM, Paris, France. His research interests include component-based software engineering, aspect-oriented application, middleware, distributed applications and service-oriented architectures based on Web service.

**Petia Sice**, PhD, is a Lecturer in Information Systems at Northumbria University. Her research interests lie in modelling and knowing of social systems from a complexity perspective. This includes first and second order cybernetics, autopoiesis and self-organisation, non-linear dynamics and chaos, and the philosophy of thought and language. She is also a co-founder of the Organisational Learning Centre at the breathing equipment manufacturer Draeger Safety UK, where she is conducting research in the role of human experience and language in the promotion of learning.

**Chin Boo Soon** is a Lecturer in Information Systems and Operations Management at the University of Auckland Business School, New Zealand. He is also a Research Associate at the Centre for Supply Chain Management, a Research Centre at the University of Auckland Business School. His current research topics are the adoption of radio frequency identification in the supply chains, logistics and transport, business process management, and reverse logistics. Chin Boo has worked in the logistics industry for ten years. He received a Bachelor of Commerce in Information Systems (First Class Honors, 2002), a Masters degree in Information Systems (2003), and a Ph.D. in Information Systems and Operations Management (2010) from The University of Auckland.

**A.Thangam** is a Senior Research Fellow under CSIR fellowship scheme in the Department of Mathematics, Gandhigram Rural University. His research interests are in the field of inventory management and supply chain management. To his credit he has published articles in the reputed international journals.
Fidel Torres is an Associate Professor at the Department of Industrial Engineering of the Universidad de los Andes. He obtained his BS and Msc degrees from the Electrical Engineering Department at the Universidad de los Andes and his PhD from the Université Paul Sabatier (Toulouse, France) in 1995. He also holds a BS degree in Mathematics. His research interests include logistics and production planning and control. He is the Director of the PyLO (Production and Logistics Research Group) at the Universidad de los Andes.

R. Uthayakumar was born in Dindigul, India, in 1967. He received the PhD from the Gandhigram Rural University, Gandhigram, Tamil Nadu, India, in 2000. Now he is working as a Reader in Mathematics, in the Department of Mathematics, Gandhigram Rural University, Gandhigram. He has done research in the area of Functional Analysis. His current research interests are primarily in the field of Optimisation and Theory of Fractal Analysis. He is also interested in finding out the general Mathematical model in the field of Inventory Management and supply chain. To his credit, he has published many research articles in the area of Inventory Management and supply chain in the reputed international journals. Moreover, he is guiding many scholars in the above said areas. He is a life member in Ramanujan Mathematical Society. He has received a best paper award for young Mathematicians from Ramanujan Mathematical Society. In addition to teach various courses, he delivered various invited lectures in many academic institutions.

Iwan Vanany was a PhD candidate from the School of Management, Universiti Sains Malaysia. His current research interests are Supply Chain Relationship and Logistics.

Liya Wang was born in P. R. China, in 1976. She received her dual title Ph. D degree of Industrial Engineering and Operations Research from Penn State University, USA, in 2006 with a thesis in efficient simulation optimization algorithm design. From September 2006 to May 2008, she worked as an assistant research professor at Center for Air Transportation Systems Research, George Mason University, USA. Now she is currently working for University of Affiliated Research Center, University of California-Santa Cruz, as an associate research scientist. Her main research interests are in designing efficient algorithms for complicated systems such as supply chain systems and air transportation network.

Tiaojun Xiao is currently an Associate Professor in the School of Management Science and Engineering, Nanjing University, in China. He received his PhD in Management Science and Engineering at Southeast University, in China, and MS in Mathematics at Central South University of Technology, in China. He is an elected member of the International Statistical Institute. He is an editorial board member of International Journal of Applied Management Science, International Journal of Data Analysis Techniques and Strategies, and International Journal of Information Systems and Supply Chain Management, and Far East Editor of International Journal of Information & Decision Sciences. His research
About the Contributors

Ruben Xing received his PhD, Master of Science (M.S), and Master of Arts (M.A) in from Columbia University, New York. Having worked for more than 15 years, Dr. Xing has held senior IT management positions at several large financial conglomerates like Merrill Lynch, Citigroup, First-Boston/Credit Suisse in metropolitan New York. His current research interests include Broadband and Wireless Communications, the Internet transformations and security, Disaster Recover/Business Continuity Planning, and Supply Chain Management.

Ruiliang Yan is an assistant professor of marketing at Indiana University Northwest. He received his PhD in marketing from the University of Wisconsin, Milwaukee. He has published one book and a number of articles in the different refereed journals. He also is serving as referee for many highly prestigious journals. He specializes in marketing modeling, retailing and supply chain management.

Suhaiza Zailani is an Associate Professor of Operations Management at the School of Management, Universiti Sains Malaysia. She received a PhD and MSc from Lancaster university, United Kingdom and B.S. degree from Universiti Putra Malaysia. She has been teaching for the past 10 years as well as being involved in a few management consultancies focusing on the areas of operations management. She has more than 150 Research Publications in International/National Seminars and Journals. She is quite comfortable in operations related projects. Her areas of interest are supply chain, logistics, and transportations by involving in few important projects, which are suited to her capability.

Amy Zeng has been on the faculty of Business at Worcester Polytechnic Institute in Massachusetts, USA since 1999. She is the Director of Operations and Industrial Engineering Program at the School of Business. She earned her doctoral degree from the Smeal College of Business Administration at Pennsylvania State University, and M.S. in Engineering from the University of Washington in Seattle. Her expertise lies in the areas of efficient operational decisions and tactics for supply chain and logistics processes, supply chain disruption risk management, and green/reverse supply chain design and management. She has published over seventy articles on these topics in professional journals, books, and conference proceedings, and made nearly eighty presentations at a wide variety of occasions, out of which are several keynote speeches at international conferences. Dr. Zeng is also a recipient of numerous awards and recognitions for her teaching, research and service achievements, and an editorial board member of three academic journals.

Lindu Zhao is a professor and the Director of the Institute of Systems Engineering, and also an Associate Dean of School of Economics and Management at Southeast University in Nanjing, China. He teaches supply chain and logistics management and project management, among others. He earned his doctoral degree from the Institute of Systems Engineering at Southeast University, and M.S. in Computer Application, and CG & CAD from Jiangsu University of Science and Technology in China. He has served as a principal investigator of over twenty projects sponsored by various funding agencies in
China and received a number of awards and recognitions for his project achievements. He has published seven books and over eighty papers in international and national academic journals and magazines on the topics of supply chain and logistics management. His research interests include supply chain and logistics systems, complex system analysis and decision making, and emergency system optimization and control.

**Bin Zhou** is an Assistant Professor in the College of Business and Public Administration, Kean University, USA. He obtained his Ph.D. and MBA degrees in Management Science and Supply Chain Management from Rutgers Business School, Rutgers University. His research interests include theory and application of supply chain management, logistics and transportation, production and inventory systems, and information technology. His research work has appeared in International Journal of Production Economics, European Journal of Operational Research, International Journal of Systems Science, among others. Professor Zhou also serves in the editorial board of International Journal of Information Systems and Social Change.

**Yanjun Zuo** is an assistant professor at the University of North Dakota, Grand Forks, USA. He earned his Ph.D. in Computer Science from the University of Arkansas, Fayetteville, USA in 2005. He also holds two master’s degrees in Computer Science and Business Administration from the University of Arkansas and the University of North Dakota, Grand Forks, USA, respectively. His research interests include information and computer security, trustworthy computing, survivable and self-healing systems, and information privacy protection. He has published numerous articles in referred journals and conference proceedings in those fields.
