About the Contributors

**John Wang** is a professor in the Department of Management and Information Systems at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his Ph.D. in operations research from Temple University. He has published over 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of *Int. J. of Information Systems in the Service Sector, Int. J. of Information Systems and Supply Chain Management*. Furthermore, he is the Editor of *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* (six-volume) and the Editor of the *Encyclopedia of Data Warehousing and Mining, 2e* (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

* * *

**Marina Avgeri** received her MS in international marketing from the University of Strathclyde, MS in finance from Lancaster University and BA in business administration from the University of Thessaloniki. After maturing a two year experience in the International Markets Department of Bank 121, she moved to the Foreign Department of the Monte dei Paschi di Siena Bank where she is currently working.

**Nuri Basoglu** is a Professor in Department of Management Information Systems, Bogazici University, Istanbul, Turkey. His current interests are customer-focused product development, information technology adaptation and wireless service design, adaptive human computer interfaces. He has published articles in journals such as *Technology Forecasting and Social Change, Journal of High Technology Management, Technology in Society, International Journal of Services Sciences, Computers in Human Behavior and Foresight*. He received his BS in Industrial Engineering at Bogazici University and MS and PhD in Business Administration at Istanbul University.

**Aileen Cater-Steel** is an Associate Professor in Information Systems at the University of Southern Queensland (USQ). She leads a research team investigating the adoption and benefits of IT Service Management frameworks such as the *IT Infrastructure Library (ITIL)*. The team has achieved funding from the Australian Research Council for two ITSM projects to research the return on investment from ITIL implementation and to develop a tool for software-mediated ITSM process assessment. Her current research interests include IT governance and assessment, software process improvement, doctoral supervision, research methodologies and gender issues in IS/IT. She has also published research related to software engineering standards, organisational and national culture, and electronic commerce. From
a teaching perspective, she applies authentic learning principles and has incorporated ITSM certifica-
tion into USQ's Information Systems curriculum. Prior to her academic appointment, Aileen worked
in private sector and government organisations where her career progressed from programmer, systems
analyst and project manager to IT Manager.

Chen-Yang Cheng received his Ph.D. in Industrial and Manufacturing Engineering at Penn State
University. He is currently an Assistant Professor in Department of Industrial Engineering and Enterprise
Information at Tunghai University. His research interests include Computer Integrated Manufacturing,
Human Computer Interaction, Distributed Systems and Control, Intelligent Systems.

Sue Conger has a Ph.D. in computer information systems from the Stern School of Management at
New York University. She is on the faculty of University of Dallas where she manages both Informa-
tion Technology and IT Service Management (ITSM) programs. Professor Conger is Vice President of
Chapters for the Association of Information Systems (AIS), President of special interest group on IT
Services (AIS SIGSVIC), manages the ITSMF-USA Relationship Subcommittee, and hosts the ITSMF-
USA Academic Forum. She is on five editorial boards and the program and planning committees for
several conferences. She authored two books and is working on two others.

Lawrence Cunningham is a Professor of Marketing at the Business School at the University of
Colorado Denver and a Distinguished Research Professor and Fellow at the EDHEC School of Business
in Lille/Nice France. Professor Cunningham has served as the Joseph and Martha Davis Term Professor
of Marketing at the University of Colorado Denver (2003-2007) and as a Fulbright Distinguished Profes-
sor at the University of Linz in International Business in the 2006-2007 Fulbright Program. Professor
Cunningham is a member of the Editorial Boards of the Journal of Business Research, International
Journal of Service Industry Management, the Services Industries Journal, Chinese Marketing Review,
Journal of Chinese Marketing, International Journal of Information Systems and Services, Interna-
tional Journal of Information Systems and Decision Sciences, Journal of Air Transportation and World
Review of Inter-model Transportation Research. He also serves as an ad hoc reviewer for the Journal
of the Academy of Marketing Science and Psychology and Marketing. His main areas of research are
services, international services marketing and international marketing.

Tugrul Daim is an Associate Professor of Engineering and Technology Management at Portland
State University. Previously, he worked at Intel Corporation where he had held management positions
ranging from technology planning to new product development. He received his BS in Mechanical En-
gineering from Bogazici University in Turkey, MS in Mechanical Engineering from Lehigh University
in Pennsylvania, another MS in Engineering Management from Portland State University and a PhD
in Systems Science-Engineering Management from Portland State University.

Darko Galinec was born in Zagreb, 1967. He obtained PhD (2009) and MSc degree (program and
information engineering, 2000) in Information Science from Faculty of Organization and Informat-
ics at University of Zagreb. His research interests include appliance of fuzzy logic, service modeling,
enterprise application integration (EAI) and command and control information systems (C2IS) interop-
erability. His work has appeared in such scientific books and journals as Encyclopedia of Multimedia
Technology and Networking 2nd Edition (Information Science Reference, USA), Journal of Informa-
About the Contributors

Ovsei Gelman-Muravchik is a Senior Researcher at the Center of Applied Sciences and Technology Development (CCADET) of the National Autonomous University of Mexico (UNAM). He holds a BS, MS and PhD in Physics and Mathematics from the University of Tbilisi, Georgia. In the last 35 years he has contributed to the advance of the Systems Science discipline and Interdisciplinary Research through the publication of approximately 250 research papers in books, national and international journals and conference proceedings, as well as by the participation as an advisor in the Engineering Graduate Program at UNAM and by the consulting for governmental and private organizations.

James Gerlach is a professor of information systems at the The Business School, University of Colorado at Denver. He holds a M.S. in computer science and a Ph.D. in management, both from Purdue University. His research interests include e-commerce and management of information systems technology. His work appears in such notable journals as Management Information Systems Quarterly, IEEE Computer, IEEE Software, Communications of the ACM, Information & Management, Decision Support Systems, and The Accounting Review. He currently serves on the editorial boards of International Journal of Information Systems in the Service Sector and International Journal of Information and Decision Sciences.

Peijun Guo received the BE, ME and PhD in 1990, 1993 and 1996, respectively, all from Dalian University of Technology and the PhD in 2000 from Osaka Prefecture University. He was an Assistant Professor (2000–2001) and an Associate Professor (2001–2007) in Faculty of Economics, Kagawa University. Since 2007, he has been an Associate Professor of Decision Sciences in Faculty of Business Administration, Yokohama National University. His papers appear in IEEE Transactions on SMC-Part A: Systems and Humans, European Journal of Operational Research, Fuzzy Sets and Systems, Computational Statistics and Data Analysis, Information Sciences, etc.

Michael Harper is a senior instructor of Operations Management and Statistics in the Business School at the University of Colorado at Denver. The courses he teaches include operations management, statistics, supply chain management, and project management. He received a Ph.D. in operations research and statistics from Rensselaer Polytechnic Institute in Troy, New York. He has worked as a staff member at Los Alamos Scientific Laboratory and as a consultant in the oil industry. He has published in government research publications, Journal of Air Transportation, Journal of Financial Services Marketing, and Geophysics.
About the Contributors

Byung Ho Jeong is a professor of Industrial and Information Systems Engineering at the Chonbuk National University, KOREA. He obtained his Ph.D degree and master’s degree in Industrial Engineering, Korea Advanced Institute of Science and Technology. His research interests include Multi-attribute decision making, Simulation modeling analysis in service sector and Supply Chain Management. His articles appeared in the International Journal of Operational Research and International Journal of Production Research.

Kimberly Hollister, Ph.D. is an Associate Professor in the Department of Management & Information Systems at Montclair State University, Upper Montclair, New Jersey. Dr. Hollister’s research falls into two main categories: Applied Operations Management and Educational Program Assessment of Management Information Systems and Operations Management curriculums. Dr. Hollister’s research has been published in many peer-reviewed journals including: European Journal of Operational Research, Journal of Informatics and Education Research, Journal of Accountancy, Journal of Business & Economic Studies. Dr. Hollister is actively engaged in sharing her work with the greater academic community at regional, national, and international conferences.

Banu Kargin graduated from the Department of Management Information Systems of Bogazici University in 2002. She earned her MA in MIS Department of Bogazici University. Now, she is a Senior Specialist in the Department of Value Added Services of the leading GSM operator, Turkcell in Turkey. She has experience in the area of database marketing, customer analytics and mobile services. Her research areas of interest include database marketing and value added services, especially messaging services, location based services (LBS) and mobile advertising.

Deborah Kellogg, Ph.D., is an Associate Professor of Operations Management in the Business School at the University of Colorado Denver. She received her Ph.D. in Operations Management from the University of Southern California, a M.S. in Information Systems from University of Colorado Denver, and her B.S. in Nursing from Pacific Lutheran University. Her research interests include service delivery systems, service quality, healthcare operations, and service quality. Her research articles include publications in Management Science, Journal of Operations Management, International Journal of Service Industry Management, and Interfaces.

Soo Kim is currently an Assistant Professor in the Department of Management & Information Systems, School of Business, Montclair State University. Dr. Kim received her Ph.D. in Organizational Behavior from the School of Hospitality Management, The Pennsylvania State University. Her research interests include leadership (leader-member exchange), emotion at work, counterproductive work behavior, and self-control theory in the service industry. Her works appeared in International Journal of Business Research, Review of Business Research, Journal of Academy of Business and Economics, Journal of Human Resources in Hospitality & Tourism, Encyclopedia of Data Warehousing and Mining - 2nd Edition, and The Encyclopedia of Human Resource Management and Workplace Policy.

Ksenija Klasić (Zagreb, 1955) took her BSc in theoretical physics at the University of Zagreb. After several years of professorial experience in system engineering, she became specialist for data organization in the SOUR-Rade Koncar. She obtained her Ph.D. in Information Science at the Faculty of Orga-
organization and Informatics at the University of Zagreb. She has worked as an independent consultant for
development and management of business processes, organization and IT. Until 2009, she worked as the
permanent court expert for IT industry. She also worked in insurance business, most notably Croatia
Insurance Ltd, and Allianz Zagreb. Since 2000 she teaches information science and insurance at various
polytechnic schools and universities. She is a professor of information science and assistant professor
for economics. She wrote a series (56) of articles in information science and insurance as well as three
textbooks used in various universities, some of which have been translated to several languages. She
currently works in K & K Insurance Broker Ltd as a licensed insurance broker and a board member.

Stephen Kwan is a professor of Management Information Systems at the College of Business, San
José State University. He was the founding chair of the department and had served as the Senior As-
sociate Dean of the College. He is currently working on the development of a Service Science, Manage-
ment and Engineering (SSME) program at his university, and the promotion of education and research
about standardization in US universities. He received a B.S. and M.S. in Computer Science from the
University of Oregon, and a Ph.D. in Management from UCLA.

Yair Levy is an associate professor at the Graduate School of Computer and Information Sciences
at Nova Southeastern University. He earned his Bachelor’s degree in Aerospace Engineering from the
Technion, Israel. He received his MBA and Ph.D. from Florida International University. His current
research interests include effectiveness of IS and cognitive aspects of IS. His research publications ap-
ppear in the IS journals, conference proceedings, invited book chapters, and encyclopedias. He is the
editor-in-chief of the International Journal of Doctoral Studies and serving as an editorial review board
member of several other refereed journals. He has been serving as a referee reviewer for numerous
scientific journals.

Maria Lexhagen, PhD, is a senior lecturer and researcher at the European Tourism Research Institute
at Mid Sweden University in Östersund, Sweden. Her teaching and research interests are in the area of
marketing, customer behaviour, and information and communication technology, applied to the field of
travel and tourism. More specifically research has in recent years been focused on customer perceived
value when information and communication technology is used for marketing purposes in travel and
tourism. Currently she is involved in research on the topics of “Destination knowledge management”,
“Customer-based innovation”, “Data mining in tourism”, and “Popular culture tourism and the use of
social media”. She has published papers in journals such as, Scandinavian Journal of Hospitality and
Tourism, Journal of Information Technology and Tourism, and Event Management. Furthermore, for 10
years she has been a member of the International Federation for Information Technology and Tourism
which regularly organizes the ENTER conference where she has also published several articles in the
conference proceedings.

Yan Li received her PhD degree from the Flinders University of South Australia, Australia in March
2003. She is currently an Associate Professor in the Department of Mathematics and Computing at the
University of Southern Queensland, Australia. Her research interests lie in the areas of artificial inteli-
gent, Neural Networks, Computer Communications and Internet Technologies, Blind Signal Separation,
Signal/Image Processing technologies and their applications on medical bioinformatics etc.
About the Contributors

Manuel Mora-Tavarez is an Associate Professor of Information Systems in the Autonomous University of Aguascalientes (UAA), Mexico, since 1994. Dr. Mora holds a BS in Computer Systems Engineering (1984) and a MSc in Artificial Intelligence (1989) from Monterrey Tech (ITESM), and an EngD in Systems Engineering (2003) from the National Autonomous University of Mexico (UNAM). He has published around 35 research papers in international top conferences, books and/or journals. His main research interest is the development of a common management and engineering body of knowledge for software engineering, systems engineering and information systems underpinned in the Systems Approach.

Kenneth Murphy (Ken) is an Associate Professor of Information Systems in the Atkinson Graduate School of Management at Willamette University. Dr. Murphy’s recent research focuses on business integration, knowledge sharing and enterprise resource planning systems implementation strategies, methodologies and management in global organizations. He has also published in the areas of scheduling and organizational learning. Dr. Murphy has published in Operations Research, Naval Research Logistics, Communications of the ACM and Information Systems Journals. He is currently an active member of The Institute for Operations Research and Management Science (INFORMS), the Decision Sciences Institute (DSI), and the Association of Information Systems (AIS). He holds a B.A in Mathematics from Reed College, M.S. in Statistics from Oregon State University and a M.S. and Ph.D. from Carnegie Mellon University in Operations Research.

Rory O’Connor is a Senior Lecturer in Software Engineering at Dublin City University and a Senior Researcher with Lero, The Irish Software Engineering Research Centre. He is also Chairperson of the Irish Software Testing Board and an Irish representative to ISO/IEC JTC1/SC7. He has published more that 60 referred articles in journals and conference, and has edited 8 books. His research interests are centered on the processes whereby software intensive systems are designed, implemented and managed, in particular the methods and techniques for supporting the work of software project managers and software developers in relation to software process improvement and management of software development projects.

Marco Papa received his PhD in business administration from the University of Bari, MA in Accounting and Finance from Lancaster University, and BA in economics and commerce from the University of Bari. Throughout the academic year 2005-2006, he worked at the Department of Accounting and Finance of the University of Glasgow as visiting researcher. He is currently lecturer in business administration at the Faculty of Economics of the University of Bari. His research interests concern e-tourism and business reporting.

Claudio Pinhanez is a computer scientist, a service scientist, and a media artist. He has been a research scientist at the IBM Thomas J. Watson Research Center since 1999, where he currently conducts research on service science (theory, tools, methodology, and applications); and in ubiquitous computing and advanced computer interfaces. Claudio was born in Brazil, where he received a Bachelor’s degree in Mathematics and a M.Sc. in Computer Science from the University of São Paulo. He obtained his Ph.D. in Media Arts and Sciences in 1999 from the MIT Media Laboratory. Claudio has more than 90 international publications, including 3 best paper awards, and several patents in the US, Japan, and EU.

Paolo Popoli is Associate Professor on “Business Management” at “Parthenope” University of Naples, Italy. He is member of “Accademia Italiana di Economia Aziendale” (AIDEA) and “Society for Global Business and Economic Development” (SGBED), Montclair State University, Montclair, NJ. His main area of interest is Management both in public and private sectors, with a special focus on firm’s theoretical analysis. He is author of scientific publications on several themes: managerial control, privatization, deregulation, marketing management. In the recent years he is been focusing his researches on the outsourcing processes and decisions, deepening strategic and operational aspects of outsourcing risk management.

Vittal Prabhu received his Ph.D. in mechanical engineering from the University of Wisconsin-Madison. He is currently a professor of industrial engineering at the Pennsylvania State University. His research interests include distributed control systems, sensing and control of machines, and high-performance computing for manufacturing systems. He teaches courses in robotics, information technology, and manufacturing systems. He is the founder and codirector of the Center for Manufacturing Enterprise Integration at Penn State.

Mahesh Raisinghani is an associate professor in the Executive MBA program at the TWU School of Management. He is a Certified E-Commerce Consultant (CEC) and a Project Management Professional (PMP). Dr. Raisinghani was awarded the 2008 Excellence in Research & Scholarship award and the 2007 G. Ann Uhlir Endowed Fellowship in Higher Education Administration. He was also the recipient of TWU School of Management’s 2005 Best Professor Award for the Most Innovative Teaching Methods; 2002 research award; 2001 King/Haggar Award for excellence in teaching, research and service; and a 1999 UD-GSM Presidential Award. His research has been published in several academic journals such as IEEE Transactions on Engineering Management, Information & Management, Information Resources Management Journal, International Journal of Innovation and Learning, Journal of IT Review, Journal of Global IT Management among others and international/national conferences. Dr. Raisinghani is included in the millennium edition of Who’s Who in the World, Who’s Who among Professionals, Who’s Who among America’s Teachers and Who’s Who in Information Technology.
About the Contributors

Guttorm Sindre is professor in Information Systems at the Department of Computer and Information Science, Norwegian University of Science and Technology. His main research interests are information systems development methods, conceptual modeling, model quality, and requirements engineering, specifically focusing on early stage elicitation techniques for safety and security requirements. He has participated in several EU and Norwegian research projects and was manager of the WISEMOD project, in which this work was done. He has published more than 50 papers in refereed international journals and conferences, and was program co-chair of CAiSE’07 and posters and demos chair of RE’08.

Jim Spohrer is Director of Service Research at IBM’s Almaden Research Center in San José, CA, where he directs efforts to develop systematic approaches to service innovation. Jim is a founding member of the SRII (Service Research and Innovation Initiative - http:/www.thesrii.org). Previously, he was CTO of IBM’s Venture Capital Relations Group. In the 1990’s he was a Distinguished Engineer Scientist and Technologists in Apple Computer’s Advanced Technology Group. Jim has a PhD in Computer Science from Yale University, and a BS Physics from MIT.

Lili Sun received her PhD degree in computer science from the University of Southern Queensland (USQ), Australia in 2010. She is currently a research assistant at the University of Southern Queensland. Her research interests include databases, Web service and access control for Electronic service system. She has published about 15 articles in international journals and conferences.

Andrew Targowski was engaged in the development of social computing in totalitarian Poland (INFOSTRADA and Social Security # for 38 million citizens - PESEL-1972) and received political asylum in the U.S. during the crackdown on Solidarity in 1981. He has been a professor of Computer Information Systems at Western Michigan University since 1980. He published 21 books on information technology, history, and political science (Red Fascism-1982) in English and Polish. During the 1990s he was a Director of the TeleCITY of Kalamazoo Project, one of the first digital cities in the U.S. He investigates the role of info-communication in enterprise, economy, and civilization. He is a President of the International Society for the Comparative Study of Civilizations and a former Chairman of the Advisory Council of the Information Resources Management Association (1995-2003).

Bill Vassiliadis obtained his diploma and PhD from the Department of Computer Engineering and Informatics of the University of Patras (1995 and 2003, respectively). He is currently working as a post-doctoral research fellow at the Digital Systems and Media Computing Lab of the Hellenic Open University. His current research interests include information systems design and information management. He has published more than 50 papers in international conferences and journals.

Terje Wahl was a PhD student at the Department of Computer and Information Science, Norwegian University of Science and Technology, while most of the work with this paper was done. His main research focus during his PhD studies was semantic web and software engineering methods for developing service-oriented systems. He was also the PhD students’ representative in the university’s executive board. Wahl is now in the R&D department of Intrapoint in Trondheim, Norway, a company which develops incident and crisis management solutions, in particular automated real-time decision support systems.
William Wall is the Manager of International Business Development and Contract Agreement for Thai Polycons Public Company Limited, Bangkok Thailand and International Advisor for Civil Tech Design and Consultants Co., Ltd., Bangkok, Thailand. He holds a Master degree in International Communication and a PhD in International Business Management. He has lectured at Columbia, Yale, and New York University, Pratt Institute, School of Architecture and Fashion Institute of Technology in the United States and at Chulalongkorn University, University of the Thai Chamber of Commerce and Ramkhamhaeng University in Thailand. His research has been presented at numerous conferences in Thailand and the UAE and he has been published in International Journals such as the Language Forum in India and the International Journal of Information Systems in the Service Sector in the United States of America. His first book, “Ten Things Thai Business People Should Know” is to be published in the near future.

Yawei Wang is currently an Assistant Professor in the Department of Marketing at Montclair State University, NJ. She holds a Ph.D. in Recreation & Tourism from Clemson University, SC. Her research focuses on travel and tourism - with emphasis on mature tourism and aging issues. Her teaching interests include introduction to marketing, introduction to leisure & tourism, behavioral concepts in leisure & tourism, research methods in leisure & tourism. Prior to joining Montclair State University, Yawei worked with the Gerontology Research Interdisciplinary Team in the College of Health Education & Human Development at Clemson, SC.

Hua Wang is an associate professor in the University of Southern Queensland. Dr Wang awarded a PhD degree in Computer Science from the University of Southern Queensland in 2004. He has been active in the areas of Information Systems Management, Distributed Database Management Systems, Access Control, Software Engineering and Electronic Commerce. He has participated in research projects on mobile electronic system, Web service, and role-based access control for Electronic service system, and has already published over 100 research papers. He is the co-editor-in-chief for ICST Transaction on Scalable Information Systems and was an editor of the special issue for International Journal of Security and Networks (IJSN) as well as an Editorial Board Member of The Open Cybernetics and Systemics Journal. He is also a member of the Australian Research Council Network in Enterprise Information Infrastructure.

John Wang is a full professor at Montclair State University. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. He has published more than 100 refereed papers and six books. He has also developed several computer software programs based on his research findings. He is the Editor of the Encyclopedia of Data Warehousing and Mining, 1st and 2nd Edition. Also, he is the Editor-in-Chief of International Journal of Applied Management Science, International Journal of Information Systems and Supply Chain Management, International Journal of Data Analysis Techniques and Strategies. He has served as a guest editor and referee for many other highly prestigious journals. His long-term research goal is on the synergy of operations research, data mining and cybernetics.

Jun Xia is Assistant Professor of Management and International Business at Montclair State University, New Jersey, U.S. A. He holds a Ph.D. degree in Management from Texas Tech University. His research interests include foreign entry strategies, institutional change, and transition economies.
Stelios Zanakis is Professor of Decision Science & Information Systems at Florida International University. He served as associate editor for Decision Sciences and as guest editor for Management Science and the European Journal of Operational Research. His articles have appeared in major academic journals, mainly on multicriteria decision support systems, multivariate data analysis, and knowledge discovery in databases. His latest book “Decision Making: Recent Developments & Worldwide Applications” (Kluwer 2000) includes papers drawn from the 5th International Conference of the Decision Sciences Institute, Athens, Greece, 1999, for which he was the program chair. He has been a consultant to several industrial, hospital, governmental and service organizations, and an expert witness on statistical audits in legal disputes. Degrees include a PhD in Management Science, MS in Statistics and MBA, all from The Pennsylvania State University, and a BS in Mechanical/ Electrical Engineering from the National Technical University of Athens, Greece.
