About the Contributors

**Vishanth Weerakkody** is a member of faculty in the Business School at Brunel University (UK). VW was previously a faculty member in the Department of IS and Computing at Brunel University and he has held various IT positions in multinational organizations, including IBM UK. VW is a member of the British Computer Society, Chartered IT professional and a Fellow of the UK Higher Education Academy. He is the current Editor-in-Chief of the International Journal of Electronic Government Research.

* * *

**Hana Al-Nuaim** is an assistant professor in Computer Science and the Dean of King Abdulaziz University (Women’s Campuses), Jeddah, Saudi Arabia. She received her Ms, DSc in CS from George Washington University, USA, and her Bachelours in CS from the University of Texas at Austin. She was a former Department Chair and as Vice Dean of Distance Learning launched the first e-learning program in the kingdom for women. She has extensive faculty training background and referred papers for publications. Her publications and primary research interests are in HCI, usability, multimedia, e-learning, e-government and knowledge cities and has been involved in many web-based research projects.

**Shafi Al-Shafi** is a PhD researcher at the School of Information Systems, Computing and Mathematics, Brunel University, UK. He obtained his Master in Business Administration MBA (Information Technology) from the Faculty of Engineering and Computing, Coventry University in the UK. His research interests include e-government adoption and diffusion, impact of integration technologies, strategic management and e-commerce.

**Kenneth Allendoerfer** is an engineering research psychologist with the Federal Aviation Administration, where he has been developing and evaluating air traffic control systems for more than 10 years. His research interests include designing user interfaces for high-stakes environments, information visualization, usable information security, and incorporating user-centered methods into formal software development methodologies. Mr. Allendoerfer holds degrees in psychology from Carleton College and the State University of New York at Buffalo, and is currently a doctoral candidate at Drexel University.

**James (Jim) R. Beatty**, PhD, is a Professor of Information and Decision Systems, an Adjunct Professor of Management, and coordinator of Quantitative Methods in the College of Business Administration at San Diego State University. He serves on the faculty for the Executive MBA program and was one of the founding coordinators for SDSU’s Institute for Quality and Productivity. He has served on the
National Board of Examiners for the Malcolm Baldrige National Quality Program nine times and has led site visits and assisted organizations through Baldrige self-assessment. He was named Professor of the Year for SDSU in 2001. He has over 100 publications, textbooks, and papers. He is a Certified Compensation Professional (CCP) with WorldatWork and a Senior Professional in Human Resources (SPHR) with the American Society for Personnel Administration. He earned a Ph.D. with a double major in statistics and psychology and completed postdoctoral training in multivariate statistics.

**John J. Burbridge, Jr.** is a Professor of Business Administration and the former Dean of the Love School of Business at Elon University. Prior to Elon, Dr. Burbridge was Associate Dean of the Joseph A. Sellinger School of Business at Loyola College in Maryland from 1992 to 1996. Dr. Burbridge received his B.S., M.S., and Ph.D. in industrial engineering from Lehigh University in Bethlehem, Pennsylvania. He has made numerous presentations and authored refereed journal articles in journals such as Journal of International Business Studies, Competitiveness Review, Journal of Global Information Management, Journal of Applied Business and Economics, and others.

**Lemuria Carter** is an assistant professor at North Carolina Agricultural & Technical State University. Her primary research interests include e-government diffusion, internet voting, Web-based trust and risk perceptions. She has published in several top-tier journals including, Journal of Strategic Information Systems, Information Systems Journal, and Communications of the ACM. She also serves as an e-government mini-track co-chair at Americas Conference on Information Systems (AMCIS) and the Hawaii International Conference on Systems Sciences (HICSS).

**Wichian Chutimaskul** received his Ph.D. from the University of Sheffield, U.K. in 1994. He is a member of the International Federation for Information Processing Technical Committee on Information System for Public Administration (IFIP 8.5). He is now working as the Senior Associate Dean for Academic Affairs at the School of Information Technology, King Mongkut’s University of Technology Thonburi, Thailand. He is also a member of the University Academic Board, and the chairperson for the M.Sc. and Ph.D. programs in information technology. His international involvement also includes Thai-Japanese ICT scientific exchange, Thai-Austria Scientific exchange, and Thai University Administrators’ Shadowing Program in Canada. His current research is in the areas of e-Government and software development methodology.

**Cassandra E. DiRienzo** is an Assistant Professor of Economics at the Love School of Business at Elon University. She holds a M.E. and a Ph.D. from North Carolina State University. Her research interests are econometrics and statistical forecasting as well as economic and business applications of nonpara-

Ferne Friedman-Berg is a Federal Aviation Administration engineering research psychologist. She has conducted research on air traffic control systems, tools, and websites for over six years. Her research interests include performing human-in-the-loop simulations and analyzing user interaction patterns to better understand expert cognition and to aid in the design of more effective and more usable air traffic control tools. She is also interested in using eye-movement metrics to measure workload and as an index of interest in display design components. Dr. Friedman-Berg received her B.A. in psychology from Temple University and her M.S. and Ph.D. in cognitive psychology from the University of Massachusetts, Amherst.

Katarina Lindblad Gidlund is an Associate Professor in Social Informatics, Mid Sweden University, Sweden, where she is the leader of the CITIZYS Research Group, a multidisciplinary research group focusing on IT and sustainable development. Her research interest is directed towards accountability in IT innovation and design processes in order to enhance quality. She is the co-coordinator of the national eGovernment Research Network in Sweden, editor of the International Journal of Public Information Systems and part of the programme committee of a number of international conferences. She is also on the board for the National Association for eCompetence (REK) and a member of the jury for Guldlänken, a national award for the best public e-service in Sweden.

Petter Gottschalk is Professor in the Department of Leadership and Organization at the Norwegian School of Management in Norway. He teaches knowledge management and information systems. He received his MBA in Germany (Technical University of Berlin), MSc in the US (Dartmouth and MIT), and DBA in the UK (Henley Management College). He has been the CEO of ABB Datacables, Norwegian Computing Center, and Norwegian Information Technology Inc.

Kenneth L. Hacker (Ph.D., University of Oregon) is Professor of Communication Studies at New Mexico State University. He co-edited the book (with Jan van Dijk) Digital Democracy: Issues of Theory and Practice (Sage, 2000) and is currently editing (Jan van Dijk, co-editor) a second volume on digital democracy (Digital Democracy in a Network Society, Hampton Press).

Marijn Janssen is an Associate Professor within the Information and Communication Technology section and Director of the interdisciplinary SEPAM Master programme of the Faculty of Technology, Policy and Management at Delft University of Technology. He is also in charge of the “IT and business architecture” of the Toptech executive master. He has been a consultant for the Ministry of Justice and received a Ph.D. in information systems (2001). He serves on several editorial boards (including International Journal of E-Government Research, Government Information Quarterly and Information Systems Frontiers), has many research projects and is involved in the organization of a number of conferences. His research interests are in the field of e-government, design science, orchestration and shared services. He was ranked as one of the leading e-government researchers and published over 160 refereed publications. More information: www.tbm.tudelft.nl/marijn.
Murray E. Jennex is an associate professor at San Diego State University, editor in chief International Journal of Knowledge Management, co-editor in chief International Journal of Information Systems for Crisis Response and Management, editor in chief of Idea Group Publishing’s Knowledge Management book series, and president of the Foundation for Knowledge Management (LLC). Dr. Jennex specializes in knowledge management, system analysis and design, IS security, e-commerce, and organizational effectiveness. Dr. Jennex serves as the Knowledge Management Systems Track co-chair at the Hawaii International Conference on System Sciences. He is the author of over 100 journal articles, book chapters, and conference proceedings on knowledge management, end user computing, international information systems, organizational memory systems, e-commerce, security, and software outsourcing. He holds a B.A. in chemistry and physics from William Jewell College, an M.B.A. and an M.S. in software engineering from National University, an M.S. in telecommunications management and a Ph.D. in information systems from the Claremont Graduate University. Dr. Jennex is also a registered professional mechanical engineer in the state of California and a Certified Information Systems Security Professional (CISSP).

Janet Kaaya is a research scholar in the Department of Information Studies, Graduate School of Education and Information Studies, University California Los Angeles (UCLA). One of her primary research interests is using institutional theories to examine the adoption of ICT-related applications, focusing on e-government implementation – especially in developing countries. Other areas include studying national and international information equity issues; the influence of information and associated communications technologies (ICTs) on institutional or social change; language barriers and Internet access; and exploring and assessing web-based information resources for research and pedagogical uses. She received her PhD in information studies from UCLA and was until recently a CLIR postdoctoral fellow at Charles E. Young Research Library, UCLA. She previously worked as a field researcher and an information specialist in the national agricultural research system of Tanzania.

Muhammad Kamal is a Research Fellow at the Brunel Business School, Brunel University in the UK. He received his PhD from Brunel University in the area of Enterprise Application Integration (EAI) Adoption in the in the Local Government Authorities (LGAs), in addition, he holds two MSc’s – Distributed Computing Systems (Greenwich University, London) and Computer Sciences (Punjab Institute of Computer Science, Lahore, Pakistan). His current research interest includes investigating and evaluating factors influencing the decision making process for technology adoption in the local government domain, electronic service delivery and transformation in the public sector and integration of Health and Social Care services. He specialises in the use of data analysis methods such as Discrete Choice Analysis and Analytical Hierarchy Process. In his recent appointment, Dr. Kamal worked as a Post-Doctoral Research Assistant on a European funded research project (Ref: proposal n° 2006/ VP021/30137) namely – the REFOCUS (senioR Employees training on inFOrmation and CommUnication technologieS) Project. Prior to that, Dr. Kamal acted as a Business Analyst in a research project that focused on the integration of Customer Relationship Management (CRM) applications in the London Borough of Havering (co-funded by ORACLE UK). Currently, he is an active editorial review board member for International Journal of Electronic Government Research (IJEGR) and he has published in several leading journals and international conferences. Dr. Kamal is a member of the Association of Information Systems (AIS) and Information Systems Evaluation & Integration Network (ISeng) at Brunel Business School.
About the Contributors

Dionysis Kefallinos is a network engineer for the General Secretariat of Information Systems of Greece. He holds a Dipl.-Ing. degree in Electrical and Computer Engineering from the National Technical University of Athens, Department of Electrical and Computer Engineering and he is a doctoral candidate in the same university.

Bram Klievink is a researcher with the ICT group of the Faculty of Technology, Policy and Management at Delft University of Technology. He holds a MSc degree in political science as well as a degree in business information systems. He is currently working on a PhD research, focused on coordination mechanisms for public-private service networks. For this research, he developed a role-play game to investigate and facilitate coordination arrangements in multi-actor service delivery. Furthermore, he participated in research projects on integrated, demand-driven e-government and on multi-channel management in government. He is also a board member of the Dutch Alliance for Vital Governance, a strategic research alliance for collaboration and knowledge transfer between government organizations and research institutes in the Netherlands.

Maria A. Lambrou is an assistant professor at the University of the Aegean, Business School, Department of Shipping, Trade and Transport. She received her Ph.D. from the National Technical University of Athens (NTUA), Department of Electrical and Computer Engineering – Computer Science Division, in the area of Service Engineering (1998) and she holds an M.A. in Management studies and Industrial Relations from Brunel University (1993).

Peter Loos is director of the Institute for Information Systems (IWi) at the German Research Center for Artificial Intelligence (DFKI) and head of the chair for Business Administration and Information Systems at Saarland University. His research activities include business process management, information modelling, enterprise systems, software development as well as implementation of information systems. He graduated in business administration and information systems at Saarland University and wrote his PhD thesis on the issue of data modelling in manufacturing systems. During his earlier career Prof. Loos had been chair of information systems & management at University of Mainz (2002-2005), chair of information systems & management at Chemnitz University of Technology (1998-2002) as well as deputy chair at University of Muenster. Furthermore, he had worked for 6 years as manager of the software development department at the software and consulting company IDS Scheer. He has written several books, contributed to 30 books and published more than 100 papers in journals and proceedings.
W.H. Loo is a Lecturer in Stanford College, Melaka, Malaysia. She is also a Master of Philosophy student in the Faculty of Business and Law, Multimedia University, Malaysia. She has a first class honour Bachelor of Business Administration degree from Multimedia University.

Fabio Perez Marzullo is currently a Doctorate student in the Database Laboratory of the Federal University of Rio de Janeiro’s Department of Computer Science and Engineering. He received his M.Sc. degree in Computer Science and Engineering from UFRJ in 2006. He has been a member of research staff in the Brazilian Ministry of Defense, Brazilian Navy and COPPE/UFRJ since 2007. Author of the book: SOA na Prática: inovando seu negócio por meio de soluções orientadas a serviços, and his research interests are Services Oriented Architectures, Model-Driven and Domain-Driven Developments, Database, Project Management, Component Based Development, Component Architecture, and Frameworks Design, Components for software development automation and IT Governance.

Shana M. Mason (M.A., New Mexico State University) is a Communication Studies instructor at the Dona Ana Branch of New Mexico State University. Her work has appeared in IT & Society and Ethics and Information Technology. Her research interests include CMC and political participation.

Thomas Matheis studied at Saarland University and holds a Diploma in Computer Science (Dipl.-Inform.). Since 2005 he works as researcher and PhD student at the Institute for Information Systems (IWi) at the German Research Center for Artificial Intelligence (DFKI). He is involved in various national and international research and consulting projects at the DFKI (e.g. R4eGov IP). His main research interests are collaborative business process management, collaborative performance measurement, business integration and eGovernment. In this area he published various articles in journals and proceedings. Besides his project work he has been a lecturer at the University of Leipzig in the field of business process modelling and information systems.

Eric L. Morgan (Ph.D. University of Massachusetts) is an Associate Professor of Communication Studies at New Mexico State University. His research interests include cultural/ intercultural, international, and environmental communication.

Borworn Papasratorn is an associate professor of information technology at King Mongkut's University of Technology Thonburi (KMUTT), Thailand. He is currently a Dean of the School of Information Technology at KMUTT. Professionally he is executive director of Thailand Telecommunication Research and Industrial Development Institute. He is a member of the IEEE Computer and Communication Society. He received his D.Eng. (Electrical Engineering) from Chulalongkorn University. His research interests include e-learning, computer graphics, performance analysis, and networking.

Shantanu Pai works as a Human Factors Specialist with Engility Corporation and has been supporting human factors research endeavors at the Federal Aviation Administration Research Development and Human Factors lab for the past seven years. He has a Masters degree in human factors from the State University of New York at Buffalo and is currently a doctoral candidate in Drexel University's College of Information Science and Technology.
Christopher G. Reddick is an Associate Professor and Chair of the Department of Public Administration at the University of Texas at San Antonio, USA. Dr. Reddick’s research and teaching interests is in e-government. Some of his publications can be found in Government Information Quarterly, Electronic Government, and the International Journal of Electronic Government Research. Dr. Reddick recently edited the book entitled Handbook of Research on Strategies for Local E-Government Adoption and Implementation: Comparative Studies.

Ludwig Christian Schaupp is an assistant professor at West Virginia University. His primary research interests include website success metrics, e-government adoption and diffusion, and REA. He has published in several top-tier journals including Communications of the ACM, Journal of Computer Information Systems, and Information Systems Frontiers. He has also presented at several international conferences including Americas Conference on Information Systems (AMCIS) as well as the Hawaii International Conference on Systems Sciences.

Roy H. Segovia was born and raised in Dallas, Texas. He received his BSEE from Rice University in Houston, Texas. He lived more than 20 years in the southern California region, mostly in San Diego where he worked for a number of technology companies. He also became involved in the Latino communities of the border region of San Diego and Tijuana. In 2002 he started in the MBA program at San Diego State University with a focus on entrepreneurship and bilingual communications on the world wide web. He completed the MBA program and his research on “paralingual” websites for government in August of 2006. He is currently living in the Silicon Valley area of California and is working on various technology projects, including further use of paralingual pages for government agencies.

Daniel M. Schmidt studied informatics with focus on business informatics and graduated at Koblenz University. He started his academic career at the Research Group Modelling and Simulation of Prof. Dr. Klaus G. Troitzsch at Koblenz. His primary working field was research on supply chain management in the automotive industry. Since 2006, Daniel M. Schmidt is member of Prof. Dr. Maria A. Wimmer’s Research Group eGovernment at Koblenz University. He does research on the challenges of interoperability in public administration with scope placed on cross-organizational design and implementation of business processes, business process patterns and document engineering for information exchange. Furthermore, he works on application of Service Oriented Architectures and semantic web technologies to ensure cross-organisational and cross-border interoperability in eGovernment. He is engaged in EC-co-funded research and development projects, in German national eGovernment projects, participating in CEN BII, member of IEEE and the eGov expert group of GI e.V.

Katarina Giritli Nygren is a senior lecturer in Sociology, Department of Social sciences, Mid Sweden University, Sweden. Her research interests are connected by a main theoretical interest on how to
understand the relation between social reproduction and social change from a critical perspective. Her doctoral thesis focused on the organizational consequences and social meaning of e-government in a local government setting. The aim was to study e-government as an administrative reform, from the global creation of a superstandard to the local practices of everyday work. She has also written about the co-construction of ICT, gender and skills. In her most recent research project she focuses on place as a site where processes of social reproduction and social change take place in terms of inclusion and exclusion concerning gender, ethnicity and class.

Eva Sørensen, PhD, professor in public administration and democracy at the Department of Society and Globalisation, Roskilde University, vice-director of the Centre for Democratic networks governance, and director of a large research project on collaborative innovation in the public sector. She has published extensively on new forms of governance and their impact on democracy and effective problem solving. Recent publications are: Sørensen, E. & P. Triantafillou (2009) The Politics of Self-governance. London: Ashgate. and Sørensen, E. & J. Torfing, (2009) ‘Enhancing Effective and Democratic Network Governance through Metagovernance’ Public Administration, 87(2): 234-258.

Efstathios D. Sykas is a professor in Communications Engineering, at the School of Electrical and Computer Engineering of the National Technical University of Athens. He received Dipl.-Ing. and Dr.-Ing. degrees in Electrical Engineering, both from the National Technical University of Athens.

Sivaporn Wangpipatwong received her Ph.D. in information technology from King Mongkut’s University of Technology Thonburi, Thailand. She is a former chairperson of the Computer Science Department, School of Science and Technology, Bangkok University, Thailand. She is now working as an assistant professor at the School of Science and Technology, Bangkok University. Her current research interests include e-government, e-learning, and the diffusion of information technology in developing countries.

Maria A. Wimmer is Professor for eGovernment at the University of Koblenz. She graduated in computer Sciences (Linz, AT), and first worked in the area of designing safety critical systems for train traffic control in Italy. Her doctoral thesis suggests holistic design methods for this area. In 1999, she returned to the University of Linz and in 2004-2005, Maria A. Wimmer was with the Federal Chancellery in Austria. Since 2005 Maria A. Wimmer is with Koblenz University. She researches and teaches ICT in the public sector since about ten years, thereby specifically addressing among others: strategic modernization issues, process management, interoperability, systems architectures, ontology and semantic web usage, eParticipation. She is engaged in a number of EC-co-funded research and development projects, is co-organizer of scientific conferences, chair of IFIP WG 8.5, member of ACM, IEEE, and published more than 140 articles in eGovernment.

Paul H.P. Yeow is a Senior Lecturer in the Faculty of Business and Law, Multimedia University, Malaysia. He graduated from the National University of Singapore, Multimedia University and University of Science Malaysia with Bachelor of Computer Science, Master of Engineering, and Doctor of Philosophy in Management. Over the past 10 years, he has been giving lectures on Management Information Systems and Electronic Commerce to undergraduate and postgraduate students. He has published about 50 international refereed journal and conference papers in areas of Information Sys-
About the Contributors

tems, Usability, Human Factors, Quality and Knowledge Management. He is the programme leader of Service Embodied Technology and Application research program. He is a member of the editorial board in Journal of Urban Technology and International Journal of Applied Decision Science. Previously, he was the Head of Information Technology in United Industry Chemicals, Singapore and the Quality and Training Manager of Flextronics Technology Private Ltd., Malaysia.

Jörg Ziemann has studied at the University of Göttingen, the University of California (Irvine, USA) and the University of Hamburg, were he received a Diploma in Business Computer Science (Dipl.-Wirt.-Inf.). In 2004 he joined the Institute for Information Systems (IWi) at the German Research Center for Artificial Intelligence (DFKI) where he worked on various EU projects in the area of cross-organizational business processes, including Interop NOE, ATHENA IP and R4eGov IP. His research interests comprise the fields of collaborative business process management, enterprise-model driven development of service-oriented architectures and eGovernment. In this area he published various articles in journals and proceedings. Currently, Jörg is finalizing his PhD-thesis.
